Portfolio Description

The Thrivent Large Cap Growth Portfolio looks to provide investors with consistent, competitive performance through favorable stock selection while monitoring risk. The Portfolio typically invests in large company “growth” stocks. Growth stocks are companies whose earnings are expected to grow at an above-average rate relative to the market. Large companies are generally considered to be more stable, but may not have the fast growth potential of smaller companies or the ability to respond as quickly to competitive challenges and changing market conditions.

Investment Strategy/Process

The portfolio management team seeks to add value through stock selection and active management, and monitors risk in an effort to build a well-diversified portfolio. Thrivent analysts identify securities that they believe may provide strong, long-term, organic growth opportunities, or that are uniquely positioned within the industry. Each analyst uses a proprietary research process, considering the factors and characteristics that are most relevant for each industry. The analyst team’s “best ideas” in each sector are presented to the portfolio management team as candidates for the portfolio. The portfolio managers are responsible for portfolio construction and risk management. Variances in the portfolio’s sector weightings compared to the benchmark are minimized in an effort to ensure that stock selection is the primary source of excess return.

Growth of \$10,000 and Calendar Year Performance (%)

Chart represents the total market value if the contract is not surrendered. Performance reflects the deduction of current mortality and expense charge of 1.25% and applicable annual portfolio operating expenses. Performance of other contracts will be greater or less than the data shown based on the differences in contract charges and expenses paid by the contract holder.

All data represents past performance of the subaccount in Thrivent Flexible Premium Deferred Variable Annuity (Contract W-BC-FPVA (05)) and is no guarantee of future results. Total investment returns and principal value of an investment will fluctuate and units, when redeemed, may be worth more or less than the original investment. Current performance may be lower or higher than the performance data quoted. Market volatility can significantly affect short-term performance, and more recent returns may be different from those shown. Call 800-847-4836 for or visit Thrivent.com for the most recent month-end performance results. Data reflects the deduction of the current and maximum mortality and expense charge of 1.25% and applicable annual portfolio operating expenses. Annual expenses are subject to change. See the prospectus for detailed information on fees related specifically to this subaccount.

Periods less than one year are not annualized. Trailing return calculations assume an initial investment of \$10,000. At various times the investment adviser may have reimbursed Portfolio expenses. Had the investment adviser not done so, the total returns would have been lower.

Trailing returns do not include adjustments for annual administrative or additional feature charges. Maximum surrender charge is 7% if surrendered in the first year and decreases by 1% each subsequent year for the next six years. “If surrendered” data reflects the applicable surrender charge for the time period. “If held” values do not include surrender charges. “Since inception” returns are calculated from the later of the inception dates listed above and is based on the date the portfolio was added to the separate account used with this contract.

¹Source: Lipper. The Lipper median represents the median annualized total return for all reported portfolios in the classification. Lipper medians do not include sales charge/fees. If included, returns would have been lower.

Risks: The Portfolio primarily invests in securities of large companies, which may be unable to respond quickly to new competitive challenges and may not be able to attain a high growth rate. The value of the Portfolio is influenced by factors impacting the overall market, certain asset classes, certain investment styles, and specific issuers. The Portfolio may incur losses due to incorrect assessments of investments that do not performance as anticipated by the investment adviser. Foreign investments involve additional risks, including currency fluctuations, liquidity, political, economic and market instability, and different legal and accounting standards. Common stocks of companies that rely extensively on technology, science or communications in their product development or operations may be more volatile than the overall stock market and may or may not move in tandem with the overall stock market.
