

December 31, 2017

Portfolio Inception Date 3/2/2001
Total Portfolio Assets \$395.1 million

Portfolio Description

The Thrivent Mid Cap Index Portfolio normally invests substantially all of its assets in the medium-sized company common stocks in the S&P 400 Index in the proportions at which they are represented in the Index. The Mid Cap Index Portfolio invests across the broad U.S. mid cap market, including a combination of both mid cap "growth" stocks and "value" stocks. Mid-sized companies may be more established than small companies but still have the opportunity to experience faster growth as they seek to become large-cap companies. However, they typically have greater volatility (or more risk) than larger, more-seasoned companies.

Investment Strategy/Process

This is a passively-managed Portfolio, which means that the portfolio manager does not actively choose the securities that should make up the Portfolio. The S&P 400 Index is a capitalization-weighted index of 400 medium capitalization stocks chosen for market size, liquidity and industry representation. The Index is adjusted quarterly, and when changes to the Index occur, the portfolio manager will attempt to replicate these changes within the Portfolio. However, any such changes may result in slight variations from time to time.

Calendar Year Performance (%)

Trailing Returns — Average Annual (%)

	3 Month	YTD	1 Year	3 Year	5 Year	10 Year	Since Incept.
Subaccount	6.10	15.63	15.63	10.50	14.27	9.22	9.01
Subaccount (w/addl fees)	0.51	8.67	8.67	7.48	12.18	7.59	7.88
S&P MidCap 400 Index	6.25	16.24	16.24	11.14	15.01	9.97	N/A

All data represents past performance of this subaccount in Thrivent Financial Variable Universal Life Insurance II (contract V-VQ-VUL (07) and ICC07V-VM-VUL) and should not be viewed as an indication of future results. Total investment returns and principal value of an investment will fluctuate and units, when redeemed, may be worth more or less than the original investment. Current performance may be lower or higher than the performance data quoted. Market volatility can significantly affect short-term performance, and more recent returns may be different from those shown. Call 800-847-4836 or visit Thrivent.com for most recent month-end performance results.

Periods less than one year are not annualized. Trailing return calculations are based on the fees associated with an initial investment of \$10,000. At various times, the investment adviser may have waived and/or reimbursed Portfolio expenses. Had the investment adviser not done so, the total returns would have been lower. "Since Inception" trailing returns are calculated from the date the Subaccount was made available through the separate account used with this contract.

Trailing Returns reflect the deduction of investment advisory fees and operating expenses (reduced by any applicable waivers) associated with the Subaccount, as well as the current mortality and expense charge of 0.30%. "Subaccount w/addl fees" data reflects additional deductions of the policy fee and the 5% premium expense charge. The following charges are not reflected in the Subaccount's trailing returns and vary by contract: percent of asset charge, monthly administrative charge, cost of insurance charge, and rider or additional benefits charges. If these charges had been deducted, the performance quoted would have been significantly lower.

Since charges and fees vary from individual to individual at the contract level based on several factors, including the amount of the death benefit, the contract value, the insured's attained age, sex and risk classification, it is not possible to include them in this report. You are encouraged to contact your Thrivent Financial representative for a personalized illustration to determine what additional charges and fees you may incur. You can also review the hypothetical illustrations in the prospectus to see the effects of fees and charges on performance.

Investment Objective

The Thrivent Mid Cap Index Portfolio seeks total returns that track the performance of the S&P MidCap 400 Index.

Who Should Consider Investing?

The Portfolio may be suitable for investors who:

- Seek long-term growth.
- Have a long-term investment time horizon and an aggressive risk tolerance.
- Are able to withstand a high level of risk and volatility in pursuit of potentially high long-term returns.

Benchmark(s)

Indexes are unmanaged and do not reflect the fees and expenses associated with active management. Investments cannot be made directly into an index.

- **S&P MidCap 400 Index** represents the average performance of a group of 400 medium capitalization stocks.

Portfolio Management & Experience

Kevin R. Brimmer, FSA
Portfolio Start: 2002
Industry Start: 1986

Risks: The Portfolio primarily invests in mid-sized company stocks, which often have greater price volatility, lower trading volume, and less liquidity than stocks of larger, more established companies. The value of the Portfolio is influenced by factors impacting the overall market, certain asset classes, certain investment styles, and specific issuers.
