

Portfolio Overview

Investment Management Style

Portfolio Information

Inception date: **03/01/01**
 Total Net Assets: **\$402.8 million**
 Benchmark: **Russell 2000 Index**

Investment Objective

Seeks long-term capital growth by investing primarily in small company common stocks and securities convertible into small company common stocks.

Investment Strategy

- Invests in stocks of smaller companies with market capitalizations similar to those included in the S&P 600 Index and the Russell 2000 Index.
- Invests in small companies that have good growth prospects, capable management and are financially sound.

Investment Performance - Average Annual Total Return*

	3 Mo.	YTD	1 Yr.	3 Yr.	5 Yr.	10 Yr.	Inception
Without Charges**	3.64%	(8.81)%	(11.20)%	4.55%	11.28%	N/A	7.23%
With Charges***	(1.54)%	(13.37)%	(15.64)%	2.77%	10.14%	N/A	6.48%
Lipper Small-Cap Core Median	0.49%	(9.15)%	(16.59)%	3.44%	9.92%	N/A	—
Russell 2000 Index	0.58%	(9.37)%	(16.19)%	3.79%	10.29%	N/A	—

* All data represents past performance and should not be viewed as an indication of future results. Total investment returns and principal value of an investment will fluctuate and your units when redeemed may be worth more or less than your original cost. Current performance may be lower or higher than the performance data quoted. Market volatility can significantly affect short-term performance, and more recent returns may be different from those shown. Call 800-THRIVENT or visit www.thrivent.com for most recent month end performance results.

Periods less than one year are not annualized. Subaccount total return calculations assume an initial investment of \$10,000. At various times, the Portfolio's adviser may have reimbursed Portfolio expenses. Had the adviser not done so, the Portfolio's total returns would have been lower. This reimbursement of expenses may be discontinued at any time.

Average annual total returns are calculated for the contract subaccount of the underlying Thrivent Financial Variable Universal Life underlying portfolio. The portfolio was in existence prior to the subaccount's inception on 12/31/03. Portfolio inception date was 03/01/01. All returns shown reflect the deduction of the applicable investment advisory fee and the current maximum mortality and expense charge.

**Rates labeled "Without Charges" do not reflect the premium expense charge of 5%, the basic monthly charge, decrease charges, cost of insurance charges or other charges deducted at the individual contract level. If these charges had been deducted, the performance quoted would have been significantly lower.

***Rates labeled "With Charges" do reflect the premium charge of 5%, but do not reflect the basic monthly charge, decrease charges, cost of insurance charges or other charges deducted at the individual contract level. If these charges had been deducted, the performance quoted would have been significantly lower.

Since charges and fees vary from individual to individual at the contract level based on several factors, including the amount of the death benefit, the contract value, the insured's attained age, sex and risk classification, it is not possible to include them in this report. You are urged to contact your registered representative for a personalized illustration to determine what additional charges and fees you may incur. You can also review the hypothetical illustrations in the prospectus to see the effects of fees and charges on performance.

Lipper figures do not include charges or fees. If included, returns would have been lower.

The Russell 2000 Index measures the performance of small cap stocks. An index is unmanaged, and investments cannot be made directly into an index.

Portfolio Management

David Maule

Began managing this fund: 2007
Investment experience: 11 years

Risks: The Portfolio is exposed to the risks of investing in equity securities of smaller companies. Small company stock prices are generally more volatile than large company stock prices. These and other risks are described in the prospectus.
