Thrivent Shepherd Managed Portfolios™
A strategic approach to investing

Thrivent Shepherd Managed Portfolios feature diverse investment strategies created by a team of experienced Vanguard professionals. You choose a portfolio based on your risk tolerance and goals. The portfolio team manages the investments. It’s a straightforward approach to investing that can be an important part of your financial priorities.

The Thrivent Shepherd Managed Portfolios program may be right for you if you:

• Are interested in a well-diversified portfolio.
• Prefer a discretionary, fee-based advisory relationship.
• Want an easy-to-understand, strategic investment strategy.
• Prefer a portfolio that consists of exchange-traded funds that are well-diversified across a wide range of asset classes.
ETF model portfolios

Exchange-traded funds (EFTs) act more like stocks than a typical mutual fund. While ETFs offer investors access to professional money managers and broad diversification like a mutual fund, they can be traded throughout the day like a stock.

This discretionary asset management program features Vanguard ETF model portfolios constructed by the Vanguard Investment Strategy Group.

With this program, you benefit from:

- Vanguard strategists and analysts providing asset allocation and portfolio construction.
- An active, ongoing advisory relationship with your Thrivent financial advisor.
- An easy-to-understand investment program.

Putting our skills to work for you

These well-diversified model portfolios provide broad-market equity and investment-grade fixed-income exposure.

The portfolios are designed to fit a range of risk temperaments—from conservative to aggressive. With the help of your Thrivent financial advisor, you choose what you believe will best meet your needs from the eleven risk-based model portfolios.

Vanguard ETF strategic model portfolios are built and maintained by the Vanguard Investment Strategy Group. The portfolios use asset allocation modeling, provide broad asset-class exposure, and can benefit from Vanguard’s indexing experience.

Within the portfolios, the platform manager, Envestnet Asset Management, Inc., has discretionary authority to implement the investment trading, periodic updates and rebalancing instructions of the model provider. Thrivent and your financial advisor have no discretionary authority over the assets in this program.

Why Vanguard ETF model portfolios?

• Lower internal expenses or costs.$2
• Portfolio construction using index funds.
• Access to quarterly strategic commentary.

Once your Thrivent financial advisor works with you to determine your objectives, time horizon, cash-flow needs and risk tolerance, together you’ll determine the appropriate allocation to the major asset classes of stocks, bonds and cash investments.

Investing involves risks, including the possible loss of principal. The product and summary prospectuses for applicable securities (including mutual funds held in an account) and the Thrivent Investment Management Inc. Managed Accounts Program Brochure (Form ADV Part 2A Appendix 1), contain information on investment objectives, risks, charges, and expenses, which investors should read carefully and consider before investing. Available at Thrivent.com.

While diversification can help reduce market risk, it does not eliminate it. Diversification does not assure a profit or protect against loss in a declining market.
