### Portfolio Description

The Thrivent Mid Cap Stock Portfolio looks to provide investors with consistent, competitive performance through favorable stock selection while monitoring risk. The Portfolio typically invests in a combination of "growth" and "value" stocks. Growth stocks are companies whose earnings are expected to grow at an above-average rate relative to the market. Value stocks are companies that trade at a lower price compared to the market, as measured by valuation ratios that compare the stock's price to the company's earnings and growth trends. Mid-sized companies may be more established than small companies but have the opportunity to experience faster growth as they seek to become large-cap companies. However, they typically have greater risk than larger, more-seasoned companies.

### Investment Strategy/Process

The portfolio management team seeks to add value through stock selection and active management. The Portfolio invests in a diversified portfolio of growth and value stocks with improving or positive outlooks relative to market expectations. The process begins with idea generation and screening to identify stocks that have certain characteristics. The team uses fundamental, quantitative and technical investment research techniques to seek to identify and purchase mid-sized companies that are in industries with good economic outlooks and that have strong prospects for growth in their sales and earnings. They also seek to identify companies with high-quality management teams and strong financial positions, and monitor risk in an effort to build a well-diversified portfolio.

### Growth of \$10,000 and Calendar Year Performance (%)

Chart represents the total market value if the contract is not surrendered. Performance reflects the deduction of current mortality and expense charge of 1.25% and applicable annual portfolio operating expenses. Performance of other contracts will be greater or less than the data shown based on the differences in contract charges and expenses paid by the contract holder.

### Average Annualized Returns (%)

Periods less than one year are not annualized.

**All data represents past performance of the subaccount in Thrivent Flexible Premium Deferred Variable Annuity (Contract W-BC-FPVA (05)) and is no guarantee of future results. Total investment returns and principal value of an investment will fluctuate and units, when redeemed, may be worth more or less than the original investment. Current performance may be lower or higher than the performance data quoted. Market volatility can significantly affect short-term performance, and more recent returns may be different from those shown. Call 800-847-4836 for or visit Thrivent.com for the most recent month-end performance results. Data reflects the deduction of the current and maximum mortality and expense charge of 1.25% and applicable annual portfolio operating expenses. Annual expenses are subject to change. See the prospectus for detailed information on fees related specifically to this subaccount.**

Average annualized return calculations assume an initial investment of \$10,000. At various times the investment adviser may have reimbursed Portfolio expenses. Had the investment adviser not done so, the performance data shown would have been lower.

**Average annualized returns do not include adjustments for annual administrative or additional feature charges. Maximum surrender charge is 7% if surrendered in the first year and decreases by 1% each subsequent year for the next six years. "If surrendered" data reflects the applicable surrender charge for the time period. "If held" values do not include surrender charges. "Since inception" returns are calculated from the later of the inception dates listed above and is based on the date the portfolio was added to the separate account used with this contract.**

<sup>1</sup>Source: Lipper. The Lipper median represents the median annualized total return for all reported portfolios in the classification. Lipper medians do not include sales charge/fees. If included, returns would have been lower.

*Risks: The Portfolio primarily invests in securities of mid-sized companies, which often have greater price volatility, lower trading volume, and less liquidity than larger, more established companies. The value of the Portfolio is influenced by factors impacting the overall market, certain asset classes, certain investment styles, and specific issuers. Quantitative investing uses models and factors that rely on historical data and may be incomplete. The Portfolio may incur losses due to investments that do not perform as anticipated by the investment adviser. These and other risks are described in the Portfolio's prospectus.*
