

December 31, 2017

Portfolio Inception Date 4/30/2008
Total Portfolio Assets \$2.1 billion

Portfolio Description

The Thrivent Partner Worldwide Allocation Portfolio is a well-diversified portfolio of global securities. It is designed to provide investors with an all-in-one solution for international investing and includes allocations to large, mid and small-cap international companies, across the growth, value, and core investment styles. It also provides exposure to the emerging market equity and emerging market debt markets. The Portfolio has a long-term target allocation of approximately 30% international large cap growth, 30% international large cap value, 15% international small- and mid-cap companies, 15% emerging market equity and 10% emerging market debt securities. Investors should be comfortable with the high level of volatility that is associated with emerging market investing.

Investment Strategy/Process

The Portfolio seeks to achieve its objective by investing primarily in a portfolio of broadly-diversified international equity and debt securities. The Portfolio uses internal investment professionals as well as several sub-advisors to manage the various asset classes. Thrivent Asset Management makes asset allocation decisions among the various asset classes and selects and monitors the sub-advisors on an ongoing basis. Each of the portfolio management teams seeks to add value through security selection and active management, and monitors risk in an effort to build a well-diversified portfolio.

Calendar Year Performance (%)

Trailing Returns — Average Annual (%)

	3 Month	YTD	1 Year	3 Year	5 Year	10 Year	Since Incept.
Subaccount	3.14	23.48	23.48	7.97	6.61	N/A	2.65
Subaccount (w/addl fees)	-2.30	16.11	16.11	4.97	4.44	N/A	0.75
MSCI ACWI ex-USA - USD Net Returns	5.00	27.19	27.19	7.83	6.80	1.84	N/A
Lipper International Multi-Cap Core Funds Median ¹	3.81	24.89	24.89	7.33	6.91	1.48	N/A

All data represents past performance of this subaccount in Thrivent Financial Variable Universal Life Insurance II (contract V-VQ-VUL (07) and ICC07V-VM-VUL) and should not be viewed as an indication of future results. Total investment returns and principal value of an investment will fluctuate and units, when redeemed, may be worth more or less than the original investment. Current performance may be lower or higher than the performance data quoted. Market volatility can significantly affect short-term performance, and more recent returns may be different from those shown. Call 800-847-4836 or visit Thrivent.com for most recent month-end performance results.

Periods less than one year are not annualized. Trailing return calculations are based on the fees associated with an initial investment of \$10,000. At various times, the investment adviser may have waived and/or reimbursed Portfolio expenses. Had the investment adviser not done so, the total returns would have been lower. "Since Inception" trailing returns are calculated from the date the Subaccount was made available through the separate account used with this contract.

Trailing Returns reflect the deduction of investment advisory fees and operating expenses (reduced by any applicable waivers) associated with the Subaccount, as well as the current mortality and expense charge of 0.30%. "Subaccount w/addl fees" data reflects additional deductions of the policy fee and the 5% premium expense charge. The following charges are not reflected in the Subaccount's trailing returns and vary by contract: percent of asset charge, monthly administrative charge, cost of insurance charge, and rider or additional benefits charges. If these charges had been deducted, the performance quoted would have been significantly lower.

Since charges and fees vary from individual to individual at the contract level based on several factors, including the amount of the death benefit, the contract value, the insured's attained age, sex and risk classification, it is not possible to include them in this report. You are encouraged to contact your Thrivent Financial representative for a personalized illustration to determine what additional charges and fees you may incur. You can also review the hypothetical illustrations in the prospectus to see the effects of fees and charges on performance.

¹Source: Lipper LANA. The Lipper median represents the median annualized total return for all reported portfolios in the classification. Lipper medians do not include sales charges or fees. If included, returns would have been lower.

Investment Objective

Thrivent Partner Worldwide Allocation Portfolio seeks long-term capital growth.

Who Should Consider Investing?

The Portfolio may be suitable for investors who:

- Seek long-term growth and a well-diversified, all-in-one solution for international investing.
- Have a long-term investment time horizon and a moderately aggressive risk tolerance.
- Are able to withstand a moderately high level of risk and volatility in pursuit of moderately high long-term returns.

Benchmark(s)

Indexes are unmanaged and do not reflect the fees and expenses associated with active management. Investments cannot be made directly into an index.

- **Morgan Stanley Capital International (MSCI) All Country World Index ex-USA - USD Net Returns** is an index that is designed to measure equity market performance in all global developed and emerging markets outside of the U.S.

Risks: The Portfolio primarily invests in equity and debt securities of issuers throughout the world. Foreign investments involve additional risks, including currency fluctuations, liquidity, political, economic and market instability, and different legal and accounting standards; these risks are magnified for investments in emerging markets. The value of the Portfolio is influenced by factors impacting the overall market, certain asset classes, certain investment styles, and specific issuers. The Portfolio may incur losses due to incorrect assessments of investments by its investment advisers. Small and medium-sized companies often have greater price volatility and less liquidity than larger companies. Large cap companies may be unable to respond quickly to new competitive challenges and may not be able to attain a high growth rate. Bond prices generally fall as interest rates rise. Credit risk is the risk that an issuer of a debt security may not pay its debt, and high yield securities are subject to increased credit risk as well as liquidity risk. The investment styles employed by the Portfolio's sub-advisers may not be complementary.
