Portfolio Inception Date 10/31/2002 **Separate Account Date** 10/31/2002 **Total Portfolio Assets** \$1.1 billion

Portfolio Description

The Thrivent Large Cap Stock Portfolio typically invests in a globally-diversified portfolio that includes a combination of both large-cap “growth” stocks and “value” stocks. Large companies are generally considered to be more stable, but may not have the fast growth potential of smaller companies or the ability to respond as quickly to competitive challenges and changing market conditions.

Investment Strategy/Process

The portfolio management team seeks to add value through stock selection and active management, and monitors risk in an effort to build a well-diversified, global portfolio. The team uses fundamental, quantitative and technical investment research techniques to seek to identify and purchase companies that appear to have strong, long-term growth prospects and that are financially sound and led by capable management teams.

Growth of \$10,000 and Calendar Year Performance (%)

Trailing Returns — Average Annual (%)

	3 Month	YTD	1 Year	3 Year	5 Year	10 Year	Since Incept.
If Contract Is Held	-0.28	-0.28	11.92	6.75	9.13	5.45	5.74
If Contract Is Surrendered	-6.56	-6.56	4.87	5.12	8.54	5.45	5.74

Lipper Global Large-Cap Core Funds Median ¹	-1.69	-1.69	12.83	7.88	9.49	6.82	N/A

All data represents past performance of the subaccount in Thrivent Flexible Premium Deferred Variable Annuity (Contract W-BC-FPVA (05)) and is no guarantee of future results. Total investment returns and principal value of an investment will fluctuate and units, when redeemed, may be worth more or less than the original investment. Current performance may be lower or higher than the performance data quoted. Market volatility can significantly affect short-term performance, and more recent returns may be different from those shown. Visit Thrivent.com or call 800-847-4836 for most recent month end performance results. Data reflects the deduction of the current and maximum mortality and expense charge of 1.25% and applicable annual portfolio operating expenses. Annual expenses are subject to change. See the prospectus for detailed information on fees related specifically to this subaccount.

Periods less than one year are not annualized. Trailing return calculations assume an initial investment of \$10,000. At various times the investment adviser may have reimbursed Portfolio expenses. Had the investment adviser not done so, the total returns would have been lower.

Trailing returns do not include any adjustments for any annual administrative or additional feature charges. “If surrendered” data reflects the applicable surrender charge for the time period. “If held” values do not include surrender charges. Maximum surrender charge is 7% if surrendered in the first year and decreases by 1% each subsequent year for the next six years. “Since inception” returns are calculated from the inception date listed above and is based on the date the portfolio was added to the separate account used with this contract.

¹Source: Lipper LANA. The Lipper median represents the median annualized total return for all reported portfolios in the classification. Lipper medians do not include sales charges or fees. If included, returns would have been lower.

Investment Objective

Thrivent Large Cap Stock Portfolio seeks long-term capital growth.

Who Should Consider Investing?

The Portfolio may be suitable for investors who:

- Seek long-term growth.
- Have a long-term investment time horizon and a moderately aggressive risk tolerance.
- Are able to withstand a moderately high level of risk and volatility in pursuit of moderately high long-term returns.

Portfolio Operating Expense Ratio

Gross: 0.67%
Net: 0.67%

Risks: The Portfolio primarily invests in securities of large companies, which may be unable to respond quickly to new competitive challenges and may not be able to attain a high growth rate. The value of the Portfolio is influenced by factors impacting the overall market, certain asset classes, certain investment styles, and specific issuers. The Portfolio may incur losses due to incorrect assessments of investments by its investment adviser. Foreign investments involve additional risks, including currency fluctuations, liquidity, political, economic and market instability, and different legal and accounting standards. The use of derivatives (such as futures and swaps) involves additional risks and transaction costs, which could leave the Portfolio in a worse position than if it had not used these instruments.

PORTFOLIO STATISTICS

Statistics shown below are compared to the S&P 500® Index. The benchmark is intended to provide a comparison to the broad U.S. large cap stock market, and may not be representative of the Portfolio's investment strategies and holdings.

Holdings Information

Number of Holdings	266
Turnover Ratio (last 12-months) ²	49%

Risk/Volatility Measures

Beta (3-year vs. S&P 500®): A measure of the volatility, or market risk, of an investment compared to the broad U.S. large cap stock market.

Standard Deviation: A statistical measure of volatility. The higher the standard deviation, the riskier an investment is considered to be.

	Portfolio	S&P 500® Index ³
3 Year	11.08%	10.26%
5 Year	10.37%	9.87%
10 Year	15.59%	15.05%

Equity Characteristics

Market Capitalization: A measure of the size of the companies held in the portfolio, calculated by multiplying a company's total outstanding shares by the stock price.

	Portfolio	S&P 500® Index ⁴
Avg Mkt Cap	\$50.3 B	\$48.9 B
Wtd Median Mkt Cap	\$90.1 B	\$100.5 B

Price to Earnings (P/E) Ratio: A valuation ratio calculated by dividing the share price of each stock held in the portfolio by its trailing 12-month earnings per share.

	Portfolio	S&P 500® Index ⁵
P/E Ratio	18.9	21.5

Return on Equity (ROE): A measure of corporate profitability that shows how much net income the companies in the portfolio have generated as a percentage of shareholder equity.

	Portfolio	S&P 500® Index ⁵
ROE	17.4%	19.7%
