

March 31, 2018

Portfolio Inception Date 4/30/2008 **Separate Account Date** 10/31/2002 **Total Portfolio Assets** \$190.7 million

Portfolio Description

The Thrivent Partner Healthcare Portfolio has been managed by BlackRock Investment Management since 9/11/2017. Prior to that date, it was subadvised by Sectoral Asset Management. It seeks to provide access to a portfolio of health sciences and related industry companies. Investments may include companies that are engaged in the development, production or distribution of pharmaceutical, biotechnology and medical technology and equipment products or services. The Portfolio invests primarily in domestic small, medium and large companies and may invest in companies located outside of the U.S.

Investment Strategy/Process

The portfolio management team employs fundamental analysis to the health sciences industry and individual companies. Industry analysis considers structure and dynamics, political and regulatory environment, drivers of growth, margin trends, and valuation. Potential investments are identified through a “bottom-up” approach that seeks to understand the business, product potential, and fair valuations of each company. In selecting stocks, the subadviser engages in primary research and focuses on evaluating the company’s business economics and industry fundamentals, competitive positive, and financial strength. It also assesses the validity and marketability of the company’s products and services and its valuations in the marketplace.

Growth of \$10,000 and Calendar Year Performance (%)

Chart represents the total market value if the contract is not surrendered. Performance reflects the deduction of current mortality and expense charge of 1.25% and applicable annual portfolio operating expenses. Performance of other contracts will be greater or less than the data shown based on the differences in contract charges and expenses paid by the contract holder.

Trailing Returns — Average Annual (%)

	3 Month	YTD	1 Year	3 Year	5 Year	10 Year	Since Incept.
If Contract Is Held	-0.15	-0.15	5.85	-2.21	7.64	N/A	8.09
If Contract Is Surrendered	-6.44	-6.44	-0.82	-3.70	7.05	N/A	8.09
S&P Composite 1500® Healthcare Index	-0.50	-0.50	12.35	6.17	14.47	12.68	N/A
MSCI World Healthcare Index – USD Net Returns	-1.23	-1.23	9.12	2.77	10.62	9.84	N/A
Lipper Health/Biotechnology Funds Median ¹	0.12	0.12	12.39	4.19	15.19	13.75	N/A

All data represents past performance of the subaccount in Thrivent Flexible Premium Deferred Variable Annuity (Contract W-BC-FPVA (05)) and is no guarantee of future results. Total investment returns and principal value of an investment will fluctuate and units, when redeemed, may be worth more or less than the original investment. Current performance may be lower or higher than the performance data quoted. Market volatility can significantly affect short-term performance, and more recent returns may be different from those shown. Visit Thrivent.com or call 800-847-4836 for most recent month end performance results. Data reflects the deduction of the current and maximum mortality and expense charge of 1.25% and applicable annual portfolio operating expenses. Annual expenses are subject to change. See the prospectus for detailed information on fees related specifically to this subaccount.

Periods less than one year are not annualized. Trailing return calculations assume an initial investment of \$10,000. At various times the investment adviser may have reimbursed Portfolio expenses. Had the investment adviser not done so, the total returns would have been lower.

Trailing returns do not include any adjustments for any annual administrative or additional feature charges. “If surrendered” data reflects the applicable surrender charge for the time period. “If held” values do not include surrender charges. Maximum surrender charge is 7% if surrendered in the first year and decreases by 1% each subsequent year for the next six years. “Since inception” returns are calculated from the inception date listed above and is based on the date the portfolio was added to the separate account used with this contract.

¹Source: Lipper LANA. The Lipper median represents the median annualized total return for all reported portfolios in the classification. Lipper medians do not include sales charges or fees. If included, returns would have been lower.

Investment Objective

Thrivent Partner Healthcare Portfolio seeks long-term capital growth.

Who Should Consider Investing?

The Portfolio may be suitable for investors who:

- Seek long-term growth.
- Have a long-term investment time horizon and an aggressive risk tolerance.
- Are able to withstand the high level of risk and volatility associated with investing in a single sector, in pursuit of potentially high long-term returns.

Portfolio Operating Expense Ratio

Gross: 0.99%
Net: 0.95%

The Adviser has contractually agreed, through at least April 30, 2018, to reimburse certain expenses associated with the Portfolio. Refer to the expense table in the Series Fund’s prospectus.

Benchmark(s)

Indexes are unmanaged and do not reflect the fees and expenses associated with active management. Investments cannot be made directly into an index.

- **S&P Composite 1500® Healthcare Index** measures the performance of the stocks in the S&P Composite 1500® Index that are classified as members of the GICS® health care sector.
- **Morgan Stanley Capital International (MSCI) World Healthcare Index - USD Net Returns** is an unmanaged, capitalization weighted index that measures the performance of health care-related stocks from around the world. It was a benchmark for this Portfolio until 9/11/2017.

Portfolio Management & Experience

BlackRock Investment Management, LLC
Portfolio Start: 2017

Risks: The Portfolio primarily invests in healthcare companies, which are subject to numerous risks including legislative or regulatory changes and adverse market conditions. The value of the Portfolio is influenced by factors impacting the overall market, certain asset classes, certain investment styles, and specific issuers. The Portfolio may incur losses due to incorrect assessments of investments by its investment advisers. Small and medium-sized companies often have greater price volatility and less liquidity than larger companies. Foreign investments involve additional risks, including currency fluctuations, liquidity, political, economic and market instability, and different legal and accounting standards; these risks are magnified for investments in emerging markets. The Portfolio is non-diversified, which means that it may invest a greater percentage of its assets in the securities of any single issuer compared with diversified portfolios.
