Portfolio Description

The Thrivent Partner Emerging Markets Equity Portfolio is managed by Aberdeen Asset Managers Limited and invests primarily in companies of countries that are considered to have an “emerging” or “developing” stock market. According to the United Nations, more than fifty percent of the world’s population resides in emerging market countries, such as Brazil, Russia, India and China. Emerging market countries often have younger, growing populations, an expanding middle class, developing infrastructure and improving monetary and fiscal policies. These factors help contribute to faster growth rates compared to their developed country counterparts, but with more volatility.

Investment Strategy/Process

The Portfolio invests primarily in the equity securities of companies based in emerging stock markets. It uses a disciplined investment process which uses proprietary research to seek to identify quality companies (based on factors such as strength of management and business), that trade at reasonable valuations based on factors such as earnings growth and other key financial measurements.

All data represents past performance of the subaccount in Thrivent Flexible Premium Deferred Variable Annuity (Contract W-BC-FPVA (05)) and is no guarantee of future results. Total investment returns and principal value of an investment will fluctuate and units, when redeemed, may be worth more or less than the original investment. Current performance may be lower or higher than the performance data quoted. Market volatility can significantly affect short-term performance, and more recent returns may be different from those shown. Call 800-847-4836 or visit Thrivent.com for most recent month end performance results. Data reflects the deduction of the current and maximum mortality and expense charge of 1.25% and applicable annual portfolio operating expenses. Annual expenses are subject to change. See the prospectus for detailed information on fees related specifically to this subaccount.

Periods less than one year are not annualized. Trailing return calculations assume an initial investment of \$10,000. At various times the investment adviser may have reimbursed Portfolio expenses. Had the investment adviser not done so, the total returns would have been lower.

Trailing returns do not include any adjustments for any annual administrative or additional feature charges. “If surrendered” data reflects the applicable surrender charge for the time period. “If held” values do not include surrender charges. Maximum surrender charge is 7% if surrendered in the first year and decreases by 1% each subsequent year for the next six years. “Since inception” returns are calculated from the inception date listed above and is based on the date the portfolio was added to the separate account used with this contract.

¹Source: Lipper LANA. The Lipper median represents the median annualized total return for all reported portfolios in the classification. Lipper medians do not include sales charges or fees. If included, returns would have been lower.

Investment Objective

Thrivent Partner Emerging Markets Equity Portfolio seeks long-term capital growth.

Who Should Consider Investing?

The Portfolio may be suitable for investors who:

- Seek the diversification and high potential growth that emerging market countries may offer.
- Have a long-term investment time horizon and an aggressive risk tolerance.
- Are able to withstand the high level of risk and volatility associated with emerging market investing, in pursuit of potentially high long-term returns.

Portfolio Operating Expense Ratio

Gross: 1.66%
Net: 1.30%

The Adviser has contractually agreed, through at least April 30, 2018, to reimburse certain expenses associated with the Portfolio. Refer to the expense table in the Series Fund’s prospectus.

Benchmark(s)

Indexes are unmanaged and do not reflect the fees and expenses associated with active management. Investments cannot be made directly into an index.

Portfolio Management & Experience

Aberdeen Asset Managers Limited
Portfolio Start: 2008

Risks: The Portfolio primarily invests in emerging markets equities. Foreign investments involve additional risks, including currency fluctuations, liquidity, political, economic and market instability, and different legal and accounting standards; these risks are magnified for investments in emerging markets. The value of the Portfolio is influenced by factors impacting the overall market, certain asset classes, certain investment styles, and specific issuers. The Portfolio may incur losses due to incorrect assessments of investments by its investment advisers. Small and medium-sized companies often have greater price volatility and less liquidity than larger companies. Large cap companies may be unable to respond quickly to new competitive challenges a may not be able to attain a high growth rate. To the extent that the financials sector continues to represent a significant portion of the Portfolio, the Portfolio will be sensitive to changes in, and its performance may depend to a greater extent on, factors impacting this sector.
