

December 31, 2018

Portfolio Inception Date 3/2/2001
Total Portfolio Assets \$510.9 million

Portfolio Description

The Thrivent Small Cap Stock Portfolio looks to provide investors with competitive performance through favorable stock selection while monitoring risk. The Portfolio typically invests in a combination of both small-capitalization “growth” stocks and “value” stocks. Growth stocks are companies whose earnings are expected to grow at an above-average rate relative to the market. Value stocks are companies that trade at a lower price compared to the market average, as measured by valuation ratios that compare the stock’s price to the company’s earnings and growth trends. Small companies may have the opportunity to grow more rapidly than larger companies as they potentially emerge from small- to medium-sized companies. However, they typically do not pay significant dividends to shareholders and instead reinvest earnings back into the company. Smaller companies have greater volatility (or more risk) because they are often less-seasoned, have narrower product lines, less liquidity, smaller revenues and fewer resources than larger companies.

Investment Strategy/Process

The portfolio management team seeks to add value through stock selection and active management, and monitors risk in an effort to build a well-diversified portfolio. The team uses fundamental, quantitative and technical investment research techniques to identify and purchase small, financially-sound companies that appear to have strong, long-term growth prospects and capable management teams.

Calendar Year Performance (%)

Chart represents calendar year performance and reflects the deduction of investment advisory fees, operating expenses and current mortality and expense charge of 0.30%. Performance of other contracts will be greater or less than the bars shown based on the differences in contract charges and expenses paid by the contract holder.

Trailing Returns — Average Annual (%)

	3 Month	YTD	1 Year	3 Year	5 Year	10 Year	Since Incept.
Subaccount	-18.70	-10.40	-10.40	10.79	6.52	11.10	7.03
Subaccount (w/addl fees)	-22.99	-15.82	-15.82	7.94	4.40	9.78	5.93
S&P SmallCap 600 Index	-20.10	-8.48	-8.48	9.46	6.34	13.61	N/A
Lipper Small-Cap Core Funds Median ¹	-19.84	-12.09	-12.09	6.68	4.01	11.81	N/A

All data represents past performance of this subaccount in Thrivent Financial Variable Universal Life Insurance II (contract V-VQ-VUL (07) and ICC07V-VM-VUL) and should not be viewed as an indication of future results. Total investment returns and principal value of an investment will fluctuate and units, when redeemed, may be worth more or less than the original investment. Current performance may be lower or higher than the performance data quoted. Market volatility can significantly affect short-term performance, and more recent returns may be different from those shown. Call 800-847-4836 or visit Thrivent.com for most recent month-end performance results.

Periods less than one year are not annualized. Trailing return calculations are based on the fees associated with an initial investment of \$10,000. At various times, the investment adviser may have waived and/or reimbursed Portfolio expenses. Had the investment adviser not done so, the total returns would have been lower. “Since Inception” trailing returns are calculated from the date the Subaccount was made available through the separate account used with this contract.

Trailing Returns reflect the deduction of investment advisory fees and operating expenses (reduced by any applicable waivers) associated with the Subaccount, as well as the current mortality and expense charge of 0.30%. “Subaccount w/addl fees” data reflects additional deductions of the policy fee and the 5% premium expense charge. The following charges are not reflected in the Subaccount’s trailing returns and vary by contract: percent of asset charge, monthly administrative charge, cost of insurance charge, and rider or additional benefits charges. If these charges had been deducted, the performance quoted would have been significantly lower.

Since charges and fees vary from individual to individual at the contract level based on several factors, including the amount of the death benefit, the contract value, the insured’s attained age, sex and risk classification, it is not possible to include them in this report. You are encouraged to contact your Thrivent Financial representative for a personalized illustration to determine what additional charges and fees you may incur. You can also review the hypothetical illustrations in the prospectus to see the effects of fees and charges on performance.

¹Source: Lipper. The Lipper median represents the median annualized total return for all reported portfolios in the classification. Lipper medians do not include sales charge/fees. If included, returns would have been lower.

Investment Objective

Thrivent Small Cap Stock Portfolio seeks long-term capital growth.

Who Should Consider Investing?

The Portfolio may be suitable for investors who:

- Seek long-term growth.
- Have a long-term investment time horizon and an aggressive risk tolerance.
- Are able to withstand a high level of risk and volatility in pursuit of potentially high long-term returns.

Benchmark(s)

Indexes are unmanaged and do not reflect the fees and expenses associated with active management. Investments cannot be made directly into an index.

- **S&P SmallCap 600 Index** represents the average performance of a group of 600 small-capitalization stocks.

Portfolio Management & Experience

Matthew D. Finn, CFA

Portfolio Start: 2013

Industry Start: 1985

James M. Tinucci, CFA

Portfolio Start: 2015

Industry Start: 2008

Risks: The Portfolio primarily invests in securities of small companies. Smaller, less seasoned companies often have greater price volatility, lower trading volume, and less liquidity than larger, more established companies. The value of the Portfolio is influenced by factors impacting the overall market, certain asset classes, certain investment styles, and specific issuers. The Portfolio may incur losses due to investments that do not perform as anticipated by the investment adviser.
