

December 31, 2018

Portfolio Inception Date 10/31/2002
Total Portfolio Assets \$96.9 million

Portfolio Description

The Thrivent Partner All Cap Portfolio is managed by FIAM, LLC and invests across the broad U.S. stock market. The portfolio may hold investments in small, medium and large companies across the growth, value and core investment styles.

Investment Strategy/Process

The Portfolio is not constrained by any particular investment style. In buying and selling securities, the portfolio management team uses a disciplined approach that involves computer-aided, quantitative analysis supported by fundamental research and analysis. The computer model systematically reviews thousands of stocks based on data such as historical earnings, dividend yield, earnings per share and other quantitative factors. The model is used to help identify stocks that may warrant more in-depth analysis, based on fundamental factors such as the company's earnings estimates, growth potential, and financial condition.

Calendar Year Performance (%)

Trailing Returns — Average Annual (%)

	3 Month	YTD	1 Year	3 Year	5 Year	10 Year	Since Incept.
Subaccount	-16.07	-10.16	-10.16	4.34	5.32	10.72	8.13
Subaccount (w/addl fees)	-20.51	-15.61	-15.61	1.53	3.24	9.44	7.10
S&P Composite 1500® Index	-13.97	-4.96	-4.96	9.17	8.25	13.20	N/A
Lipper Multi-Cap Core Funds Median ¹	-14.27	-7.16	-7.16	6.95	6.15	12.43	N/A

All data represents past performance of this subaccount in Thrivent Financial Variable Universal Life Insurance II (contract V-VQ-VUL (07) and ICC07V-VM-VUL) and should not be viewed as an indication of future results. Total investment returns and principal value of an investment will fluctuate and units, when redeemed, may be worth more or less than the original investment. Current performance may be lower or higher than the performance data quoted. Market volatility can significantly affect short-term performance, and more recent returns may be different from those shown. Call 800-847-4836 or visit Thrivent.com for most recent month-end performance results.

Periods less than one year are not annualized. Trailing return calculations are based on the fees associated with an initial investment of \$10,000. At various times, the investment adviser may have waived and/or reimbursed Portfolio expenses. Had the investment adviser not done so, the total returns would have been lower. "Since Inception" trailing returns are calculated from the date the Subaccount was made available through the separate account used with this contract.

Trailing Returns reflect the deduction of investment advisory fees and operating expenses (reduced by any applicable waivers) associated with the Subaccount, as well as the current mortality and expense charge of 0.30%. "Subaccount w/addl fees" data reflects additional deductions of the policy fee and the 5% premium expense charge. The following charges are not reflected in the Subaccount's trailing returns and vary by contract: percent of asset charge, monthly administrative charge, cost of insurance charge, and rider or additional benefits charges. If these charges had been deducted, the performance quoted would have been significantly lower.

Since charges and fees vary from individual to individual at the contract level based on several factors, including the amount of the death benefit, the contract value, the insured's attained age, sex and risk classification, it is not possible to include them in this report. You are encouraged to contact your Thrivent Financial representative for a personalized illustration to determine what additional charges and fees you may incur. You can also review the hypothetical illustrations in the prospectus to see the effects of fees and charges on performance.

¹Source: Lipper. The Lipper median represents the median annualized total return for all reported portfolios in the classification. Lipper medians do not include sales charge/fees. If included, returns would have been lower.

Investment Objective

Thrivent Partner All Cap Portfolio seeks long-term growth of capital.

Who Should Consider Investing?

The Portfolio may be suitable for investors who:

- Seek long-term growth.
- Have a long-term investment time horizon and a moderately-aggressive risk tolerance.
- Are able to withstand a moderately-high level of risk and volatility in pursuit of moderately-high long-term returns.

Benchmark(s)

Indexes are unmanaged and do not reflect the fees and expenses associated with active management. Investments cannot be made directly into an index.

- **S&P Composite 1500® Index** measures performance of a group of 1500 publicly-traded stocks.

Portfolio Management & Experience

FIAM, LLC

(an affiliate of Fidelity Investments)

Portfolio Start: 2001

Risks: The Portfolio primarily invests in common stocks. The value of the Portfolio is influenced by factors impacting the overall market, certain asset classes, certain investment styles, and specific issuers. The Portfolio may incur losses due to investments that do not perform as anticipated by the investment adviser. Small- and medium-sized companies often have greater price volatility and less liquidity than larger companies. Large-cap companies may be unable to respond quickly to new competitive challenges and may not be able to attain a high growth rate.

PORTFOLIO STATISTICS

Statistics shown below are compared to the S&P 500® Index. The benchmark is intended to provide a comparison to the broad U.S. large cap stock market, and may not be representative of the Portfolio's investment strategies and holdings.

Holdings Information

Number of Holdings	87
Turnover Ratio (last 12-months) ²	53%

Risk/Volatility Measures

Beta (3-year vs. S&P 500®): A measure of the volatility, or market risk, of an investment compared to the broad U.S. large-cap stock market.

Standard Deviation: A statistical measure of volatility. The higher the standard deviation, the riskier an investment is considered to be.

	Portfolio	S&P 500® Index ³
3 Year	12.33%	10.95%
5 Year	11.78%	10.95%
10 Year	14.67%	13.61%

Equity Characteristics

Market-Capitalization: A measure of the size of the companies held in the portfolio, calculated by multiplying a company's total outstanding shares by the stock price.

	Portfolio	S&P 500® Index ⁴
Avg Mkt Cap	\$78.7 B	\$45.7 B
Wtd Median Mkt Cap	\$36.2 B	\$99.1 B

Price to Earnings (P/E) Ratio: A valuation ratio calculated by dividing the share price of each stock held in the portfolio by its trailing 12-month earnings per share.

	Portfolio	S&P 500® Index ⁵
P/E Ratio	18.8	16.4

Return on Equity (ROE): A measure of corporate profitability that shows how much net income the companies in the portfolio have generated as a percentage of shareholder equity.

	Portfolio	S&P 500® Index ⁵
ROE	16.8%	20.1%
