Portfolio Inception Date 10/31/2002 **Separate Account Date** 10/31/2002 **Total Portfolio Assets** \$1.1 billion

Portfolio Description

Thrivent Global Stock Portfolio is a well-diversified portfolio of global securities, which may include companies from all countries, including the United States. The Portfolio looks to provide investors with consistent, competitive performance through favorable stock selection while monitoring risk. The Portfolio typically invests in a globally-diversified portfolio that includes a combination of both large-cap "growth" stocks and "value" stocks. The Portfolio will invest at least 40% of net assets in securities of foreign companies. Growth stocks are companies whose earnings are expected to grow at an above-average rate relative to the market. Value stocks are companies that trade at a lower price compared to the market average, as measured by valuation ratios that compare the stock's price to the company's earnings and growth trends. Large companies are generally considered to be more stable, but may not have the fast growth potential of smaller companies or the ability to respond as quickly to competitive challenges and changing market conditions.

Prior to April 30, 2019, Thrivent Global Stock Portfolio was named Thrivent Large Cap Stock Portfolio. This is reflected in the summary prospectus.

Investment Strategy/Process

The portfolio management team seeks to add value through stock selection and active management, and monitors risk in an effort to build a well-diversified, global portfolio. The team uses fundamental, quantitative and technical investment research techniques to identify and purchase financially-sound companies that appear to have strong, long-term growth prospects and capable management teams.

Growth of \$10,000 and Calendar Year Performance (%)

Average Annualized Returns (%)

Periods less than one year are not annualized.

	3 Month	YTD	1 Year	3 Year	5 Year	10 Year	Since Incept.

All data represents past performance of the subaccount in Thrivent Flexible Premium Deferred Variable Annuity (Contract W-BC-FPVA (05)) and is no guarantee of future results. Total investment returns and principal value of an investment will fluctuate and units, when redeemed, may be worth more or less than the original investment. Current performance may be lower or higher than the performance data quoted. Market volatility can significantly affect short-term performance, and more recent returns may be different from those shown. Call 800-847-4836 for or visit Thrivent.com for the most recent month-end performance results. Data reflects the deduction of the current and maximum mortality and expense charge of 1.25% and applicable annual portfolio operating expenses. Annual expenses are subject to change. See the prospectus for detailed information on fees related specifically to this subaccount.

Average annualized return calculations assume an initial investment of \$10,000. At various times the investment adviser may have reimbursed Portfolio expenses. Had the investment adviser not done so, the performance data shown would have been lower.

Average annualized returns do not include adjustments for annual administrative or additional feature charges. Maximum surrender charge is 7% if surrendered in the first year and decreases by 1% each subsequent year for the next six years. "If surrendered" data reflects the applicable surrender charge for the time period. "If held" values do not include surrender charges.

"Since inception" returns are calculated from the later of the inception dates listed above and is based on the date the portfolio was added to the separate account used with this contract.

¹Source: Lipper. The Lipper median represents the median annualized total return for all reported portfolios in the classification. Lipper medians do not include sales charge/fees. If included, returns would have been lower.

Investment Objective

Thrivent Global Stock Portfolio seeks long-term capital growth.

Who Should Consider Investing?

The Portfolio may be suitable for investors who:

- Seek long-term growth.
- Have a long-term investment time horizon and a moderately aggressive risk tolerance.
- Are able to withstand a moderately high level of risk and volatility in pursuit of moderately high long-term returns.

Portfolio Operating Expense Ratio

Gross: 0.64%
Net: 0.64%

Benchmark(s)

Indexes are unmanaged and do not reflect the fees and expenses associated with active management. Investments cannot be made directly into an index.

Risks: The Portfolio invests in securities of large companies, which may be unable to respond quickly to new competitive challenges and may not be able to attain a high growth rate. The value of the Portfolio is influenced by factors impacting the overall market, certain asset classes, certain investment styles, and specific issuers. The Portfolio may incur losses due to investments that do not perform as anticipated by the investment adviser. Foreign investments involve additional risks, including currency fluctuations, liquidity, political, economic and market instability, and different legal and accounting standards. The use of futures contracts involves additional risks such as a loss in value in the underlying instrument, which could decrease the value of the Portfolio. Quantitative investing uses models and factors that rely on historical data and may be incomplete. These and other risks are described in the Portfolio's prospectus.

PORTFOLIO STATISTICS

Statistics shown below are compared to the S&P 500® Index. The benchmark is intended to provide a comparison to the broad U.S. large cap stock market, and may not be representative of the Portfolio's investment strategies and holdings.

Holdings Information

Number of Holdings	310
Turnover Ratio (last 12-months) ²	46%

Risk/Volatility Measures

Beta (3-year vs. S&P 500®): A measure of the volatility, or market risk, of an investment compared to the broad U.S. large-cap stock market.

Standard Deviation: A statistical measure of volatility. The higher the standard deviation, the riskier an investment is considered to be.

	Portfolio	S&P 500® Index ³
3 Year	11.57%	12.19%
5 Year	12.07%	12.03%
10 Year	13.47%	12.73%

Equity Characteristics

Market-Capitalization: A measure of the size of the companies held in the portfolio, calculated by multiplying a company's total outstanding shares by the stock price.

	Portfolio	S&P 500® Index ⁴
Avg Mkt Cap	\$62.0 B	\$53.0 B
Wtd Median Mkt Cap	\$89.3 B	\$113.2 B

Price to Earnings (P/E) Ratio: A valuation ratio calculated by dividing the share price of each stock held in the portfolio by its trailing 12-month earnings per share.

	Portfolio	S&P 500® Index ⁵
P/E Ratio	17.2	20.5

Return on Equity (ROE): A measure of corporate profitability that shows how much net income the companies in the portfolio have generated as a percentage of shareholder equity.

	Portfolio	S&P 500® Index ⁵
ROE	21.9%	22.9%
