Portfolio Inception Date 10/31/2002 Separate Account Date 10/31/2002 Total Portfolio Assets \$922.7 million

Portfolio Description

The Thrivent Limited Maturity Bond Portfolio invests primarily in investment-grade corporate bonds, government bonds, asset-backed securities, mortgage-backed securities, and collateralized debt obligations. The Portfolio may also invest a portion of assets in leveraged loans and foreign securities. The dollar-weighted average effective maturity for the Portfolio is expected to be between one and five years. The Portfolio's shorter duration makes it less sensitive to interest rate changes than longer-duration portfolios. As a result, the Portfolio may be appropriate for an investor who is seeking to generate a modest level of income (with some additional risk), but with less interest rate risk and a lower return potential than most longer-maturity bond portfolios.

Investment Strategy/Process

The portfolio management team seeks to add value through security selection and active management, and monitors risk in an effort to build a well-diversified portfolio. The team uses fundamental, quantitative and technical investment research techniques to determine which debt securities to buy and sell. The Portfolio's investment adviser generally focuses on issuers that it believes are financially sound and that have strong cash flows and earnings. The Portfolio may use an interest-rate management technique that includes the purchase and sale of U.S. Treasury securities and related futures contracts for the purpose of managing the duration of the Portfolio.

Growth of \$10,000 and Calendar Year Performance (%)

Average Annualized Returns (%)

Periods less than one year are not annualized.

Table with 8 columns: Metric, 3 Month, YTD, 1 Year, 3 Year, 5 Year, 10 Year, Since Incept. Rows include 'If Contract Is Held', 'If Contract Is Surrendered', 'BBgBarc 1-3 Year Govt/Credit Bond Index', and 'Lipper Short-Intermediate Investment Grade Debt Median'.

All data represents past performance of the subaccount in Thrivent Flexible Premium Deferred Variable Annuity (Contract W-BC-FPVA (05)) and is no guarantee of future results. Total investment returns and principal value of an investment will fluctuate and units, when redeemed, may be worth more or less than the original investment. Current performance may be lower or higher than the performance data quoted. Market volatility can significantly affect short-term performance, and more recent returns may be different from those shown. Call 800-847-4836 for or visit Thrivent.com for the most recent month-end performance results. Data reflects the deduction of the current and maximum mortality and expense charge of 1.25% and applicable annual portfolio operating expenses. Annual expenses are subject to change. See the prospectus for detailed information on fees related specifically to this subaccount.

Average annualized return calculations assume an initial investment of \$10,000. At various times the investment adviser may have reimbursed Portfolio expenses. Had the investment adviser not done so, the performance data shown would have been lower.

Average annualized returns do not include adjustments for annual administrative or additional feature charges. Maximum surrender charge is 7% if surrendered in the first year and decreases by 1% each subsequent year for the next six years. "If surrendered" data reflects the applicable surrender charge for the time period. "If held" values do not include surrender charges. "Since inception" returns are calculated from the later of the inception dates listed above and is based on the date the portfolio was added to the separate account used with this contract.

1 Source: Lipper. The Lipper median represents the median annualized total return for all reported portfolios in the classification. Lipper medians do not include sales charge/fees. If included, returns would have been lower.

Investment Objective

Thrivent Limited Maturity Bond Portfolio seeks a high level of current income consistent with stability of principal.

Who Should Consider Investing?

The Portfolio may be suitable for investors who:

- Seek income consistent with stability of principal.
• Have a short- to medium-term investment time horizon and a conservative risk tolerance.
• Are able to withstand a low to moderate level of risk and volatility in pursuit of commensurate long-term returns.

Portfolio Operating Expense Ratio

Gross: 0.44%
Net: 0.44%

Benchmark(s)

Indexes are unmanaged and do not reflect the fees and expenses associated with active management. Investments cannot be made directly into an index.

- Bloomberg Barclays (BBgBarc) 1-3 Year Government/Credit Bond Index is an unmanaged index which measures the performance of corporate and government U.S. bonds with maturities of 1-3 years.

Risks: The Portfolio primarily invests in investment-grade debt securities. The value of the Portfolio is influenced by factors impacting the overall market, debt securities in particular, and specific issuers. The Portfolio may incur losses due to investments that do not perform as anticipated by the investment adviser. Bond prices may decline during periods of rising interest rates. Credit risk is the risk that an issuer of a debt security may not pay its debt. The value of mortgage-related and other asset-backed securities will be influenced by the factors affecting the housing market and the assets underlying such securities. Preferred securities are subject to risks such as credit and liquidity risk. Foreign investments involve additional risks, including currency fluctuations, liquidity, political, economic and market instability, and different legal and accounting standards. Quantitative investing uses models and factors that rely on historical data and may be incomplete. The prices of futures contracts can be highly volatile and the loss from investing in them can exceed the initial investment. Collateralized debt obligations are subject to additional risks. In periods when dealer inventories of bonds are low in relation to market size, there is the potential for decreased liquidity and increased price volatility in the fixed-income markets. These and other risks are described in the Portfolio's prospectus.
