Portfolio Information

Inception date: **01/30/98**
 Total Net Assets: **\$563.7 million**
 Benchmark: **Russell MidCap Growth Index**

Investment Objective

Seeks long-term growth of capital by investing primarily in a diversified portfolio of companies with medium market capitalizations.

Investment Strategy

- Focuses mainly on securities of mid-sized U.S. companies which have market capitalizations similar to those companies included in widely known mid cap indices such as the Russell Midcap Growth Index or the S&P MidCap 400/Citigroup Growth Index.
- Employs a bottom-up stock selection process based on fundamental, quantitative and technical analysis.
- Gauges sector, industry and company weightings relative to a proprietary benchmark of the Portfolio's Lipper peers, enabling the Portfolio to control risk as it seeks to outperform its peer group.

Investment Performance - Average Annual Total Return*

	3 Mo.	YTD	1 Yr.	3 Yr.	5 Yr.	10 Yr.	Inception
Without Charges**	(13.57)%	(13.57)%	(1.35)%	7.71%	12.88%	5.72%	N/A
With Charges***	(17.89)%	(17.89)%	(6.28)%	5.88%	11.73%	5.18%	N/A
Lipper Mid-Cap Growth Median	(12.87)%	(12.87)%	(2.27)%	7.58%	13.89%	5.71%	—
Russell MidCap Growth Index	(10.95)%	(10.95)%	(4.55)%	7.77%	15.20%	5.15%	—

* All data represents past performance and should not be viewed as an indication of future results. Total investment returns and principal value of an investment will fluctuate and your units when redeemed may be worth more or less than your original cost. Current performance may be lower or higher than the performance data quoted. Market volatility can significantly affect short-term performance, and more recent returns may be different from those shown. Call 800-THRIVENT or visit www.thrivent.com for most recent month end performance results.

Periods less than one year are not annualized. Subaccount total return calculations assume an initial investment of \$10,000. At various times, the Portfolio's adviser may have reimbursed Portfolio expenses. Had the adviser not done so, the Portfolio's total returns would have been lower. This reimbursement of expenses may be discontinued at any time.

Average annual total returns are calculated for the contract subaccount of the underlying Thrivent Financial Variable Universal Life underlying portfolio. The portfolio was in existence prior to the subaccount's inception on 12/31/03. Portfolio inception date was 01/30/98. All returns shown reflect the deduction of the applicable investment advisory fee and the current maximum mortality and expense charge.

**Rates labeled "Without Charges" do not reflect the premium expense charge of 5%, the basic monthly charge, decrease charges, cost of insurance charges or other charges deducted at the individual contract level. If these charges had been deducted, the performance quoted would have been significantly lower.

***Rates labeled "With Charges" do reflect the premium charge of 5%, but do not reflect the basic monthly charge, decrease charges, cost of insurance charges or other charges deducted at the individual contract level. If these charges had been deducted, the performance quoted would have been significantly lower.

Since charges and fees vary from individual to individual at the contract level based on several factors, including the amount of the death benefit, the contract value, the insured's attained age, sex and risk classification, it is not possible to include them in this report. You are urged to contact your registered representative for a personalized illustration to determine what additional charges and fees you may incur. You can also review the hypothetical illustrations in the prospectus to see the effects of fees and charges on performance.

Lipper figures do not include charges or fees. If included, returns would have been lower.

The Russell MidCap Growth Index measures the performance of mid cap growth stocks. An index is unmanaged, and investments cannot be made directly into an index.
