Portfolio Description

The Thrivent Large Cap Index Portfolio normally invests substantially all of its assets in the large company common stocks in the S&P 500® Index in the proportions at which they are represented in the Index. The Large Cap Index Portfolio invests across the broad U.S. large-cap market, including a combination of both large-cap "growth" stocks and "value" stocks. Large companies are generally considered to be more stable, but may not have the fast growth potential of smaller companies or the ability to respond as quickly to competitive challenges and changing market conditions.

Investment Strategy/Process

This is a passively-managed Portfolio, which means that the portfolio manager does not actively choose the securities that should make up the Portfolio. The S&P 500® Index is comprised of 500 domestic large company stocks. The Index is adjusted quarterly, and when changes to the Index occur, the portfolio manager will attempt to replicate these changes within the Portfolio. However, any such changes may result in slight variations from time to time.

All data represents past performance of the subaccount in Thrivent Flexible Premium Deferred Variable Annuity (Contract W-BC-FPVA (05)) and is no guarantee of future results. Total investment returns and principal value of an investment will fluctuate and units, when redeemed, may be worth more or less than the original investment. Current performance may be lower or higher than the performance data quoted. Market volatility can significantly affect short-term performance, and more recent returns may be different from those shown. Call 800-847-4836 for or visit Thrivent.com for the most recent month-end performance results. Data reflects the deduction of the current and maximum mortality and expense charge of 1.25% and applicable annual portfolio operating expenses. Annual expenses are subject to change. See the prospectus for detailed information on fees related specifically to this subaccount.

Periods less than one year are not annualized. Trailing return calculations assume an initial investment of \$10,000. At various times the investment adviser may have reimbursed Portfolio expenses. Had the investment adviser not done so, the total returns would have been lower.

Trailing returns do not include adjustments for annual administrative or additional feature charges. Maximum surrender charge is 7% if surrendered in the first year and decreases by 1% each subsequent year for the next six years. "If surrendered" data reflects the applicable surrender charge for the time period. "If held" values do not include surrender charges. "Since inception" returns are calculated from the later of the inception dates listed above and is based on the date the portfolio was added to the separate account used with this contract.

¹Source: Lipper. The Lipper median represents the median annualized total return for all reported portfolios in the classification. Lipper medians do not include sales charge/fees. If included, returns would have been lower.

Investment Objective
