

MAKE A DIFFERENCE. SERVE FAMILIES. BUILD COMMUNITIES.

Did you know that despite the beautiful beaches, mountains and people, many Dominicans live in houses made of tejamanil (a mixture of soil and manure), wood or even empty oil drums? The dirt floors in many of these houses produce constant dust, inviting insects and rodents inside and posing a health risk.

Bring hope to families

Your work in the Dominican Republic means that you'll be helping families that are struggling to meet basic needs by helping them create a safe and decent place to live. Join a Thrivent Builds Worldwide trip to the Dominican Republic, and:

- Change your life and the lives of others as you put your faith into action.
- Build deep relationships with your teammates and partner family as you build homes side by side.
- Know that your action makes a profound difference in a way that's heartening and authentic.

Opening eyes to the world

Thrivent Builds Worldwide is a powerful way for members and other volunteers to express their faith. It's an opportunity to build simple homes in partnership with Habitat for Humanity Dominican Republic and the partner families—and to see the world with a different perspective.

Opening the way—your trip is simplified

The Thrivent Builds program makes participation as easy as possible. Your needs will be taken care of once you arrive in the Dominican Republic. Except for your airfare, the following costs are included:

- Transportation to and from the building site.
- Lodging in secure and clean hotels.
- Three meals a day, snacks and pure drinking water.
- Engaging and informative cross-cultural activities.
- Meaningful work at well-organized and supervised build sites.

Take this opportunity to do good

You're invited to participate in a Thrivent Builds Worldwide trip to the Dominican Republic!
