THRIVENT VARIABLE UNIVERSAL LIFE INSURANCE

Prospectuses
April 30, 2020
Thrivent Variable Life Account I
Thrivent Series Fund, Inc.
The Board of Directors of Thrivent Series Fund, Inc. has approved the merger of Thrivent Partner Growth Stock Portfolio (the “Target Portfolio”) into Thrivent Large Cap Growth Portfolio. The merger is subject to approval by contractholders of the Target Portfolio at a special meeting of contractholders to be held on or about August 24, 2020. The merger, if approved by contractholders, will occur on or about August 31, 2020. The Target Portfolio and its corresponding subaccount will be closed as new investment selections at the end of the day on July 17, 2020. If you already invest in a subaccount corresponding to the Target Portfolio, you can continue to invest in the subaccount until the merger has been completed.

The date of this Supplement is June 24, 2020.

Please include this Supplement with your Prospectus.

Thrivent Partner Growth Stock Portfolio

The Board of Directors of Thrivent Series Fund, Inc. has approved the merger of Thrivent Partner Growth Stock Portfolio (the “Target Portfolio”) into Thrivent Large Cap Growth Portfolio. The merger is subject to approval by contractholders of the Target Portfolio at a special meeting of contractholders to be held on or about August 24, 2020. The merger, if approved by contractholders, will occur on or about August 31, 2020. The Target Portfolio and its corresponding subaccount will be closed as new investment selections at the end of the day on July 17, 2020. If you already invest in a subaccount corresponding to the Target Portfolio, you can continue to invest in the subaccount until the merger has been completed.

The date of this Supplement is June 24, 2020.
1. Xiang Liu, PhD and Jeff Lee joined Erin Xie, PhD as portfolio co-managers of Thrivent Partner Healthcare Portfolio in June 2020. The following replaces similar information for Thrivent Partner Healthcare Portfolio found in the “Summary Section” under the heading “Portfolio Manager(s)” and in the “Management of the Portfolios” section under the heading “Portfolio Management”:

   **Erin Xie, PhD, Xiang Liu, PhD, and Jeff Lee** are jointly and primarily responsible for the day-to-day management of the Portfolio. Dr. Xie, Managing Director of BlackRock, Inc. ("BlackRock"), has served as a portfolio manager of the Portfolio since September 2017. Dr. Xie has been a Managing Director of BlackRock since 2006 and joined BlackRock as a Director in 2005. Prior to joining BlackRock, Dr. Xie was a Senior Vice President of State Street Research & Management from 2001 to 2005. Dr. Liu, Director of BlackRock, has served as a portfolio manager of the Portfolio since June 2020. Dr. Liu has been a Director of Black Rock since 2016 and joined BlackRock in 2008 as a Vice President in 2005. Mr. Lee, Vice President of BlackRock, has served as a portfolio manager of the Portfolio since June 2020. Mr. Lee has been a Vice President of BlackRock since joining BlackRock in 2011. Prior to joining BlackRock, Mr. Lee was an analyst of Duquesne Capital Management from 2008 to 2010.

2. Thrivent Partner Healthcare Portfolio currently is considered to be diversified within the meaning of the 1940 Act.

   Accordingly, the third sentence under “Principal Strategies” for Thrivent Partner Healthcare Portfolio in the “Summary Section” is deleted and replaced with the following: “The Portfolio invests primarily in equity securities of both U.S. and non-U.S. companies (including American Depositary Receipts and issuers in emerging markets).”

   Non-Diversified Risk is deleted from the “Principal Risks” for Thrivent Partner Healthcare Portfolio in the “Summary Section.”

   The date of this Supplement is July 24, 2020.

   Please include this Supplement with your Prospectus or Summary Prospectus.

This prospectus describes a flexible premium individual variable life insurance contract (the “Contract”) previously offered by Thrivent Financial for Lutherans (“Thrivent”, “we”, “us” or “our”). Even though we no longer issue new Contracts on this form as described in this prospectus, the Contract Owner (“you”) may continue to allocate Net Premiums among investment alternatives with different investment objectives and make changes including increases in coverage pursuant to the terms of the Contract.

We allocate premiums based on your designation to one or more Subaccounts of Thrivent Variable Life Account I (the “Variable Account”) or theFixed Account. The assets of each Subaccount will be invested solely in a corresponding Portfolio of Thrivent Series Fund, Inc. (“Fund”), which is an open-end management investment company (commonly known as a “mutual fund”). We provide the overall investment management for each Portfolio of the Fund, although some of the Portfolios are managed by an investment subadviser. Summary prospectuses for the Fund are attached to this prospectus and describe the investment objectives and attendant risks of the following Portfolios of the Fund:

- Thrivent Aggressive Allocation Portfolio
- Thrivent All Cap Portfolio
- Thrivent Balanced Income Plus Portfolio
- Thrivent Diversified Income Plus Portfolio
- Thrivent ESG Index Portfolio
- Thrivent Global Stock Portfolio
- Thrivent Government Bond Portfolio
- Thrivent High Yield Portfolio
- Thrivent Income Portfolio
- Thrivent International Allocation Portfolio
  (subadvised by Goldman Sachs Asset Management, L.P.)

- Thrivent Small Cap Index Portfolio
- Thrivent Small Cap Stock Portfolio

An investment in the Contract is not a deposit of a bank or financial institution and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. An investment in the Contract involves investment risk including the possible loss of principal, tax risks, and Contract lapse.

The Securities and Exchange Commission has not approved or disapproved these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

This prospectus sets forth concisely the information about the Contract that a prospective investor ought to know before investing, and should be read and kept for future reference. We have not authorized anyone to provide you with information that is different.

Beginning on Jan. 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the shareholder reports for portfolios available under your Contract will no longer be sent by mail, unless you specifically request paper copies of the reports from Thrivent or from your financial professional. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive reports electronically, you will not be affected by this change and need not take any action. You may elect to receive shareholder reports and other communications from Thrivent electronically by calling our Service Center or by signing up for electronic delivery on our website at thrivent.com/gopaperless.
You may elect to receive all future reports in paper free of charge. You can inform Thrivent that you wish to continue receiving paper copies of your shareholder reports by calling our Service Center at (800) 847-4836. Your election to receive reports in paper will apply to all portfolio companies available under your Contract.

The date of this prospectus is April 30, 2020.

This summary describes the Contract’s important benefits and risks. The sections in the prospectus following this summary discuss the Contract’s benefits and other provisions in more detail. For your convenience, we have provided Definitions at the end of this prospectus that define certain words and phrases used in this prospectus.

Contract Benefits

The Contract is a flexible premium individual variable life insurance contract. The Contract is built around its Accumulated Value. Accumulated Value changes every business day based upon the investment experience of the Portfolios underlying the Subaccounts or the amount of interest credited to the Fixed Account. Premiums increase Accumulated Value. Charges and cash you withdraw from the Contract decrease Accumulated Value. Your choice of the timing and amount of premiums you pay, investment options, and your use of partial surrender and loan privileges will influence the Contract’s performance. The choices you make will directly impact how long the Contract remains in effect, its tax status and the amount of cash available for use.

Death Benefit

At the time of purchase, you must select between two Death Benefit Options: the Level Death Benefit and the Variable Death Benefit.

Option 1 (Level Death Benefit Option). Under this option and before age 100, the death benefit is the greater of the Face Amount or the death benefit factor multiplied by Accumulated Value. The death benefit factor depends on the Insured’s Attained Age. The death benefit for this option generally remains level. On or after age 100, the death benefit equals the Accumulated Value.

Option 2 (Variable Death Benefit Option). Under this option and before age 100, the death benefit is the greater of the Face Amount plus Accumulated Value, or the death benefit factor multiplied by Accumulated Value. The death benefit factor depends on the Insured’s Attained Age. The death benefit for this option will vary over time. On or after age 100, the death benefit equals the Accumulated Value.

Death Proceeds

We pay Death Proceeds to the Beneficiary upon receipt at our Service Center of due proof of death of the Insured. The Death Proceeds will equal the Death Benefit and any insurance on the life of the Insured provided by Additional Benefits less any Debt and the amount, if any, needed to cover monthly deductions through the month of death.

Death Benefit Guarantee

Two Death Benefit Guarantees are generally available at issue: a basic and an enhanced Death Benefit Guarantee. The Death Benefit Guarantee ensures that your Contract will remain in effect, even if the Cash Surrender Value is insufficient to pay the current monthly deductions, if the Death Benefit Guarantee requirements are met. (In some states, this feature is referred to as a “no-lapse guarantee.”) The basic Death Benefit Guarantee is in effect for at least five Contract Years and until the Insured reaches age 70 or 15 years from the Date of Issue, whichever is earlier, provided that you make timely payment of the required minimum premium amounts. The enhanced Death Benefit Guarantee is available for Contracts issued before age 70 and is in effect until the Insured reaches age 75. The enhanced Death Benefit Guarantee provides longer protection than the basic guarantee provided you make timely payment of the required minimum premium amount.

Access to Accumulated Value

Transfers. You may transfer Accumulated Value among the Subaccounts and the Fixed Account. You will not be charged for the first 12 transfers in a Contract Year. We will charge $25 for each additional transfer during a Contract Year. The minimum amount that may be transferred from a Subaccount or Fixed Account is $50, or if less, the total value in the Subaccount or the Fixed Account. There is no minimum amount that can be received by a Subaccount or Fixed Account. Transfers into the DCA Fixed Account are not permitted.

Automatic Asset Rebalancing Program. The Automatic Asset Rebalancing program transfers your Contract’s Accumulated Value among Subaccounts (this excludes the Fixed Account) on a regular basis according to your instructions.
**Dollar Cost Averaging Program.** Dollar Cost Averaging allows you to make regular transfers of predetermined amounts from either your Money Market Subaccount or the DCA Fixed Account to any or all of the other Subaccounts. The Dollar Cost Averaging amount from the Money Market Subaccount must be at least $50. The DCA Fixed Account is available as the source account for Dollar Cost Averaging for the initial 12 month period of your Contract if you elected it at the time you applied for the Contract. You may choose to use the Money Market Subaccount as the source account at any time and for any length of time.

**Loans.** You may borrow up to 90% (in most states) of the Accumulated Value of your Contract less any applicable decrease charge. Currently, we charge you an annual interest rate of 5% on the loan balance. The maximum annual interest rate is 5%. After the 10th Contract Year, you may borrow a portion of your Accumulated Value at an annual rate of 3% (preferred loan). For amounts that are left as collateral in the Loan Account, we pay an annual rate of 3%. Loans may have tax consequences. See **Federal Tax Matters.** In your Contract, the discussion of the operation of the loan feature is described as a Loan Account. Loans are not available until the Contract has been in force for 60 days from the Date of Issue.

**Partial Surrenders.** You may make a request to withdraw part of your Accumulated Value by giving us Notice. During the first ten Contract Years, a partial surrender charge of not more than $25 will apply to each surrender in excess of one in a Contract Year. After the tenth Contract Year, no partial surrender charge will apply. Decrease charges may apply if the partial surrender results in a decrease in Face Amount. Partial surrenders may have tax consequences. See **Federal Tax Matters.**

**Surrenders.** At any time while the Contract is in force and the Insured is living, you may surrender this Contract by giving us Notice. A surrender may result in a decrease charge depending how long your Contract has been in force. Surrenders may have tax consequences. See **Federal Tax Matters.**

**Premiums**

**Flexibility of Premiums.** After you pay the initial premium, you may pay subsequent premiums at any time and in any amount, subject to some restrictions. While there are no scheduled premium due dates, you may schedule planned periodic premiums and then you will receive billing statements for the amount you select. You may elect to receive billing statements quarterly, semi-annually or annually. In most cases, you may make changes in the frequency and payment amounts at any time by giving adequate Notice to our Service Center.

**Electronic Payment Program.** Under this program, you may make premium payments (or loan repayments) to your Contract on a regularly scheduled basis by having money automatically withdrawn from your checking or savings account, or other acceptable payment source, rather than being billed. To set up the electronic payment program, you may complete the applicable section on the application or, after the time of application, by giving us Notice.

**The Contract**

**Ownership Rights.** While the Insured is living and the Contract is in force, you, as the Owner of the Contract, may exercise all of the rights and options described in the Contract, subject to the terms of any assignment of the Contract. These rights include selecting and changing the Beneficiary, naming a successor Owner, changing the Face Amount of the Contract, and assigning the Contract. However, if the Issue Age was less than 16 and an Applicant Controller applied for this Contract, then you are the Owner but may not exercise ownership rights until control is transferred, only the Applicant Controller may exercise ownership rights.

Thrivent does not allow assignment of variable life insurance Contracts to life settlement or viatical companies.

**Variable Account.** The Variable Account is an investment account separate from the Fixed Account sometimes known as a separate account. You may direct the money in your Contract to any of the Subaccounts of the Variable Account.
Each Subaccount invests in one of the corresponding Portfolios listed on the first page of this prospectus. Amounts in the Variable Account will vary according to the investment performance of the Portfolios in which the Subaccounts invest. There is no guaranteed minimum Subaccount Accumulated Value.

**Fixed Account.** You may place money in the Fixed Account where it earns at least 3% annual interest. We may declare higher rates of interest, but are not obligated to do so. The Fixed Account is part of our General Account.

**DCA Fixed Account.** If you elect this option in the application, we transfer amounts from the DCA Fixed Account to Subaccounts according to your allocation instructions for a period of 12 months from the time the DCA Fixed Account is established. Dollars in the DCA Fixed Account earn at least 3% annual rate of return for the 12 months the Dollar Cost Averaging program is in place. The interest rate we pay is determined at the time you set up the DCA Fixed Account.

**Loan Account.** The Loan Account is the amount securing any loan you make. Amounts transferred to the Loan Account are invested with our General Account assets and kept separate from the other amounts in your Contract. The excess of amounts charged to the loan over amounts credited to the amount held as collateral for the loan is transferred to the Loan Account.

Accumulated Value. Accumulated Value is the sum of your amounts in the Subaccounts, the DCA Fixed Account, the Fixed Account and the Loan Account. Accumulated Value varies from day to day, depending on the investment performance of the Subaccounts you select, interest we credit to the Fixed Account, charges we deduct, and any other transactions (e.g., transfers, partial surrenders, and loans).

**Settlement Options.** There are several ways of receiving proceeds under the Contract other than in a lump sum. Proceeds distributed according to a settlement option do not vary with the investment experience of the Variable Account. The minimum amount you may apply to a settlement option is $2,000.

**Additional Benefits and Riders**

We offer several optional insurance benefits and riders that provide additional benefits under the Contract. There is a charge associated with most of these insurance benefits and riders. Your financial professional can help you determine whether any of these benefits and riders are suitable for you.

**Contract Risks**

**Investment Risk**

The Contract is not suitable as a short-term investment vehicle. If you invest your Accumulated Value in one or more Subaccounts, then you will be subject to the risk that investment performance of the Subaccounts will be unfavorable and that the Accumulated Value will decrease. The assets in each Subaccount are invested in a corresponding Portfolio of the Fund. A comprehensive discussion of the risks of each Portfolio may be found in the Fund’s prospectus. You could lose everything you invest and your Contract could lapse without value, unless you pay additional premium. If you allocate premiums to the Fixed Account, then we credit your Accumulated Value in the Fixed Account with a declared rate of interest. You assume the risk that the rate may decrease, although the Fixed Account rate will never be lower than a guaranteed minimum annual effective rate of 3%.

**Health Crisis Risk**

The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Fund to process contract owner redemptions, and negatively impact Fund performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Fund.

**Risk of Lapse**

If your monthly deductions exceed your Cash Surrender Value and a Death Benefit Guarantee is not in effect, your Contract will enter a 61-day (in most states) grace period. We will notify you that your Contract will lapse.
(that is, terminate without value) if you do not send us a sufficient payment by a specified date. Your Contract generally will not lapse:

- if you make timely payment of the minimum premium amount required to keep your Death Benefit Guarantee in effect; or
- if during the grace period you make a payment sufficient to cover the next two monthly deductions plus any additional amount necessary to bring your Cash Surrender Value to a positive balance before the end of the grace period. Subject to certain conditions, you may reinstate a lapsed Contract.

**Tax Risks**

We anticipate that the Contract should be deemed a life insurance contract under federal tax law. However, the federal income tax requirements applicable to the Contract are complex and there is limited guidance and some uncertainty about the application of the federal tax law to the Contract. Assuming that the Contract qualifies as a life insurance contract for federal income tax purposes, you should not be deemed to be in constructive receipt of Accumulated Value until there is a distribution from the Contract. In addition, assuming the Contract continues to qualify as a life insurance contract beyond age 100, you should not be deemed to be in constructive receipt upon attainment of age 100.

However, the IRS could determine that a Contract Owner is in constructive receipt of the Accumulated Value if the Accumulated Value becomes equal to the Death Benefit, which can occur in some instances where the Insured is Attained Age 95 or older. In a case where there may be constructive receipt, an amount equal to the excess of the Accumulated Value over the investment in the contract could be includible in the Contract Owner’s income at that time. Under current tax law, Death Proceeds payable under the Contract generally would be excludable from the gross income of the Beneficiary. As a result, the Beneficiary generally should not have to pay U.S. federal income tax on the Death Proceeds. However, Death Proceeds may be subject to state and/or federal estate and/or inheritance tax.

Depending on the total amount of premiums you pay and the frequency of such payments, the Contract may be treated as a modified endowment contract (MEC) under federal tax laws. If a contract is treated as a MEC, then surrenders, partial surrenders, collateral assignments, loans and loan interest under the Contract will be taxable as ordinary income to the extent there are earnings in the Contract. In addition, a 10% penalty tax may be imposed on surrenders, partial surrenders, collateral assignments and loans (including loan interest) taken before you reach age 59½. If the Contract is not a MEC, distributions generally will be treated first as a return of your investment in the Contract and then as taxable income. Moreover, loans generally will not be treated as distributions. Finally, neither distributions nor loans from a Contract that is not a MEC are subject to the 10% penalty tax. See Federal Tax Matters.

If the Contract lapses and a loan is outstanding, you may be deemed to be in receipt of taxable income from the Contract. Additionally, if the Contract lapses and is later reinstated, the Contract may be treated as a MEC.

We make no guarantees regarding any tax treatment—federal, state or local—of any Contract or of any transaction involving a Contract.

You should consult a qualified tax advisor for assistance in all Contract-related tax matters.

**Surrender and Partial Surrender Risks**

A decrease charge applies during the first 10 Contract Years after the Date of Issue and for 10 years after each increase in Face Amount. Depending on the amount of premium paid, or any decreases in Face Amount, there may be little or no Cash Surrender Value available to you at the time you surrender your Contract. You should purchase the Contract only if you have the financial ability to keep it in force for a substantial period of time. You should not purchase the Contract if you intend to surrender all or part of the Accumulated Value in the near future. We designed the Contract to meet long-term financial goals. The Contract is not suitable as a short-term investment.

Even if you do not ask to surrender your Contract, decrease charges may play a role in determining whether your Contract will lapse (terminate without value). This is because decrease charges affect the Cash Surrender Value, a measure we use to determine whether your Contract will enter a grace period (and possibly lapse). See Risk of Lapse in this section.
A partial surrender will reduce Accumulated Value, death benefit and the amount of premiums considered paid to meet the Death Benefit Guarantee Premium requirement. If you select a Level Death Benefit Option, a partial surrender also will generally reduce the Face Amount of the Contract.

A surrender or partial surrender may have tax consequences. See Federal Tax Matters.

**Loan Risks**

A Contract loan, whether or not repaid, will affect Accumulated Value over time because we subtract the amount of the loan from the Subaccounts and/or Fixed Account as collateral. This loan collateral does not participate in the investment performance of the Subaccounts.

A loan will reduce your Cash Surrender Value, Death Proceeds and the amount of premiums considered to meet the Death Benefit Guarantee Premium requirement. If you surrender the Contract or allow it to lapse while a Contract loan is outstanding, the amount of the loan, to the extent it has not previously been taxed, will be considered part of the amount you receive and taxed accordingly. A loan may have tax consequences. See Federal Tax Matters.

**Portfolio Risks**

A comprehensive discussion of the risks of each Portfolio in which the Subaccounts invest may be found in the Fund’s summary prospectuses. Please refer to the summary prospectuses for the Fund for more information. There is no assurance that any Portfolio will achieve its stated investment objective.
The following tables describe the fees and expenses that you will pay when owning and surrendering the Contract. If the amount of a charge varies depending on the Insured’s individual characteristics (such as age, sex or risk class), the tables below show the minimum and maximum charges we assess under the Contract across the range of all possible individual characteristics, as well as the charges for a specified typical Insured. *These charges may not be representative of the charges you will actually pay under the Contract.*

Your Contract’s schedule pages will indicate the specific charges applicable to your Contract, and more detailed information concerning your charges is available on request from our Service Center at (800) 847-4836.

The first table describes the fees and expenses that you will pay at the time you pay premiums, surrender the Contract, or transfer cash value among the Subaccounts and the Fixed Account.

<sup>1</sup> We are not currently subject to premium taxes. However, we reserve the right to impose a charge for these taxes in the future if we have to pay them. If imposed, the premium tax charge would be between 0% and 5% of premium payments.

<sup>2</sup> The decrease charge remains level for the first five years of the Contract (or during the first five years following an increase in Face Amount), and then decreases each Contract Year to zero after year 10 (and to zero after the 10th year following an increase in Face Amount). Decrease charges depend on the Insured’s Issue Age, sex (in most states), amount of decrease in Face Amount, risk class and duration of the Contract. The decrease charges shown in the table may not be representative of the charges you will pay. For decreases in Face Amount during the first 10 Contract Years (or first 10 Contract Years following an increase in Face Amount), we calculate the amount of the decrease charge at the time of the decrease or surrender.

<sup>3</sup> The charge is applicable during the first 10 Contract Years for each partial surrender in excess of one per Contract Year. After the 10th Contract Year there will not be a partial surrender charge.

<sup>4</sup> We do not assess a transfer charge for the first twelve transfers made each Contract Year.

<sup>5</sup> This charge may vary by state and may be lower in some states.

<td>A tiered charge based on Subaccount Accumulated Value up to $25,000</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Administrative Charge</td>
<td>On Date of Issue and monthly thereafter.</td>
<td>$108 for adults&lt;sup&gt;10&lt;/sup&gt;</td>
</tr>
</tbody>
</table>

<sup>7</sup> Cost of insurance charges depend on the Insured's Issue Age, sex (in most states), amount at risk, Face Amount, risk class and duration of the Contract. The cost of insurance charges shown in the table are extremes and may not be representative of the charges you will pay.

<sup>8</sup> The amount at risk is equal to the death benefit divided by 1.0024663, then less the Accumulated Value on the date the charge is deducted.

<sup>9</sup> After the 10th Contract Year the maximum annual rate drops to 0.90% of the Subaccount Accumulated Value. For Subaccount Accumulated Values in excess of $25,000 up to $100,000, the maximum annual rate is 1.00% dropping to 0.80% after the 10th Contract Year. For Subaccount Accumulated Values in excess of $100,000, the maximum annual rate is 0.90% dropping to 0.70% after the 10th Contract Year. This is a tiered charge. Actual current charges may be less. For additional information regarding this charge please see Charges and Deductions in this prospectus.

<sup>10</sup> Charge shown is for adults (18+ years) and equates to $9.00 per month. For juvenile (0-17 years) Contracts, the charge is $90 per year, which equates to $7.50 per month.

11 You may borrow up to an amount such that the total loan amount does not exceed 90% of the Accumulated Value less decrease charges at the time of the loan request. Loans are not available until the expiration of the Free Look Period.

12 See the Loans section later in this prospectus for more information on preferred loans.

13 Charges for Additional Benefits may vary based on the Insured’s attained age or Issue Age, sex (in most states), risk class, Face Amount, amount at risk, or rider coverage amount. Charges based on age may increase as the Insured ages. The charges noted apply if the rider is included in your Contract and the Contract and/or rider has not otherwise terminated. The rider charges shown in the table may not be representative of the charges you will pay. Before you purchase a Contract, we will provide you personalized illustrations of your future benefits under the Contract, based upon the Insured’s age, sex, risk class, death benefit option chosen, Face Amount and riders requested.

14 This charge applies until the Insured’s Attained Age 70.

15 This charge applies until the 30th rider anniversary.

16 The amount of coverage includes $90,000 of base coverage and $135,000 of term rider coverage with a total of $225,000.

\(^{23}\) This charge applies until the Insured’s Attained Age 43.

\(^{24}\) This charge applies until the earlier of the Insured’s or spouse’s death or divorce, or the 30th rider anniversary.
The next table shows the minimum and maximum Total Annual Portfolio Operating Expenses charged by the Portfolios that you pay indirectly during the time you own the Contract. This table shows the range (minimum and maximum) of fees and expenses (including management fees and other expenses) charged by the Portfolios, expressed as an annual percentage of average daily net assets. The amounts shown reflect expenses before any applicable expense reimbursement or fee waiver.

<table>
<thead>
<tr>
<th>Total Annual Fund Operating Expenses</th>

</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>3.90%</td>
<td>0.24%</td>
</tr>
</tbody>
</table>

25 Thrivent has agreed to reimburse certain expenses associated with the Portfolios. After taking these contractual and voluntary arrangements into account, the actual range (minimum and maximum) of total operating expenses charged by the Portfolios was 0.24% to 1.25%. The voluntary reimbursements may be discontinued at any time. The amounts are based on the arithmetic average of expenses paid in the year ended December 31, 2019 for all of the available Portfolios, adjusted to reflect anticipated changes in fees and expenses. With respect to new portfolios, if any, amounts are based on estimates for the current fiscal year.

Each Subaccount of the Variable Account purchases shares of the corresponding Fund Portfolio at net asset value. The net asset value reflects the investment advisory fees and other expenses that are deducted from the assets of the portfolio. The advisory fees and other expenses are not fixed or specified under the terms of the Contract, and they may vary from year to year. More detail concerning the fees and expenses of the Portfolios is contained in the summary prospectuses for the Fund.

If a Portfolio is structured as a “fund of funds,” the Portfolio will indirectly bear its proportionate share of any fees and expenses (like investment advisory fees and operating expenses) of the investment companies in which it invests. However, Thrivent has contractually agreed, for as long as the current fee structure is in place, to waive an amount equal to any investment advisory fees indirectly incurred by an Asset Allocation Portfolio as a result of its investment in any other mutual fund for which the Adviser or an affiliate serves as investment adviser, other than Thrivent Cash Management Trust. For a list of the “fund of funds” portfolios available through the Contract, see the chart of portfolios available in The Variable Account and the Portfolios section of this prospectus.
Thrivent

Thrivent is a not-for-profit financial services membership organization of Christians helping our members achieve financial security and give back to their communities. We were organized in 1902 as a fraternal benefit society under Wisconsin law, and comply with Internal Revenue Code Section 501(c)(8). We are licensed to sell insurance in all states and the District of Columbia.

For more information, visit Thrivent.com.

Fixed Account and DCA Fixed Account

The Fixed Account is an investment option that provides a declared rate of interest. Unlike the Subaccounts of the Variable Account, the performance of the Fixed Account does not rely on the performance of the financial markets. We credit interest daily on amounts in the Fixed Account. Interest accrues on amounts allocated or transferred to the Fixed Account from the date of allocation or transfer.

The DCA Fixed Account is an account to which you direct an amount to be transferred on a monthly basis for 12 months. You establish the DCA Fixed Account at the time of application. Like the Fixed Account above, we credit interest daily on amounts in the DCA Fixed Account.

The Fixed Account and DCA Fixed Account are part of our General Account. The General Account consists of all assets owned by Thrivent Financial other than those segregated in any Variable Account. Subject to applicable law, we have sole discretion over the investment of the General Account assets. You do not share directly in the investment returns of those assets. Instead, each quarter, we will declare an effective annual interest rate for the Fixed Account. We guarantee that the effective interest rate will never be less than 3% annually. We may credit interest at a rate in excess of 3% per year. The interest rate credited on the DCA Fixed Account is determined at the time the DCA Fixed Account is established. The interest rate will be effective for 12 months and is guaranteed to be at least 3%.

The Fixed Account has not been registered under the Securities Act of 1933 (1933 Act), and the Fixed Account has not been registered as an investment company under the Investment Company Act of 1940 (1940 Act). Accordingly, neither the Fixed Account nor any interests therein are generally subject to the provisions of the 1933 or 1940 Acts. Disclosures regarding the Fixed Account, however, may be subject to certain generally applicable provisions of the federal securities laws relating to the accuracy and completeness of statements in prospectuses.

Maintenance of Solvency

If the Society’s reserves for any class of contracts, other than those portions of any contract that provide variable benefits based on the experience of a separate account, become impaired, the Board of Directors may require that benefit members pay the Society an equitable amount to eliminate the deficiency. If the amount is not paid within 60 days from the date we notify you of your share, it will be charged as a loan against this Contract with interest compounded at the rate of 5% per year. If you agree, an equivalent reduction in benefits can be chosen instead of the payment or loan against the Contract.
Variable Account

Thrivent Variable Life Account I is a segregated asset account established by the Board of Directors of Thrivent (then, Aid Association for Lutherans) on May 8, 1997, pursuant to the laws of the State of Wisconsin, and the first investment was made on March 31, 1998. The account meets the definition of “separate account” under the federal securities laws. The Variable Account is a unit investment trust, which is a type of investment company. It is registered with the Securities and Exchange Commission (SEC) under the 1940 Act. Such registration does not involve supervision by the SEC of the management or investment policies or practices of the Variable Account.

The Variable Account is divided into Subaccounts. Net Premiums flow through the Contract to either the Variable Account or the Fixed Account according to your instructions. From the Variable Account, the Net Premium flows to the Subaccounts in the amounts or percentages you allocate. In turn, the Subaccounts invest in shares of one of the corresponding Portfolios of the Fund at net asset value. We describe these Portfolios and their investment objectives later in this prospectus. Net Premiums are allocated to a Subaccount, and the resulting Accumulated Value will increase or decrease based on the investment experience of that Subaccount’s corresponding Portfolio and fees and charges under the Contract. We make no assurance that the Portfolios will meet their investment objectives. You bear all the investment risk for premiums allocated to the Subaccounts.

We own the assets of the Variable Account and keep them legally segregated from the assets of the General Account. The assets of the Variable Account shall, at the time during the year that adjustments in the reserves are made, have a value at least equal to the reserves and other Contract liabilities with respect to the Variable Account and, at all other times, shall have a value approximately equal to or in excess of such reserves and liabilities. The Variable Account will be fully funded at all times for purposes of the federal securities laws. The assets of the Variable Account shall not be chargeable with liabilities arising out of any other business we may conduct, except to the extent that the assets of the Variable Account exceed the reserves and other contract liabilities of the Variable Account arising under the contracts supported by the Variable Account. We are obligated to pay all amounts promised to you under the Contract.
Variable Investment Options and the Subaccounts

We select the Portfolios offered through the Contract based on several factors. We generally select the Portfolios to provide a range of investment options for the Contracts from conservative to more aggressive investment strategies.

You may allocate the Net Premiums paid under the Contract and transfer the Contract’s Accumulated Value to the Subaccounts of the Variable Account. We invest the assets of each Subaccount in a corresponding Portfolio of the Fund. Note that the italicized Portfolios below are “fund of funds” which are comprised of investments in other Portfolios within the Fund. The Subaccounts and the corresponding Portfolios are listed below.

Each Portfolio has its own investment objective, investment program, policies and restrictions. Although the investment objectives and policies of certain Portfolios may be similar to the investment objectives and policies of other Portfolios that we manage or sponsor or that an affiliate of ours may manage or sponsor, we do not represent or assure you that the investment results will be comparable to any other Portfolio, even where the investment adviser or manager is the same. Differences in portfolio size, actual investments held, fund expenses, and other factors all contribute to differences in Portfolio performance. For all of these reasons, you should expect investment results to differ. In particular, certain Portfolios available only through the Contract may have names similar to portfolios not available through the Contract. The performance of a Portfolio not available through the Contract does not indicate performance of the similarly named Portfolio available through the Contract.

Before selecting any Subaccount, you should carefully read the accompanying prospectus for the Fund attached to this prospectus and found in the back of this book. You should periodically consider your allocation among Subaccounts in light of current market conditions and your investment goals, risk tolerance and financial circumstances. The Fund prospectus provides more complete information about the Portfolios of the Fund in which the Subaccounts invest, including investment objectives and policies, risks, charges, and expenses.

Shares of the Fund are sold to other Portfolios of the Fund, to other insurance company separate accounts of ours, and to other insurance company separate accounts not affiliated with us. The Fund may, in the future, create new Portfolios. It is conceivable that in the future it may be disadvantageous for both variable annuity separate accounts and variable life insurance separate accounts to invest simultaneously in the Fund, although we do not foresee any such disadvantages to either variable annuity or variable life insurance contract owners. The Fund’s management intends to monitor events in order to identify any material conflicts between such Contract Owners and to determine what action, if any, should be taken in response. Material conflicts could result from, for example:

♦ Changes in state insurance laws;
♦ Changes in Federal income tax law;
♦ Changes in the investment management of the Fund; or
♦ Differences in voting instructions between those given by the Contract Owners from the different separate accounts.
The Variable Account and the Portfolios

If we believe the responses of the Fund to any of those events or conflicts insufficiently protects Contract Owners, we may take appropriate action on our own. Such action could include the sale of Fund shares by one or more of the separate accounts, which could have adverse consequences.

The Fund is a Minnesota corporation registered with the SEC under the 1940 Act as an open-end management investment company (commonly called a “mutual fund”). That registration does not involve supervision by the SEC of the management or investment practices or policies of the Fund.

The Variable Account will purchase and redeem shares from the Fund at net asset value. Shares will be redeemed to the extent necessary for us to collect charges under the Contracts, to make payments upon surrenders, to provide benefits under the Contracts, or to transfer assets from one Subaccount to another Subaccount or the Fixed Account as requested by Contract Owners. Any dividend or capital gain distribution received from a Portfolio of the Funds will be reinvested immediately at net asset value in shares of that Portfolio and retained as assets of the corresponding Subaccount.

Investment Management

Thrivent is investment adviser to the Fund. Thrivent is registered as an investment adviser under the Investment Advisers Act of 1940. Pursuant to the investment advisory agreement, Thrivent is responsible for determining which securities to purchase and sell, arranges the purchases and sales and helps formulate the investment program for the Portfolios. Thrivent implements the investment program for the Portfolios consistent with each Portfolio’s investment objectives, policies and restrictions. Thrivent and the Fund have engaged the following investment subadvisers:

<table>
<thead>
<tr>
<th>Subadviser</th>
<th>Portfolio Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>Goldman Sachs Asset Management, L.P.</td>
<td>Thrivent International Allocation Portfolio</td>
</tr>
<tr>
<td>Aberdeen Asset Managers Limited</td>
<td>Thrivent Partner Emerging Markets Equity Portfolio</td>
</tr>
<tr>
<td>T. Rowe Price Associates, Inc.</td>
<td>Thrivent Partner Growth Stock Portfolio</td>
</tr>
<tr>
<td>BlackRock Investment Management, LLC</td>
<td>Thrivent Partner Healthcare Portfolio</td>
</tr>
</tbody>
</table>

We, as investment adviser, pay each of the above subadvisers an annual fee for subadvisory services. Subadvisory fees are described fully in the Statement of Additional Information for the Fund.
Addition, Deletion, Combination, or Substitution of Investments

Where permitted by applicable law and business need, we reserve the right to make certain changes to the structure and operation of the Variable Account, including, among others, the right to:

- Remove, combine, or add Subaccounts and make the new Subaccounts available to you at our discretion;
- Substitute shares of another Portfolio, which may have differences such as (among other things) different fees and expenses, objectives, and risks, for shares of an existing Portfolio in which your Subaccount invests at our discretion;
- Substitute or close Subaccounts to allocations of premiums or Accumulated Value, or both, and to existing investments or the investment of future premiums, or both, at any time in our discretion;
- Transfer assets supporting the Contract from one Subaccount to another or from the Variable Account to another Variable Account;
- Combine the Variable Account with other variable accounts, and/or create new variable accounts;
- Deregister the Variable Account under the 1940 Act, or operate the Variable Account as a management investment company under the 1940 Act, or as any other form permitted by law; and
- Modify the provisions of the Contract to reflect changes to the Subaccounts and the Variable Account and to comply with applicable law.

The Portfolios, which sell their shares to the Subaccounts, also may terminate these arrangements and discontinue offering their shares to the Subaccounts. We will not make any changes without receiving any necessary approval of the SEC and applicable state insurance departments. We will notify you of any changes.

If investment in the Fund or in any particular Portfolio is no longer possible, in our judgment becomes inappropriate for the purposes of the Contract, or for any other reason in our sole discretion, we may close or combine any of the current Portfolios. We may close a Portfolio to new investment, but continue to allow current investors to add additional premium payments, or we may combine the Portfolio with another Portfolio. The substituted investment option may have different fees and expenses. We will not make any substitutions without receiving any necessary approval of the SEC and state insurance departments, if applicable. You will be notified of any substitutions. This notification will include the name of the Portfolio being modified, the approximate date of the shareholder vote, the date any combination will be completed (if approved and if applicable), the date that the Portfolio will be closed to new investment selections, the date that funds can no longer be applied to the Portfolio and the description of where the current value will move to (if applicable) and where future premium payments (if any) will be applied. Subaccounts may be opened, closed or substituted with regard to any of the following as of any specified date: 1) existing Accumulated Value; 2) future payments; and 3) existing and/or future Contract Owners. The Fund sells its shares to the Subaccounts pursuant to a participation agreement and may terminate the agreement and discontinue offering its shares to the Subaccounts.

In addition, we reserve the right to make other structural and operational changes affecting the Variable Account.

We do not guarantee any money you place in the Subaccounts. The value of each Subaccount will increase or decrease, depending on the investment performance of the corresponding Portfolio and fees and charges under the Contract. You could lose some or all of your money.

Voting Privileges

To the extent required by law, we will vote the Fund’s shares held in the Variable Account at regular and special shareholder meetings of the Fund in accordance with instructions received from persons having voting interests in the corresponding Subaccounts of the
Variable Account. If, however, the 1940 Act or any regulation thereunder should be amended or if the present interpretation thereof should change, and as a result we determine that we are permitted to vote the Fund's shares in our own right, we may elect to do so.

Any Portfolio shares held in the Variable Account for which we do not receive timely voting instructions, or which are not attributable to Contract Owners, will be voted by us in proportion to the instructions received from all Contract Owners. Any Portfolio shares held by us or our affiliates in General Accounts will, for voting purposes, be allocated to all separate accounts of ours and our affiliates having a voting interest in that Portfolio in proportion to each such separate account's votes. Voting instructions to abstain on any item to be voted upon will be applied on a pro rata basis to reduce the votes eligible to be cast.

Each person having a voting interest in a Subaccount will receive proxy materials, reports and other materials relating to the appropriate Portfolio.

THE CONTRACT

While the Insured is alive, the Owner of the Contract may exercise every right and enjoy every benefit provided in the Contract.

For a Contract where the Insured and Owner of the Contract is younger than age 16 (juvenile), an adult must apply on behalf of the Insured in this case and retain control over the Contract. The adult is referred to as the applicant controller in the Contract. The applicant controller exercises certain rights of ownership on behalf of the juvenile. These rights are described in the Contract. The applicant controller may transfer control to another eligible person, but cannot transfer ownership of the Contract.

After the juvenile Insured/Owner attains age 16, control will transfer to the Insured/Owner on the earlier of:

- the Contract Anniversary after the Insured's 21st birthday;
- the date on which the applicant controller transfers control to the Insured/Owner by giving us Notice; or
- the date of death of the applicant controller.

If the person who has control of the Contract dies before the juvenile Insured attains age 16, control will be vested in an eligible person according to our bylaws. If we determine that it is best for the Insured, we may transfer control of the Contract to some other eligible person according to our bylaws.

Replacement of Existing Insurance

It may not be in your best interest to surrender, lapse, change or borrow from existing life insurance policies or annuity contracts to increase coverage under this Contract. You should compare your existing insurance and this Contract carefully. You should replace your existing insurance only when you determine additional coverage under this Contract is better for you. You may have to pay a surrender charge on your existing insurance, and this Contract imposes a new decrease charge period on the amount of the increase in coverage. If you surrender your existing insurance policy for cash and then increase coverage under this Contract, you may have to pay a tax, including possibly a penalty tax, on the surrender. If the premium is coming from the issuer of your existing insurance policy, the increase of coverage under this Contract may be delayed.

Term Conversion

Contract Owners may be eligible for a contractual conversion incentive to convert their Thrivent term insurance contract(s) or rider(s) to permanent coverage.

If you are eligible for and exercise the conversion privilege found in eligible Thrivent term contracts and riders, Thrivent will give you a credit toward the first premium payable for the new coverage. The amount of the credit will not be less than $1.00 per $1,000 of term insurance that is converted.
Review this opportunity with your financial professional to determine whether it is available to you and right for you.

Ownership Rights
The Contract belongs to the Owner named in the application. While the Insured is living, the Owner may exercise all of the rights and options described in the Contract. The Insured is the Owner unless the application specifies another person as the Owner, or the Owner is changed after issue. If the Owner is not the Insured and dies before the Insured, ownership of the Contract will pass to the Owner’s estate, unless a successor Owner has been designated. To the extent permitted by law, Contract benefits are not subject to any legal process for the payment of any claim against the payee, and no right or benefit will be subject to claims of creditors (except as may be provided by assignment). However, if the Issue Age was less than 16 and an applicant controller applied for the Contract, then you are the Owner but may not exercise ownership rights until control of the contract is transferred to you. Before control is transferred, only the applicant controller may exercise ownership rights on behalf of the Insured.

The Contract Owner may transfer ownership of the Contract, if the new owner is eligible under our Bylaws, or assign the Contract as collateral by giving Notice. Transfer of ownership will be effective as of the date you sign the Notice or, if the Notice is not dated, on the date the Notice is received at our Service Center.

Thrivent does not allow assignment of variable life insurance contracts to life settlement or viatical companies.

The Contract Owner may name one or more Beneficiaries to receive Death Proceeds. We restrict who may be named as a Beneficiary under your life insurance Contract. The named Beneficiaries must be eligible under our Bylaws. The Contract Owner will classify each Beneficiary as primary or contingent. Upon the Insured’s death, we will pay the Death Proceeds to the Beneficiaries as follows:

1. Proceeds will be paid to the primary Beneficiaries who are then alive.
2. If no primary Beneficiaries are living, proceeds will be paid to the surviving contingent Beneficiaries.
3. If no Beneficiary survives, proceeds will be paid to the Contract Owner or, if the Insured is the Contract Owner, to the Insured’s estate.

Other designations or successions of Beneficiaries may be arranged with us. Any Beneficiary who dies simultaneously with the Insured or within 15 days after the Insured dies and before Death Proceeds have been paid will be deemed to have died before the Insured.

The Contract Owner may change the Beneficiary by giving Notice while the Insured is living. Notice must be received by the Service Center and approved before it will be effective. The effective date of the change will be the date the Owner signs the Notice or, if the Notice is not dated, the date it is received at our Service Center. We are not liable for any payment made or action taken by us before we receive Notice.

Modifying the Contract
No representative of Thrivent except the president or the secretary may change any provisions of the Contract.

Misstatement of Age or Sex Provision
If the Insured’s age or sex has been misstated and Death Proceeds are payable, the Face Amount will be adjusted to the amount that would have been provided by the most recent cost of insurance deduction using the correct age and sex.

Suicide Exclusion Provision
If the Insured dies by suicide within two years after the Date of Issue, the Death Proceeds of this Contract are limited to premiums paid less the sum of: (1) any Debt; and (2) any partial surrenders. If the Insured dies by suicide within two years after the effective date of an increase in Face Amount, the Death Proceeds with respect to the increase are limited to the cost of insurance and monthly unit charges for the increase.
Termination

Your Contract will terminate if the Insured dies, if you surrender the Contract, if you exercise the right to a full payout under the accelerated death benefit rider, if a premium required to keep the Contract in force has not been paid by the end of the grace period or due to an excess loan.

State Variations

Any state variations in the Contract are covered in a special Contract form for use in that state. See your Contract for details.

PREMIUMS

Flexible Premiums

This Contract is a flexible premium contract. Premiums may be paid at any time and in any amount, subject to some restrictions. All premium payments must be in U.S. dollars drawn on a U.S. bank. Generally, we do not accept cash, starter checks (checks without pre-printed registration), traveler’s checks, credit card courtesy checks, most third-party checks or other types of payments defined as not acceptable in our standard procedures. There are no scheduled premium due dates. However, we have the ability to assist you by scheduling planned periodic premiums. Planned periodic premiums are premiums you elect to pay on a regular basis. We will send you billing statements for an amount you select. You may select quarterly, semi-annual or annual statements. You may also elect to make pre-authorized automatic premiums using our electronic payment program. In most cases, you may make changes in frequency and payment amounts at any time with adequate notice.

We recommend that you pay at least a Death Benefit Guarantee Premium to protect your Contract from lapsing. Paying this minimum premium amount ensures that your Contract will not lapse in the event the Cash Surrender Value is not sufficient to pay the monthly deductions. See Death Benefit Guarantee. In certain circumstances, a premium payment may cause the Contract to be characterized as a modified endowment contract. See Federal Tax Matters. You should discuss the amount and frequency of your premiums with your financial professional.

Premium in Default and Grace Period

Unless a Death Benefit Guarantee is in effect, a premium is in default on a Monthly Anniversary if a monthly deduction to be made on that date would result in a Cash Surrender Value less than zero. You will be given 61 days from the date notice is mailed to you (in most states) to pay the required premium in order to avoid lapse. In addition, the Contract will lapse whenever the Contract Debt exceeds the Accumulated Value and 61 days have elapsed since we mailed notice to you. We will notify you of the premium required to keep the Contract in force. The amount indicated in the notice will be based on the Valuation Date on which the notice is produced. The amount needed to prevent the Contract from lapsing may increase or decrease daily based on fluctuations in the Subaccounts you selected.

You should discuss the amount with your financial professional. The Contract will continue in force through the grace period.

If the Insured dies during the grace period, the Death Proceeds payable will be reduced by the amount of the monthly deductions due and unpaid and the amount of any outstanding Contract Debt.

Net Premiums & Premium Allocation

We deduct from each premium, including the initial premium, a percent of premium charge of 5% for sales expenses. The remainder of the premium is the “Net Premium.” The percent of premium charge may not be deducted in certain situations. Net Premiums are the amounts we direct to the various Subaccounts and/or Fixed Account according to your allocation instructions.
We will allocate your Net Premium according to the allocation instructions on your application or most recent allocation instructions on file. Your allocation must be in whole percentages and total 100%. If the allocation request is not completed, is not in whole percentages, or does not total 100%, then the request will be treated as not in Good Order. We will process the allocation request when it is in Good Order. You may change your allocation percentages for future payments at any time by giving us Notice.

If we receive your premium before the close of regular trading on the New York Stock Exchange (NYSE) (usually 4:00 p.m. Eastern Time, the time we determine the value of the Accumulation Units) on a Valuation Date, allocation occurs at the end of the day in which we receive your payment. If we receive your premium on a non-Valuation Date or after the NYSE closes, the allocation occurs as of the end of the next Valuation Date.

**Electronic Payment Program**

Our electronic payment program allows you to make premium payments (or loan repayments) to your Contract on a regularly scheduled basis by having money automatically withdrawn from your checking or savings account, or other applicable payment source, rather than being billed. Under this plan, we draw from your account on the date you select and we will allocate premiums to the Subaccount(s) or Fixed Account according to your instructions. However, if the purchase date you have chosen falls on a weekend (or holiday) in any given month, we will treat your order as being received by us on the next Valuation Date. To set up the electronic payment program you may complete the applicable section on the application or, after the time of application, by giving us Notice.

**Limits**

We reserve the right to:

- limit the amount of premiums; and
- refuse any premium that adversely affects life insurance qualification under the Internal Revenue Code.

In addition to excluding life insurance Death Proceeds from the Beneficiary’s gross income, the Internal Revenue Code also excludes increases in Accumulated Value prior to receipt from the income of the Contract Owner. To qualify for this exclusion, federal tax law limits the premiums you may pay and requires that the Accumulated Value be limited to a certain percentage of the death benefit. We will return the portion of any premium payment that causes the limit on premiums to be exceeded.

If we receive your premium before the close of regular trading on the New York Stock Exchange (NYSE) (usually 4:00 p.m. Eastern Time, the time we determine the value of the Accumulation Units) on a Valuation Date, allocation occurs at the end of the day in which we receive your payment. If we receive your premium on a non-Valuation Date or after the NYSE closes, the allocation occurs as of the end of the next Valuation Date.

**Electronic Payment Program**

Our electronic payment program allows you to make premium payments (or loan repayments) to your Contract on a regularly scheduled basis by having money automatically withdrawn from your checking or savings account, or other applicable payment source, rather than being billed. Under this plan, we draw from your account on the date you select and we will allocate premiums to the Subaccount(s) or Fixed Account according to your instructions. However, if the purchase date you have chosen falls on a weekend (or holiday) in any given month, we will treat your order as being received by us on the next Valuation Date. To set up the electronic payment program you may complete the applicable section on the application or, after the time of application, by giving us Notice.

**Limits**

We reserve the right to:

- limit the amount of premiums; and
- refuse any premium that adversely affects life insurance qualification under the Internal Revenue Code.

In addition to excluding life insurance Death Proceeds from the Beneficiary’s gross income, the Internal Revenue Code also excludes increases in Accumulated Value prior to receipt from the income of the Contract Owner. To qualify for this exclusion, federal tax law limits the premiums you may pay and requires that the Accumulated Value be limited to a certain percentage of the death benefit. We will return the portion of any premium payment that causes the limit on premiums to be exceeded.

In the event of a reduction in the Face Amount, or other changes to the Contract which cause the premiums paid or the Accumulated Value to exceed the applicable limit stated in the Internal Revenue Code regarding the definition of life insurance, we will refund any excess premiums or cash necessary to comply with the limit stated in the Internal Revenue Code.

IRS rules govern the tax treatment of life insurance contracts. We have the right to limit or refund a premium payment or make distributions from the Contract as necessary to continue to qualify the Contract as life insurance under federal tax law or to avoid the classification of your Contract as a “modified endowment contract” (MEC). If mandated under applicable law, we may be required to reject a premium payment.

Your Contract could be classified as a MEC if premiums paid exceed certain dollar thresholds or if certain transactions are processed. Except as described below, we will apply only the portion of the premium payment(s) (including electronic payments) that will not cause the Contract to become a MEC and will return the balance to the premium payer without applying it to the Contract. The portion of the payment that is applied to the Contract will be credited as of the Valuation Date the payment was determined to be in Good Order. Additionally, except as described below, a request for any transaction (such as a reduction in Face Amount) that would immediately cause the Contract to become a MEC will be deemed not in Good Order. We will notify you if a requested transaction would immediately cause your Contract to become a MEC and will not process that transaction unless and until we have received your instruction to proceed and allow MEC status.
The following exceptions apply to this process:

1. When your Contract is initially issued, we will either accept or reject the full premium payment. We will accept a full premium payment that results in MEC status only if we have received acknowledgement of MEC status signed by you on forms acceptable to us. Otherwise, if allocation of the full premium payment would result in MEC status, we will consider the Application to be not in Good Order and will not issue the Contract and will not allocate any portion of the premium until the Application is in Good Order.

2. If your Contract is not on an electronic payment program, and if the start of the next MEC Contract Year is within 14 calendar days of the date the premium is received, and allocating all or a portion of the payment on the first day of the next MEC Contract Year will not cause the Contract to become a MEC, then:
   a. upon receipt we will allocate, as described above, only the portion of the premium payment that will not cause the Contract to become a MEC; and
   b. we will wait to allocate the balance of the payment that can be applied without causing your Contract to become a MEC on the first day of the next MEC Contract Year or if the first day of the next MEC Contract Year is not a Valuation Date, then the payment will be allocated as of the next following Valuation Date; and
   c. we will return to the premium payer, without allocating it to the Contract, any remaining balance that, as of the first day of the next MEC Contract Year, still would have caused the Contract to become a MEC; and
   d. no interest will be paid to you or the premium payer from the date of receipt of the premium payment to the date it is either allocated to your Contract or returned to you.

3. You may also provide instructions directing us to allocate any specific premium payment and/or process any specific transaction even if MEC status will result. Those instructions must indicate that you consent to your Contract being treated as a MEC. You should consult with your tax advisor before doing so. Those instructions must be received with the applicable premium payment or transaction request that will result in MEC status. We do not allow advance elections for future premium payments or future transactions that may result in MEC status on your Contract.

For more information on MECs, see Federal Tax Matters.

**Contract Values**

**Accumulated Value**

On the Contract Date, the Accumulated Value is the first Net Premium less any monthly deductions. After the Contract Date, Accumulated Value is equal to the sum of the accumulated values in the Contract’s Subaccounts, DCA Fixed Account, Fixed Account and Loan Account and may change daily.

The Accumulated Value of your Contract, at any one time, is determined by: multiplying the total number of Accumulation Units for each Subaccount by its appropriate current Accumulation Unit Value; adding together the resulting values of each Subaccount; and adding any accumulated value in the Fixed Account, DCA Fixed Account and the Loan Account.

While loans are not deducted from Accumulated Value, loans do reduce the amount you would receive upon surrender of your Contract and the amount available to pay charges. Loans do not share in the investment performance of the Subaccounts and accrue interest charges which may result in less Accumulated Value in your Contract than if the amounts were allocated to the Fixed Account.
Over the life of your Contract, many factors determine its Accumulated Value. They include:

- premiums paid;
- the investment experience of the Subaccounts;
- interest credited to the Fixed Account, DCA Fixed Account and Loan Account;
- loans taken and loan repayments;
- interest charged for any loans taken;
- partial surrenders taken; and
- charges and deductions taken.

Because a Contract’s Accumulated Value is based on the variables listed above, it cannot be predetermined. Accumulated Value in the Subaccounts will largely be determined by market conditions and investment experience of the underlying Portfolios. The Owner will bear all such risk.

Amounts held in the Fixed Account, including the DCA Fixed Account, are invested with our General Account assets. Interest will be credited on net premiums allocated to the Fixed Account and on Accumulated Value transferred to the Fixed Account from the date of allocation or transfer. Interest is compounded daily and the effective annual interest rate will never be less than 3% and is subject to the Contract charges and deductions. There is no guaranteed minimum Accumulated Value for any Subaccount.

**Fixed Account Accumulated Value**

The Fixed Account accumulated value reflects Net Premiums allocated to the Fixed Account, transfers of Accumulated Value to or from the Subaccounts, interest credited, partial surrenders, and any deductions. Each day the accumulated value in the Fixed Account will change based upon these factors. Review your Contract for further detail.

**DCA Fixed Account**

The DCA Fixed Account accumulation value reflects the Net Premium directed to fund the account to establish the Dollar Cost Averaging program. The periodic transfers reduce the account monthly for 12 months. If the DCA Fixed Account election is cancelled before the end of the 12-month period, we transfer any remaining value to the Money Market Subaccount unless you request that it be transferred to a different Subaccount.

**Loan Account**

You establish the Loan Account when you take out a loan. The amount used to secure the loan is transferred to the Loan Account. The Loan Account is affected by repayments, additional loans and interest credited to and charged against it. Each day the accumulated value in the Loan Account will change based on these factors.

**Variable Account Accumulated Value**

**Number of Accumulation Units**

The number of Accumulation Units in any Subaccount may increase or decrease at the end of each Valuation Period. This fluctuation depends on the transactions that occur in the Subaccount during the Valuation Period. When transactions occur, the actual dollar amounts of the transactions are converted to Accumulation Units. The number of Accumulation Units is determined by dividing the dollar amount of the transaction by the Accumulation Unit Value of the Subaccount at the end of the Valuation Period during which the transaction occurs.

The number of Accumulation Units in a Subaccount increases when the following transactions occur during the Valuation Period:

- Net Premiums are allocated to the Subaccount; or
- Accumulated Value is transferred to the Subaccount from another Subaccount or from the Fixed Account; or
- Debt is repaid.

The number of Accumulation Units in a Subaccount decreases when the following transactions occur during the Valuation Period:

- Accumulated Value is transferred from the Subaccount to another Subaccount or to the Fixed Account, including loan transfers;
- surrenders, partial surrenders and decrease charges are taken from the Subaccount;
monthly deductions or transfer charges are taken from the Subaccount; or
any loan taken.

Accumulation Unit Value

For each Subaccount, the initial Accumulation Unit Value was set when the Subaccount was established. The Accumulation Unit Value may increase or decrease from one Valuation Period to the next.

The Accumulation Unit Value for a Subaccount for any Valuation Period is equal to:

- the net asset value of the corresponding Portfolio at the end of the Valuation Period;
- plus the amount of any dividend, capital gain or other distribution made by the Portfolio if the “ex-dividend” date occurs during the Valuation Period;
- plus or minus any cumulative credit or charge for taxes reserved which we determine has resulted from the operation of the Portfolio;
- divided by the total number of Accumulation Units held in the Subaccount at the end of the Valuation Period before any of the transactions, referred to in the Number of Accumulation Units subsection, have occurred.

Cash Surrender Value

The Cash Surrender Value is the total amount you will receive upon surrender of the Contract. It is equal to the Accumulated Value less any decrease charges and any outstanding Debt and any deferred monthly deductions. The Cash Surrender Value changes daily, reflecting, among other things, increases and decreases in the value of the Portfolios in which the assets of the Subaccounts are invested and interest credited in the Fixed Account, DCA Fixed Account and Loan Account, and any interest charged against the Loan Account. It is possible for the Cash Surrender Value of your Contract to decline to zero because of unfavorable investment performance or outstanding Debt or insufficient premium payments.

You will be advised as to the number of Accumulation Units which are credited to the Contract, the current Accumulation Unit Values, Subaccount accumulated value, Fixed Account accumulated value, DCA Fixed Account accumulated value and Loan Account accumulated value, the total Accumulated Value and the Cash Surrender Value at least annually.

DEATH BENEFITS

The primary reason to buy a life insurance Contract is for the death benefit it provides in the event of the Insured's death. At the time of purchase, you chose between two Death Benefit Options: Option 1 (Level Death Benefit Option) or Option 2 (Variable Death Benefit Option). We determine the amount payable (Death Proceeds) depending on the Death Benefit Option in effect on the date of the Insured's death. Death Proceeds payable upon the death of the Insured is the sum of the Death Benefit plus any insurance on the Insured's life provided by Additional Benefits. Any loans, unpaid loan interest and any unpaid monthly deductions will reduce the Death Proceeds. The Death Benefit will be calculated as of the date of death.

Option 1 (Level Death Benefit Option)

The death benefit for this option remains level, but in limited situations will vary. Prior to age 100, the death benefit is the greater of the Face Amount, or the death benefit factor multiplied by Accumulated Value. If you keep your Contract in force for several years and your Accumulated Value continues to increase, your death benefit may be increased by a death benefit factor. This factor helps to ensure that your death benefit is large enough to qualify as life insurance under federal tax law. The death benefit factor depends upon your Attained Age. Your Contract includes a table of the death benefit factors. On or after age 100, the death benefit equals the Accumulated Value.
DEATH BENEFITS

You should consider the Level Death Benefit Option if:

♦ you do not expect your insurance needs to generally increase; or
♦ you would like to minimize your insurance costs.

In general, the Level Death Benefit Option provides greater growth potential in Accumulated Value than the Variable Death Benefit Option. By choosing the Level Death Benefit Option, any increases in Accumulated Value reduce the actual risk amount and lower your cost of insurance.

Option 2 (Variable Death Benefit Option)

The Variable Death Benefit Option provides a death benefit that varies over time. Prior to age 100, the death benefit will be the greater of the Face Amount plus Accumulated Value, or the death benefit factor (described above) multiplied by Accumulated Value. The death benefit fluctuates correspondingly with your Accumulated Value. On or after age 100, the death benefit equals the Accumulated Value.

You should consider the Variable Death Benefit Option if:

♦ you expect your insurance needs to increase, or
♦ you would like to have the potential for an increasing death benefit.

In general, the variable option provides the potential for a greater death benefit than the level option.

Changing Your Face Amount

You chose the Face Amount when you applied for the Contract. You may change the Face Amount by giving us Notice. We will not permit any change that would result in your Contract being disqualified as a life insurance contract under Section 7702 of the Internal Revenue Code. Changing the Face Amount may have tax consequences and you should consult a tax advisor before doing so.

Increasing Your Face Amount

Subject to our underwriting guidelines and policies, you have the right to increase the Face Amount at any time on or before the Insured’s 80th birthday.

Any increase in Face Amount is subject to the following conditions:

♦ We must receive a written application at our Service Center.
♦ We require evidence of insurability which meets our standards.
♦ The increase amount must be for at least $25,000.
♦ The Cash Surrender Value must be sufficient to cover the monthly deduction on the effective date of the increase.

Increases in your Face Amount will result in additional charges to cover the increased amount at risk. We compute charges at the existing rates at the time of increase. The cost of insurance rates for each increase will vary based on factors such as sex (in most states),
DEATH BENEFITS

Risk class, age and the time elapsed since issue. The increase will be effective on the date shown on the supplemental Contract schedule page we provide.

A new set of decrease charges will also apply to each increase in the Face Amount. We show these new charges on the supplemental Contract schedule page of your Contract. However, the decrease charges will only be assessed if your Face Amount is later decreased and the decrease charge is still in effect for that part of the Face Amount that was decreased. See Charges and Deductions for additional information regarding this charge.

Decreasing Your Face Amount

At any time before the Insured’s Attained Age 100, you have the right to decrease your Face Amount. Requirements for decreasing your Face Amount are:

♦ we must receive Notice at our Service Center;
♦ the Face Amount remaining in effect cannot be less than the minimum amount defined at issue on the schedule page; and
♦ premiums and Accumulated Value must be in compliance with Internal Revenue Code limits.

The decrease will become effective as of the Monthly Deduction Date on or following the date we receive the request at the Service Center. We will subtract the decrease first from any previous increases in the Face Amount, starting with the most recent, then as needed from the original Face Amount.

We subtract a decrease charge from the Accumulated Value if a decrease charge is in effect for that part of the Face Amount decreased. We show you the decrease charges applicable to you on the Table of Decrease Charges in your Contract.

A decrease in your Face Amount may cause your Contract to be classified as a modified endowment contract and could have other tax consequences. Please consult your tax advisor before decreasing your Face Amount. See Federal Tax Matters.

Death Claims

In the event of the death of the Insured, we must receive Notice of death at our Service Center. Notice should include the Insured’s name and Contract number. A financial professional may assist in making such a claim.

As long as the Contract remains in force and the Death Proceeds are payable, we will pay the Death Proceeds to the Beneficiary upon receipt at our Service Center of all forms, requirements and due proof of the Insured’s death.

Payment of Benefits

In addition to traditional lump sum payments, other payment options are available. All or part of the life insurance proceeds from death or surrender may be placed in one of several settlement options. Proceeds distributed according to a settlement option do not vary with the investment performance of the Variable Account. Contract Owners may select or change a settlement option prior to, or after, the Insured’s death. If you are the Contract Owner and the Insured, your Beneficiary may choose a settlement option at the time of making a claim for death benefits. If no settlement option is selected, we will pay the proceeds in the form of a lump sum payment. The minimum amount that we will apply to a settlement option is $2,000. Additionally, the resulting payment must be at least $50. Once the Beneficiary chooses a settlement option, we will provide a settlement option agreement. In the settlement option agreement, we will reflect guaranteed payments, if any.

Settlement Options

Option 1: Interest

Under this settlement option, the proceeds are left with Thrivent to accumulate interest. We will pay a rate of interest of at least 3% annually on the proceeds that remain with us. The payee may withdraw all or part of the proceeds at any time.

Option 2: A Selected Amount of Income

With this settlement option the payee elects to receive a fixed amount at regular intervals until the proceeds with interest have all been paid. The payment period may not exceed 30 years. Interest accumulates on the
amount that remains with us until the proceeds are all paid out. For example, if your Beneficiary elected to receive $10,000, paid annually, we would pay $10,000 annually until we pay out all of the remaining proceeds. The final payment may be smaller than prior payments.

We will pay a rate of interest of at least 3% annually. The amount of interest may be greater than the guaranteed amount. Unless the income election was irrevocable, the payee may withdraw the Commuted Value of all remaining payments at any time. If the Commuted Value is withdrawn, we will make no further payments.

**Option 3: A Specified Period**

This option provides payments at regular intervals. The payee may elect a specified number of months or years, but may not select a period exceeding the greater of 30 years or the payee’s life expectancy.

We will pay a rate of interest of at least 3% annually on the proceeds that remain with us. The amount of interest we pay may be greater than the guaranteed amount. Unless the income election was irrevocable, the payee may withdraw the Commuted Value of any remaining payments at any time. If the Commuted Value is withdrawn, we will make no further payments.

**Option 4: Life Payment**

This settlement option is a form of annuity payment that continues until the annuitant’s death. The payee is the person receiving the income. We make payments to the payee at regular intervals during the annuitant’s life. Upon electing this option, the payee also selects a guaranteed period of not more than 360 months or selects no guaranteed period at all. If the annuitant dies during the guaranteed payment period, payments will continue to a Beneficiary named for the settlement option until the guaranteed payment period expires. The longer the guaranteed payment period, the lower the amount of regular payment. In other words, the payment amount the payee receives would be higher if the payee chose no guaranteed payment period. However, the risk the payee takes is that he or she may die shortly after we issue the settlement agreement. The agreement would then terminate and all payments would cease.

The amount of the payments depends on the age and, where permitted, sex of the annuitant at the time the settlement agreement is established. We show representative guaranteed payments in the settlement option section of the Contract. These rates are based on a guaranteed effective annual interest rate of 3% using the “Annuity 2000 Table” annuitant mortality table.

**Option 5: Joint & Survivor**

This settlement option is another form of annuity payment or life income available when both annuitants are alive when the settlement option is chosen. We will pay an income as long as at least one of the two annuitants is alive. The amount of payments is determined based on the lives of both of the annuitants. The payees may select a guaranteed payment period of not more than 360 months, or may select no guaranteed payment period at all.

Upon the death of one of the persons named to receive payments, we will continue to make payments of the same amount to the survivor for the remainder of the guaranteed payment period. At the end of this period, if the survivor is still living, the payments may be reduced if a reduction factor was chosen at issue. We pay the reduced amount until the survivor annuitant’s death. If the survivor also dies during the guaranteed payment period, the remaining guaranteed payments continue to a designated Beneficiary. The Beneficiary has an option to take a lump sum payment. If no guarantee payment period was selected, all payments will cease and the agreement terminates.

The amount of the payments depends on the age and, where permitted, sex of the annuitants at the time we issue the settlement agreement. In addition, any selection of a guaranteed payment period or any reduction factor will influence the payments. We show representative guaranteed payments in the settlement option section of the Contract. These rates are based on a guaranteed effective annual interest rate of 3% using the “Annuity 2000 Table” annuitant mortality table.

We may also offer other settlement options at our discretion.
**Death Benefit Guarantee**

A Death Benefit Guarantee ensures that your coverage will continue even if the Cash Surrender Value is insufficient to pay the current monthly deductions. However, the guarantee is contingent upon timely payment of a minimum premium amount known as the Death Benefit Guarantee Premium.

The Death Benefit Guarantee Premium is the minimum monthly premium required to keep your Death Benefit Guarantee in effect. We show your particular Death Benefit Guarantee Premiums in your Contract. The Death Benefit Guarantee Premium is calculated specifically for each Contract on the Date of Issue. The Death Benefit Guarantee will vary by Issue Age, sex, Face Amount, Death Benefit Option, risk class and substandard ratings. The charges in the calculation include:

- the cost of insurance;
- the monthly administrative charge of $9 ($7.50 for Insureds Issue Age 17 and under);
- the percent of premium charge; and
- the charge for each additional benefit you choose.

Under the Contract, two Death Benefit Guarantees are generally available depending on the amount of your initial premium and Issue Age: the basic and the enhanced Death Benefit Guarantee. The basic Death Benefit Guarantee is available to you if you provide an initial premium payment that is at least the basic Death Benefit Guarantee Premium. The enhanced Death Benefit Guarantee is available to you if the Insured’s Issue Age is less than 70 and if you provide an initial premium payment that is at least the enhanced Death Benefit Guarantee Premium. Generally, the enhanced Death Benefit Guarantee provides a longer level of guarantee than the basic. The type of guarantee, the amount of the Death Benefit Guarantee Premium amount and termination date for the guarantee are shown on the schedule page of your Contract. Termination of the Death Benefit Guarantee differs between the two as follows:

- **Basic Death Benefit Guarantee**
  - The earlier of the Contract Anniversary after age 70 or 15 Contract Years, but at least for 5 years.

- **Enhanced Death Benefit Guarantee**
  - The Contract Anniversary on or next after the Insured’s 75th birthday.

Each month, we will determine if a Death Benefit Guarantee remains in effect. A Death Benefit Guarantee will remain in effect if, on each Monthly Deduction Date, the sum of all premiums paid and credited less any partial surrenders and loan amounts is greater than or equal to the sum of Death Benefit Guarantee Premiums for that guarantee since the Contract’s Date of Issue. If the Contract includes a disability waiver of monthly deduction benefit, the Death Benefit Guarantee Premium will not be added to this sum on any monthly anniversary on which we waive or credit the monthly deduction under that rider.

If this requirement is not met, we will notify you that an insufficiency has occurred. We will allow you 61 days to pay sufficient premiums or loan repayments to satisfy the Death Benefit Guarantee. If you do not pay the required premium, the Death Benefit Guarantee will expire and we will not reinstate it (in most states). However, this does not necessarily terminate your Contract. See **Contract Lapse and Reinstatement**.

If you change your Face Amount or riders, we will correspondingly change the Death Benefit Guarantee Premium. Any new Death Benefit Guarantee Premium applies from the effective date of the change.

Please note that the Death Benefit Guarantee will terminate automatically as determined by the type of Death Benefit Guarantee (described above). The termination date of the guarantee is listed on the schedule page of your Contract. After termination, the insurance coverage provided by the Contract will remain in force as long as your Cash Surrender Value is large enough to pay monthly deductions. See **Contract Lapse and Reinstatement**.
PARTIAL SURRENDERS AND SURRENDERS

You may surrender your Contract and receive your Cash Surrender Value or make a partial surrender by giving us Notice at our Service Center. The surrender or partial surrender will not be processed until we receive your request in Good Order. You may obtain information as to a surrender or partial surrender by contacting your financial professional or calling our Service Center at (800) 847-4836. We do not accept telephone requests for surrenders.

Verification of Identity

We require a Medallion Signature Guarantee for any surrender, partial surrender or loan disbursement in an amount of $500,000 or more. Certain requests of less than $500,000 require either a Medallion Signature Guarantee, a notarized signature, or an attestation of your signature by a Thrivent financial professional. These authentication procedures are designed to protect against fraud. Such an authentication procedure may be required for a:

- Request to receive funds with a value of $100,000 or more;
- Request to receive funds if there has been a change of address for the Contract Owner within the preceding 15 days; and
- Certain other transactions as determined by us.

A Medallion Signature Guarantee is a stamp provided by a financial institution that guarantees your signature. You sign the Thrivent approved form and have the signature(s) guaranteed by an eligible guarantor institution such as a commercial bank, trust company, brokerage firm, credit union, or a savings bank participating in the Medallion Signature Guarantee Program. We may waive the Medallion Signature Guarantee in limited circumstances. A Notary Public is an individual who is authorized to authenticate signatures and can be found in law firms or many of the same places that an individual who provides Medallion Signature Guarantees can be found. Attestation by a financial professional requires the verification and witness of your signature by a Thrivent financial professional. You should consider the tax implications of a surrender or loan before you make a request. See Federal Tax Matters.

Complete information pertaining to your individual situation is available through our Service Center at (800) 847-4836.

Partial Surrenders

Partial surrenders offer you a way to access your Accumulated Value. You may withdraw part of your Cash Surrender Value by giving us Notice. Each partial surrender must be at least $200. You may not make a partial surrender if the remaining Cash Surrender Value would be less than $300. Partial surrenders are implemented by either the redemption of Accumulation Units and/or reduction in the Fixed Account balance. The partial surrender will be taken from the Subaccounts and Fixed Account according to the ratio that the Contract’s Accumulated Value in the Subaccount or Fixed Account bears to the total Accumulated Value less any loan plus accrued interest of the Contract at the time of the partial surrender; or any other administrative option you choose that is available at the time of the partial surrender. During the first 10 Contract Years, a $25 charge will be deducted from the Accumulated Value for each partial surrender after the first one in any Contract Year. An amount withdrawn may not be repaid.

A partial surrender may have tax consequences. It is important to note that if the Face Amount is decreased (including as a result of partial surrender), there is a possibility that the Contract might be classified as a modified endowment contract. See Federal Tax Matters.

For a Contract with Option 1 (Level Death Benefit Option):

A partial surrender will reduce your Accumulated Value, Face Amount, death benefit and the amount of premiums considered to meet the Death Benefit Guarantee Premium requirements. If the death benefit is equal to the Face Amount at the time of the partial surrender, the amount of the reduction in the death benefit will be equal to the amount of the partial surrender. If the death benefit is greater than the Face Amount, (a) the Face Amount will be reduced by the amount (if any) by which the partial surrender amount exceeds the difference between the death benefit and
the Face Amount, and (b) the new death benefit will be based on the death benefit factor, Accumulated Value, and Face Amount after the reduction.

The Face Amount remaining in effect after a partial surrender may not be less than the minimum Face Amount as defined on issue in the schedule pages of your Contract. We will not grant any request for a partial surrender that would reduce the Face Amount below this amount.

For a Contract with Option 2 (Variable Death Benefit Option):
A partial surrender will reduce the Accumulated Value, death benefit and the amount of premiums paid. Since the premiums paid are reduced, partial surrenders also affect the amount of premiums considered paid to meet the Death Benefit Guarantee Premium requirement. A partial surrender will not reduce the Face Amount. A partial surrender may have tax consequences. See Federal Tax Matters.

Surrender
You may surrender this Contract for its Cash Surrender Value by giving us Notice. If you surrender your Contract, you will receive the Accumulated Value less any decrease charge and outstanding loan balance. The surrender will be effective on the day we receive Notice. Insurance coverage ceases on the effective date of the surrender. Alternatively, at any time while the Insured is living (and before Attained Age 100) you may surrender this Contract and apply the Cash Surrender Value as a single premium to purchase paid-up life insurance on the Insured.

A full surrender of your Contract may have tax consequences. See Federal Tax Matters.

Postponement of Payments
We typically process any surrender, partial surrender, death benefit, loan, transfer or settlement option within 7 days after receipt of all applicable written and telephone requests and/or proof of death of the Insured. We may postpone payment of any amount due from the Variable Account for a surrender, partial surrender, transfer, loan or on the death of the Insured whenever:

- the New York Stock Exchange is closed or trading is otherwise restricted;
- the SEC has determined that an emergency exists;
- the SEC requires that trading be restricted; or
- the SEC, by order, permits such postponement for the protection of Contract Owners.

We also may postpone any transfer from the Fixed Account or payment of any portion of the amount payable upon surrender, partial surrender or loan from the Fixed Account for not more than 6 months from the day we receive Notice and, if required, your Contract.

If mandated under applicable law, we may be required to reject a premium payment and/or otherwise block access to a Contract Owner's account, and thereby refuse to pay any request for transfers, partial surrenders, surrenders or death benefits. Once restricted, money is held in that account until instructions are received from the appropriate authority.

Transfers
While the Insured is alive and the Contract is in force, you may transfer the Accumulated Value among the Subaccounts and Fixed Account by submitting a proper Notice to our Service Center.

You may make twelve transfers per Contract Year without charge. There will be a charge of $25 for each transfer in excess of twelve excluding any automatic transfers from the DCA Fixed Account or the Money Market Subaccount. We consider all amounts transferred in the same Valuation Period to be one transfer for purposes of this charge. It is not dependent upon the number of originating or destination Subaccounts.
Only one transfer may be made from the Fixed Account in each Contract Year which, if made, counts toward the twelve allowable transfers. If the accumulated value in the Fixed Account immediately before the transfer is at least $2,000, the amount transferred may not exceed 25% of the accumulated value in the Fixed Account. Otherwise, the amount transferred may not exceed $500.

Any transfer among the Subaccounts or to the Fixed Account will result in the crediting and cancellation of Accumulation Units based on the Accumulation Unit Values. Calculations are made as of the end of the Valuation Period during which a proper transfer request is received. The minimum amount that may be transferred from a Subaccount or the Fixed Account is $50 or the entire Accumulated Value in that Subaccount or Fixed Account, if less.

**Frequent Trading Policies**

Because short-term or frequent transfers, purchases and redemptions of Contract value among Subaccounts pose risks to Contract Owners, we place limits on frequent trading practices. Such risks include potentially impaired investment performance due to disruption of portfolio management strategies, increased transactions costs, and dilution of fund shares (and, therefore, unit values) thereby negatively impacting the performance of the corresponding Subaccount.

We have policies and procedures to discourage frequent transfers of value among Subaccounts. We use reasonable efforts to apply the policies and procedures uniformly. Several different tactics are used to detect and prevent excessive trading within the Subaccounts.

As described in this section, we impose a fee if the transfers made within a given time period exceed a maximum contractual number.

We also use a combination of monitoring Contract Owner activity and further restricting certain Contract Owner transfers based on a history of frequent transfers among subaccounts. When monitoring Contract Owner activity, we may consider several factors to evaluate transfer activity including, but not limited to, the amount and frequency of transfers, the amount of time between transfers and trading patterns. In making this evaluation, we may consider trading in multiple contracts under common ownership or control.

Exceptions may apply to Dollar Cost Averaging, automatic investment plans, systematic withdrawal plans or non-abusive re-balancing. We reserve the right, in our sole discretion, to identify other trading practices as abusive.

If we determine that you are engaging in excessive trading activity, we will request that you cease such activity immediately. If we determine that you are continuing to engage in excessive trading, we will restrict your Contract so that you can make transfers on only one business day each calendar month and any such transfers must be separated by at least 20 calendar days. We reserve the right to reject or restrict any transfer request, without notice for any reason.

In addition, the underlying funds may have adopted restrictions designed to discourage frequent trading practices, and we reserve the right to enforce these policies and procedures.

Although we seek to deter and prevent frequent trading practices, there are no guarantees that all activity can be detected or prevented. Contract Owners engaging in such trading practices use an evolving variety of strategies to avoid detection and it may not be possible for operational and technological systems to reasonably identify all frequent trading activity. Contract Owners still may be subject to their harmful effects if Thrivent is unable to detect and deter abusive trading practices.

**Dollar Cost Averaging**

Your Contract provides for two different Dollar Cost Averaging programs that allow you to have automatic periodic transfers made to one or more Subaccounts. Dollar Cost Averaging is generally suitable if you are making a substantial deposit to your Contract and desire to control the risk of investing at the top of a market cycle. Either Dollar Cost Averaging program allows such investments to be made in equal installments over time in an effort to reduce such risk. Dollar Cost Averaging does not guarantee that your Contract’s Accumulated Value will gain in value, nor
will it protect against a decline in value if market prices fall. However, it can be an effective strategy to help meet your long-term goals.

Neither Dollar Cost Averaging program allows you to make automatic transfers to the Fixed Account or a Fixed Period Allocation.

**Dollar Cost Averaging from the DCA Fixed Account**
This program is no longer available because the Contract is no longer sold. At the time of your application, you had the option to dedicate a premium of at least $1,000 to be allocated to a one-year allocation in the Fixed Account (the “DCA Fixed Account”) for automatic monthly transfers to one or more Subaccounts. Any amount allocated to the DCA Fixed Account was credited with an interest rate determined when the payment was received and was guaranteed for the duration of the one-year period.

One-twelfth of any amount you allocated to the DCA Fixed Account was transferred to the designated Subaccounts when we allocated your initial premium, and subsequent transfers were made on the same date each month for the next 11 months. If that date fell on a date at the end of the month like the 29th, 30th, or the 31st and the subsequent month did not have a comparable date, we processed the transfer on the first business day of the following month. The amount of the transfer each month was equal to the Accumulated Value in the DCA Fixed Account divided by the number of automatic transfers remaining. If you terminated the automatic transfers before the twelfth transfer, the Accumulated Value in the DCA Fixed Account would have been transferred to the Thrivent Money Market Subaccount unless you requested that it be transferred to a different Subaccount.

**Money Market Dollar Cost Averaging**
You may establish a Dollar Cost Averaging program to make periodic transfers of at least $50 from the Money Market Subaccount to one or more other Subaccounts. Transfers will be made automatically on the date you select (except the 29th, 30th, or 31st of a month).

Transfers will continue until the entire amount in the Thrivent Money Market Subaccount has been depleted or until we receive Notice from you to discontinue the program, whichever is sooner. If the amount remaining in the Thrivent Money Market Subaccount drops below the amount you established to be transferred, the entire remaining balance will be transferred on the next transfer date and the Money Market Dollar Cost Averaging program will be discontinued. If the program is discontinued and you want systematic transfers to resume from the Money Market Subaccount, you must provide us Notice and assure adequate funding in the Money Market Subaccount.

**Automatic Asset Rebalancing Program**
As the value of your Subaccounts changes, the distribution of Accumulated Value among those Subaccounts also changes. The Automatic Asset Rebalancing program transfers your Contract’s value among the variable investment options (this excludes the Fixed Account). You may elect to automatically rebalance your Accumulated Value in the Subaccounts periodically under the Automatic Asset Rebalancing program according to the percentage allocation you determine at the time of setting up this program.

Automatic Asset Rebalancing may be set up annually or semi-annually to begin on the date you select (except the 29th, 30th or 31st). Before you begin the program, you should determine your investment goals and risk tolerance. Use of this program will not ensure any gain nor protect against any loss in overall Accumulated Value. To elect to participate in the program, we must receive Notice at our Service Center from you. This request will override any previous allocations you may have selected. Rebalancing continues until you stop or change it.

You can change your allocations at any time by giving us Notice. You can also stop or suspend the program by providing Notice to our Service Center. If you make additional premium payments or transfers into a Subaccount that was not previously included in the asset rebalancing program, those amounts will not be subject to rebalancing unless you revise your asset rebalancing program. Periodic rebalancing takes into account increases and decreases in accumulated values in each Subaccount. Any transfers resulting from
rebalancing will not incur a transfer charge.
You may perform certain transactions online or over the telephone if we receive proper authorization from you.

We have adopted reasonable security procedures to ensure the authenticity of instructions, including requiring identifying information, recording telephone conversations and providing written confirmations of transactions. Nevertheless, we honor instructions from any person who provides the correct identifying information. Be aware that there is a risk of possible loss to the Owner if an unauthorized person uses this service in the Owner's name. Thrivent disclaims any liability for losses resulting from such transactions by reason of their not having been properly authorized. However, if Thrivent does not take reasonable steps to help ensure that such authorizations are valid, Thrivent may be liable for such losses.

Certain circumstances may prevent you from conducting transactions including but not limited to the event of a disaster, equipment malfunction, or overload of telephone system circuits. Should circumstances prevent you from conducting a telephone or online transaction, we recommend you provide us with written Notice. If, due to malfunction or other circumstances, the request is incomplete or not fully comprehensible, we will not process the transaction.

We reserve the right to suspend or limit telephone and online transactions.

Owners can complete certain transactions online at thrivent.com or complete telephone transactions by contacting the Service Center at (800) 847-4836.

**Timely Processing**

We will process all requests in a timely fashion. Requests received prior to 4:00 p.m. Eastern Time (or sooner if the NYSE closes prior to 4:00 p.m. Eastern Time) on a Valuation Date will use the Accumulation Unit Value as of the close of regular trading on the NYSE on that Valuation Date. We will process requests received after that time using the Accumulation Unit Value as of the close of regular trading on the NYSE of the following Valuation Date. An online transaction payment will be applied on the effective date you select. This date can be the same day you perform the transaction as long as the request is received prior to 4:00 p.m. Eastern Time. The effective date cannot be a date prior to the date of the online transaction.

Once we issue your Contract, we will process payment of any amount due from any Subaccount within seven calendar days after we receive Notice. Payment may be postponed if the NYSE is closed. Postponement may also result for such other periods as the SEC may permit. Payment from the Fixed Account may be deferred up to six months.
While the Insured is living, you may, by giving us Notice, use your Accumulated Value as security for a loan of your Cash Surrender Value. The maximum available loan amount is an amount such that the total loan or loans will not exceed 90% (in most states) of Accumulated Value less decrease charges at the time of the loan request.

For Contract loans, interest will accrue on a daily basis at a maximum annual rate of 5% on the loan balance. On the 10th Contract Anniversary, any Debt that does not exceed 60% of the Accumulated Value will be automatically changed to a preferred loan. On each subsequent Contract Anniversary, we will automatically change to a preferred loan the portion of Debt, if any, that is not a preferred loan and does not increase the sum of preferred loans on this contract to more than 60% of the Accumulated Value on that date. On or after the 10th Contract Year, when you take a new loan we will add the new loan to Debt and then change to a preferred loan the portion of the Debt, if any, that is not a preferred loan and does not increase the sum of preferred loans on this contract to more than 60% of the Accumulated Value on that date. Interest will accrue on a daily basis at a maximum annual rate of 3% on any preferred loan balance.

When a loan is made, Accumulated Value will be transferred to the Loan Account to secure the loan. Accumulated Value will be transferred from the Subaccounts or Fixed Account according to the ratio that the Accumulated Value in the Subaccounts or Fixed Account bears to the total Accumulated Value less loan and loan interest; or according to any other administrative option you choose and available at the time of the loan. The amount transferred to the Loan Account will continue to be treated as part of the Contract’s Accumulated Value. An interest rate of 3% will be credited to the Loan Account.

While your Contract is in force, you may repay, at any time, all or part of your loan. All loan repayments must be in U.S. dollars drawn on a U.S. bank. Generally, we do not accept cash, starter checks (checks without pre-printed registration), traveler’s checks, credit card courtesy checks, or third-party checks.

Upon your request, we will set up a loan repayment schedule for you. When you repay all or part of a loan, we credit your Loan Account then transfer the repayment from the Loan Account to the Subaccounts and the Fixed Account. Repayments will be allocated according to your premium allocation. Total Accumulated Value does not increase as a result of a loan repayment. The longer the loan is outstanding, the greater the negative impact it will have on Accumulated Value growth.

A loan reduces your Cash Surrender Value, your Death Proceeds and the amount of premiums considered to meet the Death Benefit Guarantee Premium requirement. Depending upon investment performance of the Subaccounts and the amounts borrowed, loans may cause your Contract to lapse. If your Contract lapses with an outstanding loan, adverse tax consequences may result. You should carefully consider the impact on your Contract’s Death Proceeds, before exercising these privileges.

A loan may have tax consequences. See Federal Tax Matters.
**CONTRACT LAPSE AND REINSTATEMENT**

---

**Lapse**

Your Contract will lapse (that is, terminate without value) if:

- your monthly deductions are greater than your Cash Surrender Value;
- the Death Benefit Guarantee is not in effect; and
- payment of the required premium to keep the Contract in force is not received within 61 days of the date notification is mailed to you (in most states).

If the Contract lapses, a tax may result.

If the Contract lapses, you have the right to reinstate your Contract within certain limitations. The requirements for reinstatement and associated limitations are described below and in more detail in your Contract. Reinstatement within 90 days of lapse and within the same calendar year as the lapse is most beneficial for minimizing related taxes.

---

**Reinstatement**

You may reinstate the Contract any time within three years after it has lapsed (some states may require a longer period to be able to reinstate your Contract). You cannot reinstate a Contract that was surrendered by you. To reinstate your Contract you must provide evidence of insurability that meets our standards and submit the required payment equal to or more than:

- the amount to cover the monthly deductions that were not made during the grace period;
- an amount to keep this Contract in force for at least two months, based on unit values on the date of reinstatement; and
- repayment of any loan amount and loan interest.

The premium paid upon reinstatement will be used first to pay any unpaid monthly deductions that occurred during the grace period. Your Contract will then be reinstated as of the date we approve your application for reinstatement.

We may contest the validity of the reinstated Contract based only upon statements made in the application for reinstatement for two years from the date of reinstatement.

---

**CHARGES AND DEDUCTIONS**

Charges are necessary to pay death benefits and to cover the expenses generated by issuing, distributing and administering the Contract. We expect to profit from one or more of the charges under the Contract. We can use these profits from any of these charges for any corporate purpose including our fraternal activities.

**Transaction Fees**

*Charges Deducted from Premiums (Percent of Premium Charge)*

We charge a percent of premium charge of 5% on premiums. We use this charge to cover the costs of sales and other expenses.

---

**Decrease Charge**

If you elect to surrender your Contract, reduce the Face Amount, or if the Face Amount is decreased as a result of a partial surrender or Death Benefit Option change, we will reduce your Accumulated Value by the applicable decrease charge. Decrease charges compensate us for expenses associated with underwriting, issuing and distributing the Contract. For decreases in the Face Amount or partial surrenders that result in a decrease in Face Amount during the first 10 Contract Years (or first 10 years following an increase in Face Amount), we calculate the amount of the decrease charge at the time of the reduction in Face Amount or surrender. We do not deduct this amount until the next Monthly Anniversary or upon surrender or lapse, if earlier. We do not impose any other charges (such as
mortality and expense risk charges) on the decrease charge amount during this time. Because the decrease charge is not immediately deducted, you retain the investment risk on such amount prior to deduction and will bear any investment loss and benefit from any investment gain on such amounts. If the decrease charge applies to a partial surrender, the decrease charge will be deducted from the Subaccounts and Fixed Account in the same ratios as used for the partial surrender. If the decrease charge applies to other Face Amount decreases, the decrease charge will be deducted from the Subaccounts and Fixed Account in the same ratios as the monthly deduction is taken. New decrease charges apply to each Face Amount increase.

The decrease charge is assessed on a per thousand basis. The amount per thousand of Face Amount varies by sex (in most states), Face Amount, risk class and Issue Age. For the first five Contract Years, the decrease charge remains level then grades to zero after the 10th Contract Year. Beginning in the 11th year after the Date of Issue (assuming no increases in Face Amount), the decrease charge will be zero. We list your decrease charges in your Contract.

If you increase your Contract’s Face Amount, a new decrease charge is applicable to the increase, in addition to any existing decrease charge. We list your actual decrease charges for the increased Face Amount separately on a supplementary Contract schedule. We mail the supplementary Contract schedule to you after we process the request for increase in Face Amount.

The following is an example of decrease charges for a 40-year-old male in the preferred non-tobacco risk class, $150,000 Face Amount:

<table>

</table>

If you decrease the Face Amount while the decrease charge applies, we assess a decrease charge on a per $1,000 basis. We subtract the amount of decrease first from any previous increases in the Face Amount, starting with the most recent and then as needed from the original Face Amount.

**Surrender Charge**

During the first 10 Contract Years, we charge up to $25 for each partial surrender after the first partial surrender each Contract Year. This charge is in addition to the amount withdrawn. The timing and treatment of this charge is similar to the decrease charge as described previously.

**Transfer Charge**

You may make up to twelve transfers per Contract Year from the Subaccounts without charge. We charge $25 for each transfer in excess of twelve per Contract Year. This charge is deducted from the Subaccounts and the Fixed Account in proportion to the amount transferred from each. Transfers resulting from Dollar Cost Averaging, asset rebalancing and loans do not count as transfers for the purpose of assessing this charge.
CHARGES AND DEDUCTIONS

Monthly Deductions from Accumulated Value

We deduct certain charges from Accumulated Value on a monthly basis. We refer to these charges as monthly deductions. Monthly deductions are deducted from each Subaccount or Fixed Account on a basis proportional to the Accumulated Value less any loan interest in the Contract. With our approval, you may choose other allocations of the monthly deductions. We deduct charges each month, beginning with the Contract Date (effective retroactive to the Date of Issue, if different) then monthly thereafter on each Monthly Deduction Date, provided that day of the month is a Valuation Date. If that day of the month does not fall on a Valuation Date, we use the next Valuation Date. Because portions of the deductions (e.g., the cost of insurance) can vary from month to month, the aggregate monthly deductions also will vary.

The monthly deductions consist of:
- the cost of insurance charge;
- the monthly mortality and expense risk charge;
- the monthly administrative charge; and
- charges for additional insurance benefits (riders), if any.

Cost of Insurance

We assess a monthly cost of insurance charge to compensate us for underwriting the death benefit. The charge depends on a number of variables (including Issue Age, sex (in most states), risk class, rating class, duration, and Face Amount) that would cause it to vary from Contract to Contract.

The primary factors in the determination of the cost of insurance are the cost of insurance rate (or rates) and the net amount at risk. The cost of insurance charge for the initial Face Amount equals: the cost of insurance rate for the Insured’s age shown in your Contract, multiplied by the initial net amount at risk of your Contract divided by 1,000. Factors that affect the amount at risk include investment performance, payment of premiums, charges, partial surrenders and surrenders. We deduct the cost of insurance charge on each date we assess monthly deductions, starting with your Contract Date (effective retroactive to the Date of Issue, if different).

We underwrite the applicant to determine the risk class using information provided in the application and in other sources permitted by law. The factors that we consider for underwriting include, but are not limited to:
- the amount of insurance applied for,
- the proposed Insured’s age,
- outcome of medical testing,
- reports from physicians (attending physicians’ statements); and/or
- other information such as financial information that may be required.

Based on this information, standard or preferred coverage may be offered, or if it is determined that risks for a proposed Insured are higher than would be the case for a healthy individual, the proposed Insured may receive a rating which increases cost of insurance rates or, in some cases, the proposed Insured may be declined.

Cost of Insurance Rates

Cost of insurance rates are determined for the initial Face Amount and each increase in Face Amount. Actual cost of insurance rates may change, and we will determine the actual monthly cost of insurance rates based on our expectations as to future mortality, expense and persistency experience.

Actual cost of insurance rates will never be greater than the guaranteed maximum cost of insurance rates in the Contract. These guaranteed rates are determined based upon the Insured’s Attained Age and the applicable rate in the 1980 CSO Mortality Tables for Non-smokers and Smokers. We currently use cost of insurance rates that are generally lower than the guaranteed cost of insurance rates, and we reserve the right to raise those current rates.

Our current cost of insurance rates apply uniformly to all Insureds of the same Issue Age, duration, sex, risk class and rating within the same band. Banding refers to the Face Amount. For purposes of this charge, the Face Amount includes any increases to the Face Amount made subsequent to the initial Face Amount and also
includes the amount of any term rider coverage on the Insured under this Contract. Face Amounts within increasingly higher bands will generally result in a reduced cost of insurance on a per thousand basis. Any changes in the cost of insurance rates will apply uniformly to all Insureds of the same risk class within the same band. The bands for this charge are as follows:

**Banded Levels**

- $25,000 to $99,999
- $100,000 to $249,999
- $250,000 to $499,999
- $500,000 to $999,999
- $1,000,000 and above

The cost of insurance rates generally increase as the Insured’s Attained Age increases, and they vary with the number of years the Face Amount or any increase in Face Amount has been in force. The risk class of an Insured also will affect the cost of insurance rate. Insureds in the preferred risk class generally will have a lower cost of insurance rate than those in risk classes involving higher mortality risk. The seven risk classes consist of the following:

1. Super-Preferred, Non-Tobacco
2. Preferred Non-Tobacco
3. Preferred Tobacco
4. Standard Non-Tobacco
5. Standard Tobacco
6. Substandard Non-Tobacco (Rated)
7. Substandard Tobacco (Rated)

Insureds in non-tobacco risk classes will generally have a lower cost of insurance rate than similarly situated Insureds in tobacco risk classes. We use the same guidelines in determining premiums for the cost of insurance for the Contract as we would for any other life insurance Contract of similar risk class we offer.

**Mortality and Expense Risk Charges**

The mortality and expense risk charge is a monthly charge for risks that we assume in the Contracts. The mortality risk assumed is that Insureds, as a group, may live for a shorter period of time than we estimate and, therefore, the cost of insurance charges specified in the Contract would be insufficient to meet actual claims. The expense risk is that expenses incurred in issuing and administering the Contracts and operating the Variable Account may be greater than the charges we assess for such expenses. We may use any profit to pay distribution, sales and other expenses.

The following table outlines our current annual mortality and expense risk charge that will be assessed from and based on the Accumulated Value of all of your Subaccounts. These charges are different in Maryland. No mortality and expense risk charges are deducted from the Fixed Account. This is a tiered charge based on your Accumulated Value at the time the charge is deducted.

CHARGES AND DEDUCTIONS

Administrative Charge
We deduct a charge to cover administrative costs. This charge covers such expenses as premium billing and collection, Accumulated Value calculation, transaction confirmations and periodic reports. This charge is dependent upon the Issue Age of the Insured. For Contracts we issue to Insureds whose Issue Age is from 0 to 17, we charge a monthly charge of $7.50. We charge all others $9 per month.

Rider or Additional Benefit Charge
If your Contract includes riders or additional benefits, we will deduct a monthly cost for those benefits from the Accumulated Value. Benefits include guaranteed increase option, disability waivers, applicant waiver and accidental death, term insurance rider, child term rider and spouse term insurance rider.

Fund Charges
The value of the net assets of each Subaccount reflects the investment advisory fee and other expenses incurred by the underlying Portfolios in which the Subaccount invests. For more information on these fees and expenses, refer to the Fund’s summary prospectuses and Fee Tables above.

Variation or Reduction of Charges
We may vary the charges and other terms of the Contracts if special circumstances result in reduced sales expenses, administrative expenses, or various risks. These variations will not be unfairly discriminatory to the interests of other Contract Owners. Variations may occur in Contracts sold to members of a class of associated individuals, an employer or other entities representing an associated class.

FEDERAL TAX MATTERS

General
The following discussion of the federal income tax treatment of the Contract is not exhaustive, does not purport to cover all situations, and is not intended as tax advice. The federal income tax treatment of the Contract is unclear in certain circumstances, and a qualified tax advisor should always be consulted with regard to the application of law to individual circumstances. This discussion is based on the Internal Revenue Code of 1986, as amended (the “Code”), Treasury Department regulations, and interpretations existing on the date of this Prospectus. These authorities, however, are subject to change by Congress, the Treasury Department, and judicial decisions.

This discussion generally does not address state or local tax consequences associated with the purchase of the Contract. In addition, WE MAKE NO GUARANTEE REGARDING ANY TAX TREATMENT—FEDERAL, STATE OR LOCAL—OF ANY CONTRACT OR OF ANY TRANSACTION INVOLVING A CONTRACT.

Estate, Gift and Generation-Skipping Transfer Tax Considerations
The transfer of the Contract or designation of a Beneficiary may have federal, state, and/or local transfer and inheritance tax consequences, including the imposition of gift, estate, and generation skipping transfer taxes. For example, the transfer of the Contract to, or the designation as a Beneficiary of, or the payment of proceeds to, a person who is assigned to a generation which is two or more generations below the generation assignment of the Contract Owner may have generation-skipping transfer tax consequences in addition to gift and estate tax consequences under federal tax law.
The individual situation of each Contract Owner or Beneficiary will determine the extent, if any, to which federal, state, and local transfer and inheritance taxes may be imposed and how ownership or receipt of Contract proceeds will be treated for purposes of federal, state and local estate, inheritance, generation-skipping and other taxes. If this Contract is used with estate and gift tax planning in mind, you should consult with your tax advisor as to the most up-to-date information as to federal estate, gift, and generation skipping tax rules.

**Tax Status of the Variable Account**

We are treated as the owner of the assets of the Variable Account for federal tax purposes. Also, the Variable Account is not separately taxed as a “regulated investment company” under the Code. Both the investment income and realized capital gains of the Variable Account (i.e., the income and capital gains distributed to the Variable Account by the Fund) are reinvested without tax under current law. We reserve the right in the future to make a charge against the Variable Account or the Accumulated Value of a Contract for any federal, state, or local income taxes that are incurred and that we determine to be properly attributable to the Variable Account or the Contract. We will promptly notify you of any such charge.

**Taxation of the Contract—In General**

**Tax Status of the Contract**

Section 7702 of the Code establishes a statutory definition of life insurance for federal tax purposes. While the requirements of this section of the Code are complex and limited guidance has been provided from the Internal Revenue Service (the “IRS”) or otherwise, Thrivent believes that the Contract will meet the current statutory definition of life insurance, which places limitations on the amount of premiums that may be paid and the Accumulated Values that can accumulate relative to the Death Benefit. As a result, the Death Benefit payable under the Contract will generally be excludable from the Beneficiary’s gross income, and gains and other income credited under the Contract will not be taxable unless certain withdrawals are made (or deemed to be made) from the Contract prior to the Insured’s death, as discussed below. This tax treatment generally will only apply, however, if (1) the investments of the Variable Account are “adequately diversified” in accordance with Treasury Department regulations, and (2) Thrivent, rather than the Contract Owner, is considered the owner of the assets of the Variable Account for federal income tax purposes.

The Code and Treasury Department regulations prescribe the manner in which the investments of a segregated asset account, such as the Variable Account, are to be “adequately diversified.” If the Variable Account fails to comply with these diversification standards, the Contract will not be treated as a life insurance contract for federal income tax purposes and the Contract Owner would generally be taxed currently on the income on the Contract (as defined in the tax law). We expect that the Variable Account, through the Funds, will comply with the diversification requirements prescribed by the Code and Treasury Department regulations.

In certain circumstances, variable life insurance contract owners may be considered the owners, for federal income tax purposes, of the assets of a segregated asset account, such as the Variable Account, used to support their contracts. In those circumstances, income and gains from the segregated asset account would be includible in the contract owners’ gross income on a current basis. The IRS has stated in published rulings that a variable contract owner will be considered the owner of the assets of a segregated asset account if the owner possesses incidents of ownership in those assets, such as the ability to exercise investment control over the assets.

The ownership rights under the Contract are similar to, but different in certain respects from, the ownership rights described in certain other IRS rulings where it was determined that contract owners were not owners of the assets of a segregated asset account. For example, the Owner of this Contract has the choice of more investment options to which to allocate premium payments and the Accumulated Value than were addressed in such rulings. These differences could result in the Contract Owner being treated as the owner of all or a portion of the assets of the Variable Account and thus subject to current taxation on the income and gains from those assets. In addition, we do not know what standards will be set forth in any further regulations or rulings which the Treasury Department or
the IRS may issue. We, therefore, reserve the right to modify the Contract as necessary to prevent Contract Owners from being considered the owners of the assets of the Variable Account. However, there is no assurance that such efforts would be successful.

The remainder of this discussion assumes that the Contract will be treated as a life insurance contract for federal tax purposes.

**Tax Treatment of Death Proceeds**

In general, the amount of the Death Proceeds payable from a Contract by reason of the death of the Insured is excludable from gross income under section 101 of the Code. Certain transfers of the Contract for valuable consideration, however, may result in a portion of the Death Proceeds being taxable.

If the Death Proceeds are not received in a lump sum and are, instead, applied under certain settlement options (other than settlement option 1), generally payments will be prorated between amounts attributable to the Death Proceeds, which will be excludable from the Beneficiary's income, and amounts attributable to interest (accruing after the Insured's death), which will be includible in the Beneficiary's income. If the Death Proceeds are applied under settlement option 1 (Interest Income), the interest credited will be currently includible in the Beneficiary's income.

Death Proceeds may be subject to state and/or federal estate and/or inheritance tax. The entire amount of Death Proceeds will be included in the taxable estate of an Insured if the Insured possesses control (referred to as "incidents of ownership") over the Contract at the time of death or control has not been transferred more than three years prior to death. Many factors determine if an estate is subject to estate and/or inheritance tax such as the size of the taxable estate, timing of death and the applicable state law.

**Tax Deferral During Accumulation Period**

Under existing provisions of the Code, except as described below, any increase in a Contract's Accumulated Value is generally not taxable to the Contract Owner unless amounts are received (or are deemed to be received) from the Contract prior to the Insured's death. Amounts received (or deemed to be received) from the Contract are treated as ordinary income for tax purposes. If there is a full surrender of the Contract, an amount equal to the excess of the amount received over the “investment in the contract” will generally be includible in the Contract Owner’s income. The “investment in the contract” generally is the aggregate premiums and other consideration paid for the Contract, less the aggregate amount received under the Contract previously to the extent such amounts received were excludable from gross income.

As discussed below, the taxation of partial surrenders and other amounts deemed to be distributed from the Contract depends, in part, upon whether the Contract is considered a “modified endowment contract” (“MEC”) for federal income tax purposes. The status of a Contract as a MEC also may affect whether a 10% penalty tax applies upon a surrender or other distribution, as discussed below.

**Taxation of Contracts that Are Not MECs**

**Tax Treatment of Partial Surrenders from Contracts that Are Not MECs—In General**

If the Contract is not a MEC (described below), the amount of any partial surrender from the Contract generally will be treated first as a non-taxable recovery of premium and then as income received from the Contract. Thus, a partial surrender from a Contract that is not a MEC generally will not be includible in income except to the extent it exceeds the investment in the contract immediately before the partial surrender.

**Certain Distributions Required by the Tax Law in the First 15 Contract Years**

As indicated above, Section 7702 of the Code places limitations on the amount of premiums that may be paid and the Accumulated Values that can accumulate relative to the Death Benefit. Where cash distributions are required under Section 7702 of the Code in connection with a reduction in benefits during the first 15 years after the Contract is issued (or if cash distributions are made in anticipation of a reduction in benefits, within the meaning of the tax law, during this period), some or all of such amounts may be includible in income notwithstanding the general rule described in...
the preceding paragraph. A reduction in benefits may result upon a decrease in the Face Amount, upon a change from one Death Benefit Option to the other, if a partial surrender is made, and in certain other instances.

**Tax Treatment of Loans from Contracts that Are Not MECs**

If a Contract is not a MEC, a Contract loan generally will be treated as indebtedness of the Contract Owner. As a result, no part of any Contract loan will constitute income to the Contract Owner so long as the Contract remains in force. However, in those situations where the interest rate credited to the Loan Account equals or is nearly the same as the interest rate charged for the loan, it is possible that some or all of the loan proceeds may be includible in income. If a Contract lapses or is surrendered when a Contract loan is outstanding, the portion of the Accumulated Value applied to repay the Contract loan outstanding, including any accrued and unpaid loan interest, will be treated as the proceeds of a surrender for purposes of determining whether any amounts are includible in the Contract Owner’s income. The amount of Debt over and above that secured by Accumulated Value is “excess debt” taxable as “cancellation of indebtedness”.

Generally, interest paid on any Contract loans will not be tax deductible. A limited exception to this rule exists for certain interest paid in connection with certain “key person” insurance. Contract Owners should consult a tax advisor regarding the deductibility of interest incurred in connection with this Contract.

**Taxation of Contracts that Are MECs**

If the Contract is a MEC, partial surrenders from the Contract will be treated first as withdrawals of income and then as a recovery of the investment in the Contract. Thus, partial surrenders will be includible in income to the extent the Accumulated Value exceeds the investment in the Contract. The receipt of any Contract loan, including any accrual of loan interest, will be treated as a withdrawal for tax purposes. In addition, distributions made within two years before a failure to meet the 7-Pay Test are treated as made under a MEC.

The discussion above regarding the tax treatment of deductibility of interest on loans and of lapses while loans are outstanding under the caption “Tax Treatment of Loans from Contracts that Are Not MECs” also generally applies to Contracts which are MECs.

If the Contract Owner assigns or pledges (or agrees to assign or pledge) any portion of the Accumulated Value, such portion will be treated as a withdrawal for tax purposes. If the entire Accumulated Value is assigned or pledged, subsequent increases in the Accumulated Value are also treated as withdrawals for as long as the assignment or pledge remains in place. The Contract Owner’s investment in the Contract is increased by the amount includible in income with respect to any assignment, pledge, or loan, though it is not affected by any other aspect of the assignment, pledge, or loan (including its release or repayment). Before assigning, pledging, or requesting a loan under a Contract treated as a MEC, a Contract Owner should consult a tax advisor.

**Characterization of a Contract as a MEC**

In general, a Contract will be considered a “modified endowment contract” under section 7702A of the Code (i.e., as a MEC) if (1) the Contract is received in exchange for a life insurance contract that was a MEC, or (2) the Contract is entered into on or after June 21, 1988 and premiums are paid into the Contract more rapidly than the rate defined by a “7-Pay Test.” This test generally provides that a Contract will fail this test (and thus be considered a MEC) if the accumulated amount paid under the Contract at any time during the first 7 Contract Years exceeds the cumulative sum of the net level premiums which would have been paid to that time if the Contract provided for paid-up future benefits after the payment of 7 level annual premiums. A material change of the Contract (as defined in the tax law) will generally result in a reapplication of the 7-Pay Test. In addition, any reduction in benefits during a 7-Pay testing period, including where a Contract lapses and is then reinstated more than 90 days later will affect the application of this test. We will monitor the Contracts and will attempt to notify Contract Owners on a timely basis if a Contract becomes a MEC or would become a MEC as a result of a transaction. The Contract
Owner may then request that we take any steps that may be available to avoid treatment of the Contract as a MEC, if that is desired.

**Tax Treatment of Partial Surrenders, Loans, Assignments, and Pledges Where a Contract is a MEC**

If the Contract is a MEC, partial surrenders from the Contract will be treated first as withdrawals of income and then as a recovery of the investment in the Contract. Thus, partial surrenders will be includible in income to the extent the Accumulated Value exceeds the investment in the Contract. The amount of any outstanding loans, including any accrued loan interest, will be treated as a withdrawal for tax purposes. In addition, distributions made within two years before a failure to meet the 7-Pay Test are treated as made under a MEC.

The discussion above regarding the tax treatment of deductibility of interest on loans and of lapses while loans are outstanding under the caption “Tax Treatment of Loans from Contracts that Are Not MECs” also generally applies to Contracts which are MECs.

If the Contract Owner assigns or pledges any portion of the Accumulated Value (or agrees to assign or pledge any portion), such portion will be treated as a withdrawal for tax purposes. The Contract Owner’s investment in the Contract is increased by the amount includible in income with respect to any assignment, pledge, or loan, though it is not affected by any other aspect of the assignment, pledge, or loan (including its release or repayment). Before assigning, pledging, or requesting a loan under a Contract treated as a MEC, a Contract Owner should consult a tax advisor.

**Penalty Tax**

Generally, proceeds of a full or partial surrender (or the amount of any deemed withdrawal, such as in the case of loans, assignments and pledges) from a MEC are subject to a penalty tax equal to 10% of the portion of the proceeds that is includable in income. This penalty tax does not apply where the surrender or deemed withdrawal is made (1) after the Contract Owner attains age 59½, (2) because the Contract Owner has become disabled (as defined in the tax law), or (3) as substantially equal periodic payments over the life or life expectancy of the Contract Owner (or the joint lives or life expectancies of the Contract Owner and his or her Beneficiary, as defined in the tax law).

**Aggregation of Contracts that Are MECs**

All life insurance contracts which are treated as MECs and which are purchased by the same person(s) from, or any of our affiliates, within the same calendar year will be aggregated and treated as one contract for purposes of determining the tax on withdrawals (including deemed withdrawals). Contracts issued by different companies that subsequently merge are not aggregated. The effects of such aggregation are not always clear; however, it could affect the amount of a full or partial surrender (or a deemed withdrawal) that is taxable and the amount which might be subject to the 10% penalty tax described above.

**Contracts Not Owned by Individuals**

In the case of life insurance contracts issued to a non-natural taxpayer, or held for the benefit of such an entity, the tax law provides that a portion of the taxpayer’s otherwise deductible interest expenses may not be deductible as a result of ownership of the contract even if no loans are taken under the contract. An exception to this rule is provided for certain life insurance contracts which cover the life of an individual who is a twenty percent owner, or an officer, director, or employee, of a trade or business at the time first covered by the Contract. Entities that are considering purchasing the Contract, or entities that will be beneficiaries under a Contract, should consult a tax advisor.

**Section 1035 Exchanges**

Section 1035 of the Code provides that no gain or loss will be recognized on the exchange of a life insurance contract for another life insurance contract, endowment contract, annuity contract, or qualified long-term care insurance contract, provided that certain requirements are met. If the Contract is being issued in exchange for another life insurance contract, the requirements that must be met to receive tax-free treatment under Section 1035 of the Code include, but are not limited to: (1) the contracts must have the same insured, and (2) your old contract must be exchanged for the new contract either through an assignment of your old contract or...
contract to the new insurer or by a direct transfer of the account value of the old contract to the new insurer. If your old contract was a MEC, the new life insurance contract also will be a MEC. You cannot exchange an endowment, annuity, or qualified long-term care insurance contract for a life insurance contract tax-free. If any money or other property is received in the exchange (“boot”) that satisfies the requirements of section 1035 of the Code, gain (but not loss) will be recognized equal to the lesser of the gain realized on the exchange or the amount of the boot received.

Generally, the new contract will have the same investment in the contract as the exchanged contract. However, if boot is received in the exchange the investment in the contract may be adjusted. Special rules and procedures apply to section 1035 exchanges. These rules can be complex, and if you wish to take advantage of section 1035, you should consult a tax and/or legal advisor.

Accelerated Death Benefits
If an Insured is “terminally ill,” as defined in the tax law, accelerated death benefits paid under a life insurance contract generally will be excludable from income under section 101 of the Code. Exceptions apply for certain business-related contracts and in certain situations where a Contract has been transferred for value. Under the tax law, an individual is considered “terminally ill” if the individual has been certified by a physician (as defined in the tax law) as having an illness or physical condition which can reasonably be expected to result in death in 24 months or less after the date of the certification.

Amounts paid under the Accelerated Benefits Rider may, in some (but not all) circumstances, satisfy this requirement. In addition, benefits under the Accelerated Benefits Rider may be excludable from income in certain other circumstances. If you wish to receive benefits pursuant to the Accelerated Benefits Rider and have not been certified by a physician as “terminally ill,” within the meaning of the tax law, you should consult a tax advisor regarding the tax treatment of such benefits.

Actions to Ensure Compliance with the Tax Law
We believe that the maximum amount of premiums and other values that we have determined for the Contracts will comply with the federal tax definition of life insurance under section 7702 of the Code. We will monitor the amount of premiums paid and, if the premiums paid exceed those permitted by the tax definition of life insurance, we will refund the excess premiums with interest thereon to the extent required by the Code. We also reserve the right to increase the Death Benefit (which may result in larger charges under a Contract) or to take any other action deemed necessary to ensure the compliance of the Contract with the federal tax definition of life insurance.

Other Considerations
Changing the Contract Owner, exchanging the Contract, changing from one Death Benefit Option to another, and other changes under the Contract may have tax consequences (other than those discussed herein) depending on the circumstances of such change or event. This list and the discussion herein are not exhaustive. Other transactions with respect to a Contract may also have federal income or other tax consequences. Federal estate, and state and local estate, inheritance and other tax consequences of ownership or receipt of Contract proceeds depend on the circumstances of each Contract Owner or Beneficiary.

Federal Income Tax Withholding
We will withhold and remit to the federal government a part of the taxable portion of full and partial surrenders made under a Contract unless the Contract Owner notifies us in writing, and such Notice is received at the Service Center at or before the time of the full or partial surrender, that he or she elects not to have any amounts withheld. Regardless of whether the Contract Owner requests that no taxes be withheld or whether we withhold a sufficient amount of taxes, the Contract Owner will be responsible for the payment of any taxes including any penalty tax that may be due on the amounts received. The Contract Owner may also be required to pay penalties under the estimated tax rules if the Contract Owner's withholding and estimated tax payments are insufficient to satisfy the Contract Owner's tax liability.
FATCA Withholding
If the payee of a distribution (including the Death Benefit) from the Contract is a foreign financial institution ("FFI") or a non-financial foreign entity ("NFFE") within the meaning of the Code as amended by the Foreign Account Tax Compliance Act ("FATCA"), the distribution could be subject to U.S. federal withholding tax on the taxable amount of the distribution at a 30% rate irrespective of the status of any beneficial owner of the Contract or the nature of the distribution. The rules relating to FATCA are complex, and a tax advisor should be consulted if an FFI or NFFE is or may be designated as a payee with respect to the Contract.

Nonresident Aliens and Other Foreign Persons
The discussion above provides general information regarding U.S. federal withholding tax consequences to life insurance purchasers that are U.S. citizens or residents. Purchasers or Beneficiaries that are not U.S. citizens or residents will generally be subject to U.S. federal withholding tax on taxable distributions (including taxable Death Benefit Proceeds) from life insurance policies at a 30% rate, unless a lower treaty rate applies. Prospective purchasers that are not U.S. citizens or residents and other foreign persons should consult with a tax advisor regarding federal tax withholding with respect to distributions from a Contract.

Additional Benefits and Riders
We offer several riders or additional benefits that you can add to your Contract. Certain of these riders are subject to age and underwriting requirements and may be added or cancelled at any time. We generally deduct any monthly costs for these riders from Accumulated Value as part of the monthly deduction. (See Fee Table for more information regarding rider expenses.) Your Thrivent Financial professional can help you determine whether certain riders are appropriate for you. We describe any riders included with your Contract more fully in your Contract. Accordingly, the following summaries do not include all the terms, limitations and conditions.

Disability Waivers
You may choose one of two different disability waivers. Waiver of monthly deductions provides that, in the event of your qualifying disability, we will waive your cost of insurance and expense deductions until the earlier of your age 100 or your recovery from disability. The charge for this rider is a percentage based on Attained Age multiplied by the amount of each monthly deduction. Waiver of selected amount credits the amount selected at issue. The charge for this rider is a percentage based on Attained Age multiplied by the selected amount.

Accidental Death Benefit
This benefit generally provides an additional death benefit when the Insured dies from accidental bodily injury. Subject to our overall limit on accidental death benefits, you may select the amount of coverage up to the same amount as the Face Amount of your Contract. Any accidental death benefit payable would be in addition to your basic death benefit. The charge for this rider, based on Issue Age, is a per-thousand rate multiplied by the accidental death amount.

Applicant Waiver of Selected Amount
This benefit enables the applicant on a Contract on the life of a minor to have selected amounts credited to the Contract if the applicant becomes disabled (as described above) or dies. Amounts will be credited until the end of the benefit period as defined in the rider. The charge for this benefit is a percentage based on Attained Age of the applicant and Issue Age of the Insured multiplied by the selected amount. The charge will apply until the rider terminates. The rider will terminate on the earliest of the following dates:

1. The date the applicant reaches age 65 or the end of a benefit period, if later.
ADDITIONAL BENEFITS AND RIDERS

2. The date control of the Contract is transferred to the Insured.
3. The date the Contract terminates.
4. The first monthly anniversary on or after the date we receive Notice to cancel the rider.

Guaranteed Increase Option
Purchasing this option allows you to increase the amount of coverage without having to show evidence of insurability at certain pre-defined opportunities. The charge is a per-thousand rate multiplied by the size of the guaranteed increase amount.

Child Term Life Insurance
This rider generally pays a benefit to the Beneficiary in the event of the death of a covered child of the Insured prior to the rider anniversary following the child’s 25th birthday. Conversely, in the event of the death of the Insured, the rider for any covered child will become child paid-up term insurance in force to the child’s 25th birthday. Beginning on the rider anniversary on or after the covered child’s 21st birthday until the rider anniversary on or after that child’s 25th birthday, the child will have the option to purchase his or her own life Contract without having to provide evidence of insurability. The charge for this benefit is a per-thousand rate multiplied by the amount of rider coverage. The charge does not depend upon the number of children Insured.

This rider may be issued even if there are no eligible children at the time the Contract is issued. In this case, there is no charge for this rider while there are no covered children. If you notify us within six months of the first birth or adoption, your child, and any subsequent children, will be covered without evidence of insurability. Charges will begin six months after the date of birth or adoption.

Term Life Insurance and Spouse Term Life Insurance
These riders provide additional term life insurance. The riders are available on the life of the Insured and/or on the life of the spouse of the Insured for up to 30 years.

The charge for this benefit is a per-thousand cost of insurance rate multiplied by the amount of rider coverage.

Cost of Living Adjustment Benefit
This benefit annually adjusts the Face Amount of the Contract and, if elected, your premium payments to keep pace with the Consumers’ Price Index. The maximum increase is the smallest of 1) the CPI increase on a Contract Anniversary multiplied by the Face Amount rounded up to the next $100; 2) 10% of the Face Amount; and 3) $50,000. As a result of increasing the Face Amount, monthly deductions will increase. Furthermore, a new schedule of decrease charges will apply to any resulting increase in Face Amount. Any resulting increase to the Face Amount will also require a new Death Benefit Guarantee Premium amount to be determined. There is no separate charge to implement this benefit, however, by electing the benefit you should anticipate increasing costs associated with increasing your Face Amount. This benefit terminates at the earliest of the:

1) expiration date for the rider shown on page 5-COL of the Contract;
2) date the Contract terminates;
3) date the Contract owner rejects an increase in Face Amount under the rider;
4) effective date of any decrease in Face Amount;
5) date the sum of the increases in Face Amount due to this rider equals or exceeds two times the Face Amount on the date of issue of the rider;
6) the effective date of any increase in Face Amount that has a rated Risk Class; and
7) the date the Contract owner gives Notice to cancel the rider.

Accelerated Benefits Riders
This rider pays a portion of the death benefit when requested if the Insured has a life expectancy of 12 months or less or has been in a nursing home for at
least six consecutive months and is expected to remain there for the rest of his or her life. Tax consequences may result. See Federal Tax Matters.

**Accelerated Death Benefit for Terminal Illness**

You may add this rider at any time without cost. The rider allows you to receive the present value of the death benefit tax free if eligibility requirements are met. Eligibility requirements include doctor certification that the Insured is terminally ill. State variations apply.
For financial professionals who are registered representatives of Thrivent Investment Management Inc., the following applies:

Thrivent Investment Management Inc., 625 Fourth Avenue South, Minneapolis, Minnesota 55415, an indirect subsidiary of Thrivent, is a registered broker-dealer and acts as principal underwriter and distributor of the Contracts pursuant to a distribution agreement with us. Thrivent Investment Management Inc. also acts as the distributor of a number of other variable annuity and variable life insurance contracts we offer.

The financial professional in this transaction is a duly licensed registered representative of Thrivent Investment Management Inc. and is also an appointed insurance producer of Thrivent.

Our financial professionals predominately sell insurance and annuity products of ours. It is more profitable for us and our affiliates if you purchase products issued by us instead of those issued by other insurance companies. As a result, we have a financial interest in the sale of the Contract, and an incentive to recommend that you purchase a contract issued by Thrivent instead of a contract issued by another company. Sales of Thrivent insurance products, which include variable annuity and variable life insurance contracts, help support our mission of service to congregations and communities. This gives both the organization and our members an opportunity to promote volunteerism, aid those in need, strengthen non-profit organizations and address critical community needs.

In addition, your financial professional may be paid differently depending on the product or service he or she recommends. As a result, your financial professional in this transaction may have a financial incentive to recommend that you purchase one product instead of another.

From time to time and in accordance with applicable laws and regulations, financial professionals are eligible for various incentives. These include cash incentives such as bonuses and sales incentives, or other economic benefits. In addition to the commissions or other compensation paid when you purchase or invest in a product or account, your financial professional may also be paid additional compensation based on factors including the total volume of product sales, length of time that you continue to pay premiums or keep assets invested in the products sold, and the profitability of the products.

Compensation consists of commissions, bonuses and promotional incentives. Commissions pay at a first-year commission rate of 0% to 94% of commissionable premiums paid into the Contract. Your financial professional also receives a premium based trail compensation ranging from 0% to 7% annually.

Your financial professional may receive asset-based compensation in the amount of 0.0% to 0.3% of the Accumulated Value, if eligible. If you elect a settlement option, we pay commissions to the financial professional ranging from 0.25% to 0.99% of the premium applied to the settlement option, if eligible.

Financial professionals are eligible to be paid back a portion of what they spent on marketing their financial services to the public.

For financial professionals who are registered representatives of Selling Firms, the following applies:

We and the principal underwriter of the Contracts have entered, and may enter, into selling agreements with broker-dealers that are unaffiliated with us (“Selling Firms”). The financial professional in a transaction through a Selling Firm is a registered representative of the Selling Firm, and an appointed insurance producer of Thrivent Financial. The following paragraphs describe how payments are made by us to unaffiliated Selling Firms.

The terms of any agreement governing compensation may vary among Selling Firms. The prospect of receiving, or the receipt of, compensation may provide Selling Firms and/or their registered representatives with an incentive to favor sales of the Contracts over other variable contracts (or other investments) with respect to which the Selling Firms do not receive compensation or receive lower compensation. You should take such
distribution of the contracts

payment arrangements into account when considering and evaluating any recommendation relating to the Contracts.

The maximum commission we pay to Selling Firms is 100% of first year commissionable premiums, plus up to .10% of a Contract’s Accumulated Value annually and up to 3% of paid premiums.

The registered representative typically receives a portion of the compensation we pay to the Selling Firm, based on the agreement between the Selling Firm and its registered representative. You may ask registered representatives how they will be personally compensated. The compensation described above is not charged directly to you or your Contract.

The compensation is paid from our resources, which include fees and charges imposed on your Contract.

legal proceedings

There are no legal proceedings to which the Variable Account is a party or to which the assets of the Variable Account are subject. Neither Thrivent nor Thrivent Investment Management Inc. is involved in any litigation that is of material importance in relation to their financial condition or that relates to the Variable Account.

financial statements

The financial statements of Thrivent and the Variable Account are contained in the Statement of Additional Information.

DEFINITIONS

Accumulated Value: The total value of the Contract. Accumulated Value equals the sum of the Subaccounts, the Fixed Account, the DCA Fixed Account and the Loan Account.

Accumulation Unit: A unit of measure used to calculate the Accumulated Value in each Subaccount of the Variable Account.

Accumulation Unit Value: On any Valuation Date, the value of the Accumulation Unit of each Subaccount of the Variable Account.

Additional Benefits: Benefits provided by riders, if any, attached to the Contract.

Attained Age: Attained Age on any day is the Insured's age on the Contract Anniversary on or immediately prior to that day.

Automatic Asset Rebalancing: An elective feature of the Contract that provides an automatic rebalancing of Accumulated Values of Subaccounts in accordance with your previously established rebalancing percentages.

Beneficiary: The person(s) named by the Contract Owner to receive the Death Proceeds under the Contract. A Beneficiary need not be a natural person.

Cash Surrender Value: The Accumulated Value of the Contract less any applicable decrease charges and outstanding loan balances and any deferred monthly deductions.

Committed Value: The present value of any remaining future payments for the rest of the guaranteed payment period.

Contract: The flexible premium variable life insurance Contract offered by us, (Thrivent) and described in this prospectus. The Contract consists of the Contract, any additional riders or benefits, amendments, endorsements, the application and our Articles of Incorporation and Bylaws.

Contract Anniversary: The same day and month in each succeeding year as the Date of Issue.

Contract Date: The later of the Date of Issue or the date we receive in Good Order the first premium payment at our Service Center.

Contract Year: The 12-month period following the Date of Issue or a Contract Anniversary. The Contract Year is always based upon the time elapsed since the Date of Issue.

Date of Issue: The date when we issue the Contract. This date will be specified in the Contract and may be different from the Contract Date. The Date of Issue is the date as of which we begin to apply deductions from your Accumulated Value.

DCA Fixed Account: You establish this account only when you set up the Dollar Cost Averaging plan. Net Premiums are directed to this account for subsequent monthly transfers into Subaccounts according to your allocation instructions. The amount in the DCA Fixed Account is credited with an interest rate that is determined when the payment is received. It is not a Subaccount. The DCA Fixed Account is part of our General Account, which includes all of our assets other than those in any Variable Account. The DCA Fixed Account is included as part of the Accumulated Value of your Contract.

Death Benefit Guarantee: A Contract provision that guarantees that insurance coverage will not lapse if your Cash Surrender Value is not adequate to cover the current monthly deductions as long as premium requirements are met. There are two levels of Death Benefit Guarantees available: basic and enhanced.

Death Benefit Guarantee Premium: The minimum monthly premium required to keep the Death Benefit Guarantee(s) in effect. Different combinations of age, sex, risk class, Face Amount, Death Benefit Option and additional benefits will result in different Death Benefit Guarantee Premiums.

Death Benefit Option: Either of the two methods used to determine the death benefit.
**Death Proceeds:** The amount paid upon the death of the Insured.

**Debt:** All unpaid contract loans plus accrued interest.

**Dollar Cost Averaging:** An elective program that systematically moves dollars from either the DCA Fixed Account or the Money Market Subaccount.

**Face Amount:** The amount of life insurance for which we issued the Contract. The Face Amount of your Contract may change, as described in your Contract.

**Fixed Account:** A cash value accumulation option that credits an interest rate. The Fixed Account is part of our General Account. The Fixed Account is not a Subaccount.

**Free Look Period:** The period of time in which you have the right to examine and cancel your Contract and receive, in most states, a refund equal to the sum of the Accumulated Value on the date the Contract is returned to us plus any percent of premium charge and any monthly deduction made.

**Fund:** Thrivent Series Fund, Inc., the mutual fund described in the summary prospectuses accompanying this prospectus, consisting of several Portfolios that underlie Subaccounts of the Variable Account.

**General Account:** The General Account includes all assets we own that are not in the Variable Account or any other Subaccount.

**Good Order:** Any request that is submitted with any and all required forms, information, authorization, and funds, received at our Service Center in Appleton, Wisconsin.

**Insured:** The person on whose life the Contract is issued.

**Internal Revenue Code:** The Internal Revenue Code of 1986, as amended.

**Issue Age:** The age of the Insured as of his or her last birthday on the Date of Issue.

**Loan Account:** If there is a loan against the Contract, we set up a Loan Account for you. The Loan Account is equal to the amount transferred from any Subaccount, Fixed Account and/or any DCA Fixed Account to secure the loan plus any interest credited.

**Monthly Deduction Date:** The date each month on which we deduct charges from Accumulated Value. These monthly deductions occur once each month on the nearest Valuation Date, on or next following the day of the month which corresponds to the day of the month that we issued the Contract.

**MEC Contract Year:** The 12-month period following the Date of Issue or a Contract Anniversary unless there has been a material change under IRC Section 7702A. A material change of the Contract (as defined in the tax law) results in a MEC Contract Year based upon the date of the material change. If there has been more than one material change, the most recent material change will determine the current MEC Contract Year.

**Net Premium:** The amount invested in the Contract after a 5% charge is taken for sales expenses. The percent of premium charge may not be deducted in certain situations.

**Notice:** A written request or notice signed by the Contract Owner, received in Good Order by us at our Service Center and satisfactory in form and content to us. While your Contract refers to written notice, administratively Notice may meet this requirement.

**Owner:** The person or entity who owns the Contract.

**Portfolio:** A portfolio of Thrivent Series Fund, Inc. which is the underlying investment of a corresponding Subaccount which you may select for your Contract.

**Service Center:** Our office located at 4321 North Ballard Road, Appleton, Wisconsin 54919-0001. Telephone: (800) 847-4836. E-mail: mail@thrivent.com.

**Subaccount:** A subdivision of the Variable Account. Each Subaccount invests exclusively in the shares of a corresponding Portfolio of the Fund.
Thrivent: Thrivent Financial for Lutherans, a fraternal benefit society organized under the laws of the state of Wisconsin, owned by and operated for its members. Thrivent is the issuer of the Contracts.

Thrivent Financial professional: A person who is appropriately licensed by state insurance department officials to sell the Contracts, and is a licensed registered representative of Thrivent Investment Management Inc.

Thrivent Investment Management Inc.: An indirect subsidiary of Thrivent and a registered broker-dealer and investment adviser. It serves as principal underwriter of the Contracts.

Valuation Date: Any day upon which the New York Stock Exchange is open for regular trading.

Valuation Period: The period from the end of one Valuation Date to the end of the next Valuation Date.

Variable Account: Thrivent Variable Life Account I, a segregated asset account that is separate from our General Account.

we, us, our: Thrivent.

you, your: The Owner of the Contract.
To learn more about the Contract, you should read the Statement of Additional Information (SAI) that is incorporated by reference into this prospectus. The table of contents for the SAI is provided below for your reference.

Thrivent Variable Life Account I
1933 Act Registration No. 333-103454
1940 Act Registration No. 811-08289
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio’s complete prospectus, which contains more information about the Portfolio and its risks.

- **If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

- **If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio’s prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios’ annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios’ website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. You may elect to receive shareholder reports and other communications by enrolling at Thrivent.com/gopaperless.

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.
**Investment Objective**

Thrivent Aggressive Allocation Portfolio (the "Portfolio") seeks long-term capital growth.

**Fees and Expenses**

This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

¹ The Adviser has contractually agreed, for as long as the current fee structure is in place and through at least April 30, 2021, to waive an amount equal to any management fees indirectly incurred by the Portfolio as a result of its investment in any other mutual fund for which the Adviser or an affiliate serves as investment adviser, other than Thrivent Cash Management Trust. This contractual provision may be terminated upon the mutual agreement between the Independent Directors of the Portfolio and the Adviser.

**EXAMPLE**

This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. In addition, the example for the 1 Year period reflects the effect of the contractual fee waiver and/or expense reimbursement. The example also assumes that your investment has a 5% return each year, and that the Portfolio's operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

<td>$498</td>
<td>$1,127</td>
</tr>
</tbody>
</table>

**Portfolio Turnover**

The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio’s performance. During the most recent fiscal year, the Portfolio’s portfolio turnover rate was 60% of the average value of its portfolio.

**Principal Strategies**

The Portfolio pursues its objective by investing in a combination of other funds managed by the Adviser or an affiliate and directly held financial instruments. The Portfolio is designed for investors who seek greater long-term capital growth and are comfortable with higher levels of risk and volatility. The Portfolio uses a prescribed asset allocation strategy involving a two-step process that is designed to achieve its desired risk tolerance. The first step is the construction of a model for the allocation of the Portfolio’s assets across broad asset categories (namely, equity securities and debt securities). The second step involves the determination of sub-classes within the broad asset categories and target weightings (i.e., what the Adviser determines is the strategic allocation) for these sub-classes. Sub-classes for equity securities may be based on market capitalization, investment style (such as growth or value), or economic sector. Sub-classes for debt securities may be based on maturity, duration, security type or credit rating (high yield—commonly known as “junk bonds”—or investment grade).

The use of target weightings for various sub-classes within broad asset categories is intended as a multi-style approach to reduce the risk of investing in securities having common characteristics. The Portfolio may buy and sell futures contracts to either hedge its exposure or obtain exposure to certain investments.

The Portfolio may invest in foreign securities, including those of issuers in emerging markets. An “emerging market” country is any country determined by the
Adviser to have an emerging market economy, considering factors such as the country’s credit rating, its political and economic stability and the development of its financial and capital markets.

Under normal circumstances, the Portfolio invests in the following broad asset classes within the ranges given:

<table>
<thead>
<tr>
<th>Broad Asset Category</th>
<th>Target Allocation</th>
<th>Allocation Range</th>
</tr>
</thead>
<tbody>
<tr>
<td>Equity Securities</td>
<td>95%</td>
<td>75-100%</td>
</tr>
<tr>
<td>Debt Securities</td>
<td>5%</td>
<td>0-25%</td>
</tr>
</tbody>
</table>

The Portfolio’s actual holdings in each broad asset category may be outside the applicable allocation range from time to time due to differing investment performance among asset categories. The Adviser will rebalance the Portfolio at least annually so that its holdings are within the ranges for the broad asset categories.

The Portfolio pursues its investment strategy by investing primarily in other mutual funds managed by the Adviser or an affiliate. The names of the funds managed by the Adviser or an affiliate which are currently available for investment by the Portfolio are shown in the list below. The list is provided for information purposes only. The Adviser may change the availability of the funds managed by the Adviser or an affiliate for investment by the Portfolio without shareholder approval or advance notice to shareholders.

**Principal Risks**

The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

**Allocation Risk.** The Portfolio’s investment performance depends upon how its assets are allocated across broad asset categories and applicable sub-classes within such categories. Some broad asset categories and sub-classes may perform below expectations or the securities markets generally over short and extended periods. Therefore, a principal risk of investing in the Portfolio is that the allocation strategies used and the allocation decisions made will not produce the desired results.

**Equity Security Risk.** Equity securities held by the Portfolio may decline significantly in price, sometimes rapidly or unpredictably, over short or extended periods of time, and such declines may occur because of declines in the equity market as a whole, or because of declines in only a particular country, company, industry, or sector of the market. From time to time, the Portfolio may invest a significant portion of its assets in companies in one or more related sectors or industries which would make the Portfolio more vulnerable to adverse developments affecting such sectors or industries. Equity securities are generally more volatile than most debt securities.

**Large Cap Risk.** Large-sized companies may be unable to respond quickly to new competitive challenges such as changes in technology. They may also not be able to attain the high growth rate of successful smaller companies, especially during extended periods of economic expansion.

**Small Cap Risk.** Smaller, less seasoned companies often have greater price volatility, lower trading volume, and less liquidity than larger, more established companies. These companies tend to have small revenues, narrower product lines, less management depth and experience, smaller shares of their product or service markets, fewer financial resources, and less competitive strength than larger companies. Such companies seldom pay significant dividends that could soften the impact of a falling market on returns.

**Mid Cap Risk.** Medium-sized companies often have greater price volatility, lower trading volume, and less liquidity than larger, more-established companies. These companies tend to have small revenues, narrower product lines, less management depth and experience, smaller shares of their product or service markets, fewer financial resources, and less competitive strength than larger companies.
**Market Risk.** Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio's investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio's benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

**Other Funds Risk.** Because the Portfolio invests in other funds managed by the Adviser or an affiliate (“Other Funds”), the performance of the Portfolio is dependent, in part, upon the performance of Other Funds in which the Portfolio may invest. As a result, the Portfolio is subject to the same risks as those faced by the Other Funds. In addition, Other Funds may be subject to additional fees and expenses that will be borne by the Portfolio.

**Growth Investing Risk.** Growth style investing includes the risk of investing in securities whose prices historically have been more volatile than other securities, especially over the short term. Growth stock prices reflect projections of future earnings or revenues and, if a company's earnings or revenues fall short of expectations, its stock price may fall dramatically.

**Value Investing Risk.** Value style investing includes the risk that stocks of undervalued companies may not rise as quickly as anticipated if the market doesn’t recognize their intrinsic value or if value stocks are out of favor.

**Foreign Securities Risk.** Foreign securities generally carry more risk and are more volatile than their domestic counterparts, in part because of potential for higher political and economic risks, lack of reliable information and fluctuations in currency exchange rates where investments are denominated in currencies other than the U.S. dollar. Certain events in foreign markets may adversely affect foreign and domestic issuers, including interruptions in the global supply chain, natural disasters and outbreak of infectious diseases. The Portfolio's investment in any country could be subject to governmental actions such as capital or currency controls, nationalizing a company or industry, expropriating assets, or imposing punitive taxes that would have an adverse effect on security prices, and impair the Portfolio's ability to repatriate capital or income. Foreign securities may also be more difficult to resell than comparable U.S. securities because the markets for foreign securities are often less liquid. Even when a foreign security increases in price in its local currency, the appreciation may be diluted by adverse changes in exchange rates when the security's value is converted to U.S. dollars. Foreign withholding taxes also may apply and errors and delays may occur in the settlement process for foreign securities.

**Emerging Markets Risk.** The economic and political structures of developing countries in emerging markets, in most cases, do not compare favorably with the U.S. or other developed countries in terms of wealth and stability, and their financial markets often lack liquidity. Portfolio performance will likely be negatively affected by portfolio exposure to countries and corporations domiciled in or with revenue exposures to countries in the midst of, among other things, hyperinflation, currency devaluation, trade disagreements, sudden political upheaval, or interventionist government policies. Portfolio performance may also be negatively affected by portfolio exposure to countries and corporations domiciled in or with revenue exposures to countries with less developed legal, tax, regulatory, and accounting systems. Significant buying or selling actions by a few major investors may also heighten the volatility of emerging markets. These factors make investing in emerging market countries significantly riskier than in other countries, and events in any one country could cause the Portfolio's share price to decline.

**Foreign Currency Risk.** The value of a foreign currency may decline against the U.S. dollar, which would reduce the dollar value of securities denominated in that currency. The overall impact of such a decline of foreign currency can be significant, unpredictable, and long lasting, depending on the currencies represented, how each one appreciates or depreciates in relation to the U.S. dollar, and whether currency positions are hedged. Under normal conditions, the Portfolio does not engage in extensive foreign currency hedging programs. Further, exchange rate movements are volatile, and it is not possible to effectively hedge the currency risks of many developing countries.

**Investment Adviser Risk.** The Portfolio is actively managed and the success of its investment strategy depends significantly on the skills of the Adviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio's investment objective. **Conflicts of Interest Risk.** An investment in the Portfolio will be subject to a number of actual or potential conflicts of interest. For example, the Adviser or its affiliates may provide services to the Portfolio for which the Portfolio would compensate the Adviser and/or such affiliates. The Portfolio may invest in other pooled investment vehicles sponsored, managed, or otherwise affiliated with the Adviser, including other Portfolios. The Adviser may have an incentive (financial or otherwise) to enter into transactions or arrangements on behalf of the Portfolio with itself or its affiliates in
circumstances where it might not have done so otherwise.

The Adviser or its affiliates manage other investment funds and/or accounts (including proprietary accounts) and have other clients with investment objectives and strategies that are similar to, or overlap with, the investment objective and strategy of the Portfolio, creating conflicts of interest in investment and allocation decisions regarding the allocation of investments that could be appropriate for the Portfolio and other clients of the Adviser or their affiliates.

**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer’s securities and therefore the value of the Portfolio.

**Quantitative Investing Risk.** Quantitative Investing Risk is the risk that securities selected according to a quantitative analysis methodology can perform differently from the market as a whole based on the model and the factors used in the analysis, the weight placed on each factor and changes in the factor’s historical trends. Such models are based on assumptions of these and other market factors, and the models may not take into account certain factors, or perform as intended, and may result in a decline in the value of the Portfolio’s portfolio.

**Derivatives Risk.** The use of derivatives (such as futures) involves additional risks and transaction costs which could leave the Portfolio in a worse position than if it had not used these instruments. The Portfolio utilizes equity futures in order to increase or decrease its exposure to various asset classes at a lower cost than trading stocks directly. The use of derivatives can lead to losses because of adverse movements in the price or value of the underlying asset, index or rate, which may be magnified by certain features of the contract. Changes in the value of the derivative may not correlate as intended with the underlying asset, rate or index, and the Portfolio could lose much more than the original amount invested. Derivatives can be highly volatile, illiquid and difficult to value. Certain derivatives may also be subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill its contractual obligations due to its financial condition, market events, or other reasons.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance from year to year and by showing how the Portfolio’s average annual returns for one-, five- and ten-year periods compared to broad-based securities market indices. The index descriptions appear in the “Index Descriptions” section of the prospectus. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart and table include the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assume that you sold your investment at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

### Management

**Investment Adviser(s)**

The Portfolio is managed by Thrivent Financial for Lutherans (“Thrivent Financial” or the “Adviser”).

**Portfolio Manager(s)**

**Mark L. Simenstad, CFA, Darren M. Bagwell, CFA, Stephen D. Lowe, CFA, David S. Royal** and **David R. Spangler, CFA** are jointly and primarily responsible for the day-to-day management of the Portfolio. Mr. Simenstad has served as a portfolio manager of the Portfolio since April 2005. Mr. Bagwell and Mr. Lowe have served as portfolio managers of the Portfolio since April 2016. Mr. Royal has served as portfolio manager of the Portfolio since April 2018. Mr. Spangler has served as a portfolio manager of the Portfolio since February 2019. Mr. Simenstad is Chief Investment Strategist and has been with Thrivent Financial since 1999. Mr. Bagwell is Vice President, Chief Equity Strategist and has been with Thrivent Financial in an investment management capacity since 2002. Mr. Lowe is Vice President of Fixed Income Mutual Funds and Separate Accounts and has been with Thrivent Financial since 1997. He has served as a portfolio manager since 2009. Mr. Royal is Chief Investment Officer and has been with Thrivent Financial since 2006. Mr. Spangler has been with Thrivent Financial since 2002, in an investment management capacity since 2006 and currently is a Senior Portfolio Manager.

### Purchase and Sale of Shares

Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:

- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

### Tax Information

For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

### Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio’s complete prospectus, which contains more information about the Portfolio and its risks.

- **If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

- **If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio’s prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios’ annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios’ website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. You may elect to receive shareholder reports and other communications by enrolling at Thrivent.com/gopaperless.

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.
**Thrivent All Cap Portfolio**

**Investment Objective**

The investment objective of Thrivent Partner All Cap Portfolio (the "Portfolio") is to seek long-term growth of capital.

**Fees and Expenses**

This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

**EXAMPLE** This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year, and that the Portfolio’s operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

<table>
<thead>
<tr>
<th>1 Year</th>
<th>3 Years</th>
<th>5 Years</th>
<th>10 Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thrivent All Cap Portfolio</td>
<td>$73</td>
<td>$227</td>
<td>$395</td>
</tr>
</tbody>
</table>

**Principal Strategies**

The Portfolio’s principal strategy for achieving its objective is normally to invest the Portfolio’s assets primarily in common stocks of companies of any market capitalization.

The Portfolio’s Adviser is not constrained by any particular investment style. At any given time, the Adviser may tend to buy “growth” stocks or “value” stocks, or a combination of both types.

The Portfolio seeks to achieve its objective by investing in common stocks. The Adviser uses fundamental, quantitative, and technical investment research techniques and includes stocks of companies that it believes have demonstrated and will sustain above average earnings growth in the future when compared to the economy and the stock market as a whole. In addition, the Portfolio may invest in companies that it believes are undervalued in relation to their long-term earnings power or asset value.

Issuers of potential investments are analyzed using fundamental factors such as growth potential, earnings estimates, and financial condition. The Portfolio may sell securities for a variety of reasons, such as to secure gains, limit losses, or reposition assets into more promising opportunities.

**Principal Risks**

The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

**Equity Security Risk.** Equity securities held by the Portfolio may decline significantly in price, sometimes rapidly or unpredictably, over short or extended periods of time, and such declines may occur because of declines in the equity market as a whole, or because of declines in only a particular country, company, industry, or sector of the market. From time to time, the Portfolio may invest a significant portion of its assets in...
companies in one or more related sectors or industries which would make the Portfolio more vulnerable to adverse developments affecting such sectors or industries. Equity securities are generally more volatile than most debt securities.

**Market Risk.** Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio's investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio's benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

**Large Cap Risk.** Large-sized companies may be unable to respond quickly to new competitive challenges such as changes in technology. They may also not be able to attain the high growth rate of successful smaller companies, especially during extended periods of economic expansion.

**Growth Investing Risk.** Growth style investing includes the risk of investing in securities whose prices historically have been more volatile than other securities, especially over the short term. Growth stock prices reflect projections of future earnings or revenues and, if a company's earnings or revenues fall short of expectations, its stock price may fall dramatically.

**Value Investing Risk.** Value style investing includes the risk that stocks of undervalued companies may not rise as quickly as anticipated if the market doesn’t recognize their intrinsic value or if value stocks are out of favor.

**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer's securities and therefore the value of the Portfolio.

**Investment Adviser Risk.** The Portfolio is actively managed and the success of its investment strategy depends significantly on the skills of the Adviser or subadviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio's investment objective.

**Mid Cap Risk.** Medium-sized companies often have greater price volatility, lower trading volume, and less liquidity than larger, more-established companies. These companies tend to have smaller revenues, narrower product lines, less management depth and experience, smaller shares of their product or service markets, fewer financial resources, and less competitive strength than larger companies.

**Small Cap Risk.** Smaller, less seasoned companies often have greater price volatility, lower trading volume, and less liquidity than larger, more established companies. These companies tend to have small revenues, narrower product lines, less management depth and experience, small shares of their product or service markets, fewer financial resources, and less competitive strength than larger companies. Such companies seldom pay significant dividends that could soften the impact of a falling market on returns.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance from year to year and by showing how the Portfolio’s average annual returns for one-, five-, and ten-year periods compared to broad-based securities market indices. The index descriptions appear in the "Index Descriptions” section of the prospectus. The Portfolio now compares its returns to the Russell 3000 Index because it is commonly used by funds with the same investment objective and principal strategies as the Portfolio. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart and table include the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assume that you sold your investment at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

**Management**

**Investment Adviser(s)**

The Portfolio is managed by Thrivent Financial for Lutherans ("Thrivent Financial" or the "Adviser").

**Portfolio Manager(s)**

**Matthew D. Finn, CFA** and **John T. Groton, Jr., CFA** are jointly and primarily responsible for the day-to-day management of the Portfolio. Mr. Finn and Mr. Groton have served as portfolio managers of the Portfolio since February 2019. Mr. Finn is Vice President, Head of Equity Funds and has been with Thrivent Financial in an investment management capacity since April 2004. Mr. Groton is the Director of Equity Research and has been with Thrivent Financial in an investment management capacity since July 2007.

**Purchase and Sale of Shares**

Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:

- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

**Tax Information**

For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

**Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio's complete prospectus, which contains more information about the Portfolio and its risks.

- **If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:**
  You can find the Portfolio's prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.
Thrivent Balanced Income Plus Portfolio

Investment Objective

Thrivent Balanced Income Plus Portfolio (the "Portfolio") seeks long-term total return through a balance between income and the potential for long-term capital growth.

Fees and Expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of Thrivent Balanced Income Plus Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

<th>5 Years</th>
<th>10 Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thrivent Balanced Income Plus Portfolio</td>
<td>$67</td>
<td>$211</td>
<td>$368</td>
</tr>
</tbody>
</table>

Portfolio Turnover

The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio's performance. During the most recent fiscal year, the Portfolio's portfolio turnover rate was 109% of the average value of its portfolio.

Principal Strategies

Under normal circumstances, the Portfolio invests in a combination of equity securities and debt securities within the ranges shown in the following table:

<table>
<thead>
<tr>
<th>Broad Asset Category</th>
<th>Target Allocation</th>
<th>Allocation Range</th>
</tr>
</thead>
<tbody>
<tr>
<td>Equity Securities</td>
<td>50%</td>
<td>25-75%</td>
</tr>
<tr>
<td>Debt Securities</td>
<td>50%</td>
<td>25-75%</td>
</tr>
</tbody>
</table>

The equity securities in which the Portfolio invests may include common stock, preferred stock, securities convertible into common stock, or securities or other instruments the price of which is linked to the value of common stock.

The debt securities in which the Portfolio invests may be of any maturity or credit quality, including high yield, high risk bonds, notes, debentures and other debt obligations commonly known as “junk bonds.” At the time of purchase, these high-yield securities are rated within or below the “BB” major rating category by S&P or the “Ba” major rating category by Moody’s or are unrated but considered to be of comparable quality by the Adviser. The Portfolio may also invest in leveraged loans, which are senior secured loans that are made by banks or other lending institutions to companies that are rated below investment grade. In addition, the Portfolio may invest in investment-grade corporate bonds, asset-backed securities, mortgage-backed securities (including commercially backed ones), convertible bonds, and sovereign and emerging market debt (both U.S. dollar and non-U.S. dollar denominated).

The Portfolio may invest in foreign securities, including those of issuers in emerging markets. An “emerging market” country is any country determined by the Adviser to have an emerging market economy, considering factors such as the country's credit rating, its political and economic stability and the development of its financial and capital markets.
The Portfolio utilizes derivatives primarily in the form of U.S. Treasury futures contracts in order to manage the Portfolio's duration, or interest rate risk. The Portfolio may enter into derivatives contracts traded on exchanges or in the over the counter market.

The Portfolio may also pursue its investment strategy by investing in other mutual funds managed by the Adviser or an affiliate.

The Adviser uses fundamental, quantitative and technical investment research techniques to determine what to buy and sell. Fundamental techniques assess a security's value based on an issuer's financial profile, management, and business prospects while quantitative and technical techniques involve a more data-oriented analysis of financial information, market trends and price movements.

**Principal Risks**

The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

**Equity Security Risk.** Equity securities held by the Portfolio may decline significantly in price, sometimes rapidly or unpredictably, over short or extended periods of time, and such declines may occur because of declines in the equity market as a whole, or because of declines in only a particular country, company, industry, or sector of the market. From time to time, the Portfolio may invest a significant portion of its assets in companies in one or more related sectors or industries which would make the Portfolio more vulnerable to adverse developments affecting such sectors or industries. Equity securities are generally more volatile than most debt securities.

**Interest Rate Risk.** Interest rate risk is the risk that prices of debt securities decline in value when interest rates rise for debt securities that pay a fixed rate of interest. Debt securities with longer durations (a measure of price sensitivity of a bond or bond fund to changes in interest rates) or maturities (i.e., the amount of time until a bond's issuer must pay its principal or face value) tend to be more sensitive to changes in interest rates than debt securities with shorter durations or maturities. Changes by the Federal Reserve to monetary policies could affect interest rates and the value of some securities. In addition, the phase out of LIBOR (the offered rate for short-term Eurodollar deposits between major international banks) by the end of 2021 could lead to increased volatility and illiquidity in certain markets that currently rely on LIBOR to determine interest rates.

**Credit Risk.** Credit risk is the risk that an issuer of a debt security to which the Portfolio is exposed may no longer be able or willing to pay its debt. As a result of such an event, the debt security may decline in price and affect the value of the Portfolio.

**Allocation Risk.** The Portfolio's investment performance depends upon how its assets are allocated across broad asset categories and applicable sub-classes within such categories. Some broad asset categories and sub-classes may perform below expectations or the securities markets generally over short and extended periods. Therefore, a principal risk of investing in the Portfolio is that the allocation strategies used and the allocation decisions made will not produce the desired results.

**Market Risk.** Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio's investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio's benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

**Large Cap Risk.** Large-sized companies may be unable to respond quickly to new competitive challenges such as changes in technology. They may also not be able to attain the high growth rate of successful smaller companies, especially during extended periods of economic expansion.

**Leveraged Loan Risk.** Leveraged loans (also known as bank loans) are subject to the risks typically associated with debt securities. In addition, leveraged loans, which typically hold a senior position in the capital structure of a borrower, are subject to the risk that a court could subordinate such loans to presently existing or future indebtedness or take other action detrimental to the holders of leveraged loans. Leveraged loans are also subject to the risk that the value of the collateral, if any, securing a loan may decline, be insufficient to meet the obligations of the borrower, or be difficult to liquidate. Some leveraged loans are not as easily purchased or sold as publicly-traded securities and others are illiquid, which may make it more difficult for the Portfolio to value them or dispose of them at an acceptable price. Below investment-grade leveraged loans are typically more credit sensitive. In the event of fraud or misrepresentation, the Portfolio may not be protected under federal securities laws with respect to leveraged loans that may not be in the form of “securities.” The settlement period for some leveraged loans may be more than seven days.

**Prepayment Risk.** When interest rates fall, certain obligations will be paid off by the obligor more quickly than originally anticipated, and a Portfolio may have to invest the proceeds in securities with lower yields. In
periods of falling interest rates, the rate of prepayments tends to increase (as does price fluctuation) as borrowers are motivated to pay off debt and refinance at new lower rates. During such periods, reinvestment of the prepayment proceeds by the management team will generally be at lower rates of return than the return on the assets that were prepaid. Prepayment generally reduces the yield to maturity and the average life of the security.

**Foreign Securities Risk.** Foreign securities generally carry more risk and are more volatile than their domestic counterparts, in part because of potential for higher political and economic risks, lack of reliable information and fluctuations in currency exchange rates where investments are denominated in currencies other than the U.S. dollar. Certain events in foreign markets may adversely affect foreign and domestic issuers, including interruptions in the global supply chain, natural disasters and outbreak of infectious diseases. The Portfolio's investment in any country could be subject to governmental actions such as capital or currency controls, nationalizing a company or industry, expropriating assets, or imposing punitive taxes that would have an adverse effect on security prices, and impair the Portfolio's ability to repatriate capital or income. Foreign securities may also be more difficult to resell than comparable U.S. securities because the markets for foreign securities are often less liquid. Even when a foreign security increases in price in its local currency, the appreciation may be diluted by adverse changes in exchange rates when the security’s value is converted to U.S. dollars. Foreign withholding taxes also may apply and errors and delays may occur in the settlement process for foreign securities.

**Emerging Markets Risk.** The economic and political structures of developing countries in emerging markets, in most cases, do not compare favorably with the U.S. or other developed countries in terms of wealth and stability, and their financial markets often lack liquidity. Portfolio performance will likely be negatively affected by portfolio exposure to countries and corporations domiciled in or with revenue exposures to countries in the midst of, among other things, hyperinflation, currency devaluation, trade disagreements, sudden political upheaval, or interventionist government policies. Portfolio performance may also be negatively affected by portfolio exposure to countries and corporations domiciled in or with revenue exposures to countries with less developed legal, tax, regulatory, and accounting systems. Significant buying or selling actions by a few major investors may also heighten the volatility of emerging markets. These factors make investing in emerging market countries significantly riskier than in other countries, and events in any one country could cause the Portfolio's share price to decline.

**Foreign Currency Risk.** The value of a foreign currency may decline against the U.S. dollar, which would reduce the dollar value of securities denominated in that currency. The overall impact of such a decline of foreign currency can be significant, unpredictable, and long lasting, depending on the currencies represented, how each one appreciates or depreciates in relation to the U.S. dollar, and whether currency positions are hedged. Under normal conditions, the Portfolio does not engage in extensive foreign currency hedging programs. Further, exchange rate movements are volatile, and it is not possible to effectively hedge the currency risks of many developing countries.

**Mortgage-Backed and Other Asset-Backed Securities Risk.** The value of mortgage-backed and asset-backed securities will be influenced by the factors affecting the housing market and the assets underlying such securities. As a result, during periods of declining asset value, difficult or frozen credit markets, swings in interest rates, or deteriorating economic conditions, mortgage-related and asset-backed securities may decline in value, face valuation difficulties, become more volatile and/or become illiquid. In addition, both mortgage-backed and asset-backed securities are sensitive to changes in the repayment patterns of the underlying security. If the principal payment on the underlying asset is repaid faster or slower than the holder of the asset-backed or mortgage-backed security anticipates, the price of the security may fall, particularly if the holder must reinvest the repaid principal at lower rates or must continue to hold the security when interest rates rise. This effect may cause the value of the Portfolio to decline and reduce the overall return of the Portfolio.

**High Yield Risk.** High yield securities – commonly known as “junk bonds” – to which the Portfolio is exposed are considered predominantly speculative with respect to the issuer's continuing ability to make principal and interest payments. If the issuer of the security is in default with respect to interest or principal payments, the value of the Portfolio may be negatively affected. High yield securities generally have a less liquid resale market.

**Sovereign Debt Risk.** Sovereign debt securities are issued or guaranteed by foreign governmental entities. These investments are subject to the risk that a governmental entity may delay or refuse to pay interest or repay principal on its sovereign debt, due, for example, to cash flow problems, insufficient foreign currency reserves, political considerations, the relative size of the governmental entity's debt position in relation to the economy or the failure to put in place economic reforms required by the International Monetary Fund or other multilateral agencies. If a governmental entity defaults, it may ask for more time in which to pay or for further loans. There is no legal
process for collecting sovereign debts that a government does not pay nor are there bankruptcy proceedings through which all or part of the sovereign debt that a governmental entity has not repaid may be collected.

**Quantitative Investing Risk.** Quantitative Investing Risk is the risk that securities selected according to a quantitative analysis methodology can perform differently from the market as a whole based on the model and the factors used in the analysis, the weight placed on each factor and changes in the factor's historical trends. Such models are based on assumptions of these and other market factors, and the models may not take into account certain factors, or perform as intended, and may result in a decline in the value of the Portfolio’s portfolio.

**Investment Adviser Risk.** The Portfolio is actively managed and the success of its investment strategy depends significantly on the skills of the Adviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio’s investment objective.

**Conflicts of Interest Risk.** An investment in the Portfolio will be subject to a number of actual or potential conflicts of interest. For example, the Adviser or its affiliates may provide services to the Portfolio for which the Portfolio would compensate the Adviser and/or such affiliates. The Portfolio may invest in other pooled investment vehicles sponsored, managed, or otherwise affiliated with the Adviser, including other Portfolios. The Adviser may have an incentive (financial or otherwise) to enter into transactions or arrangements on behalf of the Portfolio with itself or its affiliates in circumstances where it might not have done so otherwise.

The Adviser or its affiliates manage other investment funds and/or accounts (including proprietary accounts) and have other clients with investment objectives and strategies that are similar to, or overlap with, the investment objective and strategy of the Portfolio, creating conflicts of interest in investment and allocation decisions regarding the allocation of investments that could be appropriate for the Portfolio and other clients of the Adviser or their affiliates.

**Other Funds Risk.** Because the Portfolio invests in other funds managed by the Adviser or an affiliate (“Other Funds”), the performance of the Portfolio is dependent, in part, upon the performance of Other Funds in which the Portfolio may invest. As a result, the Portfolio is subject to the same risks as those faced by the Other Funds. In addition, Other Funds may be subject to additional fees and expenses that will be borne by the Portfolio.

**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer’s securities and therefore the value of the Portfolio.

**Derivatives Risk.** The use of derivatives (such as futures) involves additional risks and transaction costs which could leave the Portfolio in a worse position than if it had not used these instruments. The Portfolio utilizes futures on U.S. Treasuries in order to manage duration. The use of derivatives can lead to losses because of adverse movements in the price or value of the underlying asset, index or rate, which may be magnified by certain features of the contract. Changes in the value of the derivative may not correlate as intended with the underlying asset, rate or index, and the Portfolio could lose much more than the original amount invested. Derivatives can be highly volatile, illiquid and difficult to value. Certain derivatives may also be subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill its contractual obligations due to its financial condition, market events, or other reasons.

**Liquidity Risk.** Liquidity is the ability to sell a security relatively quickly for a price that most closely reflects the actual value of the security. Dealer inventories of bonds are at or near historic lows in relation to market size, which has the potential to decrease liquidity and increase price volatility in the fixed income markets, particularly during periods of economic or market stress. As a result of this decreased liquidity, the Portfolio may have to accept a lower price to sell a security, sell other securities to raise cash, or give up an investment opportunity, any of which could have a negative effect on performance.

**Portfolio Turnover Rate Risk.** The Portfolio may engage in active and frequent trading of portfolio securities in implementing its principal investment strategies. A high rate of portfolio turnover (100% or more) involves correspondingly greater expenses which are borne by the Portfolio and its shareholders and may also result in short-term capital gains taxable to shareholders.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.
Performance

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance from year to year and by showing how the Portfolio’s average annual returns for one-, five- and ten-year periods compared to broad-based securities market indices. The index descriptions appear in the "Index Descriptions" section of the prospectus. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart and table include the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assume that you sold your investment at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

Effective August 16, 2013, based on approval of the Portfolio’s Board of Directors and notice to Portfolio shareholders, the Portfolio’s principal strategies were changed, which had the effect of converting the Portfolio from one which incorporated the strategies of Thrivent Large Cap Index Portfolio and Thrivent Bond Index Portfolio (now known as Thrivent Government Bond Portfolio) to one which invests in a combination of equity securities and debt securities. At the same time, the Portfolio’s name changed from Thrivent Balanced Portfolio to Thrivent Balanced Income Plus Portfolio. As a result, performance information presented below with respect to periods prior to August 16, 2013, reflects the performance of an investment portfolio that was materially different from the investment portfolio of Thrivent Balanced Income Plus Portfolio.

How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

Management

Investment Adviser(s)

The Portfolio is managed by Thrivent Financial for Lutherans (“Thrivent Financial” or the “Adviser”).

Portfolio Manager(s)

Stephen D. Lowe, CFA, Mark L. Simenstad, CFA, Noah J. Monsen, CFA, Darren M. Bagwell, CFA and David R. Spangler, CFA are jointly and primarily responsible for the day-to-day management of the Portfolio. Mr. Lowe has served as a portfolio manager of the Portfolio since August 2013. Mr. Simenstad and Mr. Monsen have served as portfolio managers of the Portfolio since April 2015. Mr. Bagwell and Mr. Spangler have served as portfolio managers of the Portfolio since February 2019. Mr. Lowe is Vice President of Fixed Income Mutual Funds and Separate Accounts and has been with Thrivent Financial since 1997. He has served as a portfolio manager since 2009. Mr. Simenstad is Chief Investment Strategist and has been with Thrivent Financial since 1999. Mr. Monsen has been with Thrivent Financial since 2000 and has served in an investment management capacity since 2008. Mr. Bagwell is Vice President, Chief Equity Strategist and has been with Thrivent Financial in an investment management capacity since 2002. Mr. Spangler has been with Thrivent Financial since 2002, in an investment management capacity since 2006 and currently is a Senior Portfolio Manager.
Purchase and Sale of Shares
Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:

- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

Tax Information
For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

Payments to Broker-Dealers and Other Financial Intermediaries
If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio’s complete prospectus, which contains more information about the Portfolio and its risks.

- **If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

- **If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio’s prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios’ annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios’ website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. You may elect to receive shareholder reports and other communications by enrolling at Thrivent.com/gopaperless.

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.
Thrivent Diversified Income Plus Portfolio

Investment Objective
Thrivent Diversified Income Plus Portfolio (the "Portfolio") seeks to maximize income while maintaining prospects for capital appreciation.

Fees and Expenses
This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

EXAMPLE This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year, and that the Portfolio's operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

| | 1 Year | 3 Years | 5 Years | 10 Years |
|--------------------------------|
| Thrivent Diversified Income Plus Portfolio | $51 | $160 | $280 | $628 |

Portfolio Turnover
The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio's performance. During the most recent fiscal year, the Portfolio's portfolio turnover rate was 157% of the average value of its portfolio.

Principal Strategies
Under normal circumstances, the Portfolio invests in a combination of equity securities and debt securities within the ranges shown in the following table:

<table>
<thead>
<tr>
<th>Broad Asset Category</th>
<th>Target Allocation</th>
<th>Allocation Range</th>
</tr>
</thead>
<tbody>
<tr>
<td>Debt Securities</td>
<td>75%</td>
<td>55-95%</td>
</tr>
<tr>
<td>Equity Securities</td>
<td>25%</td>
<td>5-45%</td>
</tr>
</tbody>
</table>

The equity securities in which the Portfolio invests may include common stock, preferred stock, securities convertible into common stock, or securities or other instruments the price of which is linked to the value of common stock.

The debt securities in which the Portfolio invests may be of any maturity or credit quality, including high yield, high risk bonds, notes, debentures and other debt obligations commonly known as “junk bonds.” At the time of purchase, these high-yield securities are rated within or below the “BB” major rating category by S&P or the “Ba” major rating category by Moody’s or are unrated but considered to be of comparable quality by the Adviser. The Portfolio may also invest in leveraged loans, which are senior secured loans that are made by banks or other lending institutions to companies that are rated below investment grade. In addition, the Portfolio may invest in investment-grade corporate bonds, asset-backed securities, mortgage-backed securities (including commercially backed ones), convertible bonds, and sovereign and emerging market debt (both U.S. dollar and non-U.S. dollar denominated).

The Portfolio may invest in foreign securities, including those of issuers in emerging markets. An “emerging market” country is any country determined by the Adviser to have an emerging market economy, considering factors such as the country's credit rating, its political and economic stability and the development of its financial and capital markets.
The Portfolio utilizes derivatives primarily in the form of U.S. Treasury futures contracts in order to manage the Portfolio’s duration, or interest rate risk. The Portfolio may enter into derivatives contracts traded on exchanges or in the over the counter market.

The Portfolio may also pursue its investment strategy by investing in other mutual funds managed by the Adviser or an affiliate.

The Adviser uses fundamental, quantitative and technical investment research techniques to determine what to buy and sell. Fundamental techniques assess a security’s value based on an issuer’s financial profile, management, and business prospects while quantitative and technical techniques involve a more data-oriented analysis of financial information, market trends and price movements.

Principal Risks

The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

Interest Rate Risk. Interest rate risk is the risk that prices of debt securities decline in value when interest rates rise for debt securities that pay a fixed rate of interest. Debt securities with longer durations (a measure of price sensitivity of a bond or bond fund to changes in interest rates) or maturities (i.e., the amount of time until a bond’s issuer must pay its principal or face value) tend to be more sensitive to changes in interest rates than debt securities with shorter durations or maturities. Changes by the Federal Reserve to monetary policies could affect interest rates and the value of some securities. In addition, the phase out of LIBOR (the offered rate for short-term Eurodollar deposits between major international banks) by the end of 2021 could lead to increased volatility and illiquidity in certain markets that currently rely on LIBOR to determine interest rates.

Equity Security Risk. Equity securities held by the Portfolio may decline significantly in price, sometimes rapidly or unpredictably, over short or extended periods of time, and such declines may occur because of declines in the equity market as a whole, or because of declines in only a particular country, company, industry, or sector of the market. From time to time, the Portfolio may invest a significant portion of its assets in companies in one or more related sectors or industries which would make the Portfolio more vulnerable to adverse developments affecting such sectors or industries. Equity securities are generally more volatile than most debt securities.

Credit Risk. Credit risk is the risk that an issuer of a debt security to which the Portfolio is exposed may no longer be able or willing to pay its debt. As a result of such an event, the debt security may decline in price and affect the value of the Portfolio.

Allocation Risk. The Portfolio’s investment performance depends upon how its assets are allocated across broad asset categories and applicable sub-classes within such categories. Some broad asset categories and sub-classes may perform below expectations or the securities markets generally over short and extended periods. Therefore, a principal risk of investing in the Portfolio is that the allocation strategies used and the allocation decisions made will not produce the desired results.

Mortgage-Backed and Other Asset-Backed Securities Risk. The value of mortgage-backed and asset-backed securities will be influenced by the factors affecting the housing market and the assets underlying such securities. As a result, during periods of declining asset value, difficult or frozen credit markets, swings in interest rates, or deteriorating economic conditions, mortgage-related and asset-backed securities may decline in value, face valuation difficulties, become more volatile and/or become illiquid. In addition, both mortgage-backed and asset-backed securities are sensitive to changes in the repayment patterns of the underlying security. If the principal payment on the underlying asset is repaid faster or slower than the holder of the asset-backed or mortgage-backed security anticipates, the price of the security may fall, particularly if the holder must reinvest the repaid principal at lower rates or must continue to hold the security when interest rates rise. This effect may cause the value of the Portfolio to decline and reduce the overall return of the Portfolio.

Market Risk. Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio’s investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio’s benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

High Yield Risk. High yield securities – commonly known as “junk bonds” – to which the Portfolio is exposed are considered predominantly speculative with respect to the issuer’s continuing ability to make principal and interest payments. If the issuer of the security is in default with respect to interest or principal payments, the value of the Portfolio may be negatively affected. High yield securities generally have a less liquid resale market.

Leveraged Loan Risk. Leveraged loans (also known as bank loans) are subject to the risks typically associated
with debt securities. In addition, leveraged loans, which typically hold a senior position in the capital structure of a borrower, are subject to the risk that a court could subordinate such loans to presently existing or future indebtedness or take other action detrimental to the holders of leveraged loans. Leveraged loans are also subject to the risk that the value of the collateral, if any, securing a loan may decline, be insufficient to meet the obligations of the borrower, or be difficult to liquidate. Some leveraged loans are not as easily purchased or sold as publicly-traded securities and others are illiquid, which may make it more difficult for the Portfolio to value them or dispose of them at an acceptable price. Below investment-grade leveraged loans are typically more credit sensitive. In the event of fraud or misrepresentation, the Portfolio may not be protected under federal securities laws with respect to leveraged loans that may not be in the form of “securities.” The settlement period for some leveraged loans may be more than seven days.

**Prepayment Risk.** When interest rates fall, certain obligations will be paid off by the obligor more quickly than originally anticipated, and a Portfolio may have to invest the proceeds in securities with lower yields. In periods of falling interest rates, the rate of prepayments tends to increase (as does price fluctuation) as borrowers are motivated to pay off debt and refinance at new lower rates. During such periods, reinvestment of the prepayment proceeds by the management team will generally be at lower rates of return than the return on the assets that were prepaid. Prepayment generally reduces the yield to maturity and the average life of the security.

**Large Cap Risk.** Large-sized companies may be unable to respond quickly to new competitive challenges such as changes in technology. They may also not be able to attain the high growth rate of successful smaller companies, especially during extended periods of economic expansion.

**Foreign Securities Risk.** Foreign securities generally carry more risk and are more volatile than their domestic counterparts, in part because of potential for higher political and economic risks, lack of reliable information and fluctuations in currency exchange rates where investments are denominated in currencies other than the U.S. dollar. Certain events in foreign markets may adversely affect foreign and domestic issuers, including interruptions in the global supply chain, natural disasters and outbreak of infectious diseases. The Portfolio's investment in any country could be subject to governmental actions such as capital or currency controls, nationalizing a company or industry, expropriating assets, or imposing punitive taxes that would have an adverse effect on security prices, and impair the Portfolio’s ability to repatriate capital or income. Foreign securities may also be more difficult to resell than comparable U.S. securities because the markets for foreign securities are often less liquid. Even when a foreign security increases in price in its local currency, the appreciation may be diluted by adverse changes in exchange rates when the security's value is converted to U.S. dollars. Foreign withholding taxes also may apply and errors and delays may occur in the settlement process for foreign securities.

**Emerging Markets Risk.** The economic and political structures of developing countries in emerging markets, in most cases, do not compare favorably with the U.S. or other developed countries in terms of wealth and stability, and their financial markets often lack liquidity. Portfolio performance will likely be negatively affected by portfolio exposure to countries and corporations domiciled in or with revenue exposures to countries in the midst of, among other things, hyperinflation, currency devaluation, trade disagreements, sudden political upheaval, or interventionist government policies. Portfolio performance may also be negatively affected by portfolio exposure to countries and corporations domiciled in or with revenue exposures to countries with less developed legal, tax, regulatory, and accounting systems. Significant buying or selling actions by a few major investors may also heighten the volatility of emerging markets. These factors make investing in emerging market countries significantly riskier than in other countries, and events in any one country could cause the Portfolio's share price to decline.

**Foreign Currency Risk.** The value of a foreign currency may decline against the U.S. dollar, which would reduce the dollar value of securities denominated in that currency. The overall impact of such a decline of foreign currency can be significant, unpredictable, and long lasting, depending on the currencies represented, how each one appreciates or depreciates in relation to the U.S. dollar, and whether currency positions are hedged. Under normal conditions, the Portfolio does not engage in extensive foreign currency hedging programs. Further, exchange rate movements are volatile, and it is not possible to effectively hedge the currency risks of many developing countries.

**Preferred Securities Risk.** There are certain additional risks associated with investing in preferred securities, including, but not limited to, preferred securities may include provisions that permit the issuer, at its discretion, to defer or omit distributions for a stated period without any adverse consequences to the issuer; preferred securities are generally subordinated to bonds and other debt instruments in a company's capital structure in terms of having priority to corporate income and liquidation payments, and therefore will be subject to greater credit risk than more senior debt instruments; preferred securities may be substantially less liquid than many other securities, such as common
stocks or U.S. Government securities; generally, traditional preferred securities offer no voting rights with respect to the issuing company unless preferred dividends have been in arrears for a specified number of periods, at which time the preferred security holders may elect a number of directors to the issuer’s board; and in certain varying circumstances, an issuer of preferred securities may redeem the securities prior to a specified date.

**Other Funds Risk.** Because the Portfolio invests in other funds managed by the Adviser or an affiliate (“Other Funds”), the performance of the Portfolio is dependent, in part, upon the performance of Other Funds in which the Portfolio may invest. As a result, the Portfolio is subject to the same risks as those faced by the Other Funds. In addition, Other Funds may be subject to additional fees and expenses that will be borne by the Portfolio.

**Investment Adviser Risk.** The Portfolio is actively managed and the success of its investment strategy depends significantly on the skills of the Adviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio’s investment objective.

**Conflicts of Interest Risk.** An investment in the Portfolio will be subject to a number of actual or potential conflicts of interest. For example, the Adviser or its affiliates may provide services to the Portfolio for which the Portfolio would compensate the Adviser and/or such affiliates. The Portfolio may invest in other pooled investment vehicles sponsored, managed, or otherwise affiliated with the Adviser, including other Portfolios. The Adviser may have an incentive (financial or otherwise) to enter into transactions or arrangements on behalf of the Portfolio with itself or its affiliates in circumstances where it might not have done so otherwise.

The Adviser or its affiliates manage other investment funds and/or accounts (including proprietary accounts) and have other clients with investment objectives and strategies that are similar to, or overlap with, the investment objective and strategy of the Portfolio, creating conflicts of interest in investment and allocation decisions regarding the allocation of investments that could be appropriate for the Portfolio and other clients of the Adviser or their affiliates.

**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer’s securities and therefore the value of the Portfolio.

**Liquidity Risk.** Liquidity is the ability to sell a security relatively quickly for a price that most closely reflects the actual value of the security. Dealer inventories of bonds are at or near historic lows in relation to market size, which has the potential to decrease liquidity and increase price volatility in the fixed income markets, particularly during periods of economic or market stress. As a result of this decreased liquidity, the Portfolio may have to accept a lower price to sell a security, sell other securities to raise cash, or give up an investment opportunity, any of which could have a negative effect on performance.

**Derivatives Risk.** The use of derivatives (such as futures) involves additional risks and transaction costs which could leave the Portfolio in a worse position than if it had not used these instruments. The Portfolio utilizes futures on U.S. Treasuries in order to manage duration. The use of derivatives can lead to losses because of adverse movements in the price or value of the underlying asset, index or rate, which may be magnified by certain features of the contract. Changes in the value of the derivative may not correlate as intended with the underlying asset, rate or index, and the Portfolio could lose much more than the original amount invested. Derivatives can be highly volatile, illiquid and difficult to value. Certain derivatives may also be subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill its contractual obligations due to its financial condition, market events, or other reasons.

**Quantitative Investing Risk.** Quantitative Investing Risk is the risk that securities selected according to a quantitative analysis methodology can perform differently from the market as a whole based on the model and the factors used in the analysis, the weight placed on each factor and changes in the factor’s historical trends. Such models are based on assumptions of these and other market factors, and the models may not take into account certain factors, or perform as intended, and may result in a decline in the value of the Portfolio’s portfolio.

**Portfolio Turnover Rate Risk.** The Portfolio may engage in active and frequent trading of portfolio securities in implementing its principal investment strategies. A high rate of portfolio turnover (100% or more) involves correspondingly greater expenses which are borne by the Portfolio and its shareholders and may also result in short-term capital gains taxable to shareholders.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global
The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance from year to year and by showing how the Portfolio’s average annual returns for one-, five- and ten-year periods compared to broad-based securities market indices. The index descriptions appear in the “Index Descriptions” section of the prospectus. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart and table include the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assume that you sold your investment at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

**Management**

**Investment Adviser(s)**

The Portfolio is managed by Thrivent Financial for Lutherans ("Thrivent Financial" or the “Adviser”).

**Portfolio Manager(s)**

Mark L. Simenstad, CFA, Stephen D. Lowe, CFA, Noah J. Monsen, CFA, Gregory R. Anderson, CFA and Darren M. Bagwell, CFA are jointly and primarily responsible for the day-to-day management of the Portfolio. Mr. Simenstad has served as a portfolio manager of the Portfolio since March 2006. Mr. Lowe and Mr. Monsen have served as portfolio managers of the Portfolio since April 2015. Mr. Anderson has served as a portfolio manager of the Portfolio since October 2018. Mr. Bagwell has served as a portfolio manager of the Portfolio since February 2019. Mr. Simenstad is Chief Investment Strategist and has been with Thrivent Financial since 1999. Mr. Lowe is Vice President of Fixed Income Mutual Funds and Separate Accounts and has been with Thrivent Financial since 1997. He has served as a portfolio manager since 2009. Mr. Monsen has been with Thrivent Financial since 2000 and has served in an investment management capacity since 2008. Mr. Anderson is Vice President, Fixed Income General Accounts. He has been with Thrivent Financial since 1997 and has served as a portfolio manager since 2009. Mr. Monsen has been with Thrivent Financial since 1997 and has served as a portfolio manager since 2009. Mr. Bagwell is Vice President, Chief Equity Strategist and has been with Thrivent Financial in an investment management capacity since 2002.
**Purchase and Sale of Shares**

Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:

- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

**Tax Information**

For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

---

**Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio’s complete prospectus, which contains more information about the Portfolio and its risks.

- **If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

- **If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio’s prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios’ annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios’ website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. You may elect to receive shareholder reports and other communications by enrolling at Thrivent.com/gopaperless.

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.
Thrivent ESG Index Portfolio

**Investment Objective**

Thrivent ESG Index Portfolio (the "Portfolio") seeks to track the investment results of an index composed of companies selected by the index provider based on environmental, social and governance characteristics. The Portfolio’s investment objective may be changed without shareholder approval.

**Fees and Expenses**

This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

</table>

1 These expenses are based on estimated amounts for the current fiscal year.
2 The Adviser has contractually agreed, through at least April 30, 2021, to waive certain fees and/or reimburse certain expenses associated with the shares of the Thrivent ESG Index Portfolio in order to limit the Total Annual Portfolio Operating Expenses After Fee Waivers and/or Expense Reimbursements to an annual rate of 0.38% of the average daily net assets of the shares. This contractual provision, however, may be terminated before the indicated termination date upon the mutual agreement between the Independent Directors of the Portfolio and the Adviser.

**Portfolio Turnover**

The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio’s performance. Because the Portfolio had not yet commenced operations prior to the date of this prospectus, the Portfolio’s portfolio turnover rate for the most recent fiscal year end is not yet available.

**Principal Strategies**

Under normal circumstances, the Portfolio invests substantially all of its assets (more than 80% of its net assets, plus the amount of any borrowings for investment purposes) in the common stocks of companies included in the MSCI KLD 400 Social Index (the “Index”) in the proportions in which they are represented in the Index. This is a passively managed Portfolio, which means that the Adviser does not actively choose the securities that should make up the Portfolio. The Index is a float-adjusted market capitalization weighted index designed to provide exposure to U.S. companies with outstanding environmental, social and governance (“ESG”) ratings and excluding exposure to companies with negative social or environmental impacts, all as identified by MSCI Inc. (the “Index Provider” or “MSCI”). As of March 31, 2020, the Index consisted of 404 companies identified by the Index Provider from the universe of companies included in the MSCI USA IMI Index, which targets 99% of the market coverage of stocks that are listed for trading on major exchanges in the U.S., as determined by the Index Provider. MSCI constructs the Index based on considerations of ESG performance, sector alignment and size representation of each eligible company, as described in more detail below. The methodology MSCI uses to construct the Index is as of the date of this prospectus and is subject to change as
determined from time to time by MSCI. The Index excludes companies whose products have negative social or environmental impacts. Companies that MSCI determines have significant involvement in the following businesses are not eligible for the Index: alcohol, gambling, tobacco, military weapons, civilian firearms, nuclear power, adult entertainment and genetically modified organisms.

In evaluating ESG performance of eligible companies, MSCI uses proprietary ratings and research covering ESG criteria. MSCI identifies companies that demonstrate an ability to manage their ESG risks and opportunities. MSCI identifies key ESG issues that hold the greatest potential risk or opportunity for each industry sector, which may include the following: climate change, natural resources, pollution and waste, environmental opportunities, human capital, product liability, stakeholder opposition, social opportunities, corporate governance, and corporate behavior. MSCI calculates a company’s exposure relating to a key issue based on an analysis of a company’s business and takes into account a company’s management process of that issue. MSCI’s ESG criteria also includes, but is not limited to, an analysis of companies involved in very serious controversies, which may result in those companies’ exclusion from the Index.

The Index is reviewed quarterly for adjustments, and when changes to the Index occur, the Adviser will attempt to replicate these changes within the Portfolio. However, any such changes may result in slight variations from time to time. The Index may include large, mid or small cap companies. The components of the Index, and the degree to which these components represent certain industry sectors, are likely to change over time. The Portfolio may buy and sell equity index futures and exchange traded funds (“ETF”) for investment exposure. For liquidity reasons, the Portfolio may invest to some degree in money market instruments.

**Principal Risks**
The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

**ESG (Environmental, Social & Governance) Investment Strategy Risk.** The Portfolio's ESG investment strategy limits the types and number of investment opportunities available to the Portfolio and, as a result, the Portfolio may underperform other funds that do not have an ESG focus. The Portfolio's ESG investment strategy may result in the Portfolio investing in securities or industry sectors that underperform the market as a whole or underperform other funds screened for ESG standards. In addition, the Index Provider may be unsuccessful in creating an index composed of companies that exhibit positive ESG characteristics.

**Equity Security Risk.** Equity securities held by the Portfolio may decline significantly in price, sometimes rapidly or unpredictably, over short or extended periods of time, and such declines may occur because of declines in the equity market as a whole, or because of declines in only a particular country, company, industry, or sector of the market. From time to time, the Portfolio may invest a significant portion of its assets in companies in one or more related sectors or industries which would make the Portfolio more vulnerable to adverse developments affecting such sectors or industries. Equity securities are generally more volatile than most debt securities.

**ETF Risk.** An ETF is subject to the risks of the underlying investments that it holds. In addition, for index-based ETFs, the performance of an ETF may diverge from the performance of such index (commonly known as tracking error). ETFs are subject to fees and expenses (like management fees and operating expenses) that do not apply to an index, and the Portfolio will indirectly bear its proportionate share of any such fees and expenses paid by the ETFs in which it invests. Because ETFs trade on an exchange, there is a risk that an ETF will trade at a discount to net asset value or that investors will fail to bring the trading price in line with the underlying shares (known as the arbitrage mechanism).

**Futures Contract Risk.** The value of a futures contract tends to increase and decrease in tandem with the value of the underlying instrument. The price of futures can be highly volatile; using them could lower total return, and the potential loss from futures can exceed the Portfolio’s initial investment in such contracts. In addition, the value of the futures contract may not accurately track the value of the underlying instrument.

**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer's securities and therefore the value of the Portfolio.

**Large Cap Risk.** Large-sized companies may be unable to respond quickly to new competitive challenges such as changes in technology. They may also not be able to attain the high growth rate of successful smaller companies, especially during extended periods of economic expansion.

**Market Risk.** Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio's investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio's benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

**Mid Cap Risk.** Medium-sized companies often have greater price volatility, lower trading volume, and less
liquidity than larger, more-established companies. These companies tend to have smaller revenues, narrower product lines, less management depth and experience, smaller shares of their product or service markets, fewer financial resources, and less competitive strength than larger companies.

**Sector Risk.** Companies with similar characteristics may be grouped together in broad categories called sectors. From time to time, the Portfolio may have significant positions in one or more sectors of the market. To the extent the Portfolio invests more heavily in particular sectors than others, its performance may be more susceptible to developments that significantly affect those sectors. Individual sectors may be more volatile, and may perform differently, than the broader market. The industries that constitute a sector may all react in the same way to economic, political or regulatory events.

**Indexing Strategy/Index Tracking Risk.** The Portfolio is managed with an indexing investment strategy, attempting to track the performance of an unmanaged index of securities, regardless of the current or projected performance of the Index or of the actual securities comprising the Index. The structure and composition of the Index will affect the performance, volatility, and risk of the Index and, consequently, the performance, volatility, and risk of the Portfolio. While the Adviser seeks to track the performance of the Index (i.e., achieve a high degree of correlation with the Index), the Portfolio's return may not match the return of the Index. The Portfolio incurs a number of operating expenses not applicable to the Index, and incurs costs in buying and selling securities. In addition, the Portfolio may not be fully invested at times, generally as a result of cash flows into or out of the Portfolio or reserves of cash held by the Portfolio to meet redemptions. The Adviser may attempt to replicate the Index return by investing in fewer than all of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Portfolio's return and that of the Index.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

No performance information for the Portfolio is provided because it had not commenced operations prior to the date of this prospectus and does not yet have a full calendar year of performance history. The index description appears in the "Index Descriptions" section of the prospectus. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end that takes place after April 30, 2020.

How the Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

**Management**

**Investment Adviser(s)**
The Portfolio is managed by Thrivent Financial for Lutherans ("Thrivent Financial" or the "Adviser").

**Portfolio Manager(s)**
Brian W. Bomgren, CQF and Sharon Wang, CFA, FRM are jointly and primarily responsible for the day-to-day management of the Portfolio. Mr. Bomgren and Ms. Wang have served as portfolio managers of the Portfolio since April 2020. Mr. Bomgren has been with Thrivent Financial since 2006 and is currently a Senior Portfolio Manager. Ms. Wang has been with Thrivent Financial since 2017 and is currently a Senior Portfolio Manager. Prior to joining Thrivent Financial, Ms. Wang worked at Bryn Mawr Capital Management as a portfolio manager from 2009 to 2016.

**Purchase and Sale of Shares**
Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:

- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

**Tax Information**

For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

**Payments to Broker-Dealers and Other Financial Intermediaries**
If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio’s complete prospectus, which contains more information about the Portfolio and its risks.

• If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

• If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio’s prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios’ annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios’ website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

</tbody>
</table>

**ANNUAL PORTFOLIO OPERATING EXPENSES** (expenses that you pay each year as a percentage of the value of your investment)

| Management Fees | 0.59% |
| Other Expenses | 0.05% |
| Total Annual Portfolio Operating Expenses | 0.64% |

**EXAMPLE** This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year, and that the Portfolio's operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

<table>

<th>10 Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thrivent Global Stock Portfolio</td>
<td>$65</td>
<td>$205</td>
<td>$357</td>
</tr>
</tbody>
</table>

**Portfolio Turnover**
The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio's performance. During the most recent fiscal year, the Portfolio’s portfolio turnover rate was 76% of the average value of its portfolio.

**Principal Strategies**
Under normal circumstances, the Portfolio invests at least 80% of its net assets in equity securities and invests at least 40% of its net assets in foreign securities (under normal market conditions). The Adviser focuses mainly on the equity securities of domestic and international companies. Should the Adviser change the investments used for purposes of this 80% threshold, we will notify you at least 60 days prior to the change.

The Portfolio seeks to achieve its investment objective by investing primarily in domestic and foreign common stocks. The Portfolio may buy and sell futures contracts to either hedge its exposure or obtain exposure to certain investments. The Adviser uses fundamental, quantitative, and technical investment research techniques to determine what stocks to buy and sell. Fundamental techniques assess a security's value based on an issuer's financial profile, management, and business prospects while quantitative and technical techniques involve a more data-oriented analysis of financial information, market trends and price movements. The Portfolio may sell securities for a variety of reasons, such as to secure gains, limit losses, or reposition assets into more promising opportunities.

**Principal Risks**
The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

**Equity Security Risk.** Equity securities held by the Portfolio may decline significantly in price, sometimes rapidly or unpredictably, over short or extended periods of time, and such declines may occur because of declines in the equity market as a whole, or because of declines in only a particular country, company, industry, or sector of the market. From time to time, the Portfolio may invest a significant portion of its assets in companies in one or more related sectors or industries which would make the Portfolio more vulnerable to adverse developments affecting such sectors or industries. Equity securities are generally more volatile than most debt securities.
**Large Cap Risk.** Large-sized companies may be unable to respond quickly to new competitive challenges such as changes in technology. They may also not be able to attain the high growth rate of successful smaller companies, especially during extended periods of economic expansion.

**Foreign Securities Risk.** Foreign securities generally carry more risk and are more volatile than their domestic counterparts, in part because of potential for higher political and economic risks, lack of reliable information and fluctuations in currency exchange rates where investments are denominated in currencies other than the U.S. dollar. Certain events in foreign markets may adversely affect foreign and domestic issuers, including interruptions in the global supply chain, natural disasters and outbreak of infectious diseases. The Portfolio's investment in any country could be subject to governmental actions such as capital or currency controls, nationalizing a company or industry, expropriating assets, or imposing punitive taxes that would have an adverse effect on security prices, and impair the Portfolio's ability to repatriate capital or income. Foreign securities may also be more difficult to resell than comparable U.S. securities because the markets for foreign securities are often less liquid. Even when a foreign security increases in price in its local currency, the appreciation may be diluted by adverse changes in exchange rates when the security's value is converted to U.S. dollars. Foreign withholding taxes also may apply and errors and delays may occur in the settlement process for foreign securities.

**Foreign Currency Risk.** The value of a foreign currency may decline against the U.S. dollar, which would reduce the dollar value of securities denominated in that currency. The overall impact of such a decline of foreign currency can be significant, unpredictable, and long lasting, depending on the currencies represented, how each one appreciates or depreciates in relation to the U.S. dollar, and whether currency positions are hedged. Under normal conditions, the Portfolio does not engage in extensive foreign currency hedging programs. Further, exchange rate movements are volatile, and it is not possible to effectively hedge the currency risks of many developing countries.

**Market Risk.** Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio's investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio's benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

**Quantitative Investing Risk.** Quantitative Investing Risk is the risk that securities selected according to a quantitative analysis methodology can perform differently from the market as a whole based on the model and the factors used in the analysis, the weight placed on each factor and changes in the factor's historical trends. Such models are based on assumptions of these and other market factors, and the models may not take into account certain factors, or perform as intended, and may result in a decline in the value of the Portfolio's portfolio.

**Mid Cap Risk.** Medium-sized companies often have greater price volatility, lower trading volume, and less liquidity than larger, more-established companies. These companies tend to have smaller revenues, narrower product lines, less management depth and experience, smaller shares of their product or service markets, fewer financial resources, and less competitive strength than larger companies.

**Small Cap Risk.** Smaller, less seasoned companies often have greater price volatility, lower trading volume, and less liquidity than larger, more established companies. These companies tend to have small revenues, narrower product lines, less management depth and experience, small shares of their product or service markets, fewer financial resources, and less competitive strength than larger companies. Such companies seldom pay significant dividends that could soften the impact of a falling market on returns.

**Emerging Markets Risk.** The economic and political structures of developing countries in emerging markets, in most cases, do not compare favorably with the U.S. or other developed countries in terms of wealth and stability, and their financial markets often lack liquidity. Portfolio performance will likely be negatively affected by portfolio exposure to countries and corporations domiciled in or with revenue exposures to countries in the midst of, among other things, hyperinflation, currency devaluation, trade disagreements, sudden political upheaval, or interventionist government policies. Portfolio performance may also be negatively affected by portfolio exposure to countries and corporations domiciled in or with revenue exposures to countries with less developed legal, tax, regulatory, and accounting systems. Significant buying or selling actions by a few major investors may also heighten the volatility of emerging markets. These factors make investing in emerging market countries significantly riskier than in other countries, and events in any one country could cause the Portfolio's share price to decline.

**Futures Contract Risk.** The value of a futures contract tends to increase and decrease in tandem with the value of the underlying instrument. The price of futures can be highly volatile; using them could lower total return, and the potential loss from futures can exceed the Portfolio's initial investment in such contracts. In addition, the value of the futures contract...
may not accurately track the value of the underlying instrument.

**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer’s securities and therefore the value of the Portfolio.

**Investment Adviser Risk.** The Portfolio is actively managed and the success of its investment strategy depends significantly on the skills of the Adviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio’s investment objective.

**Derivatives Risk.** The use of derivatives (such as futures) involves additional risks and transaction costs which could leave the Portfolio in a worse position than if it had not used these instruments. The Portfolio utilizes equity futures in order to increase or decrease its exposure to various asset classes at a lower cost than trading stocks directly. The use of derivatives can lead to losses because of adverse movements in the price or value of the underlying asset, index or rate, which may be magnified by certain features of the contract. Changes in the value of the derivative may not correlate as intended with the underlying asset, rate or index, and the Portfolio could lose much more than the original amount invested. Derivatives can be highly volatile, illiquid and difficult to value. Certain derivatives may also be subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill its contractual obligations due to its financial condition, market events, or other reasons.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance from year to year and by showing how the Portfolio’s average annual returns for one-, five- and ten-year periods compared to a broad-based securities market index. The index description appears in the “Index Descriptions” section of the prospectus. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart and table include the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assume that you sold your investment at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

**Management**

**Investment Adviser(s)**

The Portfolio is managed by Thrivent Financial for Lutherans (“Thrivent Financial” or the “Adviser”).

**Portfolio Manager(s)**

Kurt J. Lauber, CFA, Noah J. Monsen, CFA, Lauri Brunner, Darren M. Bagwell, CFA and David R. Spangler, CFA are jointly and primarily responsible for the day-to-day management of the Portfolio. Mr. Lauber has served as a portfolio manager of the Portfolio since
March 2013. Mr. Monsen has served as a portfolio manager of the Portfolio since April 2018. Ms. Brunner has served as a portfolio manager of the Portfolio since September 2018. Mr. Bagwell and Mr. Spangler have served as portfolio managers of the Portfolio since February 2019. Mr. Lauber has been with Thrivent Financial since 2004 and previously served as an associate portfolio manager. Mr. Monsen has been with Thrivent Financial since 2000 and has served in an investment management capacity since 2008. Ms. Brunner has been with Thrivent Financial since 2007 and currently is a Senior Portfolio Manager. Mr. Bagwell is Vice President, Chief Equity Strategist and has been with Thrivent Financial in an investment management capacity since 2002. Mr. Spangler has been with Thrivent Financial since 2002, in an investment management capacity since 2006 and currently is a Senior Portfolio Manager.

**Purchase and Sale of Shares**

Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:

- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

**Tax Information**

For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

**Payments to Broker- Dealers and Other Financial Intermediaries**

If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio’s complete prospectus, which contains more information about the Portfolio and its risks.

- **If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

- **If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio’s prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios’ annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios’ website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. You may elect to receive shareholder reports and other communications by enrolling at Thrivent.com/gopaperless.

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.
Thrivent Government Bond Portfolio

**Investment Objective**

Thrivent Government Bond Portfolio (the "Portfolio") seeks total return, consistent with preservation of capital. The Portfolio's investment objective may be changed without shareholder approval.

**Fees and Expenses**

This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

**EXAMPLE** This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year, and that the Portfolio’s operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

<table>
<thead>
<tr>
<th>1 Year</th>
<th>3 Years</th>
<th>5 Years</th>
<th>10 Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thrivent Government Bond Portfolio</td>
<td>$47</td>
<td>$148</td>
<td>$258</td>
</tr>
</tbody>
</table>

**Portfolio Turnover**

The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio’s performance. During the most recent fiscal year, the Portfolio’s portfolio turnover rate was 354% of the average value of its portfolio.

**Principal Strategies**

Under normal circumstances, the Portfolio invests at least 80% of its net assets (plus the amount of borrowings for investment purposes) in U.S. government bonds. For purposes of this disclosure, “U.S. government bonds” are debt instruments issued or guaranteed by the U.S. government or its agencies and instrumentalities, including U.S. Treasuries, Treasury Inflation Protected Securities (TIPS), U.S. Government Agency debt, and mortgage-backed securities issued or guaranteed by the Government National Mortgage Association (GNMA or Ginnie Mae), the Federal National Mortgage Association (FNMA or Fannie Mae) or the Federal Home Loan Mortgage Corporation (FHLMC or Freddie Mac). Should the Adviser change the investments used for purposes of this 80% threshold, you will be notified at least 60 days prior to the change.

The Portfolio’s portfolio securities may be of any maturity. The Adviser uses fundamental, quantitative and technical investment research techniques to determine what debt obligations to buy and sell. Fundamental techniques assess a security's value based on an issuer's financial profile, management, and business prospects while quantitative and technical techniques involve a more data-oriented analysis of financial information, market trends and price movements. The “total return” sought by the Portfolio consists of income earned on the Portfolio’s investments plus capital appreciation, if any. The Portfolio may invest in U.S. dollar denominated sovereign debt of foreign governments.

The Portfolio utilizes derivatives primarily in the form of U.S. Treasury futures contracts in order to manage the Portfolio’s duration, or interest rate risk. The Portfolio may enter into derivatives contracts traded on exchanges or in the over the counter market.

**Principal Risks**

The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its
investment objective and you could lose money by investing in the Portfolio.

**Government Securities Risk.** The Portfolio invests in securities issued or guaranteed by the U.S. government or its agencies and instrumentalities (such as Federal Home Loan Bank, Ginnie Mae, Fannie Mae or Freddie Mac securities). Securities issued or guaranteed by Federal Home Loan Banks, Ginnie Mae, Fannie Mae or Freddie Mac are not issued directly by the U.S. government. Ginnie Mae is a wholly owned U.S. corporation that is authorized to guarantee, with the full faith and credit of the U.S. government, the timely payment of principal and interest of its securities. By contrast, securities issued or guaranteed by U.S. government-related organizations such as Federal Home Loan Banks, Fannie Mae and Freddie Mac are not backed by the full faith and credit of the U.S. government. No assurance can be given that the U.S. government would provide financial support to its agencies and instrumentalities if not required to do so by law. In addition, the value of U.S. government securities may be affected by changes in the credit rating of the U.S. government.

**Mortgage-Backed and Other Asset-Backed Securities Risk.** The value of mortgage-backed and asset-backed securities will be influenced by the factors affecting the housing market and the assets underlying such securities. As a result, during periods of declining asset value, difficult or frozen credit markets, swings in interest rates, or deteriorating economic conditions, mortgage-related and asset-backed securities may decline in value, face valuation difficulties, become more volatile and/or become illiquid. In addition, both mortgage-backed and asset-backed securities are sensitive to changes in the repayment patterns of the underlying security. If the principal payment on the underlying asset is repaid faster or slower than the holder of the asset-backed or mortgage-backed security anticipates, the price of the security may fall, particularly if the holder must reinvest the repaid principal at lower rates or must continue to hold the security when interest rates rise. This effect may cause the value of the Portfolio to decline and reduce the overall return of the Portfolio.

**Inflation-Linked Security Risk.** Inflation-linked debt securities, such as TIPS, are subject to the effects of changes in market interest rates caused by factors other than inflation (real interest rates). In general, the price of an inflation-linked security tends to decrease when real interest rates increase and can increase when real interest rates decrease. Interest payments on inflation-linked securities are unpredictable and will fluctuate as the principal and interest are adjusted for inflation. Any increase in the principal amount of an inflation-linked debt security will be considered taxable ordinary income, even though the Portfolio will not receive the principal until maturity.

There can also be no assurance that the inflation index used will accurately measure the real rate of inflation in the prices of goods and services. The Portfolio’s investments in inflation-linked securities may lose value in the event that the actual rate of inflation is different than the rate of the inflation index. In addition, inflation-linked securities are subject to the risk that the Consumer Price Index for All Urban Consumers (CPI-U) or other relevant pricing index may be discontinued, fundamentally altered in a manner materially adverse to the interests of an investor in the securities, altered by legislation or Executive Order in a materially adverse manner to the interests of an investor in the securities or substituted with an alternative index.

**Interest Rate Risk.** Interest rate risk is the risk that prices of debt securities decline in value when interest rates rise for debt securities that pay a fixed rate of interest. Debt securities with longer durations (a measure of price sensitivity of a bond or bond fund to changes in interest rates) or maturities (i.e., the amount of time until a bond’s issuer must pay its principal or face value) tend to be more sensitive to changes in interest rates than debt securities with shorter durations or maturities. Changes by the Federal Reserve to monetary policies could affect interest rates and the value of some securities. In addition, the phase out of LIBOR (the offered rate for short-term Eurodollar deposits between major international banks) by the end of 2021 could lead to increased volatility and illiquidity in certain markets that currently rely on LIBOR to determine interest rates.

**Market Risk.** Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio’s investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio’s benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

**Sovereign Debt Risk.** Sovereign debt securities are issued or guaranteed by foreign governmental entities. These investments are subject to the risk that a governmental entity may delay or refuse to pay interest or repay principal on its sovereign debt, due, for example, to cash flow problems, insufficient foreign currency reserves, political considerations, the relative size of the governmental entity’s debt position in relation to the economy or the failure to put in place economic reforms required by the International Monetary Fund or other multilateral agencies. If a governmental entity defaults, it may ask for more time in which to pay or for further loans. There is no legal
process for collecting sovereign debts that a government does not pay nor are there bankruptcy proceedings through which all or part of the sovereign debt that a governmental entity has not repaid may be collected.

**Investment Adviser Risk.** The Portfolio is actively managed and the success of its investment strategy depends significantly on the skills of the Adviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio's investment objective.

**Derivatives Risk.** The use of derivatives (such as futures) involves additional risks and transaction costs which could leave the Portfolio in a worse position than if it had not used these instruments. The Portfolio utilizes futures on U.S. Treasuries in order to manage duration. The use of derivatives can lead to losses because of adverse movements in the price or value of the underlying asset, index or rate, which may be magnified by certain features of the contract. Changes in the value of the derivative may not correlate as intended with the underlying asset, rate or index, and the Portfolio could lose much more than the original amount invested. Derivatives can be highly volatile, illiquid and difficult to value. Certain derivatives may also be subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill its contractual obligations due to its financial condition, market events, or other reasons.

**Liquidity Risk.** Liquidity is the ability to sell a security relatively quickly for a price that most closely reflects the actual value of the security. Dealer inventories of bonds are at or near historic lows in relation to market size, which has the potential to decrease liquidity and increase price volatility in the fixed income markets, particularly during periods of economic or market stress. As a result of this decreased liquidity, the Portfolio may have to accept a lower price to sell a security, sell other securities to raise cash, or give up an investment opportunity, any of which could have a negative effect on performance.

**Portfolio Turnover Rate Risk.** The Portfolio may engage in active and frequent trading of portfolio securities in implementing its principal investment strategies. A high rate of portfolio turnover (100% or more) involves correspondingly greater expenses which are borne by the Portfolio and its shareholders and may also result in short-term capital gains taxable to shareholders.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance from year to year and by showing how the Portfolio’s average annual returns for one-, five- and ten-year periods compared to broad-based securities market indices. The index descriptions appear in the "Index Descriptions" section of the prospectus. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

Effective August 28, 2017, based on approval of the Portfolio’s Board of Directors and shareholders, the portfolio’s investment objective and principal strategies were changed, which had the effect of converting the Portfolio from one whose securities were selected based on which securities were in an index to one that is actively managed and invests primarily in U.S. government securities. At the same time, the Portfolio’s name changed from Thrivent Bond Index Portfolio to Thrivent Government Bond Portfolio. As a result, performance information presented below with respect to periods prior to August 28, 2017, reflects the performance of an investment portfolio that was materially different from the investment portfolio of Thrivent Government Bond Portfolio.

The bar chart and the table include the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assume that you sold your shares at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

How the Portfolio has performed in the past (before and after taxes) is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.
Management

Investment Adviser(s)

The Portfolio is managed by Thrivent Financial for Lutherans ("Thrivent Financial" or the "Adviser").

Portfolio Manager(s)

Michael G. Landreville, CFA, CPA (inactive) and Gregory R. Anderson, CFA are jointly and primarily responsible for the day-to-day management of the Portfolio. Mr. Landreville has served as portfolio manager of the Portfolio since December 2005. Mr. Anderson has served as a portfolio manager of the Portfolio since August 2017. Mr. Landreville has been with Thrivent Financial since 1983 and has served as a portfolio manager since 1998. Mr. Anderson is Vice President, Fixed Income General Accounts. He has been with Thrivent Financial since 1997 and has served as a portfolio manager since 2000.

Purchase and Sale of Shares

Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:

- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

Tax Information

For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio’s complete prospectus, which contains more information about the Portfolio and its risks.

- **If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

- **If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio’s prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios’ annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios' website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. You may elect to receive shareholder reports and other communications by enrolling at Thrivent.com/gopaperless.

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.
Thrivent High Yield Portfolio

Investment Objectives
Thrivent High Yield Portfolio (the "Portfolio") seeks to achieve a higher level of income. The Portfolio will also consider growth of capital as a secondary objective.

Fees and Expenses
This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

EXAMPLE This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year, and that the Portfolio’s operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

<table>
<thead>
<tr>
<th></th>
<th>1 Year</th>
<th>3 Years</th>
<th>5 Years</th>
<th>10 Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thrivent High Yield Portfolio</td>
<td>$45</td>
<td>$141</td>
<td>$246</td>
<td>$555</td>
</tr>
</tbody>
</table>

Portfolio Turnover
The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio’s performance. During the most recent fiscal year, the Portfolio’s portfolio turnover rate was 48% of the average value of its portfolio.

Principal Strategies
Under normal market conditions, the Portfolio invests at least 80% of its net assets (plus the amount of any borrowing for investment purposes) in high yield, high risk bonds, notes, debentures and other debt obligations (including leveraged loans, mortgage-backed securities, convertible bonds, and convertible stock), or preferred stocks. These securities are commonly known as “junk bonds.” At the time of purchase these securities are rated within or below the “BB” major rating category by Standard & Poor's Corporation or the “Ba” major rating category by Moody’s Investor Services, Inc. or are unrated but considered to be of comparable quality by the Adviser. The Portfolio invests in securities regardless of the securities’ maturity average and may also invest in foreign securities. Should the Adviser change the investments used for purposes of this 80% threshold, you will be notified at least 60 days prior to the change.

The Adviser uses fundamental, quantitative, and technical investment research techniques to determine what securities to buy and sell. Fundamental techniques assess a security's value based on an issuer's financial profile, management, and business prospects while quantitative and technical techniques involve a more data-oriented analysis of financial information, market trends and price movements. The Adviser focuses on U.S. companies which it believes have or are expected to achieve adequate cash flows or access to capital markets for the payment of principal and interest obligations.

The Portfolio utilizes derivatives primarily in the form of U.S. Treasury futures contracts in order to manage the Portfolio’s duration, or interest rate risk. The Portfolio may enter into derivatives contracts traded on exchanges or in the over the counter market.

Principal Risks
The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objectives and you could lose money by investing in the Portfolio.
High Yield Risk. High yield securities – commonly known as “junk bonds” – to which the Portfolio is exposed are considered predominantly speculative with respect to the issuer’s continuing ability to make principal and interest payments. If the issuer of the security is in default with respect to interest or principal payments, the value of the Portfolio may be negatively affected. High yield securities generally have a less liquid resale market.

Interest Rate Risk. Interest rate risk is the risk that prices of debt securities decline in value when interest rates rise for debt securities that pay a fixed rate of interest. Debt securities with longer durations (a measure of price sensitivity of a bond or bond fund to changes in interest rates) or maturities (i.e., the amount of time until a bond’s issuer must pay its principal or face value) tend to be more sensitive to changes in interest rates than debt securities with shorter durations or maturities. Changes by the Federal Reserve to monetary policies could affect interest rates and the value of some securities. In addition, the phase out of LIBOR (the offered rate for short-term Eurodollar deposits between major international banks) by the end of 2021 could lead to increased volatility and illiquidity in certain markets that currently rely on LIBOR to determine interest rates.

Credit Risk. Credit risk is the risk that an issuer of a debt security to which the Portfolio is exposed may no longer be able or willing to pay its debt. As a result of such an event, the debt security may decline in price and affect the value of the Portfolio.

Convertible Securities Risk. Convertible securities are subject to the usual risks associated with debt securities, such as interest rate risk and credit risk. Convertible securities also react to changes in the value of the common stock into which they convert, and are thus subject to market risk. The Portfolio may also be forced to convert a convertible security at an inopportune time, which may decrease the Portfolio’s return.

Leveraged Loan Risk. Leveraged loans (also known as bank loans) are subject to the risks typically associated with debt securities. In addition, leveraged loans, which typically hold a senior position in the capital structure of a borrower, are subject to the risk that a court could subordinate such loans to presently existing or future indebtedness or take other action detrimental to the holders of leveraged loans. Leveraged loans are also subject to the risk that the value of the collateral, if any, securing a loan may decline, be insufficient to meet the obligations of the borrower, or be difficult to liquidate. Some leveraged loans are not as easily purchased or sold as publicly-traded securities and others are illiquid, which may make it more difficult for the Portfolio to value them or dispose of them at an acceptable price. Below investment-grade leveraged loans are typically more credit sensitive. In the event of fraud or misrepresentation, the Portfolio may not be protected under federal securities laws with respect to leveraged loans that may not be in the form of “securities.” The settlement period for some leveraged loans may be more than seven days.

Prepayment Risk. When interest rates fall, certain obligations will be paid off by the obligor more quickly than originally anticipated, and a Portfolio may have to invest the proceeds in securities with lower yields. In periods of falling interest rates, the rate of prepayments tends to increase (as does price fluctuation) as borrowers are motivated to pay off debt and refinance at new lower rates. During such periods, reinvestment of the prepayment proceeds by the management team will generally be at lower rates of return than the return on the assets that were prepaid. Prepayment generally reduces the yield to maturity and the average life of the security.

Foreign Securities Risk. Foreign securities generally carry more risk and are more volatile than their domestic counterparts, in part because of potential for higher political and economic risks, lack of reliable information and fluctuations in currency exchange rates where investments are denominated in currencies other than the U.S. dollar. Certain events in foreign markets may adversely affect foreign and domestic issuers, including interruptions in the global supply chain, natural disasters and outbreak of infectious diseases. The Portfolio’s investment in any country could be subject to governmental actions such as capital or currency controls, nationalizing a company or industry, expropriating assets, or imposing punitive taxes that would have an adverse effect on security prices, and impair the Portfolio’s ability to repatriate capital or income. Foreign securities may also be more difficult to resell than comparable U.S. securities because the markets for foreign securities are often less liquid. Even when a foreign security increases in price in its local currency, the appreciation may be diluted by adverse changes in exchange rates when the security’s value is converted to U.S. dollars. Foreign withholding taxes also may apply and errors and delays may occur in the settlement process for foreign securities.

Market Risk. Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio’s investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio’s benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

Liquidity Risk. Liquidity is the ability to sell a security relatively quickly for a price that most closely reflects the actual value of the security. Dealer inventories of
bonds are at or near historic lows in relation to market size, which has the potential to decrease liquidity and increase price volatility in the fixed income markets, particularly during periods of economic or market stress. As a result of this decreased liquidity, the Portfolio may have to accept a lower price to sell a security, sell other securities to raise cash, or give up an investment opportunity, any of which could have a negative effect on performance.

**Investment Adviser Risk.** The Portfolio is actively managed and the success of its investment strategy depends significantly on the skills of the Adviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio’s investment objective.

**Derivatives Risk.** The use of derivatives (such as futures) involves additional risks and transaction costs which could leave the Portfolio in a worse position than if it had not used these instruments. The Portfolio utilizes futures on U.S. Treasuries in order to manage duration. The use of derivatives can lead to losses because of adverse movements in the price or value of the underlying asset, index or rate, which may be magnified by certain features of the contract. Changes in the value of the derivative may not correlate as intended with the underlying asset, rate or index, and the Portfolio could lose much more than the original amount invested. Derivatives can be highly volatile, illiquid and difficult to value. Certain derivatives may also be subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill its contractual obligations due to its financial condition, market events, or other reasons.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance from year to year and by showing how the Portfolio’s average annual returns for one-, five- and ten-year periods compared to a broad-based securities market index. The index description appears in the "Index Descriptions" section of the prospectus. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart and table include the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assume that you sold your investment at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

**Management**

**Investment Adviser(s)**

The Portfolio is managed by Thrivent Financial for Lutherans (“Thrivent Financial” or the “Adviser”).

**Portfolio Manager(s)**

Paul J. Ocenasek, CFA is primarily responsible for the day-to-day management of the Portfolio. Mr. Ocenasek

TSF-42
has served as portfolio manager of the Portfolio since December 1997. He has been with Thrivent Financial since 1987 and, since 1997, has served as portfolio manager to other Thrivent mutual funds.

**Purchase and Sale of Shares**

Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:

- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

**Tax Information**

For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

**Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio's complete prospectus, which contains more information about the Portfolio and its risks.

- **If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:**
  
  You can find the Portfolio's prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

- **If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:**
  
  You can find the Portfolio's prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio’s prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios’ annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios’ website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. You may elect to receive shareholder reports and other communications by enrolling at Thrivent.com/gopaperless.

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.

**Investment Objective**

Thrivent Income Portfolio (the "Portfolio") seeks to achieve a high level of income over the longer term while providing reasonable safety of capital.

**Fees and Expenses**

This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

**EXAMPLE** This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year, and that the Portfolio's operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

<td>$246</td>
<td>$555</td>
</tr>
</tbody>
</table>

**Portfolio Turnover**

The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio’s performance. During the most recent fiscal year, the Portfolio’s portfolio turnover rate was 101% of the average value of its portfolio.

**Principal Strategies**

The principal strategies of the Portfolio are to invest in investment-grade corporate bonds, government bonds, asset-backed securities, mortgage-backed securities, and other types of debt securities. Asset-backed securities are securities backed by notes or receivables originated by banks, credit card companies or other providers of credit.

The Portfolio may invest in foreign securities, including those of issuers in emerging markets. An “emerging market” country is any country determined by the Adviser to have an emerging market economy, considering factors such as the country’s credit rating, its political and economic stability and the development of its financial and capital markets.

Under normal conditions, at least 65% of the Portfolio’s assets will be invested in debt securities or preferred stock that is rated investment grade (Baa3/BBB-/BBB- or higher) using the middle rating of Moody’s, S&P and Fitch; when a rating from only two agencies is available, the lower is used; when only one agency rates a bond, that rating is used. In cases where explicit bond level ratings may not be available, the Adviser may use other sources to classify securities by credit quality.

The Portfolio may also invest in high yield, high risk bonds, notes, debentures and other debt obligations or preferred stock commonly known as “junk bonds.” At the time of purchase these securities are rated within or below the “BB” major rating category by S&P or the “Ba” major rating category by Moody’s or are unrated but considered to be of comparable quality by the Adviser.

The Adviser uses fundamental, quantitative, and technical investment research techniques to determine what debt obligations to buy and sell. Fundamental techniques assess a security’s value based on an issuer’s financial profile, management, and business prospects while quantitative and technical techniques involve a more data-oriented analysis of financial information, market trends and price movements. The Adviser may
purchase bonds of any maturity and generally focuses on U.S. companies that it believes are financially sound and have strong cash flow, asset values and interest or dividend earnings. The Adviser purchases bonds of foreign issuers as well.

The Portfolio utilizes derivatives primarily in the form of U.S. Treasury futures contracts in order to manage the Portfolio’s duration, or interest rate risk. The Portfolio may enter into derivatives contracts traded on exchanges or in the over the counter market.

The Portfolio may invest in securities of any market sector and may hold a significant amount of securities of companies, from time to time, within a single sector such as financials.

**Principal Risks**

The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

**Interest Rate Risk.** Interest rate risk is the risk that prices of debt securities decline in value when interest rates rise for debt securities that pay a fixed rate of interest. Debt securities with longer durations (a measure of price sensitivity of a bond or bond fund to changes in interest rates) or maturities (i.e., the amount of time until a bond’s issuer must pay its principal or face value) tend to be more sensitive to changes in interest rates than debt securities with shorter durations or maturities. Changes by the Federal Reserve to monetary policies could affect interest rates and the value of some securities. In addition, the phase out of LIBOR (the offered rate for short-term Eurodollar deposits between major international banks) by the end of 2021 could lead to increased volatility and illiquidity in certain markets that currently rely on LIBOR to determine interest rates.

**Credit Risk.** Credit risk is the risk that an issuer of a debt security to which the Portfolio is exposed may no longer be able or willing to pay its debt. As a result of such an event, the debt security may decline in price and affect the value of the Portfolio.

**High Yield Risk.** High yield securities – commonly known as “junk bonds” – to which the Portfolio is exposed are considered predominantly speculative with respect to the issuer’s continuing ability to make principal and interest payments. If the issuer of the security is in default with respect to interest or principal payments, the value of the Portfolio may be negatively affected. High yield securities generally have a less liquid resale market.

**Government Securities Risk.** The Portfolio invests in securities issued or guaranteed by the U.S. government or its agencies and instrumentalities (such as Federal Home Loan Bank, Ginnie Mae, Fannie Mae or Freddie Mac securities). Securities issued or guaranteed by Federal Home Loan Banks, Ginnie Mae, Fannie Mae or Freddie Mac are not issued directly by the U.S. government. Ginnie Mae is a wholly owned U.S. corporation that is authorized to guarantee, with the full faith and credit of the U.S. government, the timely payment of principal and interest of its securities. By contrast, securities issued or guaranteed by U.S. government-related organizations such as Federal Home Loan Banks, Fannie Mae and Freddie Mac are not backed by the full faith and credit of the U.S. government. No assurance can be given that the U.S. government would provide financial support to its agencies and instrumentalities if not required to do so by law. In addition, the value of U.S. government securities may be affected by changes in the credit rating of the U.S. government.

**Mortgage-Backed and Other Asset-Backed Securities Risk.** The value of mortgage-backed and asset-backed securities will be influenced by the factors affecting the housing market and the assets underlying such securities. As a result, during periods of declining asset value, difficult or frozen credit markets, swings in interest rates, or deteriorating economic conditions, mortgage-related and asset-backed securities may decline in value, face valuation difficulties, become more volatile and/or become illiquid. In addition, both mortgage-backed and asset-backed securities are sensitive to changes in the repayment patterns of the underlying security. If the principal payment on the underlying asset is repaid faster or slower than the holder of the asset-backed or mortgage-backed security anticipates, the price of the security may fall, particularly if the holder must reinvest the repaid principal at lower rates or must continue to hold the security when interest rates rise. This effect may cause the value of the Portfolio to decline and reduce the overall return of the Portfolio.

**Market Risk.** Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio’s investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio’s benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer’s securities and therefore the value of the Portfolio.

**Foreign Securities Risk.** Foreign securities generally carry more risk and are more volatile than their domestic counterparts, in part because of potential for
higher political and economic risks, lack of reliable information and fluctuations in currency exchange rates where investments are denominated in currencies other than the U.S. dollar. Certain events in foreign markets may adversely affect foreign and domestic issuers, including interruptions in the global supply chain, natural disasters and outbreak of infectious diseases. The Portfolio's investment in any country could be subject to governmental actions such as capital or currency controls, nationalizing a company or industry, expropriating assets, or imposing punitive taxes that would have an adverse effect on security prices, and impair the Portfolio's ability to repatriate capital or income. Foreign securities may also be more difficult to resell than comparable U.S. securities because the markets for foreign securities are often less liquid. Even when a foreign security increases in price in its local currency, the appreciation may be diluted by adverse changes in exchange rates when the security's value is converted to U.S. dollars. Foreign withholding taxes also may apply and errors and delays may occur in the settlement process for foreign securities.

**Investment Adviser Risk.** The Portfolio is actively managed and the success of its investment strategy depends significantly on the skills of the Adviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio's investment objective.

**Financial Sector Risk.** To the extent that the financials sector continues to represent a significant portion of the Portfolio, the Portfolio will be sensitive to changes in, and its performance may depend to a greater extent on, factors impacting this sector. Performance of companies in the financials sector may be adversely impacted by many factors, including, among others, government regulations, economic conditions, credit rating downgrades, changes in interest rates, and decreased liquidity in credit markets. The impact of more stringent capital requirements, recent or future regulation of any individual financial company or recent or future regulation of the financials sector as a whole cannot be predicted. In recent years, cyber attacks and technology malfunctions and failures have become increasingly frequent in this sector and have caused significant losses.

**Derivatives Risk.** The use of derivatives (such as futures) involves additional risks and transaction costs which could leave the Portfolio in a worse position than if it had not used these instruments. The Portfolio utilizes futures on U.S. Treasuries in order to manage duration. The use of derivatives can lead to losses because of adverse movements in the price or value of the underlying asset, index or rate, which may be magnified by certain features of the contract. Changes in the value of the derivative may not correlate as intended with the underlying asset, rate or index, and the Portfolio could lose much more than the original amount invested. Derivatives can be highly volatile, illiquid and difficult to value. Certain derivatives may also be subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill its contractual obligations due to its financial condition, market events, or other reasons.

**Emerging Markets Risk.** The economic and political structures of developing countries in emerging markets, in most cases, do not compare favorably with the U.S. or other developed countries in terms of wealth and stability, and their financial markets often lack liquidity. Portfolio performance will likely be negatively affected by portfolio exposure to countries and corporations domiciled in or with revenue exposures to countries in the midst of, among other things, hyperinflation, currency devaluation, trade disagreements, sudden political upheaval, or interventionist government policies. Portfolio performance may also be negatively affected by portfolio exposure to countries and corporations domiciled in or with revenue exposures to countries with less developed legal, tax, regulatory, and accounting systems. Significant buying or selling actions by a few major investors may also heighten the volatility of emerging markets. These factors make investing in emerging market countries significantly riskier than in other countries, and events in any one country could cause the Portfolio's share price to decline.

**Liquidity Risk.** Liquidity is the ability to sell a security relatively quickly for a price that most closely reflects the actual value of the security. Dealer inventories of bonds are at or near historic lows in relation to market size, which has the potential to decrease liquidity and increase price volatility in the fixed income markets, particularly during periods of economic or market stress. As a result of this decreased liquidity, the Portfolio may have to accept a lower price to sell a security, sell other securities to raise cash, or give up an investment opportunity, any of which could have a negative effect on performance.

**Portfolio Turnover Rate Risk.** The Portfolio may engage in active and frequent trading of portfolio securities in implementing its principal investment strategies. A high rate of portfolio turnover (100% or more) involves correspondingly greater expenses which are borne by the Portfolio and its shareholders and may also result in short-term capital gains taxable to shareholders.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak...
are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance from year to year and by showing how the Portfolio’s average annual returns for one-, five- and ten-year periods compared to broad-based securities market indices. The index descriptions appear in the “Index Descriptions” section of the prospectus. The Portfolio now compares its returns to the Bloomberg Barclays US Corporate Bond Index because the Portfolio believes it more accurately represents the Portfolio’s investment objective and principal strategies. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart and table include the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assume that you sold your investment at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

**Management**

**Investment Adviser(s)**

The Portfolio is managed by Thrivent Financial for Lutherans (“Thrivent Financial” or the “Adviser”).

**Portfolio Manager(s)**

Kent L. White, CFA is primarily responsible for the day-to-day management of the Portfolio. Mr. White has served as a portfolio manager of the Portfolio since June 2017. Mr. White is the Director of Investment Grade Research, and he has been with Thrivent Financial since 1999.

**Purchase and Sale of Shares**

Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:

- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

**Tax Information**

For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

**Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio’s complete prospectus, which contains more information about the Portfolio and its risks.

- **If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

- **If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio’s prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios’ annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios’ website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. You may elect to receive shareholder reports and other communications by enrolling at Thrivent.com/gopaperless.

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.
Thrivent International Allocation Portfolio

Investment Objective

Thrivent International Allocation Portfolio (the "Portfolio") seeks long-term capital growth.

Fees and Expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

SHAREHOLDER FEES
(fees paid directly from your investment)

| Maximum Sales Charge (load) Imposed On Purchases (as a % of offering price) | N/A |
| Maximum Deferred Sales Charge (load) (as a percentage of the lower of the original purchase price or current net asset value) | N/A |

ANNUAL PORTFOLIO OPERATING EXPENSES
(expenses that you pay each year as a percentage of the value of your investment)

| Management Fees | 0.64% |
| Other Expenses | 0.08% |
| Total Annual Portfolio Operating Expenses | 0.72% |

EXAMPLE
This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year, and that the Portfolio's operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

<table>
<thead>
<tr>
<th>1 Year</th>
<th>3 Years</th>
<th>5 Years</th>
<th>10 Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thrivent International Allocation Portfolio</td>
<td>$74</td>
<td>$230</td>
<td>$401</td>
</tr>
</tbody>
</table>

Portfolio Turnover

The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio's performance. During the most recent fiscal year, the Portfolio's portfolio turnover rate was 106% of the average value of its portfolio.

Principal Strategies

The Portfolio seeks to achieve its objective by investing primarily in equity securities of issuers throughout the world. The Portfolio seeks to diversify its portfolio broadly among developed and emerging countries and among multiple asset classes. Under normal market conditions, the Portfolio invests at least 40% of its net assets in foreign assets. If market conditions are not deemed favorable by the Adviser, the Portfolio could invest a lower percentage, but at least 30% of its net assets in foreign assets. A foreign asset could be an investment in an issuer that is organized under the laws of a foreign jurisdiction; that is traded principally in a foreign country; that derives at least 50% of its revenues or profits from goods produced or sold, investments made, or services performed in a foreign country or has at least 50% of its assets in a foreign country; or that otherwise exposes the Portfolio’s portfolio to the economic fortunes and risks of a foreign country. The Portfolio may also pursue its investment strategy by investing in equity derivatives such as futures contracts to either hedge its exposure or gain exposure to certain investments.

The Adviser will make asset allocation decisions among the various asset classes and has engaged Goldman Sachs Asset Management, L.P. (“GSAM”) to manage the Portfolio's international small- and mid- cap equity assets. The Adviser will directly manage the remaining assets in the Portfolio.

The Portfolio will generally make the following allocations among the broad asset classes listed below:

- International large-cap growth ...................... 0-50%
- International large-cap value ....................... 0-50%
- International small- and mid-cap equities ......... 0-30%
- Emerging markets equity ........................... 0-25%
- U.S. securities .................................. 0-10%

The Portfolio's actual holdings in each broad asset category may be outside the applicable allocation range from time to time due to differing investment performances among asset classes. These allocations may change without shareholder approval or advance notice to shareholders to the extent consistent with applicable law.

In buying and selling securities for the Portfolio, the Adviser uses an active strategy. This strategy consists of a
disciplined approach that involves computer-aided, quantitative analysis of fundamental, technical and risk-related factors. The Adviser’s factor model (a method of analyzing and combining multiple data sources) systematically reviews thousands of stocks, using data such as historical earnings growth and expected future growth, valuation, price momentum, and other quantitative factors to forecast return potential. Then, risk characteristics of potential investments and covariation among securities are analyzed along with the return forecasts in determining the Portfolio’s holdings.

GSAM uses a quantitative style of management, in combination with a qualitative overlay, that emphasizes fundamentally-based stock selection, careful portfolio construction and efficient implementation. The Portfolio’s investments are selected using fundamental research and a variety of quantitative techniques based on certain investment themes. The Portfolio may make investment decisions that deviate from those generated by GSAM’s proprietary models, at the discretion of GSAM. In addition, GSAM may, in its discretion, make changes to its quantitative techniques, or use other quantitative techniques that are based on GSAM’s proprietary research.

Principal Risks

The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

Allocation Risk. The Portfolio’s investment performance depends upon how its assets are allocated across broad asset categories and applicable sub-classes within such categories. Some broad asset categories and sub-classes may perform below expectations or the securities markets generally over short and extended periods. Therefore, a principal risk of investing in the Portfolio is that the allocation strategies used and the allocation decisions made will not produce the desired results.

Equity Security Risk. Equity securities held by the Portfolio may decline significantly in price, sometimes rapidly or unpredictably, over short or extended periods of time, and such declines may occur because of declines in the equity market as a whole, or because of declines in only a particular country, company, industry, or sector of the market. From time to time, the Portfolio may invest a significant portion of its assets in companies in one or more related sectors or industries which would make the Portfolio more vulnerable to adverse developments affecting such sectors or industries. Equity securities are generally more volatile than most debt securities.

Foreign Securities Risk. Foreign securities generally carry more risk and are more volatile than their domestic counterparts, in part because of potential for higher political and economic risks, lack of reliable information and fluctuations in currency exchange rates where investments are denominated in currencies other than the U.S. dollar. Certain events in foreign markets may adversely affect foreign and domestic issuers, including interruptions in the global supply chain, natural disasters and outbreak of infectious diseases. The Portfolio’s investment in any country could be subject to governmental actions such as capital or currency controls, nationalizing a company or industry, expropriating assets, or imposing punitive taxes that would have an adverse effect on security prices, and impair the Portfolio’s ability to repatriate capital or income. Foreign securities may also be more difficult to resell than comparable U.S. securities because the markets for foreign securities are often less liquid. Even when a foreign security increases in price in its local currency, the appreciation may be diluted by adverse changes in exchange rates when the security’s value is converted to U.S. dollars. Foreign withholding taxes also may apply and errors and delays may occur in the settlement process for foreign securities.

Large Cap Risk. Large-sized companies may be unable to respond quickly to new competitive challenges such as changes in technology. They may also not be able to attain the high growth rate of successful smaller companies, especially during extended periods of economic expansion.

Growth Investing Risk. Growth style investing includes the risk of investing in securities whose prices historically have been more volatile than other securities, especially over the short term. Growth stock prices reflect projections of future earnings or revenues and, if a company’s earnings or revenues fall short of expectations, its stock price may fall dramatically.

Value Investing Risk. Value style investing includes the risk that stocks of undervalued companies may not rise as quickly as anticipated if the market doesn’t recognize their intrinsic value or if value stocks are out of favor.

Quantitative Investing Risk. Quantitative Investing Risk is the risk that securities selected according to a quantitative analysis methodology can perform differently from the market as a whole based on the model and the factors used in the analysis, the weight placed on each factor and changes in the factor’s historical trends. Such models are based on assumptions of these and other market factors, and the models may not take into account certain factors, or perform as intended, and may result in a decline in the value of the Portfolio’s portfolio.

Emerging Markets Risk. The economic and political structures of developing countries in emerging markets,
in most cases, do not compare favorably with the U.S. or other developed countries in terms of wealth and stability, and their financial markets often lack liquidity. Portfolio performance will likely be negatively affected by portfolio exposure to countries and corporations domiciled in or with revenue exposures to countries in the midst of, among other things, hyperinflation, currency devaluation, trade disagreements, sudden political upheaval, or interventionist government policies. Portfolio performance may also be negatively affected by portfolio exposure to countries and corporations domiciled in or with revenue exposures to countries with less developed legal, tax, regulatory, and accounting systems. Significant buying or selling actions by a few major investors may also heighten the volatility of emerging markets. These factors make investing in emerging market countries significantly riskier than in other countries, and events in any one country could cause the Portfolio’s share price to decline.

Foreign Currency Risk. The value of a foreign currency may decline against the U.S. dollar, which would reduce the dollar value of securities denominated in that currency. The overall impact of such a decline of foreign currency can be significant, unpredictable, and long lasting, depending on the currencies represented, how each one appreciates or depreciates in relation to the U.S. dollar, and whether currency positions are hedged. Under normal conditions, the Portfolio does not engage in extensive foreign currency hedging programs. Further, exchange rate movements are volatile, and it is not possible to effectively hedge the currency risks of many developing countries.

Market Risk. Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio’s investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio’s benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

Small Cap Risk. Smaller, less seasoned companies often have greater price volatility, lower trading volume, and less liquidity than larger, more established companies. These companies tend to have small revenues, narrower product lines, less management depth and experience, small shares of their product or service markets, fewer financial resources, and less competitive strength than larger companies. Such companies seldom pay significant dividends that could soften the impact of a falling market on returns.

Mid Cap Risk. Medium-sized companies often have greater price volatility, lower trading volume, and less liquidity than larger, more-established companies. These companies tend to have smaller revenues, narrower product lines, less management depth and experience, smaller shares of their product or service markets, fewer financial resources, and less competitive strength than larger companies.

Issuer Risk. Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer’s securities and therefore the value of the Portfolio.

Investment Adviser Risk. The Portfolio is actively managed and the success of its investment strategy depends significantly on the skills of the Adviser or subadviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio’s investment objective.

Multi-Manager Risk. The investment style employed by the subadviser may not be complementary to that of the Adviser. The interplay of the strategy employed by the subadviser and the Adviser may result in the Portfolio indirectly holding positions in certain types of securities, industries or sectors. These positions may be detrimental to a Portfolio’s performance depending upon the performance of those securities and the overall economic environment. The multi-manager approach could result in a high level of portfolio turnover, resulting in higher brokerage expenses and increased tax liability from a Portfolio’s realization of capital gains.

Health Crisis Risk. The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

Performance

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance from year to year and by showing how the Portfolio’s average annual returns for one-, five- and ten-year periods compared to a broad-based securities market index. The index description appears in the “Index Descriptions” section of the prospectus. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart includes the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assume that you sold your investment at
the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

How a portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

### Management

#### Investment Adviser(s)

The Portfolio is managed by Thrivent Financial for Lutherans (“Thrivent Financial” or the “Adviser”), which has engaged Goldman Sachs Asset Management, L.P. (“GSAM”) to subadvise a portion of the Portfolio’s assets.

#### Portfolio Manager(s)

GSAM manages the international small- and mid-cap equities assets of the Portfolio. GSAM’s Quantitative Investment Strategies team (the “QIS” team) manages the international small- and mid-cap equities of the Portfolio with the following team members being jointly and primarily responsible for day-to-day management. **Len Ioffe**, Managing Director, joined GSAM as an associate in 1994 and has been a portfolio manager since 1996. **Osman Ali**, Managing Director, joined GSAM in 2003 and has been a member of the research and portfolio management team within QIS since 2005. Mr. Ali has managed the Portfolio since September 2013. **Takashi Suwabe** is a Managing Director and is co-head of active equity research in the QIS team. Mr. Suwabe joined GSAM in 2004 and has been a member of the QIS team since 2009. Previously, Mr. Suwabe worked at Nomura Securities and Nomura Research Institute. Mr. Suwabe has managed the Portfolio since September 2013.

The Adviser manages the Portfolio’s international large-cap, emerging markets equity and U.S. securities assets. **Noah J. Monsen**, CFA, **Brian W. Bomgren**, CQF, **Darren M. Bagwell**, CFA and **David R. Spangler**, CFA are jointly and primarily responsible for day-to-day management of the Portfolio’s international large-cap, emerging markets equity and U.S. securities assets. Mr. Monsen and Mr. Bomgren have served as portfolio managers of the Portfolio since March 2016. Mr. Bagwell and Mr. Spangler have served as portfolio managers of the Portfolio since February 2019. Mr. Monsen has been with Thrivent Financial since 2000 and has served in an investment management capacity since 2008. Mr. Bomgren has been with Thrivent Financial since 2006 and is currently a Senior Portfolio Manager. Mr. Bagwell is Vice President, Chief Equity Strategist and has been with Thrivent Financial in an investment management capacity since 2002. Mr. Spangler is a Senior Portfolio Manager and has been with Thrivent Financial since 2002. He has served in an investment management capacity since 2006.

#### Purchase and Sale of Shares

Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:

- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

#### Tax Information

For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

#### Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio’s complete prospectus, which contains more information about the Portfolio and its risks.

- **If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

- **If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio’s prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios’ annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios’ website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. You may elect to receive shareholder reports and other communications by enrolling at Thrivent.com/gopaperless.

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.
Thrivent International Index Portfolio

Investment Objective

Thrivent International Index Portfolio (the "Portfolio") seeks total returns that track the performance of the MSCI EAFE Index. The Portfolio’s investment objective may be changed without shareholder approval.

Fees and Expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

</table>

1 These expenses are based on estimated amounts for the current fiscal year.

2 The Adviser has contractually agreed, through at least April 30, 2021, to waive certain fees and/or reimburse certain expenses associated with the shares of the Thrivent International Index Portfolio in order to limit the Total Annual Portfolio Operating Expenses After Fee Waivers and/or Expense Reimbursements to an annual rate of 0.46% of the average daily net assets of the shares. This contractual provision, however, may be terminated before the indicated termination date upon the mutual agreement between the Independent Directors of the Portfolio and the Adviser.

EXAMPLE

This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. In addition, the example for the 1 Year period reflects the effect of the contractual fee waiver and/or expense reimbursement. The example also assumes that your investment has a 5% return each year, and that the Portfolio's operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

</tbody>
</table>

Portfolio Turnover

The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio's performance. Because the Portfolio had not yet commenced operations prior to the date of this prospectus, the Portfolio's portfolio turnover rate for the most recent fiscal year end is not yet available.

Principal Strategies

Under normal circumstances, the Portfolio invests substantially all of its assets (more than 80% of its net assets, plus the amount of any borrowings for investment purposes) in equity securities included in the MSCI EAFE Index in the proportions in which they are represented in the index. This is a passively managed Portfolio, which means that the Adviser does not actively choose the securities that should make up the Portfolio, and instead seeks to replicate the MSCI EAFE Index and provide investment results that, before expenses, correspond generally to the total return of the index. The MSCI EAFE Index captures large- and mid-cap equity securities in developed markets countries, excluding the U.S. and Canada. As of March 31, 2020, the MSCI EAFE Index consisted of 918 constituents in the following 21 developed market country indices: Australia, Austria, Belgium, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, and the United Kingdom. If the securities represented in the MSCI EAFE Index were to become concentrated in any particular industry, the Portfolio's investments would likewise be concentrated in securities of issuers in that industry; the MSCI EAFE Index is not currently concentrated in any single industry. The MSCI EAFE Index is a free float-adjusted market capitalization index that is designed to provide coverage of the relevant...
investment opportunity set with an emphasis on index liquidity, investability and replicability. The MSCI EAFE Index is adjusted quarterly, and when changes to the index occur, the Adviser will attempt to replicate these changes within the Portfolio. However, any such changes may result in slight variations from time to time. The Portfolio may buy and sell equity index futures for investment exposure. For liquidity reasons, the Portfolio may invest to some degree in money market instruments.

**Principal Risks**

The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

**Equity Security Risk.** Equity securities held by the Portfolio may decline significantly in price, sometimes rapidly or unpredictably, over short or extended periods of time, and such declines may occur because of declines in the equity market as a whole, or because of declines in only a particular country, company, industry, or sector of the market. From time to time, the Portfolio may invest a significant portion of its assets in companies in one or more related sectors or industries which would make the Portfolio more vulnerable to adverse developments affecting such sectors or industries. Equity securities are generally more volatile than most debt securities.

**Foreign Securities Risk.** Foreign securities generally carry more risk and are more volatile than their domestic counterparts, in part because of potential for higher political and economic risks, lack of reliable information and fluctuations in currency exchange rates where investments are denominated in currencies other than the U.S. dollar. Certain events in foreign markets may adversely affect foreign and domestic issuers, including interruptions in the global supply chain, natural disasters and outbreak of infectious diseases. The Portfolio’s investment in any country could be subject to governmental actions such as capital or currency controls, nationalizing a company or industry, expropriating assets, or imposing punitive taxes that would have an adverse effect on security prices, and impair the Portfolio’s ability to repatriate capital or income. Foreign securities may also be more difficult to resell than comparable U.S. securities because the markets for foreign securities are often less liquid. Even when a foreign security increases in price in its local currency, the appreciation may be diluted by adverse changes in exchange rates when the security’s value is converted to U.S. dollars. Foreign withholding taxes also may apply and errors and delays may occur in the settlement process for foreign securities.

**Foreign Currency Risk.** The value of a foreign currency may decline against the U.S. dollar, which would reduce the dollar value of securities denominated in that currency. The overall impact of such a decline of foreign currency can be significant, unpredictable, and long lasting, depending on the currencies represented, how each one appreciates or depreciates in relation to the U.S. dollar, and whether currency positions are hedged. Under normal conditions, the Portfolio does not engage in extensive foreign currency hedging programs. Further, exchange rate movements are volatile, and it is not possible to effectively hedge the currency risks of many developing countries.

**Large Cap Risk.** Large-sized companies may be unable to respond quickly to new competitive challenges such as changes in technology. They may also not be able to attain the high growth rate of successful smaller companies, especially during extended periods of economic expansion.

**Market Risk.** Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio’s investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio’s benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

**Mid Cap Risk.** Medium-sized companies often have greater price volatility, lower trading volume, and less liquidity than larger, more-established companies. These companies tend to have smaller revenues, narrower product lines, less management depth and experience, smaller shares of their product or service markets, fewer financial resources, and less competitive strength than larger companies.

**Futures Contract Risk.** The value of a futures contract tends to increase and decrease in tandem with the value of the underlying instrument. The price of futures can be highly volatile; using them could lower total return, and the potential loss from futures can exceed the Portfolio’s initial investment in such contracts. In addition, the value of the futures contract may not accurately track the value of the underlying instrument.

**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer’s securities and therefore the value of the Portfolio.

**Global Indexing Strategy/Index Tracking Risk.** The Portfolio is managed with an indexing investment strategy, attempting to track the performance of an unmanaged index of securities, regardless of the current or projected performance of the Index or of the actual
securities comprising the Index. The structure and composition of the Index will affect the performance, volatility, and risk of the Index and, consequently, the performance, volatility, and risk of the Portfolio. The securities of foreign issuers, securities of companies with significant foreign exposure, and foreign currencies can involve additional risks relating to market, economic, industry, political, regulatory, geopolitical, and other conditions. Less stringent regulatory, accounting, auditing, and disclosure requirements for issuers and markets are more common in certain foreign countries and may make the data upon which the Index is based unreliable or stale. Enforcing legal rights can be difficult, costly, and slow in certain foreign countries, and can be particularly difficult against foreign governments. While the Adviser seeks to track the performance of the Index (i.e., achieve a high degree of correlation with the Index), the Portfolio's return may not match the return of the Index. The Portfolio incurs a number of operating expenses not applicable to the Index, and incurs costs in buying and selling securities. In addition, the Portfolio may not be fully invested at times, generally as a result of cash flows into or out of the Portfolio or reserves of cash held by the Portfolio to meet redemptions. The Adviser may attempt to replicate the Index return by investing in fewer than all of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Portfolio's return and that of the Index.

Health Crisis Risk. The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

Performance

No performance information for the Portfolio is provided because it had not commenced operations prior to the date of this prospectus and does not yet have a full calendar year of performance history. The index description appears in the "Index Descriptions" section of the prospectus. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end that takes place after April 30, 2020.

How the Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio's performance over time.

Management

Investment Adviser(s)

The Portfolio is managed by Thrivent Financial for Lutherans (“Thrivent Financial” or the “Adviser”).

Portfolio Manager(s)

Brian W. Bomgren, CQF and Sharon Wang, CFA, FRM are jointly and primarily responsible for the day-to-day management of the Portfolio. Mr. Bomgren and Ms. Wang have served as portfolio managers of the Portfolio since April 2020. Mr. Bomgren has been with Thrivent Financial since 2006 and is currently a Senior Portfolio Manager. Ms. Wang has been with Thrivent Financial since 2017 and is currently a Senior Portfolio Manager. Prior to joining Thrivent Financial, Ms. Wang worked at Bryn Mawr Capital Management as a portfolio manager from 2009 to 2016.

Purchase and Sale of Shares

Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:

- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

Tax Information

For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio’s complete prospectus, which contains more information about the Portfolio and its risks.

- **If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

- **If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio’s prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios’ annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios’ website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. You may elect to receive shareholder reports and other communications by enrolling at Thrivent.com/gopaperless.

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.
**Investment Objective**

The investment objective of Thrivent Large Cap Growth Portfolio (the "Portfolio") is to achieve long-term growth of capital.

**Fees and Expenses**

This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

<table>

**EXAMPLE** This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year, and that the Portfolio’s operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

<table>
<thead>
<tr>
<th></th>
<th>1 Year</th>
<th>3 Years</th>
<th>5 Years</th>
<th>10 Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thrivent Large Cap Growth Portfolio</td>
<td>$45</td>
<td>$141</td>
<td>$246</td>
<td>$555</td>
</tr>
</tbody>
</table>

**Portfolio Turnover**

The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio’s performance. During the most recent fiscal year, the Portfolio’s portfolio turnover rate was 58% of the average value of its portfolio.

**Principal Strategies**

Under normal circumstances, the Portfolio invests at least 80% of its net assets (plus the amount of any borrowing for investment purposes) in equity securities of large companies. The Adviser focuses mainly on the equity securities of large domestic and international companies which have market capitalizations equivalent to those included in widely known indices such as the Russell 1000 Growth Index, S&P 500 Index, or the large company market capitalization classifications published by Lipper, Inc. These companies typically have a market capitalization of approximately $8 billion or more. Should the Adviser change the investments used for purposes of this 80% threshold, you will be notified at least 60 days prior to the change.

The Portfolio seeks to achieve its investment objective by investing in common stocks. The Adviser uses fundamental, quantitative, and technical investment research techniques and focuses on stocks of companies that it believes have demonstrated and will sustain above-average earnings growth over time, or which are expected to develop rapid sales and earnings growth in the future when compared to the economy and stock market as a whole. Many such companies are in the technology sector and the Portfolio may at times have a higher concentration in this industry.

The Portfolio may sell securities for a variety of reasons, such as to secure gains, limit losses, or reposition assets into more promising opportunities.

**Principal Risks**

The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

**Large Cap Risk.** Large-sized companies may be unable to respond quickly to new competitive challenges such as changes in technology. They may also not be able to
attain the high growth rate of successful smaller companies, especially during extended periods of economic expansion.

**Growth Investing Risk.** Growth style investing includes the risk of investing in securities whose prices historically have been more volatile than other securities, especially over the short term. Growth stock prices reflect projections of future earnings or revenues and, if a company's earnings or revenues fail short of expectations, its stock price may fall dramatically.

**Equity Security Risk.** Equity securities held by the Portfolio may decline significantly in price, sometimes rapidly or unpredictably, over short or extended periods of time, and such declines may occur because of declines in the equity market as a whole, or because of declines in only a particular country, company, industry, or sector of the market. From time to time, the Portfolio may invest a significant portion of its assets in companies in one or more related sectors or industries which would make the Portfolio more vulnerable to adverse developments affecting such sectors or industries. Equity securities are generally more volatile than most debt securities.

**Market Risk.** Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio’s investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio's benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

**Technology-Oriented Companies Risk.** Common stocks of companies that rely extensively on technology, science or communications in their product development or operations may be more volatile than the overall stock market and may or may not move in tandem with the overall stock market. Technology, science and communications are rapidly changing fields, and stocks of these companies, especially of smaller or unseasoned companies, may be subject to more abrupt or erratic market movements than the stock market in general. There are significant competitive pressures among technology-oriented companies and the products or operations of such companies may become obsolete quickly. In addition, these companies may have limited product lines, markets or financial resources and the management of such companies may be more dependent upon one or a few key people.

**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer’s securities and therefore the value of the Portfolio.

**Investment Adviser Risk.** The Portfolio is actively managed and the success of its investment strategy depends significantly on the skills of the Adviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio’s investment objective.

**Foreign Securities Risk.** Foreign securities generally carry more risk and are more volatile than their domestic counterparts, in part because of potential for higher political and economic risks, lack of reliable information and fluctuations in currency exchange rates where investments are denominated in currencies other than the U.S. dollar. Certain events in foreign markets may adversely affect foreign and domestic issuers, including interruptions in the global supply chain, natural disasters and outbreak of infectious diseases. The Portfolio's investment in any country could be subject to governmental actions such as capital or currency controls, nationalizing a company or industry, expropriating assets, or imposing punitive taxes that would have an adverse effect on security prices, and impair the Portfolio's ability to repatriate capital or income. Foreign securities may also be more difficult to resell than comparable U.S. securities because the markets for foreign securities are often less liquid. Even when a foreign security increases in price in its local currency, the appreciation may be diluted by adverse changes in exchange rates when the security’s value is converted to U.S. dollars. Foreign withholding taxes also may apply and errors and delays may occur in the settlement process for foreign securities.

**Non-Diversified Risk.** The Portfolio is not “diversified” within the meaning of the 1940 Act. That means the Portfolio may invest a greater percentage of its assets in the securities of any single issuer compared to other funds. A non-diversified portfolio is generally more susceptible than a diversified portfolio to the risk that events or developments affecting a particular issuer or industry will significantly affect the Portfolio’s performance.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.
**Performance**

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio's performance from year to year and by showing how the Portfolio's average annual returns for one-, five- and ten-year periods compared to broad-based securities market indices. The index descriptions appear in the “Index Descriptions” section of the prospectus. The Portfolio now compares its returns to the Russell 1000 Growth Index because it is commonly used by funds with the same investment objective and principal strategies as the Portfolio. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart and table include the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assume that you sold your investment at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

**Management**

**Investment Adviser(s)**

The Portfolio is managed by Thrivent Financial for Lutherans ("Thrivent Financial" or the “Adviser”).

**Portfolio Manager(s)**

**Lauri Brunner** is primarily responsible for the day-to-day management of the Portfolio, and she has served as portfolio manager of the Portfolio since September 2018. Ms. Brunner has been with Thrivent Financial since 2007 and currently is a Senior Portfolio Manager.

**Purchase and Sale of Shares**

Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:

- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

**Tax Information**

For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

**Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio’s complete prospectus, which contains more information about the Portfolio and its risks.

- If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

- If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio’s prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios’ annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios’ website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. You may elect to receive shareholder reports and other communications by enrolling at Thrivent.com/gopaperless.

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.
Thrivent Large Cap Index Portfolio

**Investment Objective**

Thrivent Large Cap Index Portfolio (the "Portfolio") seeks total returns that track the performance of the S&P 500 Index.

**Fees and Expenses**

This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

**EXAMPLE**

This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year, and that the Portfolio's operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

<table>
<thead>
<tr>
<th></th>
<th>1 Year</th>
<th>3 Years</th>
<th>5 Years</th>
<th>10 Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thrivent Large Cap Index Portfolio</td>
<td>$25</td>
<td>$77</td>
<td>$135</td>
<td>$306</td>
</tr>
</tbody>
</table>

**Principal Strategies**

Under normal circumstances, the Portfolio invests substantially all of its assets (more than 80% of its net assets, plus the amount of any borrowings for investment purposes) in the large company common stocks included in the S&P 500 Index in the proportions in which they are represented in the index. This is a passively managed Portfolio, which means that the Adviser does not actively choose the securities that should make up the Portfolio. The S&P 500 Index is comprised of 500 domestic large company stocks. Accordingly, the Portfolio invests in stocks of larger companies from a broad range of industries. The S&P 500 Index is adjusted quarterly, and when changes to the index occur, the Adviser will attempt to replicate these changes within the Portfolio. However, any such changes may result in slight variations from time to time. The Portfolio may buy and sell equity index futures for investment exposure. For liquidity reasons, the Portfolio may invest to some degree in money market instruments.

**Principal Risks**

The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

- **Large Cap Risk.** Large-sized companies may be unable to respond quickly to new competitive challenges such as changes in technology. They may also not be able to attain the high growth rate of successful smaller companies, especially during extended periods of economic expansion.

- **Market Risk.** Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio's investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio's benchmark index(es). The securities markets...
may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

**Equity Security Risk.** Equity securities held by the Portfolio may decline significantly in price, sometimes rapidly or unpredictably, over short or extended periods of time, and such declines may occur because of declines in the equity market as a whole, or because of declines in only a particular country, company, industry, or sector of the market. From time to time, the Portfolio may invest a significant portion of its assets in companies in one or more related sectors or industries which would make the Portfolio more vulnerable to adverse developments affecting such sectors or industries. Equity securities are generally more volatile than most debt securities.

**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer’s securities and therefore the value of the Portfolio.

**Futures Contract Risk.** The value of a futures contract tends to increase and decrease in tandem with the value of the underlying instrument. The price of futures can be highly volatile; using them could lower total return, and the potential loss from futures can exceed the Portfolio’s initial investment in such contracts. In addition, the value of the futures contract may not accurately track the value of the underlying instrument.

**Indexing Strategy/Index Tracking Risk.** The Portfolio is managed with an indexing investment strategy, attempting to track the performance of an unmanaged index of securities, regardless of the current or projected performance of the Index or of the actual securities comprising the Index. The structure and composition of the Index will affect the performance, volatility, and risk of the Index and, consequently, the performance, volatility, and risk of the Portfolio. While the Adviser seeks to track the performance of the Index (i.e., achieve a high degree of correlation with the Index), the Portfolio’s return may not match the return of the Index. The Portfolio incurs a number of operating expenses not applicable to the Index, and incurs costs in buying and selling securities. In addition, the Portfolio may not be fully invested at times, generally as a result of cash flows into or out of the Portfolio or reserves of cash held by the Portfolio to meet redemptions. The Adviser may attempt to replicate the Index return by investing in fewer than all of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Portfolio’s return and that of the Index.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance from year to year and by showing how the Portfolio’s average annual returns for one-, five- and ten-year periods compared to a broad-based securities market index. The index description appears in the "Index Descriptions" section of the prospectus. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart and table include the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assume that you sold your investment at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

Instead, the reports will be made available on the Portfolios’ website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. You may elect to receive shareholder reports and other communications by enrolling at Thrivent.com/gopaperless.

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.
Investment Objective
The investment objective of Thrivent Large Cap Value Portfolio (the "Portfolio") is to achieve long-term growth of capital.

Fees and Expenses
This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

EXAMPLE This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year, and that the Portfolio's operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

<table>

<td>$202</td>
<td>$351</td>
</tr>
</tbody>
</table>

Principal Strategies
Under normal circumstances, the Portfolio invests at least 80% of its net assets (plus the amount of any borrowing for investment purposes) in equity securities of large companies. The Adviser focuses mainly on the equity securities of large domestic and international companies which have market capitalizations equivalent to those included in widely known indices such as the Russell 1000 Value Index, S&P 500 Index, or the large company market capitalization classifications published by Lipper, Inc. These companies typically have a market capitalization of approximately $8 billion or more. Should the Adviser change the investments used for purposes of this 80% threshold, we will notify you at least 60 days prior to the change.

The Portfolio seeks to achieve its investment objective by investing primarily in common stocks. The Adviser uses fundamental, quantitative, and technical investment research techniques and focuses on stocks of companies that it believes are undervalued in relation to their long-term earnings power or asset value. These stocks typically, but not always, have below average price-to-earnings and price-to-book value ratios. The Portfolio may sell securities for a variety of reasons, such as to secure gains, limit losses, or reposition assets into more promising opportunities.

Principal Risks
The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

Large Cap Risk. Large-sized companies may be unable to respond quickly to new competitive challenges such as changes in technology. They may also not be able to attain the high growth rate of successful smaller companies, especially during extended periods of economic expansion.

Value Investing Risk. Value style investing includes the risk that stocks of undervalued companies may not rise as quickly as anticipated if the market doesn’t recognize their intrinsic value or if value stocks are out of favor.

Equity Security Risk. Equity securities held by the Portfolio may decline significantly in price, sometimes
rapidly or unpredictably, over short or extended periods of time, and such declines may occur because of declines in the equity market as a whole, or because of declines in only a particular country, company, industry, or sector of the market. From time to time, the Portfolio may invest a significant portion of its assets in companies in one or more related sectors or industries which would make the Portfolio more vulnerable to adverse developments affecting such sectors or industries. Equity securities are generally more volatile than most debt securities.

**Market Risk.** Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio’s investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio’s benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer’s securities and therefore the value of the Portfolio.

**Investment Adviser Risk.** The Portfolio is actively managed and the success of its investment strategy depends significantly on the skills of the Adviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio’s investment objective.

**Foreign Securities Risk.** Foreign securities generally carry more risk and are more volatile than their domestic counterparts, in part because of potential for higher political and economic risks, lack of reliable information and fluctuations in currency exchange rates where investments are denominated in currencies other than the U.S. dollar. Certain events in foreign markets may adversely affect foreign and domestic issuers, including interruptions in the global supply chain, natural disasters and outbreak of infectious diseases. The Portfolio’s investment in any country could be subject to governmental actions such as capital or currency controls, nationalizing a company or industry, expropriating assets, or imposing punitive taxes that would have an adverse effect on security prices, and impair the Portfolio’s ability to repatriate capital or income. Foreign securities may also be more difficult to resell than comparable U.S. securities because the markets for foreign securities are often less liquid. Even when a foreign security increases in price in its local currency, the appreciation may be diluted by adverse changes in exchange rates when the security’s value is converted to U.S. dollars. Foreign withholding taxes also may apply and errors and delays may occur in the settlement process for foreign securities.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance from year to year and by showing how the Portfolio’s average annual returns for one-, five- and ten-year periods compared to broad-based securities market indices. The index descriptions appear in the “Index Descriptions” section of the prospectus. The Portfolio now compares its returns to the Russell 1000 Value Index because it is commonly used by funds with the same investment objective and principal strategies as the Portfolio. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart and table include the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assume that you sold your investment at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

**TSF-68**
Management

Investment Adviser(s)

The Portfolio is managed by Thrivent Financial for Lutherans (“Thrivent Financial” or the “Adviser”).

Portfolio Manager(s)

Kurt J. Lauber, CFA is primarily responsible for the day-to-day management of the Portfolio. Mr. Lauber has served as portfolio manager of the Portfolio since April 2013. Mr. Lauber has been with Thrivent Financial since 2004 and previously served as an associate portfolio manager.

Purchase and Sale of Shares

Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:

- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

Tax Information

For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio’s complete prospectus, which contains more information about the Portfolio and its risks.

- **If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

- **If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio’s prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios’ annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios’ website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. You may elect to receive shareholder reports and other communications by enrolling at Thrivent.com/gopaperless.

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.
Thrivent Limited Maturity Bond Portfolio

Investment Objective
Thrivent Limited Maturity Bond Portfolio (the "Portfolio") seeks a high level of current income consistent with stability of principal.

Fees and Expenses
This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

EXAMPLE This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year, and that the Portfolio's operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

<table>
<thead>
<tr>
<th>1 Year</th>
<th>3 Years</th>
<th>5 Years</th>
<th>10 Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>$45</td>
<td>$141</td>
<td>$246</td>
<td>$555</td>
</tr>
</tbody>
</table>

Portfolio Turnover
The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio's performance. During the most recent fiscal year, the Portfolio’s portfolio turnover rate was 101% of the average value of its portfolio.

Principal Strategies
The principal strategies of the Portfolio are to invest in investment-grade corporate bonds, government bonds, municipal bonds, mortgage-backed securities (including commercially backed ones), asset-backed securities, and collateralized debt obligations (including collateralized loan obligations). Asset-backed securities are securities backed by notes or receivables originated by banks, credit card companies, or other providers of credit; collateralized debt obligations are types of asset-backed securities. Under normal market conditions, the Portfolio invests at least 80% of its net assets (plus the amount of any borrowing for investment purposes) in debt securities or preferred stock in at least the “Baa” major rating category by Moody’s or at least in the “BBB” major rating category by S&P or unrated securities considered to be of comparable quality by the Portfolio’s Adviser, with the dollar-weighted average effective maturity for the Portfolio expected to be between one and five years. Should the Adviser change the investments used for purposes of this 80% threshold, you will be notified at least 60 days prior to the change.

The Portfolio may also invest in high yield, high risk bonds, notes, debentures and other debt obligations or preferred stock commonly known as “junk bonds.” At the time of purchase, these securities are rated within or below the “BB” major rating category by S&P or the “Ba” major rating category by Moody’s or are unrated but considered to be of comparable quality by the Adviser.

The Adviser uses fundamental, quantitative, and technical investment research techniques to determine what debt obligations to buy and sell. Fundamental techniques assess a security’s value based on an issuer's financial profile, management, and business prospects while quantitative and technical techniques involve a more data-oriented analysis of financial information, market trends and price movements. The Adviser focuses on companies that it believes are financially sound and have strong cash flow, asset values and interest or dividend earnings, and may invest in U.S. dollar-denominated debt of foreign companies.

The Portfolio utilizes derivatives primarily in the form of U.S. Treasury futures contracts in order to manage the Portfolio’s duration, or interest rate risk. The Portfolio
may enter into derivatives contracts traded on exchanges or in the over the counter market.

**Principal Risks**

The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

**Government Securities Risk.** The Portfolio invests in securities issued or guaranteed by the U.S. government or its agencies and instrumentalities (such as Federal Home Loan Bank, Ginnie Mae, Fannie Mae or Freddie Mac securities). Securities issued or guaranteed by Federal Home Loan Banks, Ginnie Mae, Fannie Mae or Freddie Mac are not issued directly by the U.S. government. Ginnie Mae is a wholly owned U.S. corporation that is authorized to guarantee, with the full faith and credit of the U.S. government, the timely payment of principal and interest of its securities. By contrast, securities issued or guaranteed by U.S. government-related organizations such as Federal Home Loan Banks, Fannie Mae and Freddie Mac are not backed by the full faith and credit of the U.S. government. No assurance can be given that the U.S. government would provide financial support to its agencies and instrumentalities if not required to do so by law. In addition, the value of U.S. government securities may be affected by changes in the credit rating of the U.S. government.

**Mortgage-Backed and Other Asset-Backed Securities Risk.** The value of mortgage-backed and asset-backed securities will be influenced by the factors affecting the housing market and the assets underlying such securities. As a result, during periods of declining asset value, difficult or frozen credit markets, swings in interest rates, or deteriorating economic conditions, mortgage-related and asset-backed securities may decline in value, face valuation difficulties, become more volatile and/or become illiquid. In addition, both mortgage-backed and asset-backed securities are sensitive to changes in the repayment patterns of the underlying security. If the principal payment on the underlying asset is repaid faster or slower than the holder of the asset-backed or mortgage-backed security anticipates, the price of the security may fall, particularly if the holder must reinvest the repaid principal at lower rates or must continue to hold the security when interest rates rise. This effect may cause the value of the Portfolio to decline and reduce the overall return of the Portfolio.

**Collateralized Debt Obligations Risk.** The risks of an investment in a collateralized debt obligation (“CDO”) depend largely on the quality and type of the collateral and the tranche of the CDO in which the Portfolio invests. In addition to the typical risks associated with fixed income securities and asset-backed securities, CDOs carry additional risks including, but not limited to: (i) the possibility that distributions from collateral securities will not be adequate to make interest or other payments; (ii) the risk that the collateral may default, decline in value, and/or be downgraded; (iii) the Portfolio may invest in tranches of CDOs that are subordinate to other tranches; (iv) the structure and complexity of the transaction and the legal documents could lead to disputes among investors regarding the characterization of proceeds; (v) the investment return achieved by the Portfolio could be significantly different than those predicted by financial models; (vi) the lack of a readily available secondary market for CDOs; (vii) risk of forced “fire sale” liquidation due to technical defaults such as coverage test failures; and (viii) the CDO’s manager may perform poorly.

**Interest Rate Risk.** Interest rate risk is the risk that prices of debt securities decline in value when interest rates rise for debt securities that pay a fixed rate of interest. Debt securities with longer durations (a measure of price sensitivity of a bond or bond fund to changes in interest rates) or maturities (i.e., the amount of time until a bond’s issuer must pay its principal or face value) tend to be more sensitive to changes in interest rates than debt securities with shorter durations or maturities. Changes by the Federal Reserve to monetary policies could affect interest rates and the value of some securities. In addition, the phase out of LIBOR (the offered rate for short-term Eurodollar deposits between major international banks) by the end of 2021 could lead to increased volatility and illiquidity in certain markets that currently rely on LIBOR to determine interest rates.

**Credit Risk.** Credit risk is the risk that an issuer of a debt security to which the Portfolio is exposed may no longer be able or willing to pay its debt. As a result of such an event, the debt security may decline in price and affect the value of the Portfolio.

**Market Risk.** Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio’s investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio’s benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

**Futures Contract Risk.** The value of a futures contract tends to increase and decrease in tandem with the value of the underlying instrument. The price of futures can be highly volatile; using them could lower total return, and the potential loss from futures can exceed the Portfolio’s initial investment in such contracts. In addition, the value of the futures contract may not accurately track the value of the underlying instrument.
**High Yield Risk.** High yield securities – commonly known as “junk bonds” – to which the Portfolio is exposed are considered predominantly speculative with respect to the issuer’s continuing ability to make principal and interest payments. If the issuer of the security is in default with respect to interest or principal payments, the value of the Portfolio may be negatively affected. High yield securities generally have a less liquid resale market.

**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer’s securities and therefore the value of the Portfolio.

**Investment Adviser Risk.** The Portfolio is actively managed and the success of its investment strategy depends significantly on the skills of the Adviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio’s investment objective.

**Liquidity Risk.** Liquidity is the ability to sell a security relatively quickly for a price that most closely reflects the actual value of the security. Dealer inventories of bonds are at or near historic lows in relation to market size, which has the potential to decrease liquidity and increase price volatility in the fixed income markets, particularly during periods of economic or market stress. As a result of this decreased liquidity, the Portfolio may have to accept a lower price to sell a security, sell other securities to raise cash, or give up an investment opportunity, any of which could have a negative effect on performance.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance from year to year and by showing how the Portfolio’s average annual returns for one-, five- and ten-year periods compared to a broad-based securities market index. The index description appears in the “Index Descriptions” section of the prospectus. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart and table include the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assume that you sold your investment at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

<td>0.36%</td>
</tr>
<tr>
<td>Total Annual Portfolio Operating Expenses After Fee Waivers and/or Expense Reimbursements¹</td>
<td>0.80%</td>
</tr>
</tbody>
</table>

¹ The Adviser has contractually agreed, through at least April 30, 2021, to waive a portion of the management fees associated with the shares of the Thrivent Low Volatility Equity Portfolio in order to limit the Total Annual Portfolio Operating Expenses After Fee Waivers and/or Expense Reimbursements to an annual rate of 0.80% of the average daily net assets of the shares. This contractual provision, however, may be terminated before the indicated termination date upon the mutual agreement between the Independent Directors of the Portfolio and the Adviser.

EXAMPLE This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. In addition, the example for the 1 Year period reflects the effect of the contractual fee waiver and/or expense reimbursement. The example also assumes that your investment has a 5% return each year, and that the Portfolio's operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

<td>$333</td>
<td>$604</td>
</tr>
</tbody>
</table>

Portfolio Turnover
The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio's performance. During the most recent fiscal year, the Portfolio’s portfolio turnover rate was 53% of the average value of its portfolio.

Principal Strategies
Under normal circumstances, the Portfolio invests at least 80% of its net assets (plus the amount of any borrowing for investment purposes) in equity securities. The Portfolio’s investments are diversified globally. The Portfolio may invest in securities denominated in U.S. dollars and the currencies of the foreign countries in which it may invest. The Portfolio typically has full currency exposure to those markets in which it invests. The Portfolio may buy or sell equity index futures for investment exposure or hedging purposes. The Portfolio may invest in securities of any market capitalization, including small- and mid-cap securities.

In seeking to achieve the Portfolio’s investment objective, the Adviser employs investment management techniques to identify securities that exhibit low volatility returns. Volatility refers to the variation in security and market prices over time. Over a full market cycle, the Portfolio seeks to produce returns similar to the MSCI World Minimum Volatility Index – USD Net Returns. It is expected that the Portfolio will generally underperform the global equity markets during periods of strong market performance.

In buying and selling securities for the Portfolio, the Adviser uses an active strategy. This strategy consists of a disciplined approach that involves computer-aided, quantitative analysis of fundamental, technical and risk-related factors. The Adviser’s factor model (a
method of analyzing and combining multiple data sources) systematically reviews thousands of stocks, using data such as historical earnings growth and expected future growth, valuation, price momentum, and other quantitative factors to forecast return potential. Then, risk characteristics of potential investments and covariation among securities are analyzed along with the return forecasts in determining the Portfolio’s holdings to produce a portfolio with reduced volatility.

**Principal Risks**

The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

**Equity Security Risk.** Equity securities held by the Portfolio may decline significantly in price, sometimes rapidly or unpredictably, over short or extended periods of time, and such declines may occur because of declines in the equity market as a whole, or because of declines in only a particular country, company, industry, or sector of the market. From time to time, the Portfolio may invest a significant portion of its assets in companies in one or more related sectors or industries which would make the Portfolio more vulnerable to adverse developments affecting such sectors or industries. Equity securities are generally more volatile than most debt securities.

**Large Cap Risk.** Large-sized companies may be unable to respond quickly to new competitive challenges such as changes in technology. They may also not be able to attain the high growth rate of successful smaller companies, especially during extended periods of economic expansion.

**Quantitative Investing Risk.** Quantitative Investing Risk is the risk that securities selected according to a quantitative analysis methodology can perform differently from the market as a whole based on the model and the factors used in the analysis, the weight placed on each factor and changes in the factor’s historical trends. Such models are based on assumptions of these and other market factors, and the models may not take into account certain factors, or perform as intended, and may result in a decline in the value of the Portfolio’s portfolio.

**Foreign Securities Risk.** Foreign securities generally carry more risk and are more volatile than their domestic counterparts, in part because of potential for higher political and economic risks, lack of reliable information and fluctuations in currency exchange rates where investments are denominated in currencies other than the U.S. dollar. Certain events in foreign markets may adversely affect foreign and domestic issuers, including interruptions in the global supply chain, natural disasters and outbreak of infectious diseases. The Portfolio’s investment in any country could be subject to governmental actions such as capital or currency controls, nationalizing a company or industry, expropriating assets, or imposing punitive taxes that would have an adverse effect on security prices, and impair the Portfolio’s ability to repatriate capital or income. Foreign securities may also be more difficult to resell than comparable U.S. securities because the markets for foreign securities are often less liquid. Even when a foreign security increases in price in its local currency, the appreciation may be diluted by adverse changes in exchange rates when the security’s value is converted to U.S. dollars. Foreign withholding taxes also may apply and errors and delays may occur in the settlement process for foreign securities.

**Market Risk.** Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio’s investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio’s benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

**Mid Cap Risk.** Medium-sized companies often have greater price volatility, lower trading volume, and less liquidity than larger, more-established companies. These companies tend to have smaller revenues, narrower product lines, less management depth and experience, smaller shares of their product or service markets, fewer financial resources, and less competitive strength than larger companies.

**Foreign Currency Risk.** The value of a foreign currency may decline against the U.S. dollar, which would reduce the dollar value of securities denominated in that currency. The overall impact of such a decline of foreign currency can be significant, unpredictable, and long lasting, depending on the currencies represented, how each one appreciates or depreciates in relation to the U.S. dollar, and whether currency positions are hedged. Under normal conditions, the Portfolio does not engage in extensive foreign currency hedging programs. Further, exchange rate movements are volatile, and it is not possible to effectively hedge the currency risks of many developing countries.

**Futures Contract Risk.** The value of a futures contract tends to increase and decrease in tandem with the value of the underlying instrument. The price of futures can be highly volatile; using them could lower total return, and the potential loss from futures can exceed the Portfolio’s initial investment in such contracts. In addition, the value of the futures contract may not accurately track the value of the underlying instrument.
**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer’s securities and therefore the value of the Portfolio.

**Investment Adviser Risk.** The Portfolio is actively managed and the success of its investment strategy depends significantly on the skills of the Adviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio’s investment objective.

**Derivatives Risk.** The use of derivatives (such as futures) involves additional risks and transaction costs which could leave the Portfolio in a worse position than if it had not used these instruments. The Portfolio utilizes equity futures in order to increase or decrease its exposure to various asset classes at a lower cost than trading stocks directly. The use of derivatives can lead to losses because of adverse movements in the price or value of the underlying asset, index or rate, which may be magnified by certain features of the contract. Changes in the value of the derivative may not correlate as intended with the underlying asset, rate or index, and the Portfolio could lose much more than the original amount invested. Derivatives can be highly volatile, illiquid and difficult to value. Certain derivatives may also be subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill its contractual obligations due to its financial condition, market events, or other reasons.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance from year to year and by showing how the Portfolio’s average annual returns for the one-year period and since inception compared to a broad-based securities market index. The index description appears in the "Index Descriptions" section of the prospectus. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart includes the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assumes that you sold your investment at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

**Management**

**Investment Adviser(s)**

The Portfolio is managed by Thrivent Financial for Lutherans (“Thrivent Financial” or the “Adviser”).

**Portfolio Manager(s)**

Noah J. Monsen, CFA and Brian W. Bomgren, CQF are jointly and primarily responsible for the day-to-day management of the Portfolio. Mr. Monsen and Mr. Bomgren have served as portfolio managers of the
Portfolio since April 2017 and April 2018, respectively. Mr. Monsen has been with Thrivent Financial since 2000 and has served in an investment management capacity since 2008. Mr. Bomgren has been with Thrivent Financial since 2006 and is currently a Senior Portfolio Manager.

Purchase and Sale of Shares
Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:
- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

Tax Information
For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

Payments to Broker-Dealers and Other Financial Intermediaries
If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio’s complete prospectus, which contains more information about the Portfolio and its risks.

- **If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

- **If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio’s prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios’ annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios’ website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. You may elect to receive shareholder reports and other communications by enrolling at Thrivent.com/gopaperless.

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.
Thrivent Mid Cap Growth Portfolio

Investment Objective
Thrivent Mid Cap Growth Portfolio (the “Portfolio”) seeks long-term capital growth. The Portfolio’s investment objective may be changed without shareholder approval.

Fees and Expenses
This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

| Total Annual Portfolio Operating Expenses After Fee Waivers and/or Expense Reimbursements2                      | 0.85%  | N/A     |

1 These expenses are based on estimated amounts for the current fiscal year.
2 The Adviser has contractually agreed, through at least April 30, 2021, to waive certain fees and/or reimburse certain expenses associated with the shares of the Thrivent Mid Cap Growth Portfolio in order to limit the Total Annual Portfolio Operating Expenses After Fee Waivers and/or Expense Reimbursements to an annual rate of 0.85% of the average daily net assets of the shares. This contractual provision, however, may be terminated before the indicated termination date upon the mutual agreement between the Independent Directors of the Portfolio and the Adviser.

EXAMPLE This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. In addition, the example for the 1 Year period reflects the effect of the contractual fee waiver and/or expense reimbursement. The example also assumes that your investment has a 5% return each year, and that the Portfolio’s operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

| Th rivent Mid Cap Growth Portfolio | $87    | $908   |

Portfolio Turnover
The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio’s performance. Because the Portfolio had not yet commenced operations prior to the date of this prospectus, the Portfolio’s portfolio turnover rate for the most recent fiscal year end is not yet available.

Principal Strategies
Under normal circumstances, the Portfolio invests at least 80% of its net assets (plus the amount of any borrowing for investment purposes) in equity securities of mid-sized companies. The Adviser focuses mainly on the equity securities of mid-sized U.S. companies which have market capitalizations equivalent to those included in widely known indices such as the Russell Midcap Growth Index, S&P MidCap 400 Index, or the mid-sized company market capitalization classifications published by Lipper, Inc. These companies typically have a market capitalization of approximately $2 billion to $25 billion. Should the Adviser change the investments used for purposes of this 80% threshold, you will be notified at least 60 days prior to the change.

The Portfolio seeks to achieve its investment objective by investing primarily in common stocks. The Adviser uses fundamental, quantitative, and technical investment research techniques and focuses on stocks of companies that it believes have demonstrated and believes will sustain above average revenue and earnings growth over time, or which are expected to develop rapid sales and earnings growth in the future when compared to the economy and stock market as a whole. Many such companies are in the technology sector and the Portfolio may at times have a higher concentration in this industry.
The Adviser may sell securities for a variety of reasons, such as to secure gains, limit losses, or reposition assets to more promising opportunities.

**Principal Risks**

The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

**Mid Cap Risk.** Medium-sized companies often have greater price volatility, lower trading volume, and less liquidity than larger, more-established companies. These companies tend to have smaller revenues, narrower product lines, less management depth and experience, smaller shares of their product or service markets, fewer financial resources, and less competitive strength than larger companies.

**Growth Investing Risk.** Growth style investing includes the risk of investing in securities whose prices historically have been more volatile than other securities, especially over the short term. Growth stock prices reflect projections of future earnings or revenues and, if a company’s earnings or revenues fall short of expectations, its stock price may fall dramatically.

**Equity Security Risk.** Equity securities held by the Portfolio may decline significantly in price, sometimes rapidly or unpredictably, over short or extended periods of time, and such declines may occur because of declines in the equity market as a whole, or because of declines in only a particular country, company, industry, or sector of the market. From time to time, the Portfolio may invest a significant portion of its assets in companies in one or more related sectors or industries which would make the Portfolio more vulnerable to adverse developments affecting such sectors or industries. Equity securities are generally more volatile than most debt securities.

**Market Risk.** Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio’s investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio’s benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

**Technology-Oriented Companies Risk.** Common stocks of companies that rely extensively on technology, science or communications in their product development or operations may be more volatile than the overall stock market and may or may not move in tandem with the overall stock market. Technology, science and communications are rapidly changing fields, and stocks of these companies, especially of smaller or unseasoned companies, may be subject to more abrupt or erratic market movements than the stock market in general. There are significant competitive pressures among technology-oriented companies and the products or operations of such companies may become obsolete quickly. In addition, these companies may have limited product lines, markets or financial resources and the management of such companies may be more dependent upon one or a few key people.

**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer’s securities and therefore the value of the Portfolio.

**Investment Adviser Risk.** The Portfolio is actively managed and the success of its investment strategy depends significantly on the skills of the Adviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio’s investment objective.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

No performance information for the Portfolio is provided because it had not commenced operations prior to the date of this prospectus and does not yet have a full calendar year of performance history. The index description appears in the "Index Descriptions" section of the prospectus. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end that takes place after April 30, 2020.

How the Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.
Management

Investment Adviser(s)
The Portfolio is managed by Thrivent Financial for Lutherans (“Thrivent Financial” or the “Adviser”).

Portfolio Manager(s)

David J. Lettenberger, CFA is primarily responsible for the day-to-day management of the Portfolio. Mr. Lettenberger has served as portfolio manager of the Portfolio since April 2020. Mr. Lettenberger has been a portfolio manager at Thrivent Financial since 2013, when he joined the firm.

Purchase and Sale of Shares

Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:

- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

Tax Information

For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio’s complete prospectus, which contains more information about the Portfolio and its risks.

• If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

• If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio’s prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios’ annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios’ website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

**Portfolio Turnover**

The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio's performance. During the most recent fiscal year, the Portfolio’s portfolio turnover rate was 17% of the average value of its portfolio.

**Principal Strategies**

Under normal circumstances, the Portfolio invests substantially all of its assets (more than 80% of its net assets, plus the amount of any borrowings for investment purposes) in mid-sized company stocks included in the S&P MidCap 400 Index in the proportions in which they are represented in the Index. This is a passively managed Portfolio, which means that the Adviser does not actively choose the securities that should make up the Portfolio. The S&P MidCap 400 Index is a capitalization weighted index of 400 medium capitalization stocks chosen for market size, liquidity, and industry representation. Accordingly, the Portfolio invests in stocks of medium-sized companies from a broad range of industries. The S&P MidCap 400 Index is adjusted quarterly and when changes to the index occur, the Adviser will attempt to replicate these changes within the Portfolio. However, any such changes may result in slight variations from the index. The Portfolio may buy and sell equity index futures for investment exposure. For liquidity reasons, the Portfolio may invest, to some degree, in money market instruments.

**Principal Risks**

The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

**Mid Cap Risk.** Medium-sized companies often have greater price volatility, lower trading volume, and less liquidity than larger, more-established companies. These companies tend to have smaller revenues, narrower product lines, less management depth and experience, smaller shares of their product or service markets, fewer financial resources, and less competitive strength than larger companies.

**Market Risk.** Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The
value of the Portfolio’s investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio’s benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

**Equity Security Risk.** Equity securities held by the Portfolio may decline significantly in price, sometimes rapidly or unpredictably, over short or extended periods of time, and such declines may occur because of declines in the equity market as a whole, or because of declines in only a particular country, company, industry, or sector of the market. From time to time, the Portfolio may invest a significant portion of its assets in companies in one or more related sectors or industries which would make the Portfolio more vulnerable to adverse developments affecting such sectors or industries. Equity securities are generally more volatile than most debt securities.

**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer’s securities and therefore the value of the Portfolio.

**Futures Contract Risk.** The value of a futures contract tends to increase and decrease in tandem with the value of the underlying instrument. The price of futures can be highly volatile; using them could lower the value of the underlying instrument. The price of a futures contract tends to increase and decrease in tandem with the value of the underlying instrument.

**Indexing Strategy/Index Tracking Risk.** The Portfolio is managed with an indexing investment strategy, attempting to track the performance of an unmanaged index of securities, regardless of the current or projected performance of the Index or of the actual securities comprising the Index. The structure and composition of the Index will affect the performance, volatility, and risk of the Index and, consequently, the performance, volatility, and risk of the Portfolio. While the Adviser seeks to track the performance of the Index (i.e., achieve a high degree of correlation with the Index), the Portfolio’s return may not match the return of the Index. The Portfolio incurs a number of operating expenses not applicable to the Index, and incurs costs in buying and selling securities. In addition, the Portfolio may not be fully invested at times, generally as a result of cash flows into or out of the Portfolio or reserves of cash held by the Portfolio to meet redemptions. The Adviser may attempt to replicate the Index return by investing in fewer than all of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Portfolio’s return and that of the Index.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance from year to year and by showing how the Portfolio’s average annual returns for one-, five- and ten-year periods compared to a broad-based securities market index. The index description appears in the “Index Descriptions” section of the prospectus. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart and table include the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assume that you sold your investment at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

Management

Investment Adviser(s)
The Portfolio is managed by Thrivent Financial for Lutherans ("Thrivent Financial" or the "Adviser").

Portfolio Manager(s)

Brian W. Bomgren, CQF and Sharon Wang, CFA, FRM are jointly and primarily responsible for the day-to-day management of the Portfolio. Mr. Bomgren and Ms. Wang have served as portfolio managers of the Portfolio since January 2018. Mr. Bomgren has been with Thrivent Financial since 2006 and is currently a Senior Portfolio Manager. Ms. Wang has been with Thrivent Financial since 2017 and is currently a Senior Portfolio Manager. Prior to joining Thrivent Financial, Ms. Wang worked at Bryn Mawr Capital Management as a portfolio manager from 2009 to 2016.

Purchase and Sale of Shares
Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:
- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

Tax Information
For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

Payments to Broker-Dealers and Other Financial Intermediaries
If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio's complete prospectus, which contains more information about the Portfolio and its risks.

• **If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:**
  You can find the Portfolio's prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

• **If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:**
  You can find the Portfolio's prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio’s prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios’ annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios’ website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. You may elect to receive shareholder reports and other communications by enrolling at Thrivent.com/gopaperless.

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.
**Investment Objective**

Thrivent Mid Cap Stock Portfolio (the “Portfolio”) seeks long-term capital growth.

**Fees and Expenses**

This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

<table>

**EXAMPLE** This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year, and that the Portfolio's operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

<table>
<thead>
<tr>
<th>1 Year</th>
<th>3 Years</th>
<th>5 Years</th>
<th>10 Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thrivent Mid Cap Stock Portfolio</td>
<td>$67</td>
<td>$211</td>
<td>$368</td>
</tr>
</tbody>
</table>

**Portfolio Turnover**

The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio’s performance. During the most recent fiscal year, the Portfolio’s portfolio turnover rate was 34% of the average value of its portfolio.

**Principal Strategies**

Under normal circumstances, the Portfolio invests at least 80% of its net assets (plus the amount of any borrowing for investment purposes) in equity securities of mid-sized companies. The Adviser focuses mainly on the equity securities of mid-sized U.S. companies which have market capitalizations equivalent to those included in widely known indices such as the Russell Midcap Index, S&P MidCap 400 Index, or the mid-sized company market capitalization classifications published by Lipper, Inc. These companies typically have a market capitalization of approximately $2 billion to $25 billion. Should the Adviser change the investments used for purposes of this 80% threshold, you will be notified at least 60 days prior to the change.

The Portfolio seeks to achieve its investment objective by investing in common stocks. The Adviser uses fundamental, quantitative, and technical investment research techniques to determine what securities to buy and sell. Fundamental techniques assess a security’s value based on an issuer’s financial profile, management, and business prospects while quantitative and technical techniques involve a more data-oriented analysis of financial information, market trends and price movements. The Adviser generally looks for mid-sized companies that, in its opinion:

- have prospects for growth in their sales and earnings;
- are in an industry with a good economic outlook;
- have high-quality management; and/or
- have a strong financial position.

The Adviser may sell securities for a variety of reasons, such as to secure gains, limit losses, or reposition assets to more promising opportunities.

**Principal Risks**

The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

**Mid Cap Risk.** Medium-sized companies often have greater price volatility, lower trading volume, and less
liquidity than larger, more-established companies. These companies tend to have smaller revenues, narrower product lines, less management depth and experience, smaller shares of their product or service markets, fewer financial resources, and less competitive strength than larger companies.

**Equity Security Risk.** Equity securities held by the Portfolio may decline significantly in price, sometimes rapidly or unpredictably, over short or extended periods of time, and such declines may occur because of declines in the equity market as a whole, or because of declines in only a particular country, company, industry, or sector of the market. From time to time, the Portfolio may invest a significant portion of its assets in companies in one or more related sectors or industries which would make the Portfolio more vulnerable to adverse developments affecting such sectors or industries. Equity securities are generally more volatile than most debt securities.

**Market Risk.** Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio's investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio's benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer's securities and therefore the value of the Portfolio.

**Investment Adviser Risk.** The Portfolio is actively managed and the success of its investment strategy depends significantly on the skills of the Adviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio's investment objective.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

Performance

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance from year to year and by showing how the Portfolio’s average annual returns for one-, five- and ten-year periods compared to broad-based securities market indices. The index descriptions appear in the "Index Descriptions" section of the prospectus. The Portfolio now compares its returns to the Russell Midcap Index because it is commonly used by funds with the same investment objective and principal strategies as the Portfolio. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart and table include the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assume that you sold your investment at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

Management

Investment Adviser(s)

The Portfolio is managed by Thrivent Financial for Lutherans ("Thrivent Financial" or the "Adviser").

Portfolio Manager(s)

Brian J. Flanagan, CFA is primarily responsible for the day-to-day management of the Portfolio. Mr. Flanagan has been a portfolio manager of the Portfolio since December 2004. He has been with Thrivent Financial since 1994 and a portfolio manager since 2000.

Purchase and Sale of Shares

Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:

- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

<td></td>
<td></td>
</tr>
<tr>
<td>Total Annual Portfolio Operating Expenses After Fee Waivers and/or Expense Reimbursements $^2$</td>
<td>2.98%</td>
<td></td>
</tr>
</tbody>
</table>

$^1$ These expenses are based on estimated amounts for the current fiscal year.

$^2$ The Adviser has contractually agreed, through at least April 30, 2021, to waive certain fees and/or reimburse certain expenses associated with the shares of the Thrivent Mid Cap Value Portfolio in order to limit the Total Annual Portfolio Operating Expenses After Fee Waivers and/or Expense Reimbursements to an annual rate of 0.90% of the average daily net assets of the shares. This contractual provision, however, may be terminated before the indicated termination date upon the mutual agreement between the Independent Directors of the Portfolio and the Adviser.

**Portfolio Turnover**

The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio's performance. Because the Portfolio had not yet commenced operations prior to the date of this prospectus, the Portfolio’s portfolio turnover rate for the most recent fiscal year end is not yet available.

**Principal Strategies**

Under normal circumstances, the Portfolio invests at least 80% of its net assets (plus the amount of any borrowing for investment purposes) in equity securities of mid-sized companies. The Adviser focuses mainly on the equity securities of mid-sized U.S. companies which have market capitalizations equivalent to those included in widely known indices such as the Russell Midcap Value Index, S&P MidCap 400 Index, or the mid-sized company market capitalization classifications published by Lipper, Inc. These companies typically have a market capitalization of approximately $2 billion to $25 billion. Should the Adviser change the investments used for purposes of this 80% threshold, you will be notified at least 60 days prior to the change.

The Portfolio seeks to achieve its investment objective by investing primarily in common stocks. The Adviser uses fundamental, quantitative, and technical investment research techniques and focuses on stocks of companies that it believes are undervalued in relation to their long-term earnings power or asset value. These stocks typically, but not always, have below average price-to-earnings and price-to-book value ratios. The Adviser may sell securities for a variety of reasons, such as to secure gains, limit losses, or reposition assets to more promising opportunities.

**EXAMPLE** This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. In addition, the example for the 1 Year period reflects the effect of the contractual fee waiver and/or expense reimbursement. The example also assumes that your investment has a 5% return each year, and that the Portfolio’s operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

<table>
<thead>
<tr>
<th>Portfolio Mid Cap Value Portfolio</th>
<th>1 Year</th>
<th>3 Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>$92</td>
<td>$909</td>
<td></td>
</tr>
</tbody>
</table>
**Principal Risks**

The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

**Mid Cap Risk.** Medium-sized companies often have greater price volatility, lower trading volume, and less liquidity than larger, more-established companies. These companies tend to have smaller revenues, narrower product lines, less management depth and experience, smaller shares of their product or service market, fewer financial resources, and less competitive strength than larger companies.

**Value Investing Risk.** Value style investing includes the risk that stocks of undervalued companies may not rise as quickly as anticipated if the market doesn’t recognize their intrinsic value or if value stocks are out of favor.

**Equity Security Risk.** Equity securities held by the Portfolio may decline significantly in price, sometimes rapidly or unpredictably, over short or extended periods of time, and such declines may occur because of declines in the equity market as a whole, or because of declines in only a particular country, company, industry, or sector of the market. From time to time, the Portfolio may invest a significant portion of its assets in companies in one or more related sectors or industries which would make the Portfolio more vulnerable to adverse developments affecting such sectors or industries. Equity securities are generally more volatile than most debt securities.

**Market Risk.** Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio’s investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio’s benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer’s securities and therefore the value of the Portfolio.

**Investment Adviser Risk.** The Portfolio is actively managed and the success of its investment strategy depends significantly on the skills of the Adviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio’s investment objective.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

No performance information for the Portfolio is provided because it had not commenced operations prior to the date of this prospectus and does not yet have a full calendar year of performance history. The index description appears in the "Index Descriptions" section of the prospectus. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end that takes place after April 30, 2020.

How the Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

**Management**

**Investment Adviser(s)**

The Portfolio is managed by Thrivent Financial for Lutherans (“Thrivent Financial” or the “Adviser”).

**Portfolio Manager(s)**

**Graham Wong, CFA** is primarily responsible for the day-to-day management of the Portfolio. Mr. Wong has served as portfolio manager of the Portfolio since April 2020. Mr. Wong has been a portfolio manager at Thrivent Financial since 2013, when he joined the firm.

**Purchase and Sale of Shares**

Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:

- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.
Tax Information

1 The Adviser has contractually agreed, for as long as the current fee structure is in place and through at least April 30, 2021, to waive an amount equal to any management fees indirectly incurred by the Portfolio as a result of its investment in any other mutual fund for which the Adviser or an affiliate serves as investment adviser, other than Thrivent Cash Management Trust. This contractual provision may be terminated upon the mutual agreement between the Independent Directors of the Portfolio and the Adviser.

Portfolio Turnover
The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio's performance. During the most recent fiscal year, the Portfolio's portfolio turnover rate was 136% of the average value of its portfolio.

Principal Strategies
The Portfolio pursues its objective by investing in a combination of other funds managed by the Adviser or an affiliate and directly held financial instruments. The Portfolio is designed for investors who seek moderate long-term capital growth with reasonable stability of principal and are comfortable with moderate levels of risk and volatility. The Portfolio uses a prescribed asset allocation strategy involving a two-step process that is designed to achieve its desired risk tolerance. The first step is the construction of a model for the allocation of the Portfolio's assets across broad asset categories (namely, equity securities and debt securities). The second step involves the determination of sub-classes within the broad asset categories and target weightings (i.e., what the Adviser determines is the strategic allocation) for these sub-classes. Sub-classes for equity securities may be based on market capitalization, investment style (such as growth or value), or economic sector. Sub-classes for debt securities may be based on maturity, duration, security type or credit rating (high yield—commonly known as "junk bonds"—or investment grade).

The use of target weightings for various sub-classes within broad asset categories is intended as a multi-style approach to reduce the risk of investing in securities having common characteristics. The Portfolio may buy and sell futures contracts to either hedge its exposure or obtain exposure to certain investments.
The Portfolio may invest in foreign securities, including those of issuers in emerging markets. An “emerging market” country is any country determined by the Adviser to have an emerging market economy, considering factors such as the country’s credit rating, its political and economic stability and the development of its financial and capital markets.

Under normal circumstances, the Portfolio invests in the following broad asset classes within the ranges given:

<table>
<thead>
<tr>
<th>Broad Asset Category</th>
<th>Target Allocation</th>
<th>Allocation Range</th>
</tr>
</thead>
<tbody>
<tr>
<td>Equity Securities</td>
<td>57%</td>
<td>35-75%</td>
</tr>
<tr>
<td>Debt Securities</td>
<td>43%</td>
<td>25-65%</td>
</tr>
</tbody>
</table>

The Portfolio's actual holdings in each broad asset category may be outside the applicable allocation range from time to time due to differing investment performance among asset categories. The Adviser will rebalance the Portfolio at least annually so that its holdings are within the ranges for the broad asset categories.

The Portfolio pursues its investment strategy by investing primarily in other mutual funds managed by the Adviser or an affiliate. The names of the funds managed by the Adviser or an affiliate which are currently available for investment by the Portfolio are shown in the list below. The list is provided for information purposes only. The Adviser may change the availability of the funds managed by the Adviser or an affiliate for investment by the Portfolio without shareholder approval or advance notice to shareholders.

**Short-Term Debt Securities**
- Money Market
  - Thrivent Cash Management Trust
- Other
  - Thrivent Core Short-Term Reserve Fund

**Principal Risks**

The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

**Allocation Risk.** The Portfolio’s investment performance depends upon how its assets are allocated across broad asset categories and applicable sub-classes within such categories. Some broad asset categories and sub-classes may perform below expectations or the securities markets generally over short and extended periods. Therefore, a principal risk of investing in the Portfolio is that the allocation strategies used and the allocation decisions made will not produce the desired results.

**Equity Security Risk.** Equity securities held by the Portfolio may decline significantly in price, sometimes rapidly or unpredictably, over short or extended periods of time, and such declines may occur because of declines in the equity market as a whole, or because of declines in only a particular country, company, industry, or sector of the market. From time to time, the Portfolio may invest a significant portion of its assets in companies in one or more related sectors or industries which would make the Portfolio more vulnerable to adverse developments affecting such sectors or industries. Equity securities are generally more volatile than most debt securities.

**Interest Rate Risk.** Interest rate risk is the risk that prices of debt securities decline in value when interest rates rise for debt securities that pay a fixed rate of interest. Debt securities with longer durations (a measure of price sensitivity of a bond or bond fund to changes in interest rates) or maturities (i.e., the amount of time until a bond’s issuer must pay its principal or face value) tend to be more sensitive to changes in interest rates than debt securities with shorter durations or maturities. Changes by the Federal Reserve to monetary policies could affect interest rates and the value of some securities. In addition, the phase out of LIBOR (the offered rate for short-term Eurodollar deposits between major international banks) by the end of 2021 could lead to increased volatility and illiquidity in certain markets that currently rely on LIBOR to determine interest rates.
Large Cap Risk. Large-sized companies may be unable to respond quickly to new competitive challenges such as changes in technology. They may also not be able to attain the high growth rate of successful smaller companies, especially during extended periods of economic expansion.

Mid Cap Risk. Medium-sized companies often have greater price volatility, lower trading volume, and less liquidity than larger, more-established companies. These companies tend to have smaller revenues, narrower product lines, less management depth and experience, smaller shares of their product or service markets, fewer financial resources, and less competitive strength than larger companies.

Market Risk. Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio’s investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio’s benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

Credit Risk. Credit risk is the risk that an issuer of a debt security to which the Portfolio is exposed may no longer be able or willing to pay its debt. As a result of such an event, the debt security may decline in price and affect the value of the Portfolio.

Other Funds Risk. Because the Portfolio invests in other funds managed by the Adviser or an affiliate (“Other Funds”), the performance of the Portfolio is dependent, in part, upon the performance of Other Funds in which the Portfolio may invest. As a result, the Portfolio is subject to the same risks as those faced by the Other Funds. In addition, Other Funds may be subject to additional fees and expenses that will be borne by the Portfolio.

High Yield Risk. High yield securities – commonly known as “junk bonds” – to which the Portfolio is exposed are considered predominantly speculative with respect to the issuer’s continuing ability to make principal and interest payments. If the issuer of the security is in default with respect to interest or principal payments, the value of the Portfolio may be negatively affected. High yield securities generally have a less liquid resale market.

Foreign Securities Risk. Foreign securities generally carry more risk and are more volatile than their domestic counterparts, in part because of potential for higher political and economic risks, lack of reliable information and fluctuations in currency exchange rates where investments are denominated in currencies other than the U.S. dollar. Certain events in foreign markets may adversely affect foreign and domestic issuers, including interruptions in the global supply chain, natural disasters and outbreak of infectious diseases. The Portfolio’s investment in any country could be subject to governmental actions such as capital or currency controls, nationalizing a company or industry, expropriating assets, or imposing punitive taxes that would have an adverse effect on security prices, and impair the Portfolio’s ability to repatriate capital or income. Foreign securities may also be more difficult to resell than comparable U.S. securities because the markets for foreign securities are often less liquid. Even when a foreign security increases in price in its local currency, the appreciation may be diluted by adverse changes in exchange rates when the security’s value is converted to U.S. dollars. Foreign withholding taxes also may apply and errors and delays may occur in the settlement process for foreign securities.

Emerging Markets Risk. The economic and political structures of developing countries in emerging markets, in most cases, do not compare favorably with the U.S. or other developed countries in terms of wealth and stability, and their financial markets often lack liquidity. Portfolio performance will likely be negatively affected by portfolio exposure to countries and corporations domiciled in or with revenue exposures to countries in the midst of, among other things, hyperinflation, currency devaluation, trade disagreements, sudden political upheaval, or interventionist government policies. Portfolio performance may also be negatively affected by portfolio exposure to countries and corporations domiciled in or with revenue exposures to countries with less developed legal, tax, regulatory, and accounting systems. Significant buying or selling actions by a few major investors may also heighten the volatility of emerging markets. These factors make investing in emerging market countries significantly riskier than in other countries, and events in any one country could cause the Portfolio’s share price to decline.

Foreign Currency Risk. The value of a foreign currency may decline against the U.S. dollar, which would reduce the dollar value of securities denominated in that currency. The overall impact of such a decline of foreign currency can be significant, unpredictable, and long lasting, depending on the currencies represented, how each one appreciates or depreciates in relation to the U.S. dollar, and whether currency positions are hedged. Under normal conditions, the Portfolio does not engage in extensive foreign currency hedging programs. Further, exchange rate movements are volatile, and it is not possible to effectively hedge the currency risks of many developing countries.

Small Cap Risk. Smaller, less seasoned companies often have greater price volatility, lower trading volume, and less liquidity than larger, more established companies. These companies tend to have small
revenues, narrower product lines, less management depth and experience, small shares of their product or service markets, fewer financial resources, and less competitive strength than larger companies. Such companies seldom pay significant dividends that could soften the impact of a falling market on returns.

**Growth Investing Risk.** Growth style investing includes the risk of investing in securities whose prices historically have been more volatile than other securities, especially over the short term. Growth stock prices reflect projections of future earnings or revenues and, if a company’s earnings or revenues fall short of expectations, its stock price may fall dramatically.

**Value Investing Risk.** Value style investing includes the risk that stocks of undervalued companies may not rise as quickly as anticipated if the market doesn’t recognize their intrinsic value or if value stocks are out of favor.

**Investment Adviser Risk.** The Portfolio is actively managed and the success of its investment strategy depends significantly on the skills of the Adviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio’s investment objective.

**Conflicts of Interest Risk.** An investment in the Portfolio will be subject to a number of actual or potential conflicts of interest. For example, the Adviser or its affiliates may provide services to the Portfolio for which the Portfolio would compensate the Adviser and/or such affiliates. The Portfolio may invest in other pooled investment vehicles sponsored, managed, or otherwise affiliated with the Adviser, including other Portfolios. The Adviser may have an incentive (financial or otherwise) to enter into transactions or arrangements on behalf of the Portfolio with itself or its affiliates in circumstances where it might not have done so otherwise.

The Adviser or its affiliates manage other investment funds and/or accounts (including proprietary accounts) and have other clients with investment objectives and strategies that are similar to, or overlap with, the investment objective and strategy of the Portfolio, creating conflicts of interest in investment and allocation decisions regarding the allocation of investments that could be appropriate for the Portfolio and other clients of the Adviser or their affiliates.

**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer’s securities and therefore the value of the Portfolio.

**Quantitative Investing Risk.** Quantitative Investing Risk is the risk that securities selected according to a quantitative analysis methodology can perform differently from the market as a whole based on the model and the factors used in the analysis, the weight placed on each factor and changes in the factor’s historical trends. Such models are based on assumptions of these and other market factors, and the models may not take into account certain factors, or perform as intended, and may result in a decline in the value of the Portfolio’s portfolio.

**Derivatives Risk.** The use of derivatives (such as futures) involves additional risks and transaction costs which could leave the Portfolio in a worse position than if it had not used these instruments. The Portfolio utilizes equity futures in order to increase or decrease its exposure to various asset classes at a lower cost than trading stocks directly. The use of derivatives can lead to losses because of adverse movements in the price or value of the underlying asset, index or rate, which may be magnified by certain features of the contract. Changes in the value of the derivative may not correlate as intended with the underlying asset, rate or index, and the Portfolio could lose much more than the original amount invested. Derivatives can be highly volatile, illiquid and difficult to value. Certain derivatives may also be subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill its contractual obligations due to its financial condition, market events, or other reasons.

**Portfolio Turnover Rate Risk.** The Portfolio may engage in active and frequent trading of portfolio securities in implementing its principal investment strategies. A high rate of portfolio turnover (100% or more) involves correspondingly greater expenses which are borne by the Portfolio and its shareholders and may also result in short-term capital gains taxable to shareholders.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance from year to year and by showing how the Portfolio’s average annual
returns for one-, five- and ten-year periods compared to broad-based securities market indices. The index descriptions appear in the "Index Descriptions" section of the prospectus. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart and table include the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assume that you sold your investment at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

### Management

**Investment Adviser(s)**

The Portfolio is managed by Thrivent Financial for Lutherans ("Thrivent Financial" or the "Adviser").

**Portfolio Manager(s)**

Mark L. Simenstad, CFA, Darren M. Bagwell, CFA, Stephen D. Lowe, CFA, David S. Royal and David R. Spangler, CFA are jointly and primarily responsible for the day-to-day management of the Portfolio. Mr. Simenstad has served as a portfolio manager of the Portfolio since April 2005. Mr. Bagwell and Mr. Lowe have served as portfolio managers of the Portfolio since April 2016. Mr. Royal has served as portfolio manager of the Portfolio since April 2018. Mr. Spangler has served as a portfolio manager of the Portfolio since February 2019. Mr. Simenstad is Chief Investment Strategist and has been with Thrivent Financial since 1999. Mr. Bagwell is Vice President, Chief Equity Strategist and has been with Thrivent Financial in an investment management capacity since 2002. Mr. Lowe is Vice President of Fixed Income Mutual Funds and Separate Accounts and has been with Thrivent Financial since 1997. He has served as a portfolio manager since 2009. Mr. Royal is Chief Investment Officer and has been with Thrivent Financial since 2006. Mr. Spangler has been with Thrivent Financial since 2002, in an investment management capacity since 2006 and currently is a Senior Portfolio Manager.

### Purchase and Sale of Shares

Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:

- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

### Tax Information

For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

### Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio's complete prospectus, which contains more information about the Portfolio and its risks.

- **If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:**
  You can find the Portfolio's prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

- **If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:**
  You can find the Portfolio's prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio's prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios' annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios' website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. You may elect to receive shareholder reports and other communications by enrolling at Thrivent.com/gopaperless.

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.
Thrivent Moderately Aggressive Allocation Portfolio

Investment Objective
Thrivent Moderately Aggressive Allocation Portfolio (the "Portfolio") seeks long-term capital growth.

Fees and Expenses
This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

<table>

¹ The Adviser has contractually agreed, for as long as the current fee structure is in place and through at least April 30, 2021, to waive an amount equal to any management fees indirectly incurred by the Portfolio as a result of its investment in any other mutual fund for which the Adviser or an affiliate serves as investment adviser, other than Thrivent Cash Management Trust. This contractual provision may be terminated upon the mutual agreement between the Independent Directors of the Portfolio and the Adviser.

EXAMPLE This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. In addition, the example for the 1 Year period reflects the effect of the contractual fee waiver and/or expense reimbursement. The example also assumes that your investment has a 5% return each year, and that the Portfolio's operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

<table>

</thead>
<tbody>
<tr>
<td>Thrivent Moderately Aggressive Allocation Portfolio</td>
<td>$72</td>
<td>$269</td>
<td>$483</td>
<td>$1,100</td>
</tr>
</tbody>
</table>

Portfolio Turnover
The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio’s performance. During the most recent fiscal year, the Portfolio’s portfolio turnover rate was 93% of the average value of its portfolio.

Principal Strategies
The Portfolio pursues its objective by investing in a combination of other funds managed by the Adviser or an affiliate and directly held financial instruments. The Portfolio is designed for investors who seek moderately greater long-term capital growth and are comfortable with moderately higher levels of risk and volatility. The Portfolio uses a prescribed asset allocation strategy involving a two-step process that is designed to achieve its desired risk tolerance. The first step is the construction of a model for the allocation of the Portfolio’s assets across broad asset categories (namely, equity securities and debt securities). The second step involves the determination of sub-classes within the broad asset categories and target weightings (i.e., what the Adviser determines is the strategic allocation) for these sub-classes. Sub-classes for equity securities may be based on market capitalization, investment style (such as growth or value), or economic sector. Sub-classes for debt securities may be based on maturity, duration, security type or credit rating (high yield—commonly known as “junk bonds”—or investment grade).

The use of target weightings for various sub-classes within broad asset categories is intended as a multi-style approach to reduce the risk of investing in securities having common characteristics. The Portfolio may buy and sell futures contracts to either hedge its exposure or obtain exposure to certain investments.

The Portfolio may invest in foreign securities, including those of issuers in emerging markets. An “emerging
market” country is any country determined by the Adviser to have an emerging market economy, considering factors such as the country’s credit rating, its political and economic stability and the development of its financial and capital markets.

Under normal circumstances, the Portfolio invests in the following broad asset classes within the ranges given:

<table>
<thead>
<tr>
<th>Broad Asset Category</th>
<th>Target Allocation</th>
<th>Allocation Range</th>
</tr>
</thead>
<tbody>
<tr>
<td>Equity Securities</td>
<td>77%</td>
<td>55-90%</td>
</tr>
<tr>
<td>Debt Securities</td>
<td>23%</td>
<td>10-45%</td>
</tr>
</tbody>
</table>

The Portfolio’s actual holdings in each broad asset category may be outside the applicable allocation range from time to time due to differing investment performance among asset categories. The Adviser will rebalance the Portfolio at least annually so that its holdings are within the ranges for the broad asset categories.

The Portfolio pursues its investment strategy by investing primarily in other mutual funds managed by the Adviser or an affiliate. The names of the funds managed by the Adviser or an affiliate which are currently available for investment by the Portfolio are shown in the list below. The list is provided for information purposes only. The Adviser may change the availability of the funds managed by the Adviser or an affiliate for investment by the Portfolio without shareholder approval or advance notice to shareholders.

**Principal Risks**

The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

**Allocation Risk.** The Portfolio’s investment performance depends upon how its assets are allocated across broad asset categories and applicable sub-classes within such categories. Some broad asset categories and sub-classes may perform below expectations or the securities markets generally over short and extended periods. Therefore, a principal risk of investing in the Portfolio is that the allocation strategies used and the allocation decisions made will not produce the desired results.

**Equity Security Risk.** Equity securities held by the Portfolio may decline significantly in price, sometimes rapidly or unpredictably, over short or extended periods of time, and such declines may occur because of declines in the equity market as a whole, or because of declines in only a particular country, company, industry, or sector of the market. From time to time, the Portfolio may invest a significant portion of its assets in companies in one or more related sectors or industries which would make the Portfolio more vulnerable to adverse developments affecting such sectors or industries. Equity securities are generally more volatile than most debt securities.

**Large Cap Risk.** Large-sized companies may be unable to respond quickly to new competitive challenges such as changes in technology. They may also not be able to attain the high growth rate of successful smaller companies, especially during extended periods of economic expansion.

**Small Cap Risk.** Smaller, less seasoned companies often have greater price volatility, lower trading volume, and less liquidity than larger, more established companies. These companies tend to have small revenues, narrower product lines, less management depth and experience, small shares of their product or service markets, fewer financial resources, and less competitive strength than larger companies. Such companies seldom pay significant dividends that could soften the impact of a falling market on returns.

**Mid Cap Risk.** Medium-sized companies often have greater price volatility, lower trading volume, and less liquidity than larger, more-established companies. These companies tend to have smaller revenues, narrower product lines, less management depth and experience, smaller shares of their product or service markets, fewer financial resources, and less competitive strength than larger companies.
Market Risk. Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio's investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio's benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

Other Funds Risk. Because the Portfolio invests in other funds managed by the Adviser or an affiliate (“Other Funds”), the performance of the Portfolio is dependent, in part, upon the performance of Other Funds in which the Portfolio may invest. As a result, the Portfolio is subject to the same risks as those faced by the Other Funds. In addition, Other Funds may be subject to additional fees and expenses that will be borne by the Portfolio.

Growth Investing Risk. Growth style investing includes the risk of investing in securities whose prices historically have been more volatile than other securities, especially over the short term. Growth stock prices reflect projections of future earnings or revenues and, if a company's earnings or revenues fall short of expectations, its stock price may fall dramatically.

Value Investing Risk. Value style investing includes the risk that stocks of undervalued companies may not rise as quickly as anticipated if the market doesn't recognize their intrinsic value or if value stocks are out of favor.

Foreign Securities Risk. Foreign securities generally carry more risk and are more volatile than their domestic counterparts, in part because of potential for higher political and economic risks, lack of reliable information and fluctuations in currency exchange rates where investments are denominated in currencies other than the U.S. dollar. Certain events in foreign markets may adversely affect foreign and domestic issuers, including interruptions in the global supply chain, natural disasters and outbreak of infectious diseases. The Portfolio's investment in any country could be subject to governmental actions such as capital or currency controls, nationalizing a company or industry, expropriating assets, or imposing punitive taxes that would have an adverse effect on security prices, and impair the Portfolio's ability to repatriate capital or income. Foreign securities may also be more difficult to resell than comparable U.S. securities because the markets for foreign securities are often less liquid. Even when a foreign security increases in price in its local currency, the appreciation may be diluted by adverse changes in exchange rates when the security's value is converted to U.S. dollars. Foreign withholding taxes also may apply and errors and delays may occur in the settlement process for foreign securities.

Emerging Markets Risk. The economic and political structures of developing countries in emerging markets, in most cases, do not compare favorably with the U.S. or other developed countries in terms of wealth and stability, and their financial markets often lack liquidity. Portfolio performance will likely be negatively affected by portfolio exposure to countries and corporations domiciled in or with revenue exposures to countries in the midst of, among other things, hyperinflation, currency devaluation, trade disagreements, sudden political upheaval, or interventionist government policies. Portfolio performance may also be negatively affected by portfolio exposure to countries and corporations domiciled in or with revenue exposures to countries with less developed legal, tax, regulatory, and accounting systems. Significant buying or selling actions by a few major investors may also heighten the volatility of emerging markets. These factors make investing in emerging market countries significantly riskier than in other countries, and events in any one country could cause the Portfolio's share price to decline.

Foreign Currency Risk. The value of a foreign currency may decline against the U.S. dollar, which would reduce the dollar value of securities denominated in that currency. The overall impact of such a decline of foreign currency can be significant, unpredictable, and long lasting, depending on the currencies represented, how each one appreciates or depreciates in relation to the U.S. dollar, and whether currency positions are hedged. Under normal conditions, the Portfolio does not engage in extensive foreign currency hedging programs. Further, exchange rate movements are volatile, and it is not possible to effectively hedge the currency risks of many developing countries.

Interest Rate Risk. Interest rate risk is the risk that prices of debt securities decline in value when interest rates rise for debt securities that pay a fixed rate of interest. Debt securities with longer durations (a measure of price sensitivity of a bond or bond fund to changes in interest rates) or maturities (i.e., the amount of time until a bond's issuer must pay its principal or face value) tend to be more sensitive to changes in interest rates than debt securities with shorter durations or maturities. Changes by the Federal Reserve to monetary policies could affect interest rates and the value of some securities. In addition, the phase out of LIBOR (the offered rate for short-term Eurodollar deposits between major international banks) by the end of 2021 could lead to increased volatility and illiquidity in certain markets that currently rely on LIBOR to determine interest rates.

Credit Risk. Credit risk is the risk that an issuer of a debt security to which the Portfolio is exposed may no longer be able or willing to pay its debt. As a result of such an event, the debt security may decline in price and affect the value of the Portfolio.

Investment Adviser Risk. The Portfolio is actively managed and the success of its investment strategy...
depends significantly on the skills of the Adviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio's investment objective.

**Conflicts of Interest Risk.** An investment in the Portfolio will be subject to a number of actual or potential conflicts of interest. For example, the Adviser or its affiliates may provide services to the Portfolio for which the Portfolio would compensate the Adviser and/or such affiliates. The Portfolio may invest in other pooled investment vehicles sponsored, managed, or otherwise affiliated with the Adviser, including other Portfolios. The Adviser may have an incentive (financial or otherwise) to enter into transactions or arrangements on behalf of the Portfolio with itself or its affiliates in circumstances where it might not have done so otherwise.

The Adviser or its affiliates manage other investment funds and/or accounts (including proprietary accounts) and have other clients with investment objectives and strategies that are similar to, or overlap with, the investment objective and strategy of the Portfolio, creating conflicts of interest in investment and allocation decisions regarding the allocation of investments that could be appropriate for the Portfolio and other clients of the Adviser or their affiliates.

**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer's securities and therefore the value of the Portfolio.

**Quantitative Investing Risk.** Quantitative Investing Risk is the risk that securities selected according to a quantitative analysis methodology can perform differently from the market as a whole based on the model and the factors used in the analysis, the weight placed on each factor and changes in the factor’s historical trends. Such models are based on assumptions of these and other market factors, and the models may not take into account certain factors, or perform as intended, and may result in a decline in the value of the Portfolio's portfolio.

**Derivatives Risk.** The use of derivatives (such as futures) involves additional risks and transaction costs which could leave the Portfolio in a worse position than if it had not used these instruments. The Portfolio utilizes equity futures in order to increase or decrease its exposure to various asset classes at a lower cost than trading stocks directly. The use of derivatives can lead to losses because of adverse movements in the price or value of the underlying asset, index or rate, which may be magnified by certain features of the contract. Changes in the value of the derivative may not correlate as intended with the underlying asset, rate or index, and the Portfolio could lose much more than the original amount invested. Derivatives can be highly volatile, illiquid and difficult to value. Certain derivatives may also be subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill its contractual obligations due to its financial condition, market events, or other reasons.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio's performance from year to year and by showing how the Portfolio's average annual returns for one-, five- and ten-year periods compared to broad-based securities market indices. The index descriptions appear in the "Index Descriptions" section of the prospectus. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart and table include the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assume that you sold your investment at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio's performance over time.

Management

Investment Adviser(s)
The Portfolio is managed by Thrivent Financial for Lutherans ("Thrivent Financial" or the "Adviser").

Portfolio Manager(s)
Mark L. Simenstad, CFA, Darren M. Bagwell, CFA, Stephen D. Lowe, CFA, David S. Royal and David R. Spangler, CFA are jointly and primarily responsible for the day-to-day management of the Portfolio. Mr. Simenstad has served as a portfolio manager of the Portfolio since April 2005. Mr. Bagwell and Mr. Lowe have served as portfolio managers of the Portfolio since April 2016. Mr. Royal has served as portfolio manager of the Portfolio since April 2018. Mr. Spangler has served as a portfolio manager of the Portfolio since February 2019. Mr. Simenstad is Chief Investment Strategist and has been with Thrivent Financial since 1999. Mr. Bagwell is Vice President, Chief Equity Strategist and has been with Thrivent Financial in an investment management capacity since 2002. Mr. Lowe is Vice President of Fixed Income Mutual Funds and Separate Accounts and has been with Thrivent Financial since 1997. He has served as a portfolio manager since 2009. Mr. Royal is Chief Investment Officer and has been with Thrivent Financial since 2006. Mr. Spangler has been with Thrivent Financial since 2002, in an investment management capacity since 2006 and currently is a Senior Portfolio Manager.

Purchase and Sale of Shares
Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:
- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

Tax Information
For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

Payments to Broker-Dealers and Other Financial Intermediaries
If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio’s complete prospectus, which contains more information about the Portfolio and its risks.

- **If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

- **If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio’s prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios’ annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios’ website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. You may elect to receive shareholder reports and other communications by enrolling at Thrivent.com/gopaperless.

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.
Thrivent Moderately Conservative Allocation Portfolio

**Investment Objective**
Thrivent Moderately Conservative Allocation Portfolio (the "Portfolio") seeks long-term capital growth while providing reasonable stability of principal.

**Fees and Expenses**
This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

$1 The Adviser has contractually agreed, for as long as the current fee structure is in place and through at least April 30, 2021, to waive an amount equal to any management fees indirectly incurred by the Portfolio as a result of its investment in any other mutual fund for which the Adviser or an affiliate serves as investment adviser, other than Thrivent Cash Management Trust. This contractual provision may be terminated upon the mutual agreement between the Independent Directors of the Portfolio and the Adviser.

**EXAMPLE**
This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. In addition, the example for the 1 Year period reflects the effect of the contractual fee waiver and/or expense reimbursement. The example also assumes that your investment has a 5% return each year, and that the Portfolio's operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

<tbody>
<tr>
<td>Thrivent Moderately Conservative Allocation Portfolio</td>
<td>$61</td>
<td>$220</td>
<td>$393</td>
<td>$894</td>
</tr>
</tbody>
</table>

**Portfolio Turnover**
The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio's performance. During the most recent fiscal year, the Portfolio’s portfolio turnover rate was 179% of the average value of its portfolio.

**Principal Strategies**
The Portfolio pursues its objective by investing in a combination of other funds managed by the Adviser or an affiliate and directly held financial instruments. The Portfolio is designed for investors who seek long-term capital growth with reasonable stability of principal and more conservative levels of risk and volatility. The Portfolio uses a prescribed asset allocation strategy involving a two-step process that is designed to achieve its desired risk tolerance. The first step is the construction of a model for the allocation of the Portfolio’s assets across broad asset categories (namely, debt securities and equity securities). The second step involves the determination of sub-classes within the broad asset categories and target weightings (i.e., what the Adviser determines is the strategic allocation) for these sub-classes. Sub-classes for debt securities may be based on maturity, duration, security type or credit rating (high yield—commonly known as “junk bonds”—or investment grade) and may include leveraged loans, which are senior secured loans that are made by banks or other lending institutions to companies that are rated below investment grade. Sub-classes for equity securities may be based on market capitalization, investment style (such as growth or value), or economic sector.

The use of target weightings for various sub-classes within broad asset categories is intended as a multi-style approach to reduce the risk of investing in securities having common characteristics. The Portfolio may buy...
and sell futures contracts to either hedge its exposure or obtain exposure to certain investments.

The Portfolio may invest in foreign securities, including those of issuers in emerging markets. An “emerging market” country is any country determined by the Adviser to have an emerging market economy, considering factors such as the country’s credit rating, its political and economic stability and the development of its financial and capital markets.

Under normal circumstances, the Portfolio invests in the following broad asset classes within the ranges given:

<table>
<thead>
<tr>
<th>Broad Asset Category</th>
<th>Target Allocation</th>
<th>Allocation Range</th>
</tr>
</thead>
<tbody>
<tr>
<td>Debt Securities</td>
<td>63%</td>
<td>35-85%</td>
</tr>
<tr>
<td>Equity Securities</td>
<td>37%</td>
<td>15-65%</td>
</tr>
</tbody>
</table>

The Portfolio’s actual holdings in each broad asset category may be outside the applicable allocation range from time to time due to differing investment performance among asset categories. The Adviser will rebalance the Portfolio at least annually so that its holdings are within the ranges for the broad asset categories.

The Portfolio pursues its investment strategy by investing primarily in other mutual funds managed by the Adviser or an affiliate. The names of the funds managed by the Adviser or an affiliate which are currently available for investment by the Portfolio are shown in the list below. The list is provided for information purposes only. The Adviser may change the availability of the funds managed by the Adviser or an affiliate for investment by the Portfolio without shareholder approval or advance notice to shareholders.

**Principal Risks**

The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

**Allocation Risk.** The Portfolio’s investment performance depends upon how its assets are allocated across broad asset categories and applicable sub-classes within such categories. Some broad asset categories and sub-classes may perform below expectations or the securities markets generally over short and extended periods. Therefore, a principal risk of investing in the Portfolio is that the allocation strategies used and the allocation decisions made will not produce the desired results.

**Interest Rate Risk.** Interest rate risk is the risk that prices of debt securities decline in value when interest rates rise for debt securities that pay a fixed rate of interest. Debt securities with longer durations (a measure of price sensitivity of a bond or bond fund to changes in interest rates) or maturities (i.e., the amount of time until a bond’s issuer must pay its principal or face value) tend to be more sensitive to changes in interest rates than debt securities with shorter durations or maturities. Changes by the Federal Reserve to monetary policies could affect interest rates and the value of some securities. In addition, the phase out of LIBOR (the offered rate for short-term Eurodollar deposits between major international banks) by the end of 2021 could lead to increased volatility and illiquidity in certain markets that currently rely on LIBOR to determine interest rates.

**Equity Security Risk.** Equity securities held by the Portfolio may decline significantly in price, sometimes rapidly or unpredictably, over short or extended periods of time, and such declines may occur because of declines in the equity market as a whole, or because of declines in only a particular country, company, industry, or sector of the market. From time to time, the Portfolio may invest a significant portion of its assets in companies in one or more related sectors or industries which would make the Portfolio more vulnerable to adverse developments affecting such sectors or industries. Equity securities are generally more volatile than most debt securities.

**Market Risk.** Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio’s investments may move with these cycles and, in some instances, increase or decrease.
more than the applicable market(s) as measured by the Portfolio's benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

**Large Cap Risk.** Large-sized companies may be unable to respond quickly to new competitive challenges such as changes in technology. They may also not be able to attain the high growth rate of successful smaller companies, especially during extended periods of economic expansion.

**Credit Risk.** Credit risk is the risk that an issuer of a debt security to which the Portfolio is exposed may no longer be able or willing to pay its debt. As a result of such an event, the debt security may decline in price and affect the value of the Portfolio.

**Mortgage-Backed and Other Asset-Backed Securities Risk.** The value of mortgage-backed and asset-backed securities will be influenced by the factors affecting the housing market and the assets underlying such securities. As a result, during periods of declining asset value, difficult or frozen credit markets, swings in interest rates, or deteriorating economic conditions, mortgage-related and asset-backed securities may decline in value, face valuation difficulties, become more volatile and/or become illiquid. In addition, both mortgage-backed and asset-backed securities are sensitive to changes in the repayment patterns of the underlying security. If the principal payment on the underlying asset is repaid faster or slower than the holder of the asset-backed or mortgage-backed security anticipates, the price of the security may fall, particularly if the holder must reinvest the repaid principal at lower rates or must continue to hold the security when interest rates rise. This effect may cause the value of the Portfolio to decline and reduce the overall return of the Portfolio.

**Government Securities Risk.** The Portfolio invests in securities issued or guaranteed by the U.S. government or its agencies and instrumentalities (such as Federal Home Loan Bank, Ginnie Mae, Fannie Mae or Freddie Mac securities). Securities issued or guaranteed by Federal Home Loan Banks, Ginnie Mae, Fannie Mae or Freddie Mac are not issued directly by the U.S. government. Ginnie Mae is a wholly owned U.S. corporation that is authorized to guarantee, with the full faith and credit of the U.S. government, the timely payment of principal and interest of its securities. By contrast, securities issued or guaranteed by U.S. government-related organizations such as Federal Home Loan Banks, Fannie Mae and Freddie Mac are not backed by the full faith and credit of the U.S. government. No assurance can be given that the U.S. government would provide financial support to its agencies and instrumentalities if not required to do so by law. In addition, the value of U.S. government securities may be affected by changes in the credit rating of the U.S. government.

**High Yield Risk.** High yield securities – commonly known as “junk bonds” – to which the Portfolio is exposed are considered predominantly speculative with respect to the issuer’s continuing ability to make principal and interest payments. If the issuer of the security is in default with respect to interest or principal payments, the value of the Portfolio may be negatively affected. High yield securities generally have a less liquid resale market.

**Mid Cap Risk.** Medium-sized companies often have greater price volatility, lower trading volume, and less liquidity than larger, more-established companies. These companies tend to have smaller revenues, narrower product lines, less management depth and experience, smaller shares of their product or service markets, fewer financial resources, and less competitive strength than larger companies.

**Other Funds Risk.** Because the Portfolio invests in other funds managed by the Adviser or an affiliate (“Other Funds”), the performance of the Portfolio is dependent, in part, upon the performance of Other Funds in which the Portfolio may invest. As a result, the Portfolio is subject to the same risks as those faced by the Other Funds. In addition, Other Funds may be subject to additional fees and expenses that will be borne by the Portfolio.

**Foreign Securities Risk.** Foreign securities generally carry more risk and are more volatile than their domestic counterparts, in part because of potential for higher political and economic risks, lack of reliable information and fluctuations in currency exchange rates where investments are denominated in currencies other than the U.S. dollar. Certain events in foreign markets may adversely affect foreign and domestic issuers, including interruptions in the global supply chain, natural disasters and outbreak of infectious diseases. The Portfolio’s investment in any country could be subject to governmental actions such as capital or currency controls, nationalizing a company or industry, expropriating assets, or imposing punitive taxes that would have an adverse effect on security prices, and impair the Portfolio’s ability to repatriate capital or income. Foreign securities may also be more difficult to resell than comparable U.S. securities because the markets for foreign securities are often less liquid. Even when a foreign security increases in price in its local currency, the appreciation may be diluted by adverse changes in exchange rates when the security’s value is converted to U.S. dollars. Foreign withholding taxes also may apply and errors and delays may occur in the settlement process for foreign securities.

**Emerging Markets Risk.** The economic and political structures of developing countries in emerging markets, in most cases, do not compare favorably with the U.S.
or other developed countries in terms of wealth and stability, and their financial markets often lack liquidity. Portfolio performance will likely be negatively affected by portfolio exposure to countries and corporations domiciled in or with revenue exposures to countries in the midst of, among other things, hyperinflation, currency devaluation, trade disagreements, sudden political upheaval, or interventionist government policies. Portfolio performance may also be negatively affected by portfolio exposure to countries and corporations domiciled in or with revenue exposures to countries with less developed legal, tax, regulatory, and accounting systems. Significant buying or selling actions by a few major investors may also heighten the volatility of emerging markets. These factors make investing in emerging market countries significantly riskier than in other countries, and events in any one country could cause the Portfolio’s share price to decline.

**Foreign Currency Risk.** The value of a foreign currency may decline against the U.S. dollar, which would reduce the dollar value of securities denominated in that currency. The overall impact of such a decline of foreign currency can be significant, unpredictable, and long lasting, depending on the currencies represented, how each one appreciates or deprecates in relation to the U.S. dollar, and whether currency positions are hedged. Under normal conditions, the Portfolio does not engage in extensive foreign currency hedging programs. Further, exchange rate movements are volatile, and it is not possible to effectively hedge the currency risks of many developing countries.

**Investment Adviser Risk.** The Portfolio is actively managed and the success of its investment strategy depends significantly on the skills of the Adviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio’s investment objective.

**Conflicts of Interest Risk.** An investment in the Portfolio will be subject to a number of actual or potential conflicts of interest. For example, the Adviser or its affiliates may provide services to the Portfolio for which the Portfolio would compensate the Adviser and/or such affiliates. The Portfolio may invest in other pooled investment vehicles sponsored, managed, or otherwise affiliated with the Adviser, including other Portfolios. The Adviser may have an incentive (financial or otherwise) to enter into transactions or arrangements on behalf of the Portfolio with itself or its affiliates in circumstances where it might not have done so otherwise.

The Adviser or its affiliates manage other investment funds and/or accounts (including proprietary accounts) and have other clients with investment objectives and strategies that are similar to, or overlap with, the investment objective and strategy of the Portfolio, creating conflicts of interest in investment and allocation decisions regarding the allocation of investments that could be appropriate for the Portfolio and other clients of the Adviser or their affiliates.

**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer’s securities and therefore the value of the Portfolio.

**Quantitative Investing Risk.** Quantitative Investing Risk is the risk that securities selected according to a quantitative analysis methodology can perform differently from the market as a whole based on the model and the factors used in the analysis, the weight placed on each factor and changes in the factor’s historical trends. Such models are based on assumptions of these and other market factors, and the models may not take into account certain factors, or perform as intended, and may result in a decline in the value of the Portfolio’s portfolio.

**Leveraged Loan Risk.** Leveraged loans (also known as bank loans) are subject to the risks typically associated with debt securities. In addition, leveraged loans, which typically hold a senior position in the capital structure of a borrower, are subject to the risk that a court could subordinate such loans to presently existing or future indebtedness or take other action detrimental to the holders of leveraged loans. Leveraged loans are also subject to the risk that the value of the collateral, if any, securing a loan may decline, be insufficient to meet the obligations of the borrower, or be difficult to liquidate. Some leveraged loans are not as easily purchased or sold as publicly-traded securities and others are illiquid, which may make it more difficult for the Portfolio to value them or dispose of them at an acceptable price. Below investment-grade leveraged loans are typically more credit sensitive. In the event of fraud or misrepresentation, the Portfolio may not be protected under federal securities laws with respect to leveraged loans that may not be in the form of “securities.” The settlement period for some leveraged loans may be more than seven days.

**Prepayment Risk.** When interest rates fall, certain obligations will be paid off by the obligor more quickly than originally anticipated, and a Portfolio may have to invest the proceeds in securities with lower yields. In periods of falling interest rates, the rate of prepayments tends to increase (as does price fluctuation) as borrowers are motivated to pay off debt and refinance at new lower rates. During such periods, reinvestment of the prepayment proceeds by the management team will generally be at lower rates of return than the return on
the assets that were prepaid. Prepayment generally reduces the yield to maturity and the average life of the security.

**Derivatives Risk.** The use of derivatives (such as futures) involves additional risks and transaction costs which could leave the Portfolio in a worse position than if it had not used these instruments. The Portfolio utilizes equity futures in order to increase or decrease its exposure to various asset classes at a lower cost than trading stocks directly. The use of derivatives can lead to losses because of adverse movements in the price or value of the underlying asset, index or rate, which may be magnified by certain features of the contract. Changes in the value of the derivative may not correlate as intended with the underlying asset, rate or index, and the Portfolio could lose much more than the original amount invested. Derivatives can be highly volatile, illiquid and difficult to value. Certain derivatives may also be subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill its contractual obligations due to its financial condition, market events, or other reasons.

**Portfolio Turnover Rate Risk.** The Portfolio may engage in active and frequent trading of portfolio securities in implementing its principal investment strategies. A high rate of portfolio turnover (100% or more) involves correspondingly greater expenses which are borne by the Portfolio and its shareholders and may also result in short-term capital gains taxable to shareholders.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance from year to year and by showing how the Portfolio’s average annual returns for one-, five- and ten-year periods compared to broad-based securities market indices. The index descriptions appear in the “Index Descriptions” section of the prospectus. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart and table include the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assume that you sold your investment at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

**Management**

**Investment Adviser(s)**

The Portfolio is managed by Thrivent Financial for Lutherans (“Thrivent Financial” or the “Adviser”).
Portfolio Manager(s)

Mark L. Simenstad, CFA, Darren M. Bagwell, CFA, Stephen D. Lowe, CFA, David S. Royal and David R. Spangler, CFA are jointly and primarily responsible for the day-to-day management of the Portfolio. Mr. Simenstad has served as a portfolio manager of the Portfolio since April 2005. Mr. Bagwell and Mr. Lowe have served as portfolio managers of the Portfolio since April 2016. Mr. Royal has served as portfolio manager of the Portfolio since April 2018. Mr. Spangler has served as a portfolio manager of the Portfolio since February 2019. Mr. Simenstad is Chief Investment Strategist and has been with Thrivent Financial since 1999. Mr. Bagwell is Vice President, Chief Equity Strategist and has been with Thrivent Financial in an investment management capacity since 1999. Mr. Bagwell is Vice President, Chief Equity Strategist and has been with Thrivent Financial in an investment management capacity since 2002. Mr. Lowe is Vice President of Fixed Income Mutual Funds and Separate Accounts and has been with Thrivent Financial since 1997. He has served as a portfolio manager since 2009. Mr. Royal is Chief Investment Officer and has been with Thrivent Financial since 2006. Mr. Spangler has been with Thrivent Financial since 2002, in an investment management capacity since 2006 and currently is a Senior Portfolio Manager.

Purchase and Sale of Shares

Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:

- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

Tax Information

For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio’s complete prospectus, which contains more information about the Portfolio and its risks.

- **If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

- **If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio’s prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios’ annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios’ website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. You may elect to receive shareholder reports and other communications by enrolling at Thrivent.com/gopaperless.

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.
Thrivent Money Market Portfolio

Investment Objective

Thrivent Money Market Portfolio (the "Portfolio") seeks to achieve the maximum current income that is consistent with stability of capital and maintenance of liquidity.

Fees and Expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

| Total Annual Portfolio Operating Expenses| 0.45%    |

EXAMPLE  This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year, and that the Portfolio's operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

</tbody>
</table>

Principal Strategies

The Portfolio seeks to produce current income while maintaining liquidity by investing at least 99.5% of its total assets in government securities, cash and repurchase agreements collateralized fully by government securities or cash. Government securities are any securities issued or guaranteed as to principal or interest by the United States, or by a person controlled or supervised by and acting as an instrumentality of the government of the United States pursuant to authority granted by the Congress of the United States; or any certificate of deposit for any of the foregoing.

The Adviser manages the Portfolio subject to strict rules established by the Securities and Exchange Commission that are designed so that the Portfolio may maintain a stable $1.00 share price. Those rules generally require the Portfolio, among other things, to invest only in high quality securities that are denominated in U.S. dollars and have short remaining maturities. In addition, the rules require the Portfolio to maintain a dollar-weighted average maturity (WAM) of not more than 60 days and a dollar-weighted average life (WAL) of not more than 120 days. When calculating its WAM, the Portfolio may shorten its maturity by using the interest rate resets of certain adjustable rate securities. Generally, the Portfolio may not take into account these resets when calculating its WAL.

The Adviser typically uses U.S. Treasury securities, short-term discount notes issued by government-related organizations and government securities payable within seven-days or less to provide liquidity for reasonably foreseeable shareholder redemptions and to comply with regulatory requirements. The Adviser invests in other securities by selecting from the available supply of short-term government securities based on its interest rate outlook and analysis of quantitative and technical factors. Although the Portfolio frequently holds securities until maturity, the Adviser may sell securities to increase liquidity. The Adviser will select securities for such sales based on how close the sale price would be to their amortized costs.

Principal Risks

You could lose money by investing in the Portfolio. Although the Portfolio seeks to preserve the value of your investment at $1.00 per share, it cannot guarantee it will do so. An investment in the Portfolio is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Portfolio's sponsor has no legal obligation to provide financial support to the Portfolio, and you should not expect that the sponsor will provide financial support to
the Portfolio at any time. In addition, the Portfolio is subject to the following principal investment risks.

**Government Securities Risk.** The Portfolio invests in securities issued or guaranteed by the U.S. government or its agencies and instrumentalities (such as Federal Home Loan Bank, Ginnie Mae, Fannie Mae or Freddie Mac securities). Securities issued or guaranteed by Federal Home Loan Banks, Ginnie Mae, Fannie Mae or Freddie Mac are not issued directly by the U.S. government. Ginnie Mae is a wholly owned U.S. corporation that is authorized to guarantee, with the full faith and credit of the U.S. government, the timely payment of principal and interest of its securities. By contrast, securities issued or guaranteed by U.S. government-related organizations such as Federal Home Loan Banks, Fannie Mae and Freddie Mac are not backed by the full faith and credit of the U.S. government. No assurance can be given that the U.S. government would provide financial support to its agencies and instrumentalities if not required to do so by law. In addition, the value of U.S. government securities may be affected by changes in the credit rating of the U.S. government.

**Interest Rate Risk.** A weak economy, strong equity markets, or changes by the Federal Reserve in its monetary policies may cause short-term interest rates to increase and affect the Portfolio’s ability to maintain a stable share price.

**Credit Risk.** Credit risk is the risk that an issuer of a debt security to which the Portfolio is exposed may no longer be able or willing to pay its debt. As a result of such an event, the debt security may decline in price and affect the value of the Portfolio.

**Redemption Risk.** The Portfolio may need to sell portfolio securities to meet redemption requests. The Portfolio could experience a loss when selling portfolio securities to meet redemption requests if there is (i) significant redemption activity by shareholders, including, for example, when a single investor or few large investors make a significant redemption of Portfolio shares, (ii) a disruption in the normal operation of the markets in which the Portfolio buys and sells portfolio securities or (iii) the inability of the Portfolio to sell portfolio securities because such securities are illiquid. In such events, the Portfolio could be forced to sell portfolio securities at unfavorable prices in an effort to generate sufficient cash to pay redeeming shareholders. Although the Portfolio generally does not have the ability to impose liquidity fees or temporarily suspend redemptions, the payment of redemption proceeds could be delayed or denied if the Portfolio is liquidated, to the extent permitted by applicable regulations.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance from year to year and by showing the Portfolio’s average annual returns for one-, five- and ten-year periods. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart and table include the effects of Portfolio expenses and assume that you sold your investment at the end of the period. On February 1, 2016, the Portfolio changed its investment strategies from those of a prime money market fund to those of a government money market fund. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.
### AVERAGE ANNUAL TOTAL RETURNS

The 7-day yield for the period ended December 31, 2019 was 1.36%. You may call 800-847-4836 to obtain the Portfolio’s current yield information.

### Management

#### Investment Adviser(s)

The Portfolio is managed by Thrivent Financial for Lutherans ("Thrivent Financial" or the "Adviser").

#### Portfolio Manager(s)

**William D. Stouten** is primarily responsible for the day-to-day management of the Portfolio. Mr. Stouten has served as portfolio manager of the Portfolio since October 2003. Prior to this position, he was a research analyst and trader for the Thrivent money market funds since 2001, when he joined Thrivent Financial.

### Purchase and Sale of Shares

Shares of each series of Thrivent Series Fund, Inc. (the "Fund") may be sold, without any minimum initial or subsequent investment requirements, only to:

- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

### Tax Information

For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

### Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio’s complete prospectus, which contains more information about the Portfolio and its risks.

- **If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

- **If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio’s prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios’ annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios’ website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. You may elect to receive shareholder reports and other communications by enrolling at Thrivent.com/gopaperless.

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.
Thrivent Multidimensional Income Portfolio

Investment Objective
Thrivent Multidimensional Income Portfolio (the "Portfolio") seeks a high level of current income and, secondarily, growth of capital. The Portfolio's investment objectives may be changed without shareholder approval.

Fees and Expenses
This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

ANNUAL PORTFOLIO OPERATING EXPENSES (expenses that you pay each year as a percentage of the value of your investment)

| Management Fees | 0.55% |
| Other Expenses  | 0.87% |
| Acquired Fund Fees and Expenses | 0.30% |
| Total Annual Portfolio Operating Expenses | 1.72% |
| Less Fee Waivers and/or Expense Reimbursements¹ | 0.47% |
| Total Annual Portfolio Operating Expenses After Fee Waivers and/or Expense Reimbursements¹ | 1.25% |

¹ The Adviser has contractually agreed, through at least April 30, 2021, to waive a portion of the management fees associated with the shares of the Thrivent Multidimensional Income Portfolio in order to limit the Total Annual Portfolio Operating Expenses After Fee Waivers and/or Expense Reimbursements to an annual rate of 0.95% of the average daily net assets of the shares. This contractual provision, however, may be terminated before the indicated termination date upon the mutual agreement between the Independent Directors of the Portfolio and the Adviser.

EXAMPLE
This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. In addition, the example for the 1 Year period reflects the effect of the contractual fee waiver and/or expense reimbursement. The example also assumes that your investment has a 5% return each year, and that the Portfolio's operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

| Thrivent Multidimensional Income Portfolio | $127 | $496 | $889 | $1,991 |

Portfolio Turnover
The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio’s performance. During the most recent fiscal year, the Portfolio’s portfolio turnover rate was 106% of the average value of its portfolio.

Principal Strategies
The Portfolio seeks to achieve its investment objectives by allocating assets across multiple income and growth producing asset classes and strategies. Debt securities in which the Portfolio invests include high yield, high risk bonds, notes, debentures and other debt obligations commonly known as “junk bonds.” At the time of purchase, these high-yield securities are rated within or below the “BB” major rating category by S&P or the “Ba” major rating category by Moody’s or are unrated but considered to be of comparable quality by the Adviser. The Portfolio will also implement its investment strategy by investing in convertible bonds and U.S. dollar denominated emerging markets sovereign debt.

The Portfolio also plans to invest in income-producing equity securities, including preferred stock and real estate investment trusts (“REITs”). The Portfolio will invest in other income-producing securities such as shares of closed-end funds (“CEFs”), publicly-traded business development companies (“BDCs”), master limited partnerships (“MLPs”), and exchange-traded funds (“ETFs”). CEFs are investment companies that issue a fixed number of shares that trade on a stock exchange or over-the-counter, typically at a premium or a discount to their net asset value. BDCs are publicly held investment funds that invest primarily in private
and thinly traded public U.S. businesses. MLPs are publicly-traded limited partnerships that are limited by the Internal Revenue Code to only apply to enterprises that engage in certain businesses, mostly pertaining to the use of natural resources. ETFs are investment companies generally designed to track the performance of a securities or other index or benchmark. The Portfolio may also pursue its investment strategy by investing in other mutual funds, including funds managed by the Adviser or an affiliate and unaffiliated funds.

The Portfolio may invest in other securities such as investment-grade corporate bonds, asset-backed securities, mortgage-backed securities (including commercially backed ones), and leveraged loans. The Portfolio utilizes derivatives primarily in the form of U.S. Treasury futures contracts in order to manage the Portfolio's duration, or interest rate risk. The Portfolio may enter into derivatives contracts traded on exchanges or in the over the counter market.

The Adviser uses fundamental, quantitative and technical investment research techniques to determine what to buy and sell. Fundamental techniques assess a security's value based on an issuer's financial profile, management, and business prospects while quantitative and technical techniques involve a more data-oriented analysis of financial information, market trends and price movements.

**Principal Risks**

The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

**Interest Rate Risk.** Interest rate risk is the risk that prices of debt securities decline in value when interest rates rise for debt securities that pay a fixed rate of interest. Debt securities with longer durations (a measure of price sensitivity of a bond or bond fund to changes in interest rates) or maturities (i.e., the amount of time until a bond’s issuer must pay its principal or face value) tend to be more sensitive to changes in interest rates than debt securities with shorter durations or maturities. Changes by the Federal Reserve to monetary policies could affect interest rates and the value of some securities. In addition, the phase out of LIBOR (the offered rate for short-term Eurodollar deposits between major international banks) by the end of 2021 could lead to increased volatility and illiquidity in certain markets that currently rely on LIBOR to determine interest rates.

**Credit Risk.** Credit risk is the risk that an issuer of a debt security to which the Portfolio is exposed may no longer be able or willing to pay its debt. As a result of such an event, the debt security may decline in price and affect the value of the Portfolio.

**High Yield Risk.** High yield securities – commonly known as “junk bonds” – to which the Portfolio is exposed are considered predominantly speculative with respect to the issuer’s continuing ability to make principal and interest payments. If the issuer of the security is in default with respect to interest or principal payments, the value of the Portfolio may be negatively affected. High yield securities generally have a less liquid resale market.

**Preferred Securities Risk.** There are certain additional risks associated with investing in preferred securities, including, but not limited to, preferred securities may include provisions that permit the issuer, at its discretion, to defer or omit distributions for a stated period without any adverse consequences to the issuer; preferred securities are generally subordinated to bonds and other debt instruments in a company’s capital structure in terms of having priority to corporate income and liquidation payments, and therefore will be subject to greater credit risk than more senior debt instruments; preferred securities may be substantially less liquid than many other securities, such as common stocks or U.S. Government securities; generally, traditional preferred securities offer no voting rights with respect to the issuing company unless preferred dividends have been in arrears for a specified number of periods, at which time the preferred security holders may elect a number of directors to the issuer’s board; and in certain varying circumstances, an issuer of preferred securities may redeem the securities prior to a specified date.

**Closed-End Fund (“CEF”) Risk.** Investments in CEFs are subject to various risks, including reliance on management’s ability to meet a CEF’s investment objective and to manage a CEF’s portfolio; fluctuation in the market value of a CEF’s shares compared to the changes in the value of the underlying securities that the CEF owns (i.e., trading at a discount or premium to its net asset value); and that CEFs are permitted to invest in a greater amount of “illiquid” securities than typical mutual funds. The Portfolio is subject to a pro-rata share of the management fees and expenses of each CEF in addition to the Portfolio’s management fees and expenses, resulting in Portfolio shareholders subject to higher expenses than if they invested directly in CEFs.

**Emerging Markets Risk.** The economic and political structures of developing countries in emerging markets, in most cases, do not compare favorably with the U.S. or other developed countries in terms of wealth and stability, and their financial markets often lack liquidity. Portfolio performance will likely be negatively affected by portfolio exposure to countries and corporations domiciled in or with revenue exposures to countries in...
the midst of, among other things, hyperinflation, currency devaluation, trade disagreements, sudden political upheaval, or interventionist government policies. Portfolio performance may also be negatively affected by portfolio exposure to countries and corporations domiciled in or with revenue exposures to countries with less developed legal, tax, regulatory, and accounting systems. Significant buying or selling actions by a few major investors may also heighten the volatility of emerging markets. These factors make investing in emerging market countries significantly riskier than in other countries, and events in any one country could cause the Portfolio’s share price to decline.

**Foreign Securities Risk.** Foreign securities generally carry more risk and are more volatile than their domestic counterparts, in part because of potential for higher political and economic risks, lack of reliable information and fluctuations in currency exchange rates where investments are denominated in currencies other than the U.S. dollar. Certain events in foreign markets may adversely affect foreign and domestic issuers, including interruptions in the global supply chain, natural disasters and outbreak of infectious diseases. The Portfolio’s investment in any country could be subject to governmental actions such as capital or currency controls, nationalizing a company or industry, expropriating assets, or imposing punitive taxes that would have an adverse effect on security prices, and impair the Portfolio’s ability to repatriate capital or income. Foreign securities may also be more difficult to resell than comparable U.S. securities because the markets for foreign securities are often less liquid. Even when a foreign security increases in price in its local currency, the appreciation may be diluted by adverse changes in exchange rates when the security’s value is converted to U.S. dollars. Foreign withholding taxes also may apply and errors and delays may occur in the settlement process for foreign securities.

**Market Risk.** Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio’s investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio’s benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

**Mortgage-Backed and Other Asset-Backed Securities Risk.** The value of mortgage-backed and asset-backed securities will be influenced by the factors affecting the housing market and the assets underlying such securities. As a result, during periods of declining asset value, difficult or frozen credit markets, swings in interest rates, or deteriorating economic conditions, mortgage-related and asset-backed securities may decline in value, face valuation difficulties, become more volatile and/or become illiquid. In addition, both mortgage-backed and asset-backed securities are sensitive to changes in the repayment patterns of the underlying security. If the principal payment on the underlying asset is repaid faster or slower than the holder of the asset-backed or mortgage-backed security anticipates, the price of the security may fall, particularly if the holder must reinvest the repaid principal at lower rates or must continue to hold the security when interest rates rise. This effect may cause the value of the Portfolio to decline and reduce the overall return of the Portfolio.

**Convertible Securities Risk.** Convertible securities are subject to the usual risks associated with debt securities, such as interest rate risk and credit risk. Convertible securities also react to changes in the value of the common stock into which they convert, and are thus subject to market risk. The Portfolio may also be forced to convert a convertible security at an inopportune time, which may decrease the Portfolio’s return.

**Government Securities Risk.** The Portfolio invests in securities issued or guaranteed by the U.S. government or its agencies and instrumentalities (such as Federal Home Loan Bank, Ginnie Mae, Fannie Mae or Freddie Mac securities). Securities issued or guaranteed by Federal Home Loan Banks, Ginnie Mae, Fannie Mae or Freddie Mac are not issued directly by the U.S. government. Ginnie Mae is a wholly owned U.S. corporation that is authorized to guarantee, with the full faith and credit of the U.S. government, the timely payment of principal and interest of its securities. By contrast, securities issued or guaranteed by U.S. government-related organizations such as Federal Home Loan Banks, Fannie Mae and Freddie Mac are not backed by the full faith and credit of the U.S. government. No assurance can be given that the U.S. government would provide financial support to its agencies and instrumentalities if not required to do so by law. In addition, the value of U.S. government securities may be affected by changes in the credit rating of the U.S. government.

**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer’s securities and therefore the value of the Portfolio.

**Investment Adviser Risk.** The Portfolio is actively managed and the success of its investment strategy depends significantly on the skills of the Adviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio’s investment objective.
Conflicts of Interest Risk. An investment in the Portfolio will be subject to a number of actual or potential conflicts of interest. For example, the Adviser or its affiliates may provide services to the Portfolio for which the Portfolio would compensate the Adviser and/or such affiliates. The Portfolio may invest in other pooled investment vehicles sponsored, managed, or otherwise affiliated with the Adviser, including other Portfolios. The Adviser may have an incentive (financial or otherwise) to enter into transactions or arrangements on behalf of the Portfolio with itself or its affiliates in circumstances where it might not have done so otherwise.

The Adviser or its affiliates manage other investment funds and/or accounts (including proprietary accounts) and have other clients with investment objectives and strategies that are similar to, or overlap with, the investment objective and strategy of the Portfolio, creating conflicts of interest in investment and allocation decisions regarding the allocation of investments that could be appropriate for the Portfolio and other clients of the Adviser or their affiliates.

Sovereign Debt Risk. Sovereign debt securities are issued or guaranteed by foreign governmental entities. These investments are subject to the risk that a governmental entity may delay or refuse to pay interest or repay principal on its sovereign debt, due, for example, to cash flow problems, insufficient foreign currency reserves, political considerations, the relative size of the governmental entity’s debt position in relation to the economy or the failure to put in place economic reforms required by the International Monetary Fund or other multilateral agencies. If a governmental entity defaults, it may ask for more time in which to pay or for further loans. There is no legal process for collecting sovereign debts that a government does not pay nor are there bankruptcy proceedings through which all or part of the sovereign debt that a governmental entity has not repaid may be collected.

Business Development Company (“BDC”) Risk. The value of a BDC’s investments will be affected by portfolio company specific performance as well as the overall economic environment. Shares of BDCs may trade at prices that reflect a premium above or a discount below the investment company’s net asset value, which may be substantial. The Portfolio may be exposed to greater risk and experience higher volatility than would a portfolio that was not invested in BDCs. Additionally, most BDCs employ leverage which can magnify the returns of underlying investments.

Investment in Other Investment Companies Risk. Investing in other investment companies, including CEFs and BDCs, could result in the duplication of certain fees, including management and administrative fees, and may expose the Portfolio to the risks of owning the underlying investments that the other investment company holds.

Liquidity Risk. Liquidity is the ability to sell a security relatively quickly for a price that most closely reflects the actual value of the security. Dealer inventories of bonds are at or near historic lows in relation to market size, which has the potential to decrease liquidity and increase price volatility in the fixed income markets, particularly during periods of economic or market stress. As a result of this decreased liquidity, the Portfolio may have to accept a lower price to sell a security, sell other securities to raise cash, or give up an investment opportunity, any of which could have a negative effect on performance.

Derivatives Risk. The use of derivatives (such as futures) involves additional risks and transaction costs which could leave the Portfolio in a worse position than if it had not used these instruments. The Portfolio utilizes futures on U.S. Treasuries in order to manage duration. The use of derivatives can lead to losses because of adverse movements in the price or value of the underlying asset, index or rate, which may be magnified by certain features of the contract. Changes in the value of the derivative may not correlate as intended with the underlying asset, rate or index, and the Portfolio could lose much more than the original amount invested. Derivatives can be highly volatile, illiquid and difficult to value. Certain derivatives may also be subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill its contractual obligations due to its financial condition, market events, or other reasons.

Other Funds Risk. Because the Portfolio invests in other funds managed by the Adviser or an affiliate (“Other Funds”), the performance of the Portfolio is dependent, in part, upon the performance of Other Funds in which the Portfolio may invest. As a result, the Portfolio is subject to the same risks as those faced by the Other Funds. In addition, Other Funds may be subject to additional fees and expenses that will be borne by the Portfolio.

Portfolio Turnover Rate Risk. The Portfolio may engage in active and frequent trading of portfolio securities in implementing its principal investment strategies. A high rate of portfolio turnover (100% or more) involves correspondingly greater expenses which are borne by the Portfolio and its shareholders and may also result in short-term capital gains taxable to shareholders.

Health Crisis Risk. The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the
Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance from year to year and by showing how the Portfolio’s average annual returns for the one-year period and since inception compared to broad-based securities market indices. The index descriptions appear in the "Index Descriptions" section of the prospectus. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart includes the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assumes that you sold your investment at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

**Management**

**Investment Adviser(s)**

The Portfolio is managed by Thrivent Financial for Lutherans ("Thrivent Financial" or the "Adviser").

**Portfolio Manager(s)**

**Mark L. Simenstad, CFA, Gregory R. Anderson, CFA, Paul J. Ocenasek, CFA, Stephen D. Lowe, CFA and Kent L. White, CFA** are jointly and primarily responsible for the day-to-day management of the Portfolio. Mr. Simenstad, Mr. Anderson, and Mr. Ocenasek have served as portfolio managers of the Portfolio since April 2017. Mr. Lowe has served as a portfolio manager of the Portfolio since April 2018. Mr. White has served as a portfolio manager of the Fund since July 2019. Mr. Simenstad is Chief Investment Strategist and has been with Thrivent Financial since 1999. Mr. Anderson is Vice President, Fixed Income General Accounts. He has been with Thrivent Financial since 1997 and has served as a portfolio manager since 2000. Mr. Ocenasek has been with Thrivent Financial since 1987 and has served in a portfolio management capacity since 1997. Mr. Lowe is Vice President of Fixed Income Mutual Funds and Separate Accounts and has been with Thrivent Financial since 1997. Mr. White is the director of Investment Grade Research, and he has been with Thrivent Financial since 1999.
Purchase and Sale of Shares

Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:

- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

Tax Information

For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio’s complete prospectus, which contains more information about the Portfolio and its risks.

• If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

• If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio’s prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios’ annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios’ website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. You may elect to receive shareholder reports and other communications by enrolling at Thrivent.com/gopaperless.

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.
Thrivent Opportunity Income Plus Portfolio

**Investment Objective**

Thrivent Opportunity Income Plus Portfolio (the "Portfolio") seeks a combination of current income and long-term capital appreciation.

**Fees and Expenses**

This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

**EXAMPLE** This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year, and that the Portfolio's operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

</thead>
<tbody>
<tr>
<td>Thrivent Opportunity Income Plus Portfolio</td>
<td>$66</td>
<td>$208</td>
<td>$362</td>
<td>$810</td>
</tr>
</tbody>
</table>

**Portfolio Turnover**

The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio's performance. During the most recent fiscal year, the Portfolio's portfolio turnover rate was 195% of the average value of its portfolio.

**Principal Strategies**

Under normal circumstances, the Portfolio primarily invests in a broad range of debt securities.

The debt securities in which the Portfolio invests may be of any maturity or credit quality, including high yield, high risk bonds, notes, debentures and other debt obligations commonly known as "junk bonds." At the time of purchase, these high-yield securities are rated within or below the "BB" major rating category by S&P or the "Ba" major rating category by Moody's or are unrated but considered to be of comparable quality by the Adviser. The Portfolio may also invest in leveraged loans, which are senior secured loans that are made by banks or other lending institutions to companies that are rated below investment grade. The Portfolio may also invest in investment-grade corporate bonds, asset-backed securities, mortgage-backed securities (including commercially backed ones), sovereign and emerging market debt (both U.S. dollar and non-U.S. dollar denominated), preferred stock, and other types of securities.

The Portfolio utilizes derivatives primarily in the form of U.S. Treasury futures contracts in order to manage the Portfolio's duration, or interest rate risk. The Portfolio may enter into derivatives contracts traded on exchanges or in the over the counter market.

The Portfolio may invest in foreign securities, including those of issuers in emerging markets. An “emerging market” country is any country determined by the Adviser to have an emerging market economy, considering factors such as the country’s credit rating, its political and economic stability and the development of its financial and capital markets.

The Portfolio may invest in exchange-traded funds ("ETFs"), which are investment companies generally designed to track the performance of a securities or other index or benchmark.

The Portfolio may also pursue its investment strategy by investing in other mutual funds managed by the Adviser or an affiliate.
The Adviser uses fundamental, quantitative and technical investment research techniques to determine what to buy and sell. Fundamental techniques assess a security’s value based on an issuer’s financial profile, management, and business prospects while quantitative and technical techniques involve a more data-oriented analysis of financial information, market trends and price movements.

**Principal Risks**

The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

**Interest Rate Risk.** Interest rate risk is the risk that prices of debt securities decline in value when interest rates rise for debt securities that pay a fixed rate of interest. Debt securities with longer durations (a measure of price sensitivity of a bond or bond fund to changes in interest rates) or maturities (i.e., the amount of time until a bond’s issuer must pay its principal or face value) tend to be more sensitive to changes in interest rates than debt securities with shorter durations or maturities. Changes by the Federal Reserve to monetary policies could affect interest rates and the value of some securities. In addition, the phase out of LIBOR (the offered rate for short-term Eurodollar deposits between major international banks) by the end of 2021 could lead to increased volatility and illiquidity in certain markets that currently rely on LIBOR to determine interest rates.

**Credit Risk.** Credit risk is the risk that an issuer of a debt security to which the Portfolio is exposed may no longer be able or willing to pay its debt. As a result of such an event, the debt security may decline in price and affect the value of the Portfolio.

**Mortgage-Backed and Other Asset-Backed Securities Risk.** The value of mortgage-backed and asset-backed securities will be influenced by the factors affecting the housing market and the assets underlying such securities. As a result, during periods of declining asset value, difficult or frozen credit markets, swings in interest rates, or deteriorating economic conditions, mortgage-related and asset-backed securities may decline in value, face valuation difficulties, become more volatile and/or become illiquid. In addition, both mortgage-backed and asset-backed securities are sensitive to changes in the repayment patterns of the underlying security. If the principal payment on the underlying asset is repaid faster or slower than the holder of the asset-backed or mortgage-backed security anticipates, the price of the security may fall, particularly if the holder must reinvest the repaid principal at lower rates or must continue to hold the security when interest rates rise. This effect may cause the value of the Portfolio to decline and reduce the overall return of the Portfolio.

**Leveraged Loan Risk.** Leveraged loans (also known as bank loans) are subject to the risks typically associated with debt securities. In addition, leveraged loans, which typically hold a senior position in the capital structure of a borrower, are subject to the risk that a court could subordinate such loans to presently existing or future indebtedness or take other action detrimental to the holders of leveraged loans. Leveraged loans are also subject to the risk that the value of the collateral, if any, securing a loan may decline, be insufficient to meet the obligations of the borrower, or be difficult to liquidate. Some leveraged loans are not as easily purchased or sold as publicly-traded securities and others are illiquid, which may make it more difficult for the Portfolio to value them or dispose of them at an acceptable price. Below investment-grade leveraged loans are typically more credit sensitive. In the event of fraud or misrepresentation, the Portfolio may not be protected under federal securities laws with respect to leveraged loans that may not be in the form of “securities.” The settlement period for some leveraged loans may be more than seven days.

**Prepayment Risk.** When interest rates fall, certain obligations will be paid off by the obligor more quickly than originally anticipated, and a Portfolio may have to invest the proceeds in securities with lower yields. In periods of falling interest rates, the rate of prepayments tends to increase (as does price fluctuation) as borrowers are motivated to pay off debt and refinance at new lower rates. During such periods, reinvestment of the prepayment proceeds by the management team will generally be at lower rates of return than the return on the assets that were prepaid. Prepayment generally reduces the yield to maturity and the average life of the security.

**High Yield Risk.** High yield securities – commonly known as “junk bonds” – to which the Portfolio is exposed are considered predominantly speculative with respect to the issuer’s continuing ability to make principal and interest payments. If the issuer of the security is in default with respect to interest or principal payments, the value of the Portfolio may be negatively affected. High yield securities generally have a less liquid resale market.

**Allocation Risk.** The Portfolio’s investment performance depends upon how its assets are allocated across broad asset categories and applicable sub-classes within such categories. Some broad asset categories and sub-classes may perform below expectations or the securities markets generally over short and extended periods. Therefore, a principal risk of investing in the Portfolio is that the allocation strategies used and the allocation decisions made will not produce the desired results.
Foreign Securities Risk. Foreign securities generally carry more risk and are more volatile than their domestic counterparts, in part because of potential for higher political and economic risks, lack of reliable information and fluctuations in currency exchange rates where investments are denominated in currencies other than the U.S. dollar. Certain events in foreign markets may adversely affect foreign and domestic issuers, including interruptions in the global supply chain, natural disasters and outbreak of infectious diseases. The Portfolio's investment in any country could be subject to governmental actions such as capital or currency controls, nationalizing a company or industry, expropriating assets, or imposing punitive taxes that would have an adverse effect on security prices, and impair the Portfolio's ability to repatriate capital or income. Foreign securities may also be more difficult to resell than comparable U.S. securities because the markets for foreign securities are often less liquid. Even when a foreign security increases in price in its local currency, the appreciation may be diluted by adverse changes in exchange rates when the security's value is converted to U.S. dollars. Foreign withholding taxes also may apply and errors and delays may occur in the settlement process for foreign securities.

Emerging Markets Risk. The economic and political structures of developing countries in emerging markets, in most cases, do not compare favorably with the U.S. or other developed countries in terms of wealth and stability, and their financial markets often lack liquidity. Portfolio performance will likely be negatively affected by portfolio exposure to countries and corporations domiciled in or with revenue exposures to countries in the midst of, among other things, hyperinflation, currency devaluation, trade disagreements, sudden political upheaval, or interventionist government policies. Portfolio performance may also be negatively affected by portfolio exposure to countries and corporations domiciled in or with revenue exposures to countries with less developed legal, tax, regulatory, and accounting systems. Significant buying or selling actions by a few major investors may also heighten the volatility of emerging markets. These factors make investing in emerging market countries significantly riskier than in other countries, and events in any one country could cause the Portfolio's share price to decline.

Sovereign Debt Risk. Sovereign debt securities are issued or guaranteed by foreign governmental entities. These investments are subject to the risk that a governmental entity may delay or refuse to pay interest or repay principal on its sovereign debt, due, for example, to cash flow problems, insufficient foreign currency reserves, political considerations, the relative size of the governmental entity's debt position in relation to the economy or the failure to put in place economic reforms required by the International Monetary Fund or other multilateral agencies. If a governmental entity defaults, it may ask for more time in which to pay or for further loans. There is no legal process for collecting sovereign debts that a government does not pay nor are there bankruptcy proceedings through which all or part of the sovereign debt that a governmental entity has not repaid may be collected.

Market Risk. Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio's investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio's benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

Other Funds Risk. Because the Portfolio invests in other funds managed by the Adviser or an affiliate (“Other Funds”), the performance of the Portfolio is dependent, in part, upon the performance of Other Funds in which the Portfolio may invest. As a result, the Portfolio is subject to the same risks as those faced by the Other Funds. In addition, Other Funds may be subject to additional fees and expenses that will be borne by the Portfolio.

Investment Adviser Risk. The Portfolio is actively managed and the success of its investment strategy depends significantly on the skills of the Adviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio’s investment objective.

Conflicts of Interest Risk. An investment in the Portfolio will be subject to a number of actual or potential conflicts of interest. For example, the Adviser or its affiliates may provide services to the Portfolio for which the Portfolio would compensate the Adviser and/or such affiliates. The Portfolio may invest in other pooled investment vehicles sponsored, managed, or otherwise affiliated with the Adviser, including other Portfolios. The Adviser may have an incentive (financial or otherwise) to enter into transactions or arrangements on behalf of the Portfolio with itself or its affiliates in circumstances where it might not have done so otherwise.

The Adviser or its affiliates manage other investment funds and/or accounts (including proprietary accounts) and have other clients with investment objectives and strategies that are similar to, or overlap with, the investment objective and strategy of the Portfolio, creating conflicts of interest in investment and allocation decisions regarding the allocation of
investments that could be appropriate for the Portfolio and other clients of the Adviser or their affiliates.

**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer’s securities and therefore the value of the Portfolio.

**Liquidity Risk.** Liquidity is the ability to sell a security relatively quickly for a price that most closely reflects the actual value of the security. Dealer inventories of bonds are at or near historic lows in relation to market size, which has the potential to decrease liquidity and increase price volatility in the fixed income markets, particularly during periods of economic or market stress. As a result of this decreased liquidity, the Portfolio may have to accept a lower price to sell a security, sell other securities to raise cash, or give up an investment opportunity, any of which could have a negative effect on performance.

**Derivatives Risk.** The use of derivatives (such as futures) involves additional risks and transaction costs which could leave the Portfolio in a worse position than if it had not used these instruments. The Portfolio utilizes futures on U.S. Treasuries in order to manage duration. The use of derivatives can lead to losses because of adverse movements in the price or value of the underlying asset, index or rate, which may be magnified by certain features of the contract. Changes in the value of the derivative may not correlate as intended with the underlying asset, rate or index, and the Portfolio could lose much more than the original amount invested. Derivatives can be highly volatile, illiquid and difficult to value. Certain derivatives may also be subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill its contractual obligations due to its financial condition, market events, or other reasons.

**ETF Risk.** An ETF is subject to the risks of the underlying investments that it holds. In addition, for index-based ETFs, the performance of an ETF may diverge from the performance of such index (commonly known as tracking error). ETFs are subject to fees and expenses (like management fees and operating expenses) that do not apply to an index, and the Portfolio will indirectly bear its proportionate share of any such fees and expenses paid by the ETFs in which it invests. Because ETFs trade on an exchange, there is a risk that an ETF will trade at a discount to net asset value or that investors will fail to bring the trading price in line with the underlying shares (known as the arbitrage mechanism).

**Portfolio Turnover Rate Risk.** The Portfolio may engage in active and frequent trading of portfolio securities in implementing its principal investment strategies. A high rate of portfolio turnover (100% or more) involves correspondingly greater expenses which are borne by the Portfolio and its shareholders and may also result in short-term capital gains taxable to shareholders.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance from year to year and by showing how the Portfolio’s average annual returns for one-, five- and ten-year periods compared to broad-based securities market indices. The index descriptions appear in the “Index Descriptions” section of the prospectus. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart includes the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assume that you sold your investment at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

Effective August 16, 2013, based on approval of the Portfolio’s Board of Directors, the Portfolio’s investment objective and principal strategies were changed, which had the effect of converting the Portfolio from one which invested at least 80% of its assets in mortgage-related securities to one which invests in a broad range of fixed-income securities. At the same time, the Portfolio’s name changed from Thrivent Mortgage Securities Portfolio to Thrivent Opportunity Income Plus Portfolio. As a result, performance information presented below with respect to periods prior to August 16, 2013, reflects the performance of an investment portfolio that was materially different from the investment portfolio of Thrivent Opportunity Income Plus Portfolio.

How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some
indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

### Management

**Investment Adviser(s)**

The Portfolio is managed by Thrivent Financial for Lutherans (“Thrivent Financial” or the “Adviser”).

**Portfolio Manager(s)**

**Gregory R. Anderson, CFA, Conrad E. Smith, CFA, Paul J. Ocenasek, CFA, Kent L. White, CFA and Stephen D. Lowe, CFA** are jointly and primarily responsible for the day-to-day management of the Portfolio. Mr. Anderson has served as a portfolio manager of the Portfolio since April 2003. Mr. Smith has served as a portfolio manager of the Portfolio since the August 2013. Mr. Ocenasek and Mr. White have served as portfolio managers of the Portfolio since April 2015. Stephen D. Lowe, CFA has served as a portfolio manager of the Portfolio since April 2018. Mr. Anderson is Vice President, Fixed Income General Accounts. He has been with Thrivent Financial since 1997 and has served as a portfolio manager since 2000. Mr. Smith has been with Thrivent Financial since 2004 and also manages the leveraged loan portfolio and the high yield bond portfolio of Thrivent Financial’s general account. Mr. Ocenasek has been with Thrivent Financial since 1987 and has served in a portfolio management capacity since 1997. Mr. White is the Director of Investment Grade Research at Thrivent Financial and has been with the firm since 1999. Mr. Lowe is Vice President of Fixed Income Mutual Funds and Separate Accounts and has been with Thrivent Financial since 1997.

### Purchase and Sale of Shares

Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:

- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

### Tax Information

For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

### Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio’s complete prospectus, which contains more information about the Portfolio and its risks.

- **If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

- **If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio's prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios' annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios' website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. You may elect to receive shareholder reports and other communications by enrolling at Thrivent.com/gopaperless.

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.
Thrivent Partner Emerging Markets Equity Portfolio

Investment Objective
Thrivent Partner Emerging Markets Equity Portfolio (the "Portfolio") seeks long-term capital growth.

Fees and Expenses
This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

SHAREHOLDER FEES (fees paid directly from your investment)

</tbody>
</table>

¹ The Adviser has contractually agreed, through at least April 30, 2021, to waive a portion of the management fees associated with the shares of the Thrivent Partner Emerging Markets Equity Portfolio in order to limit the Total Annual Portfolio Operating Expenses After Fee Waivers and/or Expense Reimbursements to an annual rate of 1.20% of the average daily net assets of the shares. This contractual provision, however, may be terminated before the indicated termination date upon the mutual agreement between the Independent Directors of the Portfolio and the Adviser.

EXAMPLE
This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. In addition, the example for the 1 Year period reflects the effect of the contractual fee waiver and/or expense reimbursement. The example also assumes that your investment has a 5% return each year, and that the Portfolio's operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

<td>$1,559</td>
</tr>
</tbody>
</table>

Portfolio Turnover
The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio's performance. During the most recent fiscal year, the Portfolio's portfolio turnover rate was 21% of the average value of its portfolio.

Principal Strategies
Under normal circumstances, the Portfolio invests at least 80% of its net assets (plus the amount of any borrowing for investment purposes), at the time of initial purchase, in emerging market equities, including common stock, preferred stock, convertible securities, depositary receipts and rights and warrants to buy common stocks. A security is considered to be an “emerging market” security if issued by a company that Portfolio management has determined meets one or more of the following criteria:

- is organized under the laws of, or has its principal office in, an emerging market country;
- has its principal securities trading market in an emerging market country; and/or
- derives a majority of its annual revenue or earnings or assets from goods produced, sales made or services performed in an emerging market country.

An “emerging market” country is any country determined by the Adviser or subadviser to have an emerging market economy, considering factors such as the country’s credit rating, its political and economic stability and the development of its financial and capital markets. These emerging market countries include every nation in the world except the U.S., Canada, Israel, Japan, Australia, New Zealand, Hong Kong, Singapore and all nations typically considered part of Western Europe. At times, the Portfolio may have a significant amount of its assets invested in a country or geographic region.
The Portfolio may also invest in equity securities of issuers that are not tied economically to emerging market countries. The Portfolio may invest in securities denominated in U.S. dollars and currencies of emerging market countries in which it may invest. The Portfolio typically has full currency exposure to those markets in which it invests.

The Portfolio may invest in securities of any market capitalization, including small and mid-cap securities.

The Portfolio may invest in securities of any market sector and may hold a significant amount of securities of companies, from time to time, within a single sector such as financials.

The Portfolio's subadviser, Aberdeen Asset Managers Limited (“Aberdeen”), uses a disciplined investment process based on its proprietary research to determine security selection. Aberdeen seeks to identify “quality” companies, based on factors such as strength of management and business, that trade at reasonable valuations, based on factors such as earnings growth and other key financial measurements. Aberdeen also evaluates matters of long term value by examining a spectrum of considerations such as governance and risk management, including those risks often referred to as environmental, social and governance factors (“ESG”). ESG analysis is fully integrated into investment decisions for all equity holdings. As such, Aberdeen evaluates ESG factors as part of the investment analysis process and this forms an integral component of Aberdeen's quality rating for all companies. Aberdeen makes investments for the long-term, although it may sell a security when it perceives a company's business direction or growth prospects to have changed or the company's valuations are no longer attractive.

Should the Adviser determine that the Portfolio would benefit from reducing the percentage of its net assets invested in emerging market equities from 80% to a lesser amount, it will notify you at least 60 days prior to the change.

**Principal Risks**

The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

**Emerging Markets Risk.** The economic and political structures of developing countries in emerging markets, in most cases, do not compare favorably with the U.S. or other developed countries in terms of wealth and stability, and their financial markets often lack liquidity. Portfolio performance will likely be negatively affected by portfolio exposure to countries and corporations domiciled in or with revenue exposures to countries in the midst of, among other things, hyperinflation, currency devaluation, trade disagreements, sudden political upheaval, or interventionist government policies. Portfolio performance may also be negatively affected by portfolio exposure to countries and corporations domiciled in or with revenue exposures to countries with less developed legal, tax, regulatory, and accounting systems. Significant buying or selling actions by a few major investors may also heighten the volatility of emerging markets. These factors make investing in emerging market countries significantly riskier than in other countries, and events in any one country could cause the Portfolio's share price to decline.

**Foreign Securities Risk.** Foreign securities generally carry more risk and are more volatile than their domestic counterparts, in part because of potential for higher political and economic risks, lack of reliable information and fluctuations in currency exchange rates where investments are denominated in currencies other than the U.S. dollar. Certain events in foreign markets may adversely affect foreign and domestic issuers, including interruptions in the global supply chain, natural disasters and outbreak of infectious diseases. The Portfolio's investment in any country could be subject to governmental actions such as capital or currency controls, nationalizing a company or industry, expropriating assets, or imposing punitive taxes that would have an adverse effect on security prices, and impair the Portfolio's ability to repatriate capital or income. Foreign securities may also be more difficult to resell than comparable U.S. securities because the markets for foreign securities are often less liquid. Even when a foreign security increases in price in its local currency, the appreciation may be diluted by adverse changes in exchange rates when the security's value is converted to U.S. dollars. Foreign withholding taxes also may apply and errors and delays may occur in the settlement process for foreign securities.

**Equity Security Risk.** Equity securities held by the Portfolio may decline significantly in price, sometimes rapidly or unpredictably, over short or extended periods of time, and such declines may occur because of declines in the equity market as a whole, or because of declines in only a particular country, company, industry, or sector of the market. From time to time, the Portfolio may invest a significant portion of its assets in companies in one or more related sectors or industries which would make the Portfolio more vulnerable to adverse developments affecting such sectors or industries. Equity securities are generally more volatile than most debt securities.

**Market Risk.** Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio's investments may move with these cycles and, in some instances, increase or decrease.
more than the applicable market(s) as measured by the Portfolio's benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

**Financial Sector Risk.** To the extent that the financials sector continues to represent a significant portion of the Portfolio, the Portfolio will be sensitive to changes in, and its performance may depend to a greater extent on, factors impacting this sector. Performance of companies in the financials sector may be adversely impacted by many factors, including, among others, government regulations, economic conditions, credit rating downgrades, changes in interest rates, and decreased liquidity in credit markets. The impact of more stringent capital requirements, recent or future regulation of any individual financial company or recent or future regulation of the financials sector as a whole cannot be predicted. In recent years, cyber attacks and technology malfunctions and failures have become increasingly frequent in this sector and have caused significant losses.

**Foreign Currency Risk.** The value of a foreign currency may decline against the U.S. dollar, which would reduce the dollar value of securities denominated in that currency. The overall impact of such a decline of foreign currency can be significant, unpredictable, and long lasting, depending on the currencies represented, how each one appreciates or depreciates in relation to the U.S. dollar, and whether currency positions are hedged. Under normal conditions, the Portfolio does not engage in extensive foreign currency hedging programs. Further, exchange rate movements are volatile, and it is not possible to effectively hedge the currency risks of many developing countries.

**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer's securities and therefore the value of the Portfolio.

**Investment Adviser Risk.** The Portfolio is actively managed and the success of its investment strategy depends significantly on the skills of the Adviser or subadviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio's investment objective.

**Large Cap Risk.** Large-sized companies may be unable to respond quickly to new competitive challenges such as changes in technology. They may also not be able to attain the high growth rate of successful smaller companies, especially during extended periods of economic expansion.

**Mid Cap Risk.** Medium-sized companies often have greater price volatility, lower trading volume, and less liquidity than larger, more-established companies. These companies tend to have smaller revenues, narrower product lines, less management depth and experience, smaller shares of their product or service markets, fewer financial resources, and less competitive strength than larger companies.

**Small Cap Risk.** Smaller, less seasoned companies often have greater price volatility, lower trading volume, and less liquidity than larger, more established companies. These companies tend to have small revenues, narrower product lines, less management depth and experience, small shares of their product or service markets, fewer financial resources, and less competitive strength than larger companies. Such companies seldom pay significant dividends that could soften the impact of a falling market on returns.

**Preferred Securities Risk.** There are certain additional risks associated with investing in preferred securities, including, but not limited to, preferred securities may include provisions that permit the issuer, at its discretion, to defer or omit distributions for a stated period without any adverse consequences to the issuer; preferred securities are generally subordinated to bonds and other debt instruments in a company’s capital structure in terms of having priority to corporate income and liquidation payments, and therefore will be subject to greater credit risk than more senior debt instruments; preferred securities may be substantially less liquid than many other securities, such as common stocks or U.S. Government securities; generally, traditional preferred securities offer no voting rights with respect to the issuing company unless preferred dividends have been in arrears for a specified number of periods, at which time the preferred security holders may elect a number of directors to the issuer’s board; and in certain varying circumstances, an issuer of preferred securities may redeem the securities prior to a specified date.

**Convertible Securities Risk.** Convertible securities are subject to the usual risks associated with debt securities, such as interest rate risk and credit risk. Convertible securities also react to changes in the value of the common stock into which they convert, and are thus subject to market risk. The Portfolio may also be forced to convert a convertible security at an inopportune time, which may decrease the Portfolio’s return.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19
outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance from year to year and by showing how the Portfolio’s average annual returns for one-, five- and ten-year periods compared to a broad-based securities market index. The index description appears in the "Index Descriptions" section of the prospectus. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart includes the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assume that you sold your investment at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

**Portfolio Manager(s)**

Aberdeen uses a team-based approach, with the following team members being jointly and primarily responsible for day-to-day management. **Hugh Young**, Managing Director – Asia, has managed the Portfolio since April 2008. **Devan Kaloo**, Global Head of Equities/Head of Global Emerging Markets Equities, has managed the Portfolio since April 2008. **Joanne Irvine**, Deputy Head of Global Emerging Markets, has managed the Portfolio since April 2008. **Mark Gordon-James, CFA**, Investment Director, has managed the Portfolio since April 2008. **Flavia Cheong, CFA**, Head of Equities – Asia Pacific, has managed the Portfolio since April 2008.

### Tax Information

For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

### Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio’s complete prospectus, which contains more information about the Portfolio and its risks.

- **If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

- **If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio’s prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios’ annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios’ website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. You may elect to receive shareholder reports and other communications by enrolling at Thrivent.com/gopaperless.

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.
Investment Objectives

The investment objective of the Thrivent Partner Growth Stock Portfolio (the "Portfolio") is to achieve long-term growth of capital and, secondarily, increase dividend income.

Fees and Expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

**EXAMPLE** This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year, and that the Portfolio's operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

<table>

</thead>
<tbody>
<tr>
<td>Thrivent Partner Growth Stock Portfolio</td>
<td>$75</td>
<td>$233</td>
<td>$406</td>
<td>$906</td>
</tr>
</tbody>
</table>

Portfolio Turnover

The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio’s performance. During the most recent fiscal year, the Portfolio’s portfolio turnover rate was 29% of the average value of its portfolio.

Principal Strategies

The Portfolio’s principal strategy for achieving its investment objectives under normal circumstances is to invest at least 80% of net assets (plus the amount of any borrowing for investment purposes) in common stocks. Should the Adviser determine that the Portfolio would benefit from reducing the percentage of its assets invested in common stocks from 80% to a lesser amount, it will notify you at least 60 days prior to such a change.

The Portfolio concentrates its investments in growth companies. The Portfolio’s subadviser, T. Rowe Price Associates, Inc. (“T. Rowe Price”), seeks investments in companies that have the ability to pay increasing dividends through strong cash flow. The subadviser generally looks for companies with an above-average rate of earnings growth and a lucrative niche in the economy that gives them the ability to sustain earnings momentum even during times of slow economic growth. T. Rowe Price believes that when a company increases its earnings faster than both inflation and the overall economy, the market will eventually reward it with a higher stock price. The Portfolio may at times invest significantly in certain sectors, such as the information technology sector.

In pursuing the Portfolio’s investment objectives, T. Rowe Price has the discretion to purchase some securities that do not meet its normal investment criteria, as described above, when it believes such purchase will provide an opportunity for substantial appreciation. These situations might arise when T. Rowe Price believes a security could increase in value for a variety of reasons including a change in management, an extraordinary corporate event, a new product introduction or innovation, or a favorable competitive development.

While the Portfolio invests primarily (at least 80%) in common stocks, it may also invest in foreign stocks (up to 30% of total assets), and futures and options to obtain investment exposure or for hedging, in keeping with the Portfolio’s objectives.
The Portfolio may sell securities for a variety of reasons, such as to secure gains, limit losses, or reposition assets into more promising opportunities.

Principal Risks
The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objectives and you could lose money by investing in the Portfolio.

Growth Investing Risk. Growth style investing includes the risk of investing in securities whose prices historically have been more volatile than other securities, especially over the short term. Growth stock prices reflect projections of future earnings or revenues and, if a company’s earnings or revenues fall short of expectations, its stock price may fall dramatically.

Equity Security Risk. Equity securities held by the Portfolio may decline significantly in price, sometimes rapidly or unpredictably, over short or extended periods of time, and such declines may occur because of declines in the equity market as a whole, or because of declines in only a particular country, company, industry, or sector of the market. From time to time, the Portfolio may invest a significant portion of its assets in companies in one or more related sectors or industries which would make the Portfolio more vulnerable to adverse developments affecting such sectors or industries. Equity securities are generally more volatile than most debt securities.

Market Risk. Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio’s investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio’s benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

Technology-Oriented Companies Risk. Common stocks of companies that rely extensively on technology, science or communications in their product development or operations may be more volatile than the overall stock market and may or may not move in tandem with the overall stock market. Technology, science and communications are rapidly changing fields, and stocks of these companies, especially of smaller or unseasoned companies, may be subject to more abrupt or erratic market movements than the stock market in general. There are significant competitive pressures among technology-oriented companies and the products or operations of such companies may become obsolete quickly. In addition, these companies may have limited product lines, markets or financial resources and the management of such companies may be more dependent upon one or a few key people.

Issuer Risk. Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer’s securities and therefore the value of the Portfolio.

Investment Adviser Risk. The Portfolio is actively managed and the success of its investment strategy depends significantly on the skills of the Adviser or subadviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio’s investment objective.

Foreign Securities Risk. Foreign securities generally carry more risk and are more volatile than their domestic counterparts, in part because of potential for higher political and economic risks, lack of reliable information and fluctuations in currency exchange rates where investments are denominated in currencies other than the U.S. dollar. Certain events in foreign markets may adversely affect foreign and domestic issuers, including interruptions in the global supply chain, natural disasters and outbreak of infectious diseases. The Portfolio’s investment in any country could be subject to governmental actions such as capital or currency controls, nationalizing a company or industry, expropriating assets, or imposing punitive taxes that would have an adverse effect on security prices, and impair the Portfolio’s ability to repatriate capital or income. Foreign securities may also be more difficult to resell than comparable U.S. securities because the markets for foreign securities are often less liquid. Even when a foreign security increases in price in its local currency, the appreciation may be diluted by adverse changes in exchange rates when the security’s value is converted to U.S. dollars. Foreign withholding taxes also may apply and errors and delays may occur in the settlement process for foreign securities.

Derivatives Risk. The use of derivatives (such as futures and options) involves additional risks and transaction costs which could leave the Portfolio in a worse position than if it had not used these instruments. The Portfolio utilizes equity futures in order to increase or decrease its exposure to various asset classes at a lower cost than trading stocks directly. The use of derivatives can lead to losses because of adverse movements in the price or value of the underlying asset, index or rate, which may be magnified by certain features of the contract. Changes in the value of the derivative may not correlate as intended with the underlying asset, rate or index, and the Portfolio could lose much more than the original amount invested. Derivatives can be highly volatile, illiquid and difficult to value. Certain derivatives may also be subject to
counterparty risk, which is the risk that the other party in the transaction will not fulfill its contractual obligations due to its financial condition, market events, or other reasons.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance from year to year and by showing how the Portfolio’s average annual returns for one-, five-, and ten-year periods compared to broad-based securities market indices. The index descriptions appear in the “Index Descriptions” section of the prospectus. The Portfolio now compares its returns to the Russell 1000 Growth Index because it is commonly used by funds with the same investment objective and principal strategies as the Portfolio. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart and table include the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assume that you sold your investment at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

**Management**

**Investment Adviser(s)**

The Portfolio is managed by Thrivent Financial for Lutherans (“Thrivent Financial” or the “Adviser”), which has engaged T. Rowe Price Associates, Inc. (“T. Rowe Price”) to subadvise the Portfolio.

**Portfolio Manager(s)**

**Joseph B. Fath, CPA** is primarily responsible for the day-to-day management of the Portfolio. Mr. Fath has served as the portfolio manager of the Portfolio since April 2014. He currently serves as Chairman of the Portfolio’s Investment Advisory Committee. Mr. Fath joined T. Rowe Price in 2002. He joined as an equity research analyst and, since 2008, has assisted other T. Rowe Price portfolio managers in managing the Firm’s U.S. large-cap growth strategies.
Purchase and Sale of Shares

Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:

- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

Tax Information

For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio’s complete prospectus, which contains more information about the Portfolio and its risks.

- **If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

- **If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio’s prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios’ annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios’ website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. You may elect to receive shareholder reports and other communications by enrolling at Thrivent.com/gopaperless.

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.
Investment Objective
Thrivent Partner Healthcare Portfolio (the "Portfolio") seeks long-term capital growth.

Fees and Expenses
This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

⁴ The Adviser has contractually agreed, through at least April 30, 2021, to waive a portion of the management fees associated with the shares of the Thrivent Partner Healthcare Portfolio equal in the aggregate to 0.05% of the average daily net assets of the shares. This contractual provision, however, may be terminated before the indicated termination date upon the mutual agreement between the Independent Directors of the Portfolio and the Adviser.

EXAMPLE This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. In addition, the example for the 1 Year period reflects the effect of the contractual fee waiver and/or expense reimbursement. The example also assumes that your investment has a 5% return each year, and that the Portfolio’s operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

<td>Thrivent Partner Healthcare Portfolio</td>
<td>$90</td>
<td>$291</td>
<td>$510</td>
<td>$1,138</td>
</tr>
</tbody>
</table>

Portfolio Turnover
The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio’s performance. During the most recent fiscal year, the Portfolio’s portfolio turnover rate was 44% of the average value of its portfolio.

Principal Strategies
Under normal circumstances, the Portfolio will invest at least 80% of its net assets (plus the amount of any borrowing for investment purposes) in the securities of companies that are engaged in the development, production or distribution of pharmaceutical, generic, biotechnology and medical technology products or services (“healthcare companies”). Healthcare companies are those that derive at least 50% of their annual revenues from the production of such products and provision of such services or have at least 50% of their assets in such products or services. The Portfolio invests primarily in equity securities of both U.S. and non-U.S. companies (including American Depositary Receipts and issuers in emerging markets) and, as a non-diversified fund under the Investment Company Act of 1940 (the “1940 Act”), focuses its investments in the securities of a relatively few number of issuers. In addition, the Portfolio concentrates its investments in the securities of companies in the healthcare industry, some of which may be small- and medium-sized companies. Should the Adviser determine that the Portfolio would benefit from reducing the percentage of its assets invested in the securities of healthcare companies from 80% to a lesser amount, it will notify you at least 60 days prior to the change.

BlackRock Investment Management, LLC, the Portfolio’s subadviser, considers a variety of factors when choosing investments for the Portfolio, including (i) identifying companies and industries that appear to have the potential for above-average returns; and (ii) identifying companies that are expected to show above-average growth over the long-term, as well as those that appear
to be trading below their true worth. The Portfolio will generally sell a stock when, in the opinion of the subadviser, the stock reaches its price target or if there is deterioration in the company's fundamentals, a change in macroeconomic outlook, technical deterioration, valuation issues, a need to rebalance the Portfolio or a better opportunity elsewhere.

Principal Risks
The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

Healthcare Industry Risk. As a sector fund that invests primarily in the healthcare industry, the Portfolio is subject to the risk that the companies in that industry are likely to react similarly to legislative or regulatory changes, adverse market conditions and/or increased competition affecting their market segment. Due to the rapid pace of technological development, there is the risk that the products and services developed by these companies may become rapidly obsolete or have relatively short product cycles. There is also the risk that the products and services offered by these companies will not meet expectations or even reach the marketplace.

Non-Diversified Risk. The Portfolio is not "diversified" within the meaning of the 1940 Act. That means the Portfolio may invest a greater percentage of its assets in the securities of any single issuer compared to other funds. A non-diversified portfolio is generally more susceptible than a diversified portfolio to the risk that events or developments affecting a particular issuer or industry will significantly affect the Portfolio’s performance.

Market Risk. Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio's investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio's benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

Equity Security Risk. Equity securities held by the Portfolio may decline significantly in price, sometimes rapidly or unpredictably, over short or extended periods of time, and such declines may occur because of declines in the equity market as a whole, or because of declines in only a particular country, company, industry, or sector of the market. From time to time, the Portfolio may invest a significant portion of its assets in companies in one or more related sectors or industries which would make the Portfolio more vulnerable to adverse developments affecting such sectors or industries. Equity securities are generally more volatile than most debt securities.

Mid Cap Risk. Medium-sized companies often have greater price volatility, lower trading volume, and less liquidity than larger, more-established companies. These companies tend to have smaller revenues, narrower product lines, less management depth and experience, smaller shares of their product or service markets, fewer financial resources, and less competitive strength than larger companies.

Small Cap Risk. Smaller, less seasoned companies often have greater price volatility, lower trading volume, and less liquidity than larger, more established companies. These companies tend to have small revenues, narrower product lines, less management depth and experience, small shares of their product or service markets, fewer financial resources, and less competitive strength than larger companies. Such companies seldom pay significant dividends that could soften the impact of a falling market on returns.

Issuer Risk. Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer's securities and therefore the value of the Portfolio.

Investment Adviser Risk. The Portfolio is actively managed and the success of its investment strategy depends significantly on the skills of the Adviser or subadviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio's investment objective.

Foreign Securities Risk. Foreign securities generally carry more risk and are more volatile than their domestic counterparts, in part because of potential for higher political and economic risks, lack of reliable information and fluctuations in currency exchange rates where investments are denominated in currencies other than the U.S. dollar. Certain events in foreign markets may adversely affect foreign and domestic issuers, including interruptions in the global supply chain, natural disasters and outbreak of infectious diseases. The Portfolio's investment in any country could be subject to governmental actions such as capital or currency controls, nationalizing a company or industry, expropriating assets, or imposing punitive taxes that would have an adverse effect on security prices, and impair the Portfolio's ability to repatriate capital or income. Foreign securities may also be more difficult to resell than comparable U.S. securities because the markets for foreign securities are often less liquid. Even when a foreign security increases in price in its local currency, the appreciation may be diluted by adverse
changes in exchange rates when the security’s value is converted to U.S. dollars. Foreign withholding taxes also may apply and errors and delays may occur in the settlement process for foreign securities.

**Emerging Markets Risk.** The economic and political structures of developing countries in emerging markets, in most cases, do not compare favorably with the U.S. or other developed countries in terms of wealth and stability, and their financial markets often lack liquidity. Portfolio performance will likely be negatively affected by portfolio exposure to countries and corporations domiciled in or with revenue exposures to countries in the midst of, among other things, hyperinflation, currency devaluation, trade disagreements, sudden political upheaval, or interventionist government policies. Portfolio performance may also be negatively affected by portfolio exposure to countries and corporations domiciled in or with revenue exposures to countries with less developed legal, tax, regulatory, and accounting systems. Significant buying or selling actions by a few major investors may also heighten the volatility of emerging markets. These factors make investing in emerging market countries significantly riskier than in other countries, and events in any one country could cause the Portfolio’s share price to decline.

**Foreign Currency Risk.** The value of a foreign currency may decline against the U.S. dollar, which would reduce the dollar value of securities denominated in that currency. The overall impact of such a decline of foreign currency can be significant, unpredictable, and long lasting, depending on the currencies represented, how each one appreciates or depreciates in relation to the U.S. dollar, and whether currency positions are hedged. Under normal conditions, the Portfolio does not engage in extensive foreign currency hedging programs. Further, exchange rate movements are volatile, and it is not possible to effectively hedge the currency risks of many developing countries.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance from year to year and by showing how the Portfolio’s average annual returns for one-, five- and ten-year periods compared to a broad-based securities market index. The index description appears in the “Index Descriptions” section of the prospectus. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart includes the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assumes that you sold your investment at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

Management

Investment Adviser(s)
The Portfolio is managed by Thrivent Financial for Lutherans (“Thrivent Financial” or the “Adviser”), which has engaged BlackRock Investment Management, LLC (“BIM”) to subadvise the Portfolio.

Portfolio Manager(s)
Erin Xie, Managing Director of BlackRock, Inc. (“BlackRock”), is primarily responsible for the day-to-day management of the Portfolio. Dr. Xie has served as the portfolio manager of the Portfolio since September 2017. Dr. Xie has been a Managing Director of BlackRock since 2006 and joined BlackRock as a Director in 2005. Prior to joining BlackRock, Dr. Xie was a Senior Vice President of State Street Research & Management from 2001 to 2005.

Purchase and Sale of Shares
Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:

- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

Tax Information
For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

Payments to Broker-Dealers and Other Financial Intermediaries
If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio’s complete prospectus, which contains more information about the Portfolio and its risks.

**If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:**
You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com.

**If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:**
You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio’s prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios’ annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios’ website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. You may elect to receive shareholder reports and other communications by enrolling at Thrivent.com/gopaperless.

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.
Thrivent Real Estate Securities Portfolio

Investment Objective
The Thrivent Real Estate Securities Portfolio (the "Portfolio") seeks to provide long-term capital appreciation and high current income.

Fees and Expenses
This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

</table>

Principal Strategies
In seeking to achieve its investment objective, the Portfolio focuses on income-producing common stocks and other equity securities of U.S. real estate companies. Under normal circumstances, the Portfolio invests at least 80% of its net assets (plus any borrowings for investment purposes) in companies that are primarily engaged in the real estate industry. This includes companies such as real estate investment trusts (REITs) and other real estate related investments. A real estate company generally derives at least 50% of its revenue from real estate ownership, leasing, management, development, financing or sale of residential, commercial or industrial real estate—or has at least 50% of its assets in real estate. Should the Adviser determine that the Portfolio would benefit from reducing the percentage of assets invested in companies that are primarily engaged in the real estate industry from 80% to a lesser amount, it will notify you at least 60 days prior to such a change.

This Portfolio may invest up to 20% of its assets in equity and fixed income securities of companies which are not principally engaged in the real estate industry or which are not income producing equity securities of companies principally engaged in the U.S. real estate industry.

Principal Risks
The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

Real Estate Investment Trust (“REIT”) Risk. REITs generally can be divided into three types: equity REITs, mortgage REITs, and hybrid REITs (which combine the characteristics of equity REITs and mortgage REITs). Equity REITs will be affected by changes in the values of, and income from, the properties they own, while mortgage REITs may be affected by the credit quality of the mortgage loans they hold. All REIT types may be
affected by changes in interest rates. The effect of rising interest rates is generally more pronounced for high dividend paying stock than for stocks that pay little or no dividends. This may cause the value of real estate securities to decline during periods of rising interest rates, which would reduce the overall return of the Portfolio. REITs are subject to additional risks, including the fact that they are dependent on specialized management skills that may affect the REITs’ abilities to generate cash flows for operating purposes and for making investor distributions. REITs may have limited diversification and are subject to the risks associated with obtaining financing for real property. As with any investment, there is a risk that REIT securities and other real estate industry investments may be overvalued at the time of purchase. In addition, a REIT can pass its income through to its investors without any tax at the entity level if it complies with various requirements under the Internal Revenue Code. There is the risk, however, that a REIT held by the Portfolio will fail to qualify for this tax-free pass-through treatment of its income. By investing in REITs indirectly through the Portfolio, in addition to bearing a proportionate share of the expenses of the Portfolio, you will also indirectly bear similar expenses of the REITs in which the Portfolio invests.

**Real Estate Industry Risk.** To the extent the Portfolio allocates assets to companies in the real estate business, the Portfolio is subject to real estate industry risk. Declines in real estate values, changes in interest rates or economic downturns can have a significant negative effect on companies in the real estate industry. Other adverse changes could include, but are not limited to, extended vacancies of properties, increased competition, overbuilding and changes in zoning law and government regulations.

**Market Risk.** Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio’s investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio’s benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

**Equity Security Risk.** Equity securities held by the Portfolio may decline significantly in price, sometimes rapidly or unpredictably, over short or extended periods of time, and such declines may occur because of declines in the equity market as a whole, or because of declines in only a particular country, company, industry, or sector of the market. From time to time, the Portfolio may invest a significant portion of its assets in companies in one or more related sectors or industries which would make the Portfolio more vulnerable to adverse developments affecting such sectors or industries. Equity securities are generally more volatile than most debt securities.

**Investment Adviser Risk.** The Portfolio is actively managed and the success of its investment strategy depends significantly on the skills of the Adviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio’s investment objective.

**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer’s securities and therefore the value of the Portfolio.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance from year to year and by showing how the Portfolio’s average annual returns for one-, five-, and ten-year periods compared to broad-based securities market indices. The index descriptions appear in the "Index Descriptions" section of the prospectus. The Portfolio now compares its returns to the FTSE Nareit All Equity REITs Index because it is commonly used by funds with the same investment objective and principal strategies as the Portfolio. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart includes the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assumes that you sold your investment at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.
How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

**Management**

**Investment Adviser(s)**

The Portfolio is managed by Thrivent Financial for Lutherans (“Thrivent Financial” or the “Adviser”).

**Portfolio Manager(s)**

Reginald L. Pfeifer, CFA is primarily responsible for the day-to-day management of the Portfolio. Mr. Pfeifer has served as portfolio manager of the Portfolio since its inception in April 2003. Mr. Pfeifer has been with Thrivent Financial since 1990 and has served as an equity portfolio manager since 2003.

**Purchase and Sale of Shares**

Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:

- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

**Tax Information**

For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

**Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio’s complete prospectus, which contains more information about the Portfolio and its risks.

• If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

• If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio’s prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios’ annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios’ website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. You may elect to receive shareholder reports and other communications by enrolling at Thrivent.com/gopaperless.

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.
Investment Objective

Thrivent Small Cap Growth Portfolio (the "Portfolio") seeks long-term capital growth. The Portfolio's investment objective may be changed without shareholder approval.

Fees and Expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

</tbody>
</table>

¹ The Adviser has contractually agreed, through at least April 30, 2021, to waive a portion of the management fees associated with the shares of the Thrivent Small Cap Growth Portfolio in order to limit the Total Annual Portfolio Operating Expenses After Fee Waivers and/or Expense Reimbursements to an annual rate of 0.94% of the average daily net assets of the shares. This contractual provision, however, may be terminated before the indicated termination date upon the mutual agreement between the Independent Directors of the Portfolio and the Adviser.

EXAMPLE This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. In addition, the example for the 1 Year period reflects the effect of the contractual fee waiver and/or expense reimbursement. The example also assumes that your investment has a 5% return each year, and that the Portfolio's operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

</tbody>
</table>

Portfolio Turnover

The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio's performance. During the most recent fiscal year, the Portfolio's portfolio turnover rate was 51% of the average value of its portfolio.

Principal Strategies

Under normal circumstances, the Portfolio invests at least 80% of its net assets (plus the amount of any borrowing for investment purposes) in equity securities of small companies. The Adviser focuses mainly in the equity securities of smaller U.S. companies which have market capitalizations equivalent to those companies included in widely known indices such as the Russell 2000 Growth Index, S&P SmallCap 600 Index, or the small company market capitalization classification published by Lipper, Inc. These companies typically have a market capitalization of less than $6 billion. Should the Adviser change the investments used for purposes of this 80% threshold, you will be notified at least 60 days prior to the change.

The Portfolio seeks to achieve its investment objective by investing primarily in common stocks. The Adviser uses fundamental, quantitative, and technical investment research techniques and focuses on stocks of companies that it believes have demonstrated and believes will sustain above-average revenue and earnings growth over time, or which are expected to develop rapid sales and earnings growth in the future when compared to the economy and stock market as a whole. Many such companies are in the technology sector and the Portfolio may at times have a higher concentration in this industry.
The Adviser may sell securities for a variety of reasons, such as to secure gains, limit losses, or reposition assets to more promising opportunities.

**Principal Risks**

The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

**Small Cap Risk.** Smaller, less seasoned companies often have greater price volatility, lower trading volume, and less liquidity than larger, more established companies. These companies tend to have small revenues, narrower product lines, less management depth and experience, small shares of their product or service markets, fewer financial resources, and less competitive strength than larger companies. Such companies seldom pay significant dividends that could soften the impact of a falling market on returns.

**Growth Investing Risk.** Growth style investing includes the risk of investing in securities whose prices historically have been more volatile than other securities, especially over the short term. Growth stock prices reflect projections of future earnings or revenues and, if a company’s earnings or revenues fall short of expectations, its stock price may fall dramatically.

**Equity Security Risk.** Equity securities held by the Portfolio may decline significantly in price, sometimes rapidly or unpredictably, over short or extended periods of time, and such declines may occur because of declines in the equity market as a whole, or because of declines in only a particular country, company, industry, or sector of the market. From time to time, the Portfolio may invest in a significant portion of its assets in companies in one or more related sectors or industries which would make the Portfolio more vulnerable to adverse developments affecting such sectors or industries. Equity securities are generally more volatile than most debt securities.

**Market Risk.** Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio’s investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio’s benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

**Technology-Oriented Companies Risk.** Common stocks of companies that rely extensively on technology, science or communications in their product development or operations may be more volatile than the overall stock market and may or may not move in tandem with the overall stock market. Technology, science and communications are rapidly changing fields, and stocks of these companies, especially of smaller or unseasoned companies, may be subject to more abrupt or erratic market movements than the stock market in general. There are significant competitive pressures among technology-oriented companies and the products or operations of such companies may become obsolete quickly. In addition, these companies may have limited product lines, markets or financial resources and the management of such companies may be more dependent upon one or a few key people.

**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer’s securities and therefore the value of the Portfolio.

**Investment Adviser Risk.** The Portfolio is actively managed and the success of its investment strategy depends significantly on the skills of the Adviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio’s investment objective.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance from year to year and by showing how the Portfolio’s average annual returns for the one-year period and since inception compared to broad-based securities market indices. The index descriptions appear in the “Index Descriptions” section of the prospectus. The Portfolio now compares its returns to the Russell 2000 Growth Index because it is commonly used by funds with the same investment objective and principal strategies as the Portfolio. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart and table include the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assume that you sold your
investment at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

</tbody>
</table>

Portfolio Turnover

The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio’s performance. During the most recent fiscal year, the Portfolio’s portfolio turnover rate was 30% of the average value of its portfolio.

Principal Strategies

Under normal circumstances, the Portfolio invests substantially all of its assets (more than 80% of its net assets, plus the amount of any borrowings for investment purposes) in small company common stocks included in the S&P SmallCap 600 Index in the proportions in which they are represented in the Index. This is a passively managed Portfolio, which means that the Adviser does not choose the securities that make up the Portfolio. The S&P SmallCap 600 Index is a capitalization-weighted index comprised of 600 domestic small capitalization stocks chosen for market size, liquidity, and industry representation. Accordingly, the Portfolio invests in stocks of smaller companies from a broad range of industries. The S&P SmallCap 600 Index is adjusted quarterly, and when changes to the index occur, the Adviser will attempt to replicate these changes within the Portfolio. However, any such changes may result in slight variations from time to time. The Portfolio may buy and sell equity index futures for investment exposure. For liquidity reasons, the Portfolio may invest to some degree in money market instruments.

Principal Risks

The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

Small Cap Risk. Smaller, less seasoned companies often have greater price volatility, lower trading volume, and less liquidity than larger, more established companies. These companies tend to have small revenues, narrower product lines, less management depth and experience, small shares of their product or service markets, fewer financial resources, and less competitive strength than larger companies. Such companies seldom pay significant dividends that could soften the impact of a falling market on returns.
**Market Risk.** Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio's investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio's benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

**Equity Security Risk.** Equity securities held by the Portfolio may decline significantly in price, sometimes rapidly or unpredictably, over short or extended periods of time, and such declines may occur because of declines in the equity market as a whole, or because of declines in only a particular country, company, industry, or sector of the market. From time to time, the Portfolio may invest a significant portion of its assets in companies in one or more related sectors or industries which would make the Portfolio more vulnerable to adverse developments affecting such sectors or industries. Equity securities are generally more volatile than most debt securities.

**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer's securities and therefore the value of the Portfolio.

**Futures Contract Risk.** The value of a futures contract tends to increase and decrease in tandem with the value of the underlying instrument. The price of futures can be highly volatile; using them could lower the value of the Portfolio. The price of a futures contract tends to increase and decrease in tandem with the value of the underlying instrument. In addition, the value of the futures contract may not accurately track the value of the underlying instrument.

**Indexing Strategy/Index Tracking Risk.** The Portfolio is managed with an indexing investment strategy, attempting to track the performance of an unmanaged index of securities, regardless of the current or projected performance of the Index or of the actual securities comprising the Index. The structure and composition of the Index will affect the performance, volatility, and risk of the Index and, consequently, the performance, volatility, and risk of the Portfolio. While the Adviser seeks to track the performance of the Index (i.e., achieve a high degree of correlation with the Index), the Portfolio’s return may not match the return of the Index. The Portfolio incurs a number of operating expenses not applicable to the Index, and incurs costs in buying and selling securities. In addition, the Portfolio may not be fully invested at times, generally as a result of cash flows into or out of the Portfolio or reserves of cash held by the Portfolio to meet redemptions. The Adviser may attempt to replicate the Index return by investing in fewer than all of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Portfolio's return and that of the Index.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio's performance from year to year and by showing how the Portfolio's average annual returns for one-, five- and ten-year periods compared to a broad-based securities market index. The index description appears in the "Index Descriptions" section of the prospectus. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart and table include the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assume that you sold your investment at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio's performance over time.

TSF-157
Management

Investment Adviser(s)
The Portfolio is managed by Thrivent Financial for Lutherans (“Thrivent Financial” or the “Adviser”).

Portfolio Manager(s)

Brian W. Bomgren, CQF and Sharon Wang, CFA, FRM are jointly and primarily responsible for the day-to-day management of the Portfolio. Mr. Bomgren and Ms. Wang have served as portfolio managers of the Portfolio since January 2018. Mr. Bomgren has been with Thrivent Financial since 2006 and is currently a Senior Portfolio Manager. Ms. Wang has been with Thrivent Financial since 2017 and is currently a Senior Portfolio Manager. Prior to joining Thrivent Financial, Ms. Wang worked at Bryn Mawr Capital Management as a portfolio manager from 2009 to 2016.

Purchase and Sale of Shares
Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:
- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

Tax Information
For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

Payments to Broker-Dealers and Other Financial Intermediaries
If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
This Summary Prospectus is designed to provide investors with key information about the Portfolio in a clear and concise format. Before you invest, you may want to review the Portfolio’s complete prospectus, which contains more information about the Portfolio and its risks.

- **If you purchased shares of Thrivent Variable Portfolios through Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information at no cost by calling 800-847-4839 or by sending an email request to mail@thrivent.com

- **If you purchased shares of Thrivent Variable Portfolios from a firm other than Thrivent Financial:**
  You can find the Portfolio’s prospectus, reports to shareholders, and other information about the Portfolio online at ThriventPortfolios.com. You can also get this information by calling or emailing your financial advisor.

The Portfolio’s prospectus and statement of additional information, both dated April 30, 2020, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Shares of the Portfolio are sold only to insurance company separate accounts or to other investment companies funded by insurance company separate accounts. This Summary Prospectus is not intended for use by other investors.

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Portfolios’ annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Portfolios’ website (ThriventPortfolios.com), and you will be notified by mail each time a report is posted and provided with a website address to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you do not need to take any action. You may elect to receive shareholder reports and other communications by enrolling at Thrivent.com/gopaperless.

You may elect to receive all future shareholder reports in paper free of charge. You can call 800-847-4836 to let us know you wish to continue receiving paper copies of your shareholder reports. Your election to receive shareholder reports in paper will apply to all Portfolios held in your insurance company separate account.
Thrivent Small Cap Stock Portfolio

Investment Objective
The Thrivent Small Cap Stock Portfolio (the "Portfolio") seeks long-term capital growth.

Fees and Expenses
This table describes the fees and expenses that you may pay if you buy and hold shares of the Portfolio. If you own a variable annuity contract or variable life insurance contract, you will have additional expenses including mortality and expense risk charges. Please refer to the prospectus for your variable contract for additional information about charges for those contracts.

<table>
<thead>
<tr>
<th>SHAREHOLDER FEES (fees paid directly from your investment)</th>

EXAMPLE This example is intended to help you compare the cost of investing in the Portfolio with the cost of investing in other mutual funds. The Portfolio is an investment option for variable contracts, and the example does not include charges imposed by variable contracts. If variable contract charges were imposed, your expenses would be higher than those shown. The example assumes that you invest $10,000 in the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year, and that the Portfolio’s operating expenses remain the same. Although your actual cost may be higher or lower, based on the foregoing assumptions, your cost would be:

<table>
<thead>
<tr>
<th>1 Year</th>
<th>3 Years</th>
<th>5 Years</th>
<th>10 Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>$75</td>
<td>$233</td>
<td>$406</td>
<td>$906</td>
</tr>
</tbody>
</table>

Portfolio Turnover
The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Portfolio’s performance. During the most recent fiscal year, the Portfolio’s portfolio turnover rate was 53% of the average value of its portfolio.

Principal Strategies
Under normal circumstances, the Portfolio invests at least 80% of its net assets (plus the amount of any borrowing for investment purposes) in equity securities of small companies. The Adviser focuses mainly in the equity securities of smaller U.S. companies which have market capitalizations equivalent to those companies included in widely known indices such as the Russell 2000 Index, S&P SmallCap 600 Index, or the small company market capitalization classifications published by Lipper, Inc. These companies typically have a market capitalization of less than $6 billion. Should the Adviser change the investments used for purposes of this 80% threshold, you will be notified at least 60 days prior to the change.

The Portfolio seeks to achieve its investment objective by investing primarily in common stocks. The Adviser uses fundamental, quantitative, and technical investment research techniques to determine what securities to buy and sell. Fundamental techniques assess a security’s value based on an issuer’s financial profile, management, and business prospects while quantitative and technical techniques involve a more data-oriented analysis of financial information, market trends and price movements. The Adviser looks for small companies that, in its opinion:

- have an improving fundamental outlook;
- have capable management; and
- are financially sound.

The Adviser may sell securities for a variety of reasons, such as to secure gains, limit losses, or reposition assets to more promising opportunities.

Principal Risks
The Portfolio is subject to the following principal investment risks, which you should review carefully and in entirety. The Portfolio may not achieve its investment objective and you could lose money by investing in the Portfolio.

Small Cap Risk. Smaller, less seasoned companies often have greater price volatility, lower trading volume, and less liquidity than larger, more established companies. These companies tend to have small
revenues, narrower product lines, less management depth and experience, small shares of their product or service markets, fewer financial resources, and less competitive strength than larger companies. Such companies seldom pay significant dividends that could soften the impact of a falling market on returns.

**Equity Security Risk.** Equity securities held by the Portfolio may decline significantly in price, sometimes rapidly or unpredictably, over short or extended periods of time, and such declines may occur because of declines in the equity market as a whole, or because of declines in only a particular country, company, industry, or sector of the market. From time to time, the Portfolio may invest a significant portion of its assets in companies in one or more related sectors or industries which would make the Portfolio more vulnerable to adverse developments affecting such sectors or industries. Equity securities are generally more volatile than most debt securities.

**Market Risk.** Over time, securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of the Portfolio’s investments may move with these cycles and, in some instances, increase or decrease more than the applicable market(s) as measured by the Portfolio’s benchmark index(es). The securities markets may also decline because of factors that affect a particular industry or due to impacts from the spread of infectious illness, public health threats or similar issues.

**Issuer Risk.** Issuer risk is the possibility that factors specific to an issuer to which the Portfolio is exposed will affect the market prices of the issuer’s securities and therefore the value of the Portfolio.

**Investment Adviser Risk.** The Portfolio is actively managed and the success of its investment strategy depends significantly on the skills of the Adviser in assessing the potential of the investments in which the Portfolio invests. This assessment of investments may prove incorrect, resulting in losses or poor performance, even in rising markets. There is also no guarantee that the Adviser will be able to effectively implement the Portfolio’s investment objective.

**Health Crisis Risk.** The global pandemic outbreak of the novel coronavirus known as COVID-19 has resulted in substantial market volatility and global business disruption. The duration and full effects of the outbreak are uncertain and may result in trading suspensions and market closures, limit liquidity and the ability of the Portfolio to process shareholder redemptions, and negatively impact Portfolio performance. The COVID-19 outbreak and future pandemics could affect the global economy in ways that cannot be foreseen and may exacerbate other types of risks, negatively impacting the value of the Portfolio.

**Performance**

The following bar chart and table provide an indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance from year to year and by showing how the Portfolio’s average annual returns for one-, five- and ten-year periods compared to broad-based securities market indices. The index descriptions appear in the “Index Descriptions” section of the prospectus. The Portfolio now compares its returns to the Russell 2000 Index because it is commonly used by funds with the same investment objective and principal strategies as the Portfolio. Call 800-847-4836 or visit Thrivent.com for performance results current to the most recent month-end.

The bar chart and table include the effects of Portfolio expenses, but not charges or deductions against your variable contract, and assume that you sold your investment at the end of the period. Because shares of the Portfolio are offered through variable life insurance and variable annuity contracts, you should carefully review the variable contract prospectus for information on applicable charges and expenses. If the charges and deductions against your variable contract were included, returns would be lower than those shown.

How a Portfolio has performed in the past is not necessarily an indication of how it will perform in the future. Performance information provides some indication of the risks of investing in the Portfolio by showing changes in the Portfolio’s performance over time.

### Management

**Investment Adviser(s)**

The Portfolio is managed by Thrivent Financial for Lutherans (“Thrivent Financial” or the “Adviser”).

**Portfolio Manager(s)**

Matthew D. Finn, CFA and James M. Tinucci, CFA are jointly and primarily responsible for the day-to-day management of the Portfolio. Mr. Finn has served as lead portfolio manager for the Portfolio since April 2013. Mr. Tinucci has served as the associate portfolio manager of the Portfolio since March 2015. Mr. Finn has been a portfolio manager at Thrivent Financial since 2004, when he joined Thrivent Financial. Mr. Tinucci has been with Thrivent Financial since 2014.

### Purchase and Sale of Shares

Shares of each series of Thrivent Series Fund, Inc. (the “Fund”) may be sold, without any minimum initial or subsequent investment requirements, only to:

- Separate accounts of Thrivent Financial;
- Separate accounts of other insurance companies not affiliated with Thrivent Financial; and
- Other Portfolios of the Fund.

### Tax Information

For information about certain tax-related aspects of investing in the Portfolio through a variable contract, please see the variable product prospectus.

### Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Portfolio through a broker-dealer or other financial intermediary (such as an insurance company), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
Important notice regarding delivery of documents!

In response to concerns regarding multiple mailings, we send one copy of an annual and semiannual report and one copy of a prospectus to each household. This process is known as householding. This consolidation helps reduce printing and postage costs, thereby saving money. If you wish to receive additional copies, call us toll-free at 800-847-4836.

If you wish to revoke householding in the future, you may write to us at 4321 N. Ballard Rd., Appleton, WI 54919-0001, or call us at 800-847-4836. We will begin to mail separate regulatory mailings within 30 days of receiving your request.

No Need for Paper?

Go paperless and start accessing prospectuses, reports and other documents online. An email is sent to you when new documents are available.

Paperless delivery options:

- Prospectuses, annual and semiannual reports.
- Most billing and contribution notices.
- Most contract and account statements.
- Activity confirmation statements.
- Tax forms (life, health and annuity contract tax forms).
- Annual privacy notice.
- Thrivent magazine.

Go to Thrivent.com/gopaperless to learn more.

No person has been given the authority to give any information or to make any representations other than those contained in these prospectuses. If given or made, such information or representations must not be relied upon as having been authorized. These prospectuses do not constitute an offer to any person in a state where it is unlawful to make such an offer.

The variable life insurance contract described herein was issued by Thrivent, the marketing name for Thrivent Financial for Lutherans, 4321 N. Ballard Rd., Appleton, WI 54919, and distributed by Thrivent Investment Management Inc., 625 Fourth Ave. S., Minneapolis, MN 55415, a subsidiary of Thrivent Financial for Lutherans.
