Portfolio Description

The Thrivent Mid Cap Stock Portfolio seeks to provide investors with consistent, competitive performance through favorable stock selection while monitoring risk. The Portfolio typically invests in a combination of both medium-sized “growth” stocks and “value” stocks. Mid-sized companies may be more established than small companies but still have the opportunity to experience faster growth. They typically have greater volatility (or more risk) than larger, more-seasoned companies.

Investment Strategy/Process

The portfolio management team seeks to add value through stock selection and active management. The Portfolio invests in a diversified portfolio of growth and value stocks with improving or positive outlooks relative to market expectations. The process begins with idea generation and screening to identify stocks that have certain characteristics. The team uses fundamental, quantitative and technical investment research techniques to seek to identify and purchase mid-sized companies that are in industries with good economic outlooks and that have strong prospects for growth in their sales and earnings.

All data represents past performance of the subaccount in Thrivent Flexible Premium Deferred Variable Annuity (Contract W-BC-FPVA (05)) and is no guarantee of future results. Total investment returns and principal value of an investment will fluctuate and units, when redeemed, may be worth more or less than the original investment. Current performance may be lower or higher than the performance data quoted. Market volatility can significantly affect short-term performance, and more recent returns may be different from those shown. Visit Thrivent.com or call 800-847-4836 for most recent month end performance results. Data reflects the deduction of the current and maximum mortality and expense charge of 1.25% and applicable annual portfolio operating expenses. Annual expenses are subject to change. See the prospectus for detailed information on fees related specifically to this subaccount.

Periods less than one year are not annualized. Trailing return calculations assume an initial investment of \$10,000. At various times the investment adviser may have reimbursed Portfolio expenses. Had the investment adviser not done so, the total returns would have been lower.

Trailing returns do not include any adjustments for any annual administrative or additional feature charges. “If surrendered” data reflects the applicable surrender charge for the time period. “If held” values do not include surrender charges. Maximum surrender charge is 7% if surrendered in the first year and decreases by 1% each subsequent year for the next six years. “Since inception” returns are calculated from the inception date listed above and is based on the date the portfolio was added to the separate account used with this contract.

¹Source: Lipper LANA. The Lipper median represents the median annualized total return for all reported portfolios in the classification. Lipper medians do not include sales charges or fees. If included, returns would have been lower.

Portfolio Management & Experience

Brian J. Flanagan, CFA

Portfolio Start: 2004

Industry Start: 1993

Risks: The Portfolio primarily invests in securities of mid-sized companies, which often have greater price volatility, lower trading volume, and less liquidity than larger, more established companies. The value of the Portfolio is influenced by factors impacting the overall market, certain asset classes, certain investment styles, and specific issuers. The Portfolio may incur losses due to incorrect assessments of investments by its investment adviser.
