

## June 30, 2019

**Portfolio Inception Date** 5/15/1998  
**Total Portfolio Assets** \$183.4 million

### Portfolio Description

Thrivent Government Bond Portfolio invests primarily in U.S. government bonds, which may include debt instruments issued or guaranteed by the U.S. government and its agencies or instrumentalities. This includes U.S. Treasuries, Treasury Inflation Protected Securities (TIPS), U.S. Government Agency debt, and mortgage-backed securities that are issued or guaranteed by the Government National Mortgage Association (GNMA), the Federal National Mortgage Association (FNMA) or the Federal Home Loan Mortgage Corporation (FHLMC). The Portfolio may hold securities of any maturity, but under normal market conditions, the Portfolio's duration will be targeted to approximately five years. Government bonds have a low correlation to equities and may outperform stocks and corporate bonds when the market is declining and investors tend to become more risk averse. As a result, an allocation to government bonds may help diversify an investor's overall portfolio. The Portfolio may also utilize derivatives for investment exposure or hedging purposes.

### Investment Strategy/Process

The portfolio management team uses fundamental, quantitative and technical investment research techniques to determine which debt obligations to buy and sell. The portfolio manager is responsible for portfolio construction and risk management, and uses duration and yield curve management strategies in an effort to increase total return potential and manage risk. On August 28, 2017, the Portfolio adopted its current name and investment strategy. Prior to that date, it was named Thrivent Bond Index Portfolio and was managed to perform similarly to the Bloomberg Barclays U.S. Aggregate Bond Index.

### Calendar Year Performance (%)

### Average Annualized Returns (%)

Periods less than one year are not annualized.

	3 Month	YTD	1 Year	3 Year	5 Year	10 Year	Since Incept.
Subaccount	2.33	4.47	5.72	1.14	2.16	3.93	4.26
Subaccount (w/addl fees)	-3.06	-1.31	-0.69	-1.74	0.00	2.44	3.22
BBgBarc U.S. Agency Index	2.32	4.17	6.13	1.89	2.26	2.51	N/A
BBgBarc U.S. Treasury Index	3.01	5.18	7.24	1.34	2.49	3.05	N/A
Lipper Intermediate U.S. Government Funds Median <sup>1</sup>	2.45	4.46	6.15	1.34	1.89	2.80	N/A

**All data represents past performance of this subaccount in Thrivent Financial Variable Universal Life Insurance II (contract V-VQ-VUL (07) and ICC07V-VM-VUL) and should not be viewed as an indication of future results. Total investment returns and principal value of an investment will fluctuate and units, when redeemed, may be worth more or less than the original investment. Current performance may be lower or higher than the performance data quoted. Market volatility can significantly affect short-term performance, and more recent returns may be different from those shown. Call 800-847-4836 or visit Thrivent.com for most recent month-end performance results.**

Average annualized return calculations are based on the fees associated with an initial investment of \$10,000. At various times, the investment adviser may have waived and/or reimbursed Portfolio expenses. Had the investment adviser not done so, the performance data shown would have been lower. "Since Inception" returns are calculated from the date the Subaccount was made available through the separate account used with this contract.

**Average annualized return reflect the deduction of investment advisory fees and operating expenses (reduced by any applicable waivers) associated with the Subaccount, as well as the current mortality and expense charge of 0.30%. "Subaccount w/addl fees" data reflects additional deductions of the policy fee and the 5% premium expense charge. The following charges are not reflected in the Subaccount's trailing returns and vary by contract: percent of asset charge, monthly administrative charge, cost of insurance charge, and rider or additional benefits charges. If these charges had been deducted, the performance quoted would have been significantly lower.**

Since charges and fees vary from individual to individual at the contract level based on several factors, including the amount of the death benefit, the contract value, the insured's attained age, sex and risk classification, it is not possible to include them in this report. You are encouraged to contact your Thrivent Financial representative for a personalized illustration to determine what additional charges and fees you may incur. You can also review the hypothetical illustrations in the prospectus to see the effects of fees and charges on performance.

<sup>1</sup>Source: Lipper. The Lipper median represents the median annualized total return for all reported portfolios in the classification. Lipper medians do not include sales charge/fees. If included, returns would have been lower.

### Investment Objective

Thrivent Government Bond Portfolio seeks total return, consistent with preservation of capital.

### Who Should Consider Investing?

The Portfolio may be suitable for investors who:

- Seek income and a total return, consistent with preservation of capital.
- Have a medium- to long-term investment time horizon and a moderately-conservative risk tolerance.
- Are able to withstand a low to moderate level of risk and volatility in pursuit of commensurate long-term returns.

### Benchmark(s)

Indexes are unmanaged and do not reflect the fees and expenses associated with active management. Investments cannot be made directly into an index.

- **Bloomberg Barclays (BBgBarc) U.S. Agency Index** measures the performance of the publicly issued debt of U.S. Government agencies (e.g. Fannie Mae, Freddie Mac) and the Federal Home Loan Bank System.
- **Bloomberg Barclays (BBgBarc) U.S. Treasury Index** is an index that measures the performance of the public debt obligations of the U.S. Treasury with remaining maturities of one year or more.

*Risks: The Portfolio primarily invests in securities issued or guaranteed by the U.S. government or its agencies and instrumentalities. The value of the Portfolio is influenced by factors impacting the overall market, debt securities in particular, and the U.S. government. The Portfolio may incur losses due to investments that do not perform as anticipated by the investment adviser. The value of U.S. government securities may be affected by changes in the credit rating of the U.S. government. Certain U.S. government securities are not backed by the full faith and credit of the U.S. government. Bond prices may decline during periods of rising interest rates. Inflation-linked debt securities, such as TIPS, are subject to the effects of changes in market interest rates caused by factors other than inflation (real interest rates). The value of mortgage-related and other asset-backed securities will be influenced by the factors affecting the housing market and the assets underlying such securities. Quantitative investing uses models and factors that rely on historical data and may be incomplete. In periods when dealer inventories of bonds are low in relation to market size, there is the potential for decreased liquidity and increased price volatility in the fixed-income markets. The Portfolio may engage in active and frequent trading of portfolio securities in implementing its principal investment strategies, which may result in higher transaction costs and higher taxes. The use of derivatives (such as futures and swaps) involves additional risks and transaction costs, which could leave the Portfolio in a worse position than if it had not used these instruments. These and other risks are described in the Portfolio's prospectus.*

# THRIVENT GOVERNMENT BOND PORTFOLIO

June 30, 2019

## Portfolio Diversification

Securitized Debt	49.8%
Government Bonds	38.4%
International Debt	8.9%
